Financial Resources Continue To Grow

Savings Deposits in May Increased Satisfactorily — Past Year Has Seen Considerable Changes in Banking—Loans to Municipalities Still Increase — Large Circulation Reflects High Prices and Business Activity — Loans Abroad are Contracted.

	May, 1917.	April, 1918.	May, 1918.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$443,839,847	$558,509,221	$535,655,731	+ 20.8	— 4.1
Deposits after notice	892,562,657	933,644,668	947,757,337	+ 6.2	+ 1.5
Current loans in Canada	844,890,589	884,089,402	894,817,113	+ 5.9	+ 1.1
Current loans elsewhere	98,993,197	99,267,660	99,300,926	+ 1.02	+ .003
Loans to municipalities	39,790,191	55,685,350	57,728,226	+ 46.1	+ 3.6
Call loans in Canada	78,514,798	77,497,360	78,466,582	— .006	+ 1.3
Call loans elsewhere	168,692,675	179,818,531	172,259,879	+ 2.	— 4.0
Circulation	142,653,596	192,969,079	189,748,470	+ 33.1	— 1.6

CANADA'S bank statement for the month of May indicates a continuation of movements already observed. The total assets are now $2,319,958,402, a new high record in the history of Canadian banking. Probably the most remarkable feature at present is the volume of loans to municipalities. In April the amount of bank funds invested in this way was unusually high, and during May they increased by a further amount of over $2,000,000. Temporary financing of municipalities in anticipation of bond issues, or of tax sales, and loans secured on arrears of taxes, are mainly responsible for this item. Another outstanding feature of the report is the volume of circulation. Quite apart from the increase in business which has been experienced in most industries in Canada, it now requires more money to transact the same amount of business than it did formerly, on account of the rise in prices.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1917—May	$443,839.847	$892,562,657
June	449,689,670	900,510,552
July	450,849,356	929,442,340
August	443,317,275	806,774,687
September	451,749,532	965,393,541
October	495,058,449	985,790,850
November	538,869,362	1,008,657,874
December	569,441,871	995,978,013
1918—January	559,777,237	900,314,256
February	565,266,642	908,822,988
March	561,042,236	921,080,803
April	558,509.221	933,644,668
May	535,655,731	947,757,337

If the present rate of growth of savings deposits be kept up, the billion-dollar mark should be reached by the 1st of October. Then, so far as savings deposits are concerned, we would be in as strong a position for another war loan as we were just before the Victory Loan. It is encouraging to note that the increase of $14,000,000 in May is the greatest this year. The decline in demand deposits continues. With the tightening of the money market and the restriction of bank credits, the tendency is for demand deposits to be more and more fully utilized.

The course of the deposits account during the past six years is shown in the following table:—

May.	On demand.	After notice.	Total.
1913	$364,159,642	$630,755,603	$ 994,915,245
1914	340,748,488	663,945,753	1,004,694,241
1915	347,346,119	691,891,287	1,039,237,406
1916	412,301,481	765,064.041	1,177,365,525
1917	443,839,847	892,562,657	1,330,402,504
1918	535,655,731	947,757,337	1,483,413,068

Total deposits constitute a new record, needless to say. Savings deposits are fully $50,000,000 in advance of their level a year ago, and demand deposits are over $90,000,000 ahead, the decline this year being more than accounted for by the increase during the last half of 1917.

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans	Current in Canada.	Call in Canada.
1917—May	$844,890,589	$78,514,798
June	839,355,782	76,085,220
July	829,560,700	71,376,788
August	836,429,670	71,204,351
September	855,306,953	72,421,187
October	883,986,860	71,653,719
November	868,973,714	72,178,345
December	858,533,298	71,779,020
1918—January	855,506,506	76,239,201
February	859,363,147	76,722,163
March	886,995,222	74,257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582

Call loans in Canada, it will be noticed, have fluctuated considerably during the year, with no definite trend

Of the deposit in Central Gold Reserves $13 710,000 is in gold coin; the balance is in Dominion Notes.

either way. Current loans, on the other hand, show a considerable increase.

The following table shows the call loans abroad in May as compared with previous returns:—

	1915.	1916.	1917.	1918.
January	$ 85,706,641	$174,248,552	$155,747,476	$132,687,066
February	80,800,982	[illegible]	162,344,556	160,239,494
March	[illegible]	141,880,989	161,616,735	167,206,701
April	[illegible]	147,149,443	150,156,054	170,818,531
May	[illegible]	164,400,650	168,602,675	172,259,870
June	[illegible]	182,757,015	[illegible]	....
July	117,821,174	[illegible]	151,875,676	
August	120,607,677	171,382,353	[illegible]	
September	[illegible]	171,877,586	166,480,004	
October	[illegible]	[illegible]	151,018,747	
November	135,530,562	183,250,389	139,832,552	....
December	137,157,869	173,878,134	134,483,482	....

Since the high-water mark in October, 1916, call loans abroad do not show a large net falling off. The amount for April was, in fact, a high record for 1917 and 1918. In May they have declined considerably.

The following table shows the course of the principal loans accounts during the past six years:—

May.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1913	$898,959,650	$37,091,786	$69,982,540	$ 96,151,209
1914	838,462,686	51,812,875	67,210,504	120,897,328

Dominion Government---May, 1918

T. C. BOVILLE, *Deputy Minister of Finance.*

May.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	760,631,113	36,375,658	71,516,953	136,098,835
1916	763,136,917	59,600,342	84,826,636	163,406,059
1917	844,890,589	98,993,197	78,514,798	168,692,675
1918	894,817,113	99,300,926	78,466,582	172,259,879

With the exception of current loans in Canada, which have almost reached their pre-war level, the figures above show very little change during the past year. It seems probable that the recent appeal of the president of the Canadian Bankers' Association, together with the announcements of the finance department, will result in a general limitation of loans to the more essential and productive class.

RESULTS OF GRAIN INSURANCE ASSOCIATION

According to Mr. A. W. Ross, manager of the Commercial Union Assurance Company for British Columbia and Alberta, the Western Canada Grain Insurance Association has succeeded in reducing greatly the risk in elevator fires. The result has been, he states, that this business has been converted from a losing one into one showing a small profit.

The Western Canada Grain Insurance Association was formed about a year ago by fifty-four of the larger insurance companies operating in the Canadian West. The object was to secure better control of the fire situation through more rigid inspection of the various elevators throughout the three prairie provinces.

Mr. Ross states that fire conditions are now good, although losses have been considerably heavier than they were during the corresponding period last year.

PERSONAL NOTES

Mr. C. J. McCuaig, a member of the board of the Southern Canada Power Company, has retired.

Mr. Harry A. Sifton, of Ottawa, has been elected to the directorate of the Southern Canada Power Company.

Mr. W. H. McWilliams, managing director of the Canadian Elevator Company, has been appointed to the directorate of the Royal Bank of Canada.

Mr. Frank Gallway, who for several years represented the Sun Life Assurance Company in Toronto, died last week, after an illness lasting several months.

Mr. J. S. Gillies, of Gillies Brothers, Limited, lumber manufacturers, of Braeside, has been elected to the directorate of the Southern Canada Power Company.

Mr. A. R. Globe, who for the past nine years has been assistant manager of the Hollinger Consolidated Gold Mines, is severing his connection with the company.

Mr. A. McTavish Campbell and Capt. William Robinson, late directors of the Northern Crown Bank, have been appointed to the directorate of the Royal Bank of Canada.

Mr. Alexander Mackenzie, president of the Brazilian Traction Light and Power Company, Limited, who was expected in Toronto shortly, has gone to England for a few weeks.

Mr. J. M. R. Fairbairn has been appointed chief engineer of the Canadian Pacific Railway system, replacing Mr. J. G. Sullivan, chief engineer, who is retiring to enter private practice.

Messrs P. G. Perrin and J. R. Macdonald have been appointed joint managers of the Mount Royal Assurance Company, in succession to Mr. J. E. Clement, who resigned his position as general manager some weeks ago.

Mr. J. Morris McKenzie, who was previously with the Regina Brokerage and Investment Company, has been appointed head of the casualty and bonding department of Messrs. Oldfield, Kirby and Gardner, of Winnipeg, succeeding Mr. J. Elmer Woods, who has joined the Canadian Overseas Forces.

Mr. Joseph Allen Baker, M.P. for Eastern Finsbury, in the British House of Commons, died on Tuesday, July 2nd. He was born on a farm near Trenton, Ont., and was well known in Canada. The late Mr. Baker was head of the firm of Messrs. Joseph Baker and Sons, manufacturers of baking machinery at Willesden, London, England. He had a branch in Brantford, Ont., and was a frequent visitor to Canada.

CUSTOMS RECEIPTS DECREASED

The customs receipts of Canada decreased $4,192,200 during the first three months of the fiscal year as compared with the same period in 1917. The cause is presumed to be the embargoes and other trade restrictions which are limiting trade

The Canada Hail Insurance Company has ceased to carry on business in Canada and has applied to the Minister of Finance for the release of all its securities.

Mr S Kettle, foreman of the grand jury at the assizes recently held at Parry Sound, has saved four bags of flour in six months in a family of six by the use of potato cakes as a substitute for bread.

Mr Hamilton B Wills, the well-known mining broker, has opened an office in Cobalt with Mr. A. A. Amos in charge Mr. Amos was formerly a partner in the firm of Kiely, Smith and Amos, of Toronto and Kitchener. Mr. Wills now has complete wire connections from New York City to Toronto and to Cobalt.

WAR SAVINCS STAMP CAMPAICN

Plans are already being made for an active campaign in Canada for the sale of war savings stamps. It is not expected, however, that it will be launched until after the next war loan is floated, which will mean that it will be close to the end of the year. Sir Herbert Ames, who has been secretary and organizer of the patriotic fund, the cost of which will in future be assumed by the government, has been asked to take charge of the campaign.

SIR HERBERT AMES.

Sir Herbert, who is vice-president of Ames-Holden-McCready, Limited, for a long time represented the district of St. Antoine in the Canadian parliament.

RAILROAD EARNINCS

The following are the earnings of Canada's transcontinental railways for the month of June:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
June 7	$2,927,000	$2,846,000	— $ 81,000
June 14	3,165,000	2,914,000	— 251,000
June 21	2,939,000	2,849,000	— 90,000
June 30	3.995,000	3,439,000	— 556,000

Grand Trunk Railway.

	1917.	1918.	Inc. or dec.
June 7	$1,333,194	$1,383,669	+ $ 50,475
June 14	1,348,185	1,541,392	+ 193,207
June 21	1,441,424	1,621,993	+ 180,569
June 30	2,104,316	2,411,295	+ 306.979

***Canadian Northern Railway.**

	1917.	1918.	Inc. or dec.
June 7	$ 908,700	$ 847,100	— $ 61,600
June 14	916,800	853,100	— 63,700
June 21	911,400	916,300	+ 4.900

---

*Three weeks.

The following is a statement of earnings and expenses of the Canadian Northern Railway for the month of May, 1918:—

	1918.	1917.	Inc. or dec.
Total gross earnings	$ 3,762,000	$ 3,784,700	— $ 22.700
Operating expenses ..	3,381,100	2,730,300	+ 650.800
Net earnings	380,900	1,054.400	— 673.500
Aggregate gross earnings from July 1st	38,419,500	37.196,100	+ 1,223,400
Aggregate net earnings from July 1st	3,412,300	9,316,800	— 5,904.500

The Canadian Express Company has closed its offices in the United States. Its business will be handled by the American Express Company.

INTEREST RATE ON WAR LOANS

The interest rate and the price of the next Canadian war loan have not as yet been announced, and no doubt cannot be settled until near the time of issue. The price at which it can be floated will depend to some extent upon political developments between now and then, and it is desirable that the nominal rate of interest should be near the actual rate. So far, the Dominion government has followed the policy of making the issues at a price in fair accordance with the security markets. The rate has, roughly, advanced. The nominal rate on the first three domestic issues was 5 per cent., and on the fourth issue, or Victory Loan, it was 5½ per cent. The bond issues have in each case been sold at a price which amounted to less than par, so that the actual yield has been more than the nominal rate. If this policy be continued, the rate on the new issue will no doubt also be 5½ per cent., as it does not seem probable that the Dominion government will have to pay 6 per cent.

In contrast to this, is the policy of the United States government, in selling each issue at par. True, the nominal rate has been raised from 3½ to 4, and from 4 to 4¼ per cent., in the case of the three issues already made. But Secretary McAdoo has announced that the rate on the fourth Liberty loan will be 4¼ per cent., and also, what is more important, that this will be the rate on future bond issues until the end of the war. As the United States cannot expect that interest rates will move in any other direction than upwards, obviously the element of patriotism is to be made use of to a large extent. This was done in the case of the issues already made, not only in obtaining subscriptions at a rate which was not attractive in spite of the security, but also in the campaign organization itself. the members of which received no remuneration. But there is another aspect to the question; by increasing the burden of taxation which falls, directly or indirectly, on the income from other investments, the exemption of government bonds becomes an increasingly valuable feature, and enables them to compare more favorably; and the United States government has recently announced that it will practically double its war taxation. It is possible that the taxing machinery will be used to adjust the money market in such a way that the bond issues will be assured of success on a 4¼ basis. Many of the large subscriptions to the Liberty loans were made by wealthy citizens, who valued the feature of tax exemption, but who did not care greatly about the rate of interest obtained.

A fixed rate of interest has certain valuable features. There is then no occasion for speculation in the outstanding issues, and nothing to be gained by exchanging the old bonds for the new. The number of exchanges that would be made on grounds other than that of interest rate would be negligible. This is one of the questions that we in Canada have still to solve. If the yield on our loans is to continue to increase, those who hold exchangeable bonds will continue to exchange them, with trouble and expense to all concerned. But a fixed rate of interest would not be suitable for Canada, unless a radical change in the system of taxation were introduced, similar to that announced in the United States. There is, however, another alternative—that is, to issue bonds which are not exchangeable for future issues. This has already been done in part, but for reasons other than those being considered here. It will, of course, be objected that this would hinder the success of the loan. Possibly this is so to some extent. We have become used to regarding each war loan as the last, only to find another one coming at a better rate of interest. For this reason many would hesitate before purchasing bonds which were not exchangeable. But we must bear in mind that the last loan will very probably be offered at a much less favorable rate, for the very reason that it is the last, and national credit will rise enormously with the return of a satisfactory peace Then we might wake up and find that we had let slip an unparalleled investment opportunity, simply because we had hesitated to purchase non-exchangeable bonds. This point would be borne in mind by most Canadians, and could be impressed upon all in such a manner that the lack of the exchangeable feature would not necessarily be a hindrance to the success of any loan.

PUBLIC UTILITIES AND RISING COSTS

Public utility companies throughout the United States and Canada are everywhere meeting the difficulty of advancing costs of operation, while their earnings and income are practically stable. During the earlier days of the war, in Canada and in the United States, the situation was not felt very acutely, but, while other industries have been adjusting themselves gradually to the changed conditions, this class of industry has been feeling continually increased pressure.

There have been very few businesses which have advanced so rapidly during the past few decades as have utility enterprises. Street railway transportation, gas and electricity for lighting, heating and power, and telephones have almost become necessities with the great majority of people. It has been this characteristic of near-necessity which has helped to maintain the favor of investors for public unility securities as compared with ordinary manufacturing industries which were, it was supposed, more subject to competition and to changes in public tastes. Now, however, manufacturing companies have been able to take part, and frequently a leading part, in the general programme of raising prices, and their income and profits have benefited accordingly. The utility companies, on the contrary, while their rates can be raised, it is, generally speaking, necessary to secure the consent of public or semi-public bodies before doing so, and utility companies have, therefore, greater difficulty in increasing their income in proportion to the increased cost of labor, materials, etc., which enter into the industry.

This condition of affairs cannot be permanent. While, generally speaking, the return of bonds and stocks of utility companies have been maintained, it has been only with great difficulty, and conditions have become such that it is practically impossible for them to raise funds for additional capital outlay. The majority of companies have, of course, been able to get along without additional expenditure, but in the case of some of our cities, which have increased considerably in population through war industries, etc., the need for these funds has been felt with considerable urgency. Evidently, before more capital can be attracted to the industry, a reasonable return must be assured.

Bodies which have control of the rates of utility enterprises must recognize these facts and permit rates to be fixed at such levels as will assure sufficient return for bona fide investments. This happened recently in Montreal, where the tramways commission has recommended a revision in passenger tariffs to a six-cent cash fare or five tickets for twenty-five cents. The New York Railways Company, one of the largest companies of this kind in America, which operates the surface cars in the greater part of New York City, has also made an appeal for increased fares. Where business has been increasing, which has, generally speaking, been the case, the companies have through this means been able to keep pace to some extent with the increased expenses, but there are some instances where consumption has fallen off. The British Columbia Railway System reports a decidedly appreciable falling off in the use of electricity through the operation of the daylight savings bill. In cases such as these the situation is quite critical. The action of controlling bodies should be constructive. While it protects the public from exorbitant rates, it should, on the other hand, protect investors, for in so doing it not only permits of the financial soundness of the companies, but it also makes provision for future progress of industries which are among the most essential that we have.

LIFE INSURANCE FOR RICH AND POOR

An estate of almost $1,250,000, left by a Toronto man who died recently, included only $22,250 of life insurance, which is just 2 per cent. of the total estate. Is this a criticism of the value of life insurance as a whole, or merely a commentary upon its value as an investment for the rich

Life insurance was established primarily for the man of small means, and for such purposes it has primarily remained. It capitalizes earnings in case of death, and thus enables provision to be made for dependents who would not otherwise be provided for. Life insurance, however, includes among its patrons not only the poor, but also the rich. While probably there is no one so poor as not to be able to afford life insurance, it seems even more true that there is no one so rich that he chooses to be independent of it. The important difference is that with the poor life insurance is a necessity, with the wealthy it is optional. He may consider it as an investment or as a speculation, but in any case the motives for purchasing it are not just the same as in the case of the man of small means.

In practice there appears to be a wide variety of policy in this connection. A considerable proportion of some estates consists of life insurance, while in the case of others the amount is practically negligible. Where an estate is mainly invested in securities, life insurance is usually found to a considerable extent. In this case it is an investment, though of a radically different kind from the others. Again, where the major portion of an estate is locked up in some business enterprise of a more or less speculative nature, there is usually found some portion of it in life insurance. This action is no doubt taken as a special safeguard. Frequently, however, good securities, such as government or railway bonds, take the place of life insurance. In fact, with the man of means the path of duty is not plain, and on this account considerable differences are found. With the man of small means, on the other hand, there is only one course open, and when it is neglected it is the result of moral default rather than of misjudgment.

In the case previously mentioned, the bulk of the estate was invested in a business enterprise. Another large portion, comprising a fortune in itself, was invested in securities of the highest grade. Apart from some real estate, life insurance constituted the balance. Its value was recognized, but not in very great proportion. Many small estates, on the other hand, consist almost entirely of life insurance. Frequently the insurance represents savings achieved under a little pressure, where otherwise they would not exist. In this case insurance fills the double function of protection to dependents and an incentive to saving.

REGINA'S FINANCIAL BALANCE SHEET

Borrowings are Still Well Within Limits—Most of Debt Has Been Funded

For the year ended December 31st, 1917, Regina had a revenue of $673,391, which was about $14,000 less than the amount of the expenditure. Of the total revenue, $87,647 was carried forward from 1916, and the balance, $585,743, was derived from the general tax levy. The expenditure was as follows:—

General government	$ 93,527
Health department	95,889
Works department	227,938
Fire department	79,361
Building inspection	1,968
General hospital	34,386
Street lighting and wiring inspection	41,119
Police commission	53,312
Parks department	16,625
Cemetery	1,006
Winter Fair building	13,934
Exhibition	15,085
City hall	9,674
Markets	3,078
	$687,508

The estimates of expenditure were $670,243.04, so that the revenue actually received was sufficient for the estimates of expenditure.

The public utilities, the earnings and expenses of which were stated in *The Monetary Times* of June 14, are operated apart from the ordinary affairs of the city.

Debt Well Within Legal Limits.

The bonded debt of the city at December 31st, 1917, was as follows:—

Debenture:		
General	$1,546,956	
City's share of local improvements	1,152,374	
		$2,699,331
Property's share of local improvements	$1,506,200	
Property's share of waterworks	297,012	
		1,803,213
Electric light and power department		546,735
Street railway department		550,234
Waterworks department	1,011,999	
Less property's share of waterworks	297,012	
		714,987
		$6,314,501
Consolidated Stock:		
General	$1,118,000	
City's share of local improvements	110,885	
		1,228,885
Property's share of local improvements	32,868	
Property's share of waterworks	31,166	
		64,034
Electric light and power department		675,000
Street railway department		825,000
Waterworks department	490,831	
Less property's share of waterworks	31,166	
		459,665
		$3,252,585

At the credit of sinking fund there is a total of $1,329,053. In addition to the funded debt there were $959,000 of temporary debentures issued, under by-laws passed, but not covered by permanent securities. As is pointed out in the report, the borrowing power of the city—viz., 20 per cent. of the net assessment, is $8,716,[illegible]74, whereas the net debt is $5,909,866, leaving a margin of $2,80[illegible] 507. The net debt consists of the debenture debt, consolidated stock and temporary bonds, amounting to $10,526,087 altogether, less the local improvement debt, sinking fund, street railway debt and collegiate institute debt.

The total capital liabilities of $16,[illegible], mentioned in *The Monetary Times* of June 14, included this debt of $10,-526,087 and the balance was almost entirely made up of appreciation of saleable property and of fixed assets, property sales contribution to capital, revenue contribution to capital, etc. The revenue liabilities of $1,434,881 also consist for the most part of reserves and items payable to the city departments.

MONEY MARKETS

Messrs. Glazebrook & Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

Bank of England rate, 5 per cent.

UNITED STATES LOAN TO CHINA

A conference of United States bankers was held on Monday, the 1st inst., at the office of J. P. Morgan & Company, New York, with reference to a loan to the Chinese Republic. It was generally felt that the co-operation of the state department would be necessary before any advance could be made, as the bankers would want to be assured of the assistance of the state department in the event of difficulty in the collection of interest or principal. The loan, it is understood, is to be for $50,000,000, the funds being furnished by the United States and Japan. The bankers who conferred on the subject were Breckenridge Long, third assistant secretary of state; J. P. Morgan and Thomas W. Lamont, of J. P. Morgan & Company; Mortimer L. Schiff, of Kuhn, Loeb & Company; Frank A. Vanderlip, Charles E. Mitchell, Francis L. Hine, Charles H. Sabin and A. J. Sheldon.

BANK CLEARINGS

The following are the bank clearings for the weeks ended June 28th, 1917, and June 27th, 1918, respectively, with changes:—

	Week ended June 27, '18.	Week ended June 28, '17.		Changes.
Montreal	$ 90,613,056	$ 91,093,931		$ 480,875
Toronto	75,376,722	59,644,143	+	15,732,579
Winnipeg	37,161,283	41,982,136	—	4,820,853
Vancouver	10,699,830	7,666,041	+	3,033,789

JUNE FIRE LOSSES

Six Business Sections Destroyed Last Month—Many Large Fires Reported

The Monetary Times' estimate of Canada's fire loss during June, 1918, is $3,080,982, compared with the May loss of $3,570,014, and $1,184,027 for June, 1917. The following is the estimate of the June losses:—

Fires exceeding $10,000	$2,547,000
Small fires reported	132,115
Estimate for unreported fires	401,867
Total	$3,080,982

The Monetary Times' record of the past three years and this year to date, shows the following monthly losses:—

	1915.	1916.	1917.	1918.
January	$ 1,249,886	$ 1,649,217	$ 1,918,660	$ 2,688,556
February	1,019,556	3,275,600	2,009,953	2,243,762
March	1,632,006	1,406,501	2,050,650	1,682,286
April	1,463,747	1,460,437	1,317,714	3,240,187
May	881,855	1,850,205	1,163,110	3,570,014
June	1,157,156	494,557	1,184,627	3,080,982
July	773,269	3,039,634	1,101,734	....
August	403,693	1,057,109	1,230,183	....
September	1,116,109	981,703	1,301,700	....
October	1,290,325	1,077,815	704,605	....
November	1,087,980	923,235	959,049	....
December	1,595,255	3,271,496	5,144,100	....
Totals	$13,671,527	$20,487,509	$20,080,085	$16,505,787

The fires reported in May at which the losses amounted to $10,000 and over were,—

Huntsville, Ont., June 1, store and stock of the Huntsville Trading Company, $14,000.

New Westminster, B.C., June 1, Brunette Sawmills plant, $25,000.

Thorold, Ont., June 2, pulpwood pile of the Ontario Paper Company, $200,000.

Welland, Ont., June 4, planing mills of Frank Rounds, $10,000.

Barrie, Ont., June 18, Fisher Flour Mills, $70,000.

Cabri, Sask., June 17, business section of town, $100,000.

Drummondville Que., June 13, Drummondville Match Company's factory, $100,000.

Newmarket, Ont., June 18, building of Mr. T. Blizzard, $12,000.

Pembroke, Ont., June 18, business section of town, $1,000,000.

Pontypool, Ont., June 11, grain elevator of C. Good & Sons, $12,000.

Rosser, Man., June 8, general store and warehouse of E. E. Price, $12,000.

Shaunavon, Sask., June 15, business section of town, $400,000.

Aromocto, N.B., June 22, business section of town, $35,000.

Courtenay, B.C., June 15, Dykes sawmill, $25,000.

Hamilton, Ont., June 19, rolling mills plant of the Steel Company of Canada, $12,000.

St. Boniface, Man., June 17, Constant Macaroni Company's factory, $10,000.

Strome, Alta., June 13, business section of town, $20,000.

Warner, Alta., June 19, large part of town, $250,000.

Winnipeg Man., June 8, plant of the Winnipeg Telegram, $150,000.

Among the structures damaged or destroyed last month were: Electric station, 1; residences, 25; paint shop, 1; stores, 2; plants, 8; stock pen, 1; pulpwood pile, 1; business buildings, 4; planing mill, 1; hotel, 1; office, 1; stable, 1; apartment house, 1; machine shop, 1; mills, 2; barns, 5; moulding shop, 1; flour mill, 1; coal shed, 1; business sections, 6; sawmills, 2; roundhouse, 1; warehouses, 3; grain elevator, 1; bakery, 1; elevator, 1; factories, 4; fish house, 1; ice house, 1; garage, 1; granary, 1.

Among the causes last month were: Struck by lightning, 5; two live wires crossing, 1; voltage of machine too heavy, 1; overheated-iron, 1; incendiarism, 2; overheated electric motor, 1; children playing with matches, 1; matches being packed too tight, 1; lighted match, 1; mice playing with matches, 1; spontaneous combustion, 1; overheated chimney, 1; spark from wood cutting machine, 1; burning out of electric motor, 1.

The following is a list of fires at which fatalities occurred last month:—

Toronto, Ont., June 10	Ignition of clothes from pipe.	1
Euphrasia, Ont., June 11	Trapped in burning house.	5
Cornwall, Ont., June 14	Trapped in burning house.	1
Fort Coulonge, Que., June 19	Falling into fire	1
Chatham, Ont., June 25	Ignition of clothes from combustible solution	1
	Total	9

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during June, 1918, as compared with previous returns:—

	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.

AMES-HOLDEN-McCREADY HAS GOOD YEAR

In spite of the fact that the army business of Ames-Holden-McCready, Limited, for the year ended April 30th, 1918, amounted to very little, the company experienced a satisfactory year's business. The total profits amounted to $624,201, or $96,041 less than the previous year. The deductions, however, were not as great, and the net profits were $304,093 as compared with $197,303 for 1917. For the year ended April 30th, 1916, the net profits were $321,791. The surplus for the present year was $304,093. The surplus for the year 1916, on the other hand, was only $52,861. The improvement in showing is accounted for largely by amounts written off for bad debts, depreciation, etc., during the past two or three years. These deductions were especially heavy during the year ended April 30th, 1917. The total assets of the company are now $9,468,371.

The financial condition of the company has improved immensely during the past two or three years. At April 30th, 1916, there were $906,773 of accounts and bills receivable. Now the amount of bills receivable is $594,003, and the company holds $1,802,321 of notes and drafts receivable, against most of which they have secured bank loans. The fixed assets have also increased to some extent. Items for lasts, dies and patterns and for prepaid revenue charges and equities which appeared in the assets statement of 1916 do not appear at present. The stock outstanding remains the same, namely, $6,000,000, and there are now $1,563,666 of bonds and debentures outstanding, the interest on which has been paid. No dividends have been paid since July, 1914, when the last quarterly dividend of 1¾ per cent. on the preferred stock was paid. When questioned regarding the intentions of the management as to dividends, the president, Mr. D. Lorne McGibbon, said that there was no immediate prospect, although the directors had the matter in mind. Mr. McGibbon pointed out that the directors were equally desirous with the shareholders of resuming dividends. The preferred stock is cumulative and preferred as to assets as well as to dividends, so it is desirable to resume the dividend as soon as possible. Mr. McGibbon pointed out, however, that the company required large sums of money for the business. It was still a borrower at the banks, and as long as the war continued commercial and financial conditions were bound to be uncertain. He desired to see Ames-Holden self-contained and in an independent position. So long as a dividend is being earned, it is, generally speaking, the same thing whether it is immediately declared in dividends or invested in the business. Mr. McGibbon announced after the meeting that Mr. N. R. Feltes, vice-president and managing director of the company, was leaving shortly to become treasurer of the Studebaker company.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Amherstburg, Ont.—Tenders will be received up till July 9th, for the purchase of $41,412 6 per cent. 10-year bonds.

Brockville, Ont.—Tenders will be received up till July 12th, for the purchase of $10,800 6½ per cent. 20-instalment bonds.

Renfrew, Ont.—Messrs. G. A. Stimson and Company, of Toronto, have purchased a block of $22,500 bonds. These bonds were issued for patriotic purposes.

Montreal, Que.—The Montreal Protestant Schools Commission will call for tenders up till July 10th, for the purchase of $900,000 6 per cent. serial bonds.

Renfrew, Ont.—Tenders will be received up till July 12th, for the purchase of a block of $5,000 5 per cent. 25-instalment bonds and a block of $3,797 5 per cent. 30-instalment bonds.

York County, Ont.—The warden and treasurer of York County were authorized by the council on June 27th, to borrow $250,000 to meet the ordinary expenses of the county until the taxes are collected.

Liverpool, N.S.—Tenders will be received by S. M. Bartling, town treasurer, up till July, 8, 1918, for the purchase of $6,000 6-year debentures, dated July 1, 1918, bearing interest at the rate of 6 per cent. per annum, payable half-yearly.

Kenora, Ont.—Messrs. Edward Brown and Company, bond dealers of Winnipeg, were awarded the block of $11,407 6 per cent. 35-year consolidated debt bonds of Kenora. This is a refunding operation covering maturing securities. The bonds will yield the investor 6½ per cent. and as they do not mature until 1953, the buyer is assured of an excellent return for a long period. J. A. Anderson, of the firm of Edward Brown and Company, arranged the detail of the purchase.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from June 17th to June 21st, 1918:—

School Districts.—Chinook, $500 6-years not ex. 8 per cent. annuity; Nelson Burrows, Olga. Scent Grass Lake, $1,800 10-years not ex. 8 per cent. annuity; Chas. A. Mair, Prince. Orleton, $2,800 10-years not ex. 8 per cent. annuity; John A. Atkinson, Allan, Sask.

The following is a list of debentures reported sold from June 17th to June 21st, 1918:—

School Districts.—Newport, $2,300; Waterman-Waterbury Manufacuring Company, Regina. Northgate, $1,200; Canada Landed and National Investment Company, Winnipeg.

Rural Telephone Companies.—Bruce, $8,800; Goldman and Company. Turnhill, $5,350; W. L. McKinnon and Company, Regina.

BUY BONDS TO AVOID LOSSES

Many American companies with cash balances accumulating in Canada have been trying to get around the exchange problem by buying high-grade bonds, merely holding them for return in some cases and in others, shipping them to New York for use as collateral for loans there.

One difficulty about investments of this kind, is the uncertainty whether the company might not have to take a loss in selling, if it needed the cash in a hurry. Even in the Victory bonds, for instance, there is one point against the seller to be reckoned with.

BANK AMALGAMATION RATIFIED

The shareholders of the Bank of British North America have agreed to the purchase of that bank by the Bank of Montreal, according to reports from London, England.

The Bank of British North America has a paid-up capital of £1,000,000, and a reserve fund of £620,000. It is one of the oldest of Canadian banks, having been incorporated under Royal charter in 1840, and handled many transactions between Canada and Great Britain.

The Toronto fire chief's monthly report to the Board of Control on June 10th, showed that the fire loss was $90,000 on buildings and $41,000 in contents.

WAR COST IN UNITED STATES

The war is costing the United States about $50,000,000 per day, and the expenditures for June were about $1,500,000,000. Receipts, on the other hand, have exceeded all former records. The war cost so far to the United States has been approximately $13,800,000,000.

MERCHANTS BANK TO HAVE NEW BUILDING

The Merchants Bank will erect a new three-story building at 16 King Street West, Toronto, for its main Toronto branch which is now located on Wellington Street West. It is expected that the building will be commenced this fall, and completed within a year from that time.

NEW PULP AND PAPER PLANT

A company known as the Kipawa Fibre Company has commenced a new plant to the south of Lake Timiskaming, in the province of Quebec, about 35 miles from the town of Mattawa and about 65 miles from Haileybury. The company owns 20,000 square miles of timber land from which a supply of raw material can be obtained. A town site is being laid out and the total site is expected to cover 12 square miles; 20,000 horse-power is available for the operation of the plant.

CANADIAN NORTHERN ROLLING STOCK CO.

The Canadian Northern Rolling Stock Company has secured permission from the Capital Issues Committee of the United States to issue $5,000,000 6 per cent. equipment trust certificates. The approval of the Canadian minister had first to be secured, in accordance with the arrangement between Sir Thomas White and the Capital Issues Committee, after which the application went before the committee.

The Canadian Northern Rolling Stock Company is a new company incorporated for the purpose of providing rolling stock for the Canadian Northern Railway. The certificates are issued through the medium of a trust company, and this issue is to be placed by bankers and bond dealers. This is what is known as the Philadelphia plans in contrast to the older system under which the rolling stock company issued its own certificates without resorting to a trust company. The Rolling Stock is to be leased to the Canadian Northern Railway for an annual rental. It is understood that the arrangements have been completed, but the names of the trust company and of the bankers have not yet been announced, nor the terms of the issue.

ROYAL AND NORTHERN CROWN BANK AMALGAMATION

The amalgamation of the Royal and Northern Crown banks went into effect on Tuesday, the 2nd inst. On that date the offices of the Northern Crown Bank became Royal Bank branches. In view of the Northern Crown Bank's large interests in the west, three new directors have been elected to the board of the Royal Bank. They are Captain Wm. Robinson, A. McTavish Campbell and W. H. McWilliams. The former two were members of the board of the Northern Crown, and Mr. McWilliams is managing director of the Canadian Elevator Company.

An advisory committee has been formed with headquarters in Winnipeg to deal with the bank's affairs in Western Alberta. This committee is made up of the following five directors: G. R. Crowe (chairman), A. McTavish Campbell, Capt. William Robinson, D. K. Elliott and W. H. McWilliams.

Mr. Robert Campbell who was general manager of the Northern Crown Bank, becomes supervisor of central western branches for the Royal Bank. Mr. S. G. Dobson, who has been holding this position, will remain in Winnipeg for a short time, after which he will be transferred to the head office in Montreal

As an example to the nation, President Wilson has purchased a flock of sixteen Shropshire sheep and put them to make mutton and wool on the lawn behind the White House, known as the President's Park.

THE STERLING BANK
OF CANADA

A majority of the accounts placed with this bank during its first years of existence are using its service to-day. The secret of this "staying quality" is service—careful, conscientious, intelligent service.

A PLEA FOR THE PART-TIMER

Part Time Work Not Only Serves as a Period of Training But Also Has Some Permanent Advantages

By F. O. Maber, Secretary, Northwestern Life Assurance Company, Winnipeg.

During attendance at meetings of life underwriters within the past twelve months, I have listened to the utterances of men, many of whom owe a considerable portion of their success to the services of part-time representatives, in which they strongly deprecate the employment of part-time men in the business of life assurance. I have also heard renowned salesmen, prominent life assurance officials, and even those who but a few years ago were part-timers themselves, condemn with exceeding bitterness the employment of those who are able at the present time to devote but a portion of their time to the service of the great public in the promulgation of the life assurance ideal.

I must confess that this systematic attack—this "campaign" conducted apparently with great earnestness,—troubles me considerably, because, big men as many of these gentlemen are, I cannot but feel that their attitude is one of injustice to the part-timer, detrimental to the public, and particularly unfair to themselves. It is unfair to themselves because it reflects a motive—of which I believe they are for the most part unconscious—that is selfish and narrow; and big-souled men cannot afford to allow such a motive to influence their utterances, their actions or their lives. Self-interest must never be allowed to become sordid.

Class Consciousness.

Perhaps one of the most unworthy, unfortunate and disastrous of human traits is that of class consciousness. It has divided and is dividing the world to-day. An idea is born, a movement is inaugurated, a new order is introduced by a few worthy souls for the betterment of humanity, and while the movement is youthful and unimportant the highest ideals are maintained and preserved, but as the body adds to itself and grows in strength and power, selfish interests gradually appear and a new consciousness is developed—class consciousness. The impelling motive of this new consciousness is the preservation and strengthening of the body or order, irrespective of the interests of those without the circle, or of the great general public, by all means and by any means whatsoever. The body must be preserved and developed no matter at what cost or consequence. That this is prejudicial to idealism and ethical integrity, and that it leads to injustice, tyranny and oppression will be affirmed by all thinking men. It is well exemplified in the development of the various religious, professional, industrial and national movements of the past. It has even already shown symptoms of its dire effect in associations of life underwriters as is evidenced by the fact that it has actually been seriously proposed by some that life assurance salesmen who do not now belong to life underwriters' associations, should be forced to do so through pressure upon the provincial governments and head offices of the assurance companies.

It is my firm conviction that such an act would kill the "spirit" of the life underwriters' movement. It might indeed temporarily assist *some* life men financially, but surely the economic interest of the individual whole-timer is not most important? I certainly believe it is not so in the estimation of those to whom I am now appealing for fair play for the part-timer.

The Menace of Professionalism.

How common it is nowadays to hear the Life Underwriters' Association compared with the medical organization as though this latter were the most desirable one in existence. I believe it is exceedingly undesirable, in fact, to me there is nothing imaginable which could be more disastrous to the life assurance ideal than that the life underwriters should form an association as hide-bound as that of the medical men.

Perhaps there is no organized body in the world which is more behind the times, more antiquated, and obsolete as such than the medical profession. This is the result of surrounding themselves with a wall so thick and so high that little of the light of progress can shine through. And little does get through as is evidenced by the controversy now raging between the allopath, the osteopath and the chiropracteur. While thinking men outside the professions recognize that they are all doing good work, the different practitioners cannot recognize the value of each other's good work, because they are blinded by professionalism. Any idea which originates outside the sacred wall surrounding the medical organization has little chance of existence, be it ever so valuable, for the "profession" holds the keys of life and health. The medical practitioner should exist for the prevention and cure of disease, and for the amelioration of the physical suffering of humanity. That is the message which the modern ideal has carried up to the wall of the elect, but it cannot be delivered. The physician of to-day is looking for "patients." The more sickness there may be in the land the greater his income will probably be. In the last analysis it is not in the interest of the medical profession that sickness and disease should disappear. The greater interest is in keeping up fees, which cannot but be disastrous to humanity in the end.

This illustrates what I mean by "The Menace of Professionalism." Many physicians are not primarily interested in the destruction of disease, but in maintaining the sacred rights of their class; many lawyers are not primarily interested in the administration of justice, but rather in the interpretation of laws to the advantage of themselves and their clients; while many ministers of souls are not primarily interested in the amelioration of mental suffering or the welfare of the individual, but in the authority they wield and the effect of such upon their religious organizations.

Please observe that I have been careful to say primarily interested. I want it to be clearly understood that I am not questioning the bona fides of any individual in any profession. All I want to do is to make it clear that professionalism is beset with many evils of the gravest nature, and life underwriters will do well to pause before they create an association so hide-bound that its life and growth become of more importance to them than the service of the public, and the general interests of humanity.

That a powerful organization like the life underwriters founded for the primary purpose of giving service to the public should use their great influence to make the life assurance business a closed profession is to me unthinkable. Rather should they use their influence to bring the present obsolete professions up to the common sense lines of business and to raise their standards of ethics to conform with the great public need.

To drive out the part-timer by force is a definite step in the creation of an assurance professionalism which is positively abhorrent. The part-timer has played his part nobly in the past, bringing the advantages and the economic value of life assurance to public knowledge. He has borne the heat and brunt of the labor of the past and performs a no small portion of the task even to-day. When his work is really performed, when his day is done, when his sun has set he will disappear as quietly and unobtrusively as the shadows sink to rest in the darkness of the night.

Until that time arrives let us play fair, let us do him justice, nay more, let us treat him as a friend and brother and comrade-in-arms, for he possesses potentialities for the good of the business which many of us are apt to overlook. In any event because of his past deeds he merits our love and esteem.

Part-time Service a Training Ground.

The services of the part-time assurance salesman are practically indispensable at country points. Perhaps if one company could secure the monopoly of all the business obtainable in a given locality the agent representing that company might make a living, but since this is not possible under present competitive methods, it follows that in small towns the representative of a life company must also follow another calling or take on other agencies to supplement his earnings from life underwriting. To ask such an agent to devote all his time to the selling of life assurance is iniquitous, for it forces him either to give up the life assurance business altogether or to live upon a reduced income.

Of course it may be, and indeed it has been argued that the business to be secured from small towns and country districts can be written by travelling representatives, but this is not desirable even if it were entirely true. It is not desirable because a local man, provided his integrity and general qualifications are satisfactory, has the unquestionable right to secure business if he desires to do so, and to forbid him upon the threat of "all your time or no business at all" is unjust and oppressive. It is the very antithesis of public service. If there is business to be done in a certain locality, it is only fair that a resident should obtain the advantage

derivable from the same. This is quite in line with our "Made in Canada," and "Patronize Home Industry" movements.

Some prospective insurers, moreover, positively will not deal with a stranger, no matter how accredited he may be. Many will, of course, under certain conditions, but all will not, and if the great public is to be properly and adequately served all men and women must have the opportunity to secure the advantage of life assurance protection. As I have said before and as I want to emphasize again, the interest of the life underwriter is not the primary consideration. It is not nearly so important that his commissions shall be large as that the public shall be well served, and in rural communities the part-timer can render service which the travelling representative alone, be he ever so much better a man in some respects, is totally unable to give.

Part-time service affords many a man a training which fits him ultimately for continuous service in selling assurance. The writer is acquainted with some of the very best men in the profession who began for short or long periods as part-timers. The part-timer earns from his other business while he learns the insurance calling. He learns how to meet the public, how to present his proposition and how best to render efficient service.

The sale of life assurance is not always easy. The business requires especial skill, especial ability and much persistence. Many there are who would hesitate to burn their bridges and enter the field of life assurance on a commission basis without a preliminary trial. They cannot do so, sometimes, because the very existence of themselves and in many cases their families are at stake. This preliminary trial many can make in conjunction with their regular business, and after all it is only fair that any who desire it should have such a chance at least till the time comes, if it ever does, when the procuring of life applications is paid for by salary and not by commission. Were it not for the part-time field many a good man would never have joined the ranks of the underwriters of life assurance.

The objection that the part-timer is inexperienced is worthy of very little consideration here, since were he during the early months of his career a whole-timer he would possess no more ability than as a part-timer. Experience is only gained by meeting the public, and in this respect part or continuous service shows little difference in the early stages. I have never been able to ascertain that the services of the part-timer are more detrimental to the business than that of certain all-time men so far as the effect upon the public is concerned.

A Benefit to the Public.

The part-timer is advisable because he is a deterrent to the establishment of a degrading class consciousness. He is desirable because he tends to prevent the formation of a hide-bound professionalism. He furnishes a training ground and constitutes a recruiting field for renewing the life blood of the insurance business, but more than all this the retention of the part-timer is a positive advantage to the public. I am well aware that it is upon this very point that my conclusions will be most severely questioned, for is it not constantly maintained that the part-timer has no real interest in the life insurance business? Is it not claimed that, at best, the business with him is but a side line and so there is no valid reason why he should attempt to give the public a square deal or even try to uphold the ideals and lofty principles which are fundamental with the life assurance business? But he must remain in the community in which he sells his policies, while the travelling representative does not. If the part-timer is to hold the confidence of his public, he must act squarely—there is no such deterrent upon the travelling full-time agent.

I press the point, therefore, in all earnestness and maintain that the part-timer is a positive benefit to the public and that his elimination would not be for the general welfare of the great mass of the people

The reason is obvious The part-timer alone stands in the way of making the life underwriters a closed profession. Close the doors of entrance at both ends and the association may control the sale of insurance absolutely. A monopoly of the sale of insurance once secured and it becomes the usual thing, "the public be damned."

I have faith that the men who compose the life insurance fraternity are too big and too wise not to appreciate that in the last analysis there is more satisfaction in serving the public than in snatching the reins of temporary power and increased emolument. The wise man knows that in order to possess real power and wealth he must be a good "servant."

It seems to me that the ultimate ideal in the evolution of society, the ultimate ideal for which the unconscious heart of humanity yearns, is that in which the interests of the individual are secondary and subsidiary to those of the whole group. I am well aware that there is in nature no analogy for such an ideal to-day—indeed in the process of one species devouring another often the most horrible cruelties attend the development of self-interest—as, for example, when the cat tortures the mouse before devouring it, or the wolf tears out the vitals of the sheep before sucking its blood. Even among humans, as shown in the German treatment of prisoners before murder, the process of one species devouring members of its own group is not unaccompanied by fearful atrocities, but it is because the idealistic is supra-ordinary that it is ideal. If there be such a thing as a "spiritual force," and many believe that there is, we must surely look for its operation along lines superior to the commonplace.

But because the service of mankind is idealistic it is by no means impracticable. Quite the contrary. Many times in recent years has it been proved that "he profits most who serves best." Such, indeed, is the deliberate teaching of our most up-to-date schools of practical salesmanship. I believe, therefore, that the life underwriters of Canada will not suffer by subjugating all idea of personal gain and adopting in its entirety the ideal of "service." The reward for service will follow as naturally as day follows night—it is universal law and requires no consideration, no thought, no attention.

To deal with the problem of the part-timer successfully—if there be a problem—all that is necessary is that he should be reached continuously with educational literature and by personal approach when possible, so that he may learn to appreciate the important place he holds in the service of the great public and the righteousness of the life insurance ideal. That, to me, should be the beginning and the end of the "campaign" of the life underwriters of Canada against the part-timer.

"VICTORY BREAD" TO SAVE WHEAT

The Educational Division of the Canada Food Board outlines the purpose and effect of the recent order as follows:—

"That Canada is at war will be brought home to every man, woman and child next month, when all bread made from standard wheat flour must be labelled "Victory Bread" and mixed with a percentage of substitutes for wheat flour. This is the effect of a recent order issued by the Canada Food Board in a vigorous effort to save the existing wheat supplies so as to make them last out until the wheat of the coming harvest reaches the flour mills and the new flour is distributed for consumption.

"The new order defines substitutes for wheat as corn, oats, barley, rice, rye, buckwheat, tapioca and any mixture of same; potato flour, bran, shorts, oatmeal, rolled oats, cornmeal, corn starch, hominy, corn grits, rice meal and potato meal

"On and after July 1st one pound of wheat substitute must be used by all bakers, confectioners and public eating-places with every nine pounds of standard wheat flour in making any bakers' products, and the same rule shall apply to every person in Canada who bakes bread, rolls or pastry for private consumption. On and after July 15th in all Canada east of Port Arthur the proportion is to be increased to one pound with every four. In Port Arthur and the West this increase is still in abeyance, preceding the report on the quantities of substitutes available.

"It is provided in this order that on and after July 15th no licensed dealer shall sell for private consumption east of, but not including, Port Arthur, white flour to any person who does not purchase from him substitutes in the proportion of not less than one pound to two pounds of standard flour. West of Port Arthur the proportion is kept at one pound substitute to four pounds wheat flour. The brand, "Victory Bread," is to be affixed to every loaf as a guarantee that the prescribed amounts of substitutes for standard wheat flour are being included therein. Bread not bearing this label may be seized, and any person violating the regulation is liable on conviction to a penalty not exceeding $1,000 and not less than $100, or imprisonment for a period not exceeding three months, or both fine and imprisonment. Fines are to be paid to the municipality if the municipal officer secures the conviction, or to the provincial treasurer where a provincial officer secures the conviction."

The Alberta government is spending $25,000 in Manitoba in efforts to stimulate the use of western coal in that province.

Place the Management of Your Securities in Our Hands

Those who go away for a period of travel or recreation, or who, through ill-health or the pressure of other business, wish to be relieved from responsibility, will find it convenient to place their financial affairs in the hands of an experienced and trustworthy agent We offer our services in that capacity. We collect dividends, purchase or dispose of securities under instructions, and render statements of all transactions. Dividends and other collections remitted promptly.

An interview or correspondence will show more clearly the advantages of our services as your financial agent.

VICTORY LOAN IN SOUTHERN ALBERTA

Southern Alberta Executive Hands Finance Minister Substantial Cheque

Upon completion of the work of the Southern Alberta Executive of the Victory Loan Organization, Mr. William Toole, the chairman, was able to return to the finance minister a cheque for $3,537. This represented the remuneration of several of the members of the organization, which they returned; many others accepted remuneration, only to hand it over to patriotic organizations. Commenting upon the incident, Mr. Toole makes the following statement:—

"This information will be of special interest to the citizens of Southern Alberta who responded so splendidly to the government's appeal for subscriptions in the amount of $12,056,750. Commissions paid canvassers, $47,079.50. Salaries paid to secretaries and office staffs and for all clerical assistance including all other expenses incurred by the Southern Alberta Compaign Committees such as printing, stationery, postage, travelling, etc., $17,814.68. This item does not include the salaries paid Messrs. Thoburn Allan, secretary, or to Mr. J. B. Sutherland, treasurer, for their most valuable and untiring services from the commencement of the organization up to the present time.

"$11,000 was allocated by the Dominion Executive for remuneration of the Southern Alberta Executive, and as Messrs. Allan and Sutherland were members of the executive, it was decided to pay for their services first, Mr. Allan receiving $1,817.50, and Mr. Sutherland $1,603.50. The pro rata division of the balance was $505.25. The following members of the executive who accepted their share and intimated their intention of turning the money over to the Red Cross or other patriotic or charitable cause are Messrs. H. A. Howard, C. P. McQueen, E. Taylor, W. Cousins, A. McTeer, R. B. Welliver, W. M. Connacher, Wm. Ardern. Those who would not accept any remuneration and requested that their share be returned to the minister of finance are Messrs. William Toole (chairman), G. R. Marnoch (vice-chairman), C. D. Taprell, E. D. Adams, Eugene Coste, T. A. Hornibrook, Hugh Melvin, so that $3,537 was returned.

"It will be noticed from these figures that the total cost to the government incurred by the Southern Alberta Committee was $72,357.18, or three-fifths of 1 per cent. of the amount collected. I think I am quite safe in estimating from information received from time to time that two-thirds, or nearly 70 per cent. of the amount paid for commissions was turned over to the Red Cross or other equally desirable funds, which is more evidence of the patriotic spirit underlying the whole of our organization.

Much Creditable Voluntary Work.

"As this is the last statement I am likely to make regarding the 1917 Victory Loan Campaign, I would like to thank the press for the splendid voluntary service which they so cheerfully rendered and which was the backbone of the whole undertaking. When it comes to expressing my thanks and appreciation for the magnificent spirit of co-operation in which the whole community responded, both workers and subscribers, words fail me. All the honorary chairmen of the various districts and committees throughout the country, as well as those in the cities, gave their services entirely free of charge, and many of these gentlemen gave a whole month or more to the work. Several of the secretaries of districts also acted without remuneration and used their motor cars in organizing, bearing all the expenses out of their own pockets—trying to do their "bit," they said. Mr. R. J. C. Stead, head of the publicity branch of the Canadian Pacific Railway Natural Resources Department, was in charge of our publicity work and certainly rendered most valuable service without any expense to our organization. Mr. G. R. Marnoch, president of the Lethbridge Board of Trade, and one of the men who has played such a prominent part during recent years in the development of Southern Alberta, accepted the position of vice-chairman and resided continuously in Calgary from the commencement until the campaign was over. He would not accept any remuneration for his most valuable experience and services. I could not refer to any of the other members of our executive, better known to the public as district deputies, without mentioning all, as without exception they stuck to the strenuous work of organizing their large districts with the well-known most gratifying results.

"Mr. Marnoch is now in Ottawa at the request of the minister of finance to attend discussions regarding a new loan, but no details are yet known. A new loan will, unfortunately, be necessary, and I would like to ask the same patriotic co-operation for the new 1918 organization as we received last year. It is only by such splendid united efforts that real success can be achieved."

PROVINCIAL FINANCING PROBABLY COMPLETED

The past few months have witnessed several Canadian bond issues of considerable size, including the following provincial issues:—

1918.	Government.	Amount.	Rate %.	Term years.	Offered to yield investors %.
January	Saskatchewan	$ 630,000	5	15	6½
January	Manitoba	1,000,000	5	2	6¼
January	Manitoba	1,000,000	6	10	6¼
February	New Brunswick	1,000,000	6	10	6⅛
February	Ontario	3,000,000	6	10	6
March	Brit. Columbia	1,000,000	5	10	6½
March	Nova Scotia	1,500,000	6	10	6
May	Ontario	3,000.000	6	10	6
June	Saskatchewan	1,500,000	6	20	6.30
June	Alberta	825,000	6	10	6.40
		$14,455,000			

It is generally expected that there will not be another issue in the near future as large as $1,000,000 Each issue met with success, and has been placed, for the most part, with permanent investors. In addition, $4,000,000 of Newfoundland bonds were sold in Canada, and several city issues of considerable size. Governments and municipalities who expected to require funds during the current year endeavored to provide for their requirements now, as the market will be almost entirely occupied by the war loan shortly. The province of British Columbia also secured a loan in May from the Dominion government.

INVESTMENTS OF LIFE COMPANIES

War Has Had Important Effects on Distribution of Investments

Canadian life insurance companies, according to the report of the superintendent of insurance for the year 1917, have assets totalling $322,753,547. This is almost 2 per cent. of the estimated total wealth of Canada, and, on account of its concentration in the hands of a few companies, it is an even greater factor in the development of the country than its amount would indicate. The practical monopoly of the money market by government securities at unprecedented rates of interest has naturally produced fundamental changes in the way in which these assets have been invested and in their earning power. But, quite apart from this, other influences have been affecting the character of these investments.

In the following table the investments of assets of Canadian life companies over a period is compared*:—

	1877.	1882.	1887.	1892.	1896.	1901.
Real estate	4.6	4.9	3.8	7.9	....	....
Mortgage loans	22.9	26.9	38.8	43.3	37.3	28.8
Bonds and stocks....	51.1	44.1	29.6	24.1	26.8	40.9
Collateral loans	1.0	3.5	8.8	8.6	7.2	5.9
Policy loans and premium notes	9.5	8.5	8.0	8.7	10.5	9.7
Uninvested assets ...	10.9	12.0	10.9	7.3	....	...

---

*Zartman, "The Investments of Life Insurance Companies."

At December 31st, 1917, the assets were invested as follows:—

Real estate	5.4
Loans on real estate	28.7
Loans on collateral	.4
Cash loans and premium obligations on policies in force	13.2
Bonds and debentures	40.5
Stocks	5.8
Cash on hand and in banks or deposited with governments	1.3
Interest and rents due and accrued	2.3
Outstanding and deferred premiums..........	2.2
Other assets	.1

Holdings of real estate have evidently not kept pace with the general increase of assets. While practically all Canadian companies recognize the advertising value of substantial home offices, they are aware of the lessons that have been learned from projects of this kind and are inclined to move cautiously. Mortgage loans, on the other hand, continue to absorb a substantial portion of the assets, and the care with which these have been selected probably accounts to a large extent for the small amount of real estate on hand. Loans on collateral have been very greatly reduced, and at present occupy only $1,279,930 of insurance funds Loans on policies have increased considerably; the old premium note system did not, in fact, disappear until the policy loan had taken its place.

Bonds and stocks have always received much favor with Canadian companies as compared with United States companies, and this tendency was accentuated by the Canadian legislation of 1896. The proportion of assets invested in this way is now double what it was in 1892. Naturally enough, the high interest rates obtainable on Canadian government bonds during the past four years has resulted in heavy investments in them on the part of life companies. This experience parallels that of the United States during the Civil War period; and it is also worth keeping in mind that the rapid advance in the price of United States government bonds after the close of the war resulted in heavy liquidation of these securities on the part of the companies, as the interest return, calculated on the basis of market prices, was too low for their purposes

One of the most striking features of the present report is the small amount of cash on hand; and a part of this is required for a government deposit. The average for United States companies for nearly half a century ranged from 2 to 5 per cent English companies frequently have had 6 and 7 per cent. of their assets in cash. German and French companies, on the other hand, have succeeded in reducing their ratios to below 1 per cent.; the French figure for the year 1878 reached the remarkably low amount of one-tenth of 1 per cent. Naturally, when interest rates are high, the wise policy is to keep all available funds fully invested, and this is the case at present. The ratio also speaks well for the integrity of the management of Canadian companies. Much of the uninvested assets of United States companies towards the close of the last century was said to be kept on hand to supply large deposits to trust companies and banks in which some of the directors were interested. On account of the difference in the form of the statements the other items cannot be compared. They are, however, of less importance. The items of interest and rents due and accrued and outstanding and deferred premiums are unavoidable to a certain extent, and the best that can be done is to keep them at a minimum.

The increased interest rates on high-grade securities have come at a time which is particularly welcome to life companies. Life insurance is a business which cannot in its nature increase the prices of its services as can a manufacturing company, or even a fire insurance company; and considerably heavy losses have been incurred through war casualties. The increased earnings of the invested assets will accordingly compensate to some extent for this loss. There is, of course, the other side, viz., the depreciation in the value of securities previously purchased. This has been felt by banks to such a degree that they have found it necessary to appropriate substantial amounts out of their profits to write off the loss in the market value of investments. The life companies do not feel it so immediately, as the return yielded at the cost price is adequate for the accumulation of the necessary reserves. The increased return on investments being made at present is clear gain, and the appreciation in the market value of these securities after the war should also be accompanied by a rise in value of securities previously purchased.

ANGLO-FRENCH EXPLORATION COMPANY

The Anglo-French Exploration Company of Canada, in addition to controlling a number of gold mining companies in Africa, is largely interested in the Hollinger Consolidated Gold Mines, Limited, of Canada. In spite of the necessary restrictions imposed by the British government upon the class of business which falls within the scope of the company, the annual report is satisfactory. The profit and loss account shows a net realized profit of £57,969, after providing interest upon debentures. This amount, together with a balance of £48,512 brought forward from the previous year, has been placed to the credit of appropriation account, thus making a total sum of £106,482. The company's assets exceed the capital and liabilities by the sum of £81,718. The cash position of the company is a strong one, the amount of actual cash in hand at the close of 1917 being £63,752, while British treasury bills were out to the extent of £108,692.

CANADA PAPERMAKERS WANT HIGHER PRICE

"The Canadian paper-making industry will lose $10,660,000 a year, and Canada's foreign trade balance will be that much worse off, as a result of the findings of the Federal Trade Commission on the price of Canadian newsprint paper sold in the United States, as compared with what the price should be, if the findings are allowed to stand," said Mr. F. J. Campbell, president of the Canadian Pulp and Paper Association, in his statement at Montreal on June 25th, concerning the attitude of the Canadian newsprint manufacturers towards the action of the Federal Trade Commission in fixing the price of paper at $3.10 per 100 lbs.

He bases his statement on the fact that the manufacturers asked for $80 a ton and were allowed only $62. Under the former price, Canada's newsprint exports are worth $46,000,000 a year, while under the price allowed they will reach only $35,340,000. Mr. Campbell intimates that the findings will be appealed to the United States Circuit Court. He also says that the Canadian government should at once bring the Canadian price of paper, which is now $2.85 per 100 lbs., to a par with that allowed by the Federal Trade Commission.

The tax rate of York County was fixed last week at 9.85 mills, as against a rate of 7.47 mills for last year.

SECURITY MARKET IN THE UNITED STATES

Spencer, Trask and Company, in their market letter of July 1st, review the recent conditions in the bond and stock market in the United States as follows:—

"The amount of new securities that have been brought out represents in par value a fairly substantial total, and it is impossible correctly to gauge the amount of investment capital still available for similar securities. Up to the time, however, of the official announcement of Congress of the terms of the new Liberty Loan, which is expected in October, and pending also the consummation of a definite taxing programme, offerings of new securities are likely to be made whenever the market seems in a position to absorb them. The surprising factor has been the willingness of investors to absorb new securities in the face of the tremendous demands which have been made upon them during the present year and prospective demands during the remainder of the year. Additional financing, therefore, to be reasonably successful, must ensure, first, security of principal; and second, adequate income return to a degree that will offset in a measure at least the imposition of progressively higher taxes.

"The bond market for the month has been comparatively inactive as applied to outstanding issues, although there have been periods of spasmodic demand that have kept the floating supply in reasonably restricted volume. Future fluctuations in prices are dependent upon war conditions largely and the prevailing level of money rates.

"Stocks as a whole, while failing to reach the high points established in May, enjoyed a substantial advance from the prices set earlier in the month, and many issues scored new high marks for the year. It is to be expected that the taxation programme, as contemplated, will bring about reactions later on, but we look toward the future trend of the market with confidence, realizing that large earnings will remain in spite of heavier taxes, and anticipating that inflation will become a still greater factor. What is more, although the most optimistic of us can hardly hope for a satisfactory peace in the near future, there is none to question that victory is ahead of us, and, such being the case, it is unreasonable to suppose that the market will fail to discount the accomplishment of the allied purposes."

WRIT SERVED ON CANADIAN CAR DIRECTORS

On Tuesday, the 25th June, some of the shareholders of the Canadian Car and Foundry Company, who have been endeavoring to secure control, issued a writ of mandamus ordering the management to appear in court, and show cause why they should not give the petitioner, Mr. A. Hicks Lawrence, full access to the books, accounts and records of the company for the purpose of investigation. The officers of the company have explained that the refusal of information was due to the fact that some questions asked referred to matters involved in litigation, the publication of which would be prejudicial to the interest of the shareholders.

JUNE MUNICIPAL BOND SALES

Four Large Issues Responsible for Large Total Last Month—Another Montreal Issue

The municipal bond sales in Canada during June totalled $10,108,696, compared with $4,751,142 in May and $1,642,003 in June a year ago. The June records of municipal bond sales at home for the past nine years are as follows:—

June.	Municipal bond sales in Canada.
1910	$ 2,187,588
1911	3,983,670
1912	1,690,344
1913	2,435,726
1914	4,617,857
1915	2,395,744
1916	4,428,100
1917	1,642,003
1918	10,108,696

The June, 1918, total was made up chiefly of four important sales—viz., Montreal, $6,100,000; Greater Winnipeg Water District, $1,000,000; Calgary, $2,300,000; and Regina, $230,000. In addition, there were substantial sales in Ontario and Western Provinces.

At the meeting of the city council of Winnipeg on May 13th, the necessary authority was granted the Greater Winnipeg Water District to borrow $3,000,000 on short-term debentures and to issue $4,000,000 long-term stock as collateral for such short-term borrowing. The sale recorded is only the $1,000,000 which was to be issued immediately.

Details of June Sales.

The following are the details of the June sales:—

Municipality.	Rate %	Term (years).	Amount.
Saskatchewan.			
School districts	..	..	$ 49,800
Regina	6½	20 & 10	230,000
Loverna	..	.	3,000
Leader	.	..	7,500
Leader	..	..	3,500
Montmartre		..	1,200
			$ 295,000
Alberta.			
Edmonton school districts	7	Various	$ 26,200
Calgary	7	10	2,300,000
Red Deer (treasury bills)	7½	1-3	24,000
			$2,350,200
Manitoba.			
Greater Winnipeg Water District	6	5	$1,000,000
Ontario.			
Scarborough	6	..	$ 20,000
Oshawa	6	20	38,000
Kitchener	6	..	45,694
Strathroy	6½	20	13,835
Peterborough	5½	20	15,000
Peterborough	5	20	7,000
Renfrew	..	..	22,500
Kenora	6	35	11,467
			$ 173,496
Quebec.			
Montreal	6	5	$6,100,000
New Brunswick.			
Edmundston	6	20	$ 40,000
Nova Scotia.			
Dartmouth	6	10, 15 or 20	$ 150,000

The following table summarizes the above details:—

Province.	Municipal bond sales, June, 1918.
Saskatchewan	$ 295,000
Alberta	2,350,200
Manitoba	1,000,000
Ontario	173,496
Quebec	6,100,000
New Brunswick	40,000
Nova Scotia	150,000
Total	$10,108,696

Sales for Three Years.

The following table shows the sales of municipal bonds in Canada only, during the past three years, and this year to date:—

	1915.	1916.	1917.	1918.
January	$ 1,784,947	$ 1,909,441	$ 1,969,256	$ 561,000
February	3,047,011	1,419,909	458,874	5,243,279
March	2,572,357	2,027,741	229,013	9,191,643
April	8,603,094	1,979,852	1,182,974	3,968,995
May	3,464,281	2,649,000	1,375,039	4,751,142
June	2,395,744	3,043,283	1,642,003	10,108,696
July	1,618,422	1,521,525	3,814,489	....
August	1,087,415	852,447	4,637,836	....
September	2,768,484	960,435	440,268	....
October	1,245,874	1,361,665	398,771	....
November	1,645,892	1,246,480	917,191	....
December	1,676,693	669,000	890,000	....
Totals	$31,910,214	$19,640,778	$17,955,714	$33,824,755

During the past four months there have been no sales of Canadian municipals in the United States market. In view of the war financing requirements, not only is it practically impossible to sell new issues there, but only in a few instances will we be able to effect renewals there. The last sale was in February, when $300,000 of Greater Winnipeg Water District bonds were taken.

The sales of Canadian municipals in the United States market during the past three years, and this year to date, are as follows:—

	1915.	1916.	1917.	1918.
January	$ 340,000	$ 3,183,215	$ 2,454,000	$ 10,000
February	6,471,000	899 500	485,725	300,000
March	6,543,947	595,000	120,440	Nil
April	7,100,825	2,158,306	1,563,200	Nil
May	600,000	7,219,000	Nil	Nil
June	Nil	3,393,243	80,000	Nil
July	890,000	3,631,200	1,530,000	....
August	750,000	97,300	Nil	....
September	6,748,342	200,000	Nil	....
October	1,589,000	Nil	Nil	....
November	4,000,000	7,894,000	Nil	....
December	450,000	3,065,000	Nil	....
Totals	$35,483,114	$32,335,764	$ 6,233,365	$ 310,000

Bank Loans to Municipalities.

The following table, compiled by *The Monetary Times*, shows the volume of bank loans to municipalities since January, 1915:—

	1915.	1916.	1917.	1918.
January	$35,952,805	$32,015,371	$24,487,272	$40,015,466
February	38,437,903	35,149,915	26,121,324	43,535,628
March	41,227,449	38,649,462	29,877,911	50,652,061
April	43,031,360	44,371,050	35,931,996	55,685,350
May	43,948,436	43,924,036	39,700,191	57,728,226
June	46,889,816	46,773,032	42,757,673	....
July	44,029,446	42,385,096	43,989,207	....
August	46,020,730	39,882,811	43,940,176	....
September	43,928,331	38,708,745	42,721,563	....

LABOR ORGANIZATION IN CANADA

Movement Continues to Show Strength—Large Increase in Membership

The seventh annual report on Labor Organization in Canada, containing statistics, etc., for the calendar year 1917, has been issued by the department of labor. The figures show that trade union membership in the Dominion has reached the highest point recorded since the department commenced the publication of these annual reports in 1911, the total numerical strength at the close of the year 1917 being 204,630. In all there are 1,974 local branch unions in Canada, 1,702 comprising 164,896 members, being affiliated with international organizations, 244 with 32,343 members are connected with non-international bodies and 28 having 7,391 members are independent units. There was an increase of 76 international local branches during the year, and a membership gain of 35,773; the non-international bodies had an increase of 55 branches and 9,459 members, and the independent units had an addition of one, but the reported membership shows a loss of 1,009. The membership of all classes of organized labor in Canada as reported to the department for the past seven years has been as follows:—

1911	133,132
1912	160,120
1913	175,799
1914	166,163
1915	143,343
1916	160,407
1917	204,630

Strength of Trade Unions in Chief Cities.

Of the 1,974 local trade union branches in Canada, 944 are located in 21 cities, and 644 reported a membership of 85,527, representing approximately 42 per cent. of the entire trade union membership of the Dominion. Montreal, with 123, has the largest number of local branches in any city, and 75 of them reported 15,914 members; Toronto comes second with 118 branches, 76 of which reported 15,546 members. The statement for the 21 cities is as follows:—

Cities.	Number of unions in locality.	Number of unions reporting membership.	Number of members reported.
Montreal	123	75	15,914
Toronto	118	76	15,546
Winnipeg	80	47	7,073
Vancouver	70	55	9,604
Hamilton	53	42	3,451
Calgary	48	43	3,599
Ottawa	48	39	3,906
London	47	32	2,637
Edmonton	46	30	2,078
Quebec	40	21	3,743
Victoria	39	28	2,953
Fort William	30	15	1,656
Regina	27	23	856
Halifax	25	14	2,048
St. John	23	13	1,285
Saskatoon	23	19	968
Moose Jaw	22	18	2,173
Brandon	21	16	889
Moncton	21	14	1,761
Lethbridge	20	13	1,104
Sault Ste. Marie	20	11	2,281

Trade Unionists and Military Service.

A statement indicates the extent to which trade unionists of the Dominion have voluntarily contributed to the Canadian expeditionary forces since the outbreak of the war in August, 1914. Enlistment of one or more members has been reported by 1,333 local branch unions, the recruits numbering 26,438 and reservists 692, a total of 27,130 trade unionists in the ranks. The province of Ontario supplied 9,807 of the total of 26,438 recruits and 297 reservists out of 692, about 37 per cent of the enlistments, the city of Toronto furnishing 4,444. There were 43 other localities in the province which had not fewer than 25 enlistments to their credit. British Columbia supplied 3,466 recruits and 155 reservists, the city of Vancouver contributing 1,681 of the former and 93 of the last named.

The other provinces rank in the following order: Alberta, 3,240 enlistments, the city of Calgary supplying 1,666; Manitoba, 2,534, Winnipeg supplying 2,132; Quebec, 2,522, Montreal supplying 1,775; Nova Scotia, 2,348, the coal fields of Cape Breton supplying 1,100; Saskatchewan, 1,084, Regina supplying 355; New Brunswick, 998, St. John supplying 787; Prince Edward Island, 66, all of which were reported from Charlottetown.

Trade Union Beneficiary Disbursements.

The majority of the international labor organizations operating in Canada have benefit features on a varying scale. A table is furnished showing the expenditure made in the United States, Canada and elsewhere on this account, the disbursements for 1917 being $13,175,379, an increase of $673,251 as compared with the payments made in 1916. The expenditure for each class of benefit was as follows:—

Death benefits	$8,139,809
Sick and accident benefits	2,348,589
Strike benefits	2,197,559
Old-age pensions	367,755
Unemployed and travelling benefits	121,667

Six of the non-international bodies reported having made payments on account of benefits, the total expenditure amounting to $16,396, an increase of $4,463 over the amount reported in 1916.

Benefits Paid by Local Branches.

A statement is also published showing the amount paid in benefits for the year 1917 by local branch unions in Canada to their own members, the disbursements aggregating $313,116, an increase of $64,936 as compared with the expenditure for 1916. The payments made on account of each class of benefit were:—

Death benefits	$118,373
Sick benefits	95,912
Strike benefits	40,527
Unemployed benefits	5,862
Other benefits	52,442

General Features of the Report.

The report follows closely along the lines of former reports on labor organization in Canada, the various phases of the scheme of organization which have been developed being given due consideration.

A chapter deals with the proceedings incident to the indictment by the United States government of the Industrial Workers of the World. The action of several labor bodies in regard to conscription and other matters of interest to organized labor are also discussed.

The report serves as a directory of trade unions for the Dominion for 1918, including as it does particulars not only of every known local trade union in Canada, but also a list of all international and non-international central organizing bodies, together with the names and addresses of the chief executive officers.

GROWTH OF VANCOUVER

A few statistics showing the growth of the city of Vancouver are given in a circular sent out by J. Reginald Davison, civic industrial commissioner there. The value of manufacturing products of Vancouver, as compared with other leading Canadian cities, is as follows:—

	Value of products.		
	1900.	1910.	1915.
Montreal	$71,099,750	$166,296,972	$243,237,575
Toronto	60,099,857	154,306,948	219,143,728
Hamilton	17,122,346	55,125,946	66,063,339
Winnipeg	8,616,248	32,699,359	47,686,070
Vancouver	4,990,152	15,070,105	33,871,044

The results of the shipbuilding industry in Vancouver have been so far as follows:—

	No.	Dead weight. Tons.	Total. Tons.	Launched.	Building.	Employed.
Steel steamers	10	8,800	88,000	2	4	2,500
Steel steamers	2	4,700	8,400	1	1	....
Steel steamers	4	5,100	20,000	..	..	....
Steel steamers	2	4,300	8,600	..	..	900
Wooden steamers	12	3,800	22,600	4	8	600
Wooden schooners	6	2,500	15,000	..	1	911
Total	36	28,200	175,000	7	14	4,911

CROP CONDITIONS IN SASKATCHEWAN

Best That Can Be Expected is a Normal Yield—Rains Have Improved Conditions

The Press Bulletin of the Saskatchewan Department of Agriculture of the 25th June, summarizes the crop prospects of the province as follows:—

"While the whole province of Saskatchewan has more or less been affected by the drought of recent days, it would appear from reports which have been received by the provincial department of agriculture from its special crop correspondents and made public yesterday that the crop in no district is entirely ruined.

"With the rains of the last few days the crop will be equal to, if not better than, that of the last two years. Unofficial estimates place the yield this year at from 15 to 16 bushels an acre.

"Hail has done practically no damage in the province to date. Cut worm appears to be working chiefly in gardens rather than the grain. Pastures would appear to be very poor.

"Sections of the province most in need of moisture for the growing crops received copious supplies of rain on Sunday afternoon and night, while there were very few sections of Saskatchewan in which showers have not fallen during the past forty-eight hours, according to special telegraphic crop reports received last night.

"A summary of these reports shows that heavy rains lasting between five and six hours, have put a new complexion on the crop situation in what is commonly known as the 'dry belt' between Parkbeg, a few miles beyond Moose Jaw, through to the Alberta boundary and beyond. In this territory crops which were being burned up have been refreshed and a substantial percentage is assured in the most critical section of the province, provided favorable conditions prevail to harvest time.

"While the rain was not so heavy as along the main line west, a substantial fall is recorded from points all along the Empress branch of the Canadian Pacific Railway. On Sunday night rain fell in a steady downpour for between three and four hours. This part of the country was also very dry prior to Sunday, but farmers are now confident that at least fifty per cent. of the wheat crop in this section will be saved.

Rains Have Covered Most of Province.

"The wheat belt from Ravenscrag east on the Weyburn-Lethbridge line also participated in the generous supply of moisture which fell on Sunday night, and it is stated that full yields may be expected from the southern part of the province from present indications.

"Local showers have prevailed during the past forty-eight hours in the east and north of Regina. While these showers have saved the situation in some districts, where the crops were in a more precarious condition than elsewhere, more rain is needed in the near future to ensure high yields at harvest time.

"Gull Lake reports that the heavy rains of Sunday night went down about six inches and have put the crops on good footing, though north of Gull Lake the rain was rather late in arriving and the results will not be so appreciable.

"The Moosomin district had a half-hour shower on Saturday night, which was much appreciated by the farmers. The rain came in time to save the crops for the time being, but more is urgently needed in the near future.

"The Weyburn district was visited on Saturday evening by a heavy shower. The rain came at the most opportune time, for the farmers were beginning to worry. Some hail fell, but no damage has been reported to date, and last night clouds were threatening and more rain was expected before morning.

"Rain was reported from the big Goose Lake country west of Saskatoon, but east of that city no precipitation has been recorded. Saskatoon itself received but a three-hours drizzle. Last night a gentle rain fell from Delisle to Macrorie for four hours, and from Rosetown to the Alberta boundary the country was visited by a good heavy rain which lasted from four to five hours. From Saskatoon to Craik light showers were reported to have fallen at intervals during the day, the fall being more marked at Craik, Rosthern and Duck Lake, and in the Battlefords there was light rain during the day.

"In the Swift Current district the rain last night was heavy all over this district, soaking the ground for from three to six inches in depth, and resulted in much benefit to the crops. The rain was very badly needed. While there are fields of grain in some places that are practically beyond recovery the district will have a fair crop, although the straw will be short. Flax and oats are all right. A great deal of the wheat is headed out, and with further rains will be all right."

TOURIST TRAFFIC ON VANCOUVER ISLAND

The Development Association of Victoria, B.C., have been circulating advertising pamphlets in all the principal motor clubs and hotels on the Pacific coast and in the hotels in the principal cities of Western Canada and the United States. Attention is directed to the motor highway of Vancouver Island, and considerable results have been obtained during the past few years. The number of motor cars entering in 1914-15 was 71, in the next year 76, during the next year 218, and during the year 1917-18, 330.

PROHIBITION MOVEMENT IN THE UNITED STATES

A solution for the food shortage is suggested by the Prohibition National Committee, which is itself a body composed of a number of temperance organizations throughout the United States. It is pointed out that the liquor business consumes food equal to 5,000,000 pounds of bread per day and requires millions of tons of coal during the year. It also uses the transportation facilities of the country, which are at present overtaxed. Last year 500,000 cars were required. The manufacture, sale and transportation of liquor requires the services of 300,000 men. These might be relieved for more productive employment, and the grain and other materials which enter into the production would be also released for other use.

RESULT OF DAYLIGHT SAVING

The operation of the Daylight Saving Bill has resulted in a very noticeable decrease in the use of electricity. The loss of revenue incurred by the British Columbia Electric Company according to a statement of General Manager George Kidd, is about $10,000 per month. In May, 1917, their lighting revenue was $85,654 as compared with $80,074 in the same month this year. This shows a reduction of about $5,580, but, considering the increase in population during the period, it is estimated that the actual loss of revenue is about $10,000. This is to a large extent a net loss, and it increases the overhead charges upon the amount of business remaining.

UNITED STATES WHEAT CROP

Reports from the United States wheat belt are encouraging. This year's crop is estimated to be 50 per cent. larger than last year. The greatest acreage ever sown to wheat is officially reported, and by the June estimates the crop will reach 950,000,000 bushels as compared with the record crop of 1,025,000,000 bushels in 1915. The total wheat area to be harvested this year is 58,881,000 acres, an increase of 12,000,000 over the preceding year, compared to the average for the five-year period preceding the war of 48,953,000. The other grains also show a big increase. Despite the big harvest, the Food Administration of the United States is urging conservation to the greatest possible degree, as every bushel will be needed to save allied Europe from famine.

The first carload of British Columbia-made cheese was recently shipped from the factory at Sardis, B.C., to Vancouver. The local production of cheese has been increasing rapidly. Formerly the supply was mostly obtained from Ontario and Alberta. The cheese is being produced entirely locally, even boxes being made out of British Columbia timber.

THE WOMEN OF FRANCE

In France recently figures showed that there are now 475,000 women at work in munition factories at $2 per day, plus 50 cents from the government, with 25 cents additional for each child if the head of the house is in the army. Thrift is so strong a principle with French women that French banks are carrying larger deposits than ever before, despite the fact that $18,000,000,000 towards the finances of the war came from popular subscription.

CONTRACT FOR INSURANCE

The Burnaby municipal committees on June 17th, renewed the municipal insurance, totalling $43,000, as follows: D. C. McGregor, $5,000; Rand and Fowler, $5,000; H. T. Devine, $6,000; W. F. Edmonds, $2,000; J. J. Johnston, $4,000; Yorkshire Guarantee Company, $4,000; A. Lomas, $5,000; L. W. Peel, $5,000; Ceperley and Rounsefell, $4,000; and the Northern Securities Company, $3,000.

CANADIAN LOBSTER INDUSTRY DECLINING

According to Prof. Perry, of Acadia University, Wolfville, N.S., the lobster industry of the Maritime Provinces is in a serious position, and the catch has fallen off from one-third to one-half. This, he says, is the result of using traps which catch the small lobsters. Three propositions were put to the fishermen at meetings recently held: First, that there should be a size limit and none be taken under ten inches in length; second, that the fishermen should put back these lobsters; third, that the season be changed from spring to fall.

FOOD PRODUCTION IN FRANCE

More than 1,000,000 Frenchmen have been killed in war and 1,500,000 are physically unfitted by their injuries to carry on their farm work. The women are managing the farms and doing most of the farm work. In battle zones, such as the Champagne district, women did not forsake their work in the fields, even when German shells were bursting around them. When the cannonading was heavy they lay flat on the ground, and as soon as there was a lull they would be up attending to their grape-vines. The wives of French farmers have always helped their husbands in the fields. They now do double duty, rising earlier and working later. Horses were conscripted for the army, and French women have taken their place to draw the ploughs and harrows. Food production in France, despite the efforts of women, children, old men and cripples, has dropped to one-third.

INCREASED ACREAGE IN THE WEST

Mr J. D. McGregor, in a report to the minister of agriculture, cites the following figures as his estimate of the increased acreage under grain crop in the three prairie provinces:

	Acres.
Wheat	2,010,567
Oats	554,625
Barley	93,320

The total acreage for the three provinces in grain crops as compared with 1917 shows an increase of 11 per cent., according to Mr. McGregor's figures. These are:—

	Acres.
1917	24,028,900
1918	26,687,412
Increase	2,658,512

At a joint meeting of the London Board of Control and the Lambeth members of the Westminster Township Council on June 25th, it was decided to recommend that the London and Lake Erie Electric Railway be purchased. The price set was $279,000, of which the city will pay $241,500.

NEW LUMBER TAX IN QUEBEC

The government of Quebec province has announced a new tariff on wood. The existing tariff was to be in force until the year 1920, but a new one is to be substituted which will last until 1924. The rates of the new tariff vary from a minimum of $1.40 to $2.60 per thousand feet. From 1924 to 1929 a tariff of from $1.40 to $3 is to prevail, according to the arrangement. The old tariff was from $1.05 to $2 per thousand feet.

NEW ASBESTOS MINE OPENED

That the asbestos industry in Canada is thriving is indicated by the recent purchase of one-half of the Robertson asbestos mines near Thetford, Quebec, by the Pennington Asbestos Company. The same company has an option on the other half of the mines. A force of men is already engaged in operations, although the work is not yet fully under way. There is reported to be a great demand for the product. Prices of asbestos and asbestos products have advanced as much as 400 per cent. during the past seven years.

CONDITIONS GOOD AROUND PRINCE ALBERT

Crop conditions in the Prince Albert district are, generally speaking, ideal, with a greatly increased acreage under cultivation and prospects of a heavy yield. The outlook has been particularly enhanced by the copious rains that fell over a wide area recently. Wheat in the district is particularly good and is from 6 to 16 inches high. The oat crop is not so promising as the wheat, but it will be a heavy one with a 25 per cent. increase in the acreage sown.

On the whole the crop outlook in the district was never better at this season. With satisfactory conditions from now till harvest, one of the best crops in the history of the district should be reaped.

LARGE AMOUNT OF GRAIN IN CANADA

There are 20,500,000 bushels of wheat and 14,150,000 bushels of other grain in the Dominion, making a total visible supply of 34,650,000 bushels. That is the estimate obtained through a census completed by the Board of Grain Supervisors up to May 31st last.

It is estimated that there are in the farmers' hands in the West 5,000,000 bushels; in elevators and flour mill bins, about 6,750,000 bushels; in transit on railways, 1,000,000 bushels; in the East in elevators, 6,635 885 bushels; and in the East in transit about 1,000,000 bushels, making in all at the date in question a total of 20,500,000 bushels in round numbers.

It is further estimated that there are ground in Eastern Canada 6,750,000 bushels, and in Western Canada 7,400,000.

The Wheat Export Company exported 11,000,000 bushels between March 31st and April 31st.

In England and France from 15 to 30 per cent. of wheat substitution, chiefly corn, barley and rice, are required by the food scarcity in the milling of flour. The people of Great Britain are not now making or consuming white bread.

Hundreds of thousands of volunteer workers will be needed to save the crop of the United States, and they are coming forward from every walk of life. At a recent convention of bankers a question was asked, "How many of you grew up on a farm?" The count showed 90 per cent. Everyone present agreed to leave his bank and work on the farm for periods from ten days to two weeks.

The Anglican Synod of Huron adopted the following resolution: "That in view of the widespread shortage of food and the urgent need of the allied nations of Europe and of the fighting men at the front, this Synod pledges itself by every means in its power to support the government in any measures it may see fit to promote the greater production and conservation of food."

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

July 3rd, 1918.

	Div. Rate	Price about	Yield about

MORE RAIN NEEDED IN WEST

A need of rain over considerable sections of the grain growing areas in Manitoba, Saskatchewan and Alberta is indicated in the weekly crop report of Canadian Northern agents to the general offices of the company here. There are, however, a large number of agents who report that as yet the drought had not effected any damage, and that rain would entirely relieve the situation. Moreover, advices received Thursday, June 27th, showed that rain had already fallen over a considerable section.

The presence of cut-worms is reported in a small section to the north on both sides of the border of Manitoba and Saskatchewan, the damage, however, appearing to be but slight.

The fishing industry at Great Slave Lake, Lesser Slave Lake and other northern lakes has been progressing rapidly, it is reported. A large cannery is being put up at Edmonton to handle the production.

The Bank of Hamilton has closed the Brantford East End branch owing to the depletion of the staff caused by numerous demands for military service. The books have been moved to the main office, Brantford.

INVESTING YOUR SURPLUS

—whether it be individual or corporation, the most desirable security for surplus or reserve is

VICTORY LOAN 5½% BONDS

(*Free of all Federal taxation*)

Choice of 5, 10, or 20-year maturity. Always saleable. Readily negotiable. Price 98⅞% and interest ($988.75 and interest per $1,000.)

Delivered free of charge against draft at your bank.

We solicit your orders—or enquiries from interested parties.

Particularly suitable for municipal sinking funds.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 26th June, 1918.

RAILWAYS MAY REDUCE RATES

A Railway Board judgment just issued, reaffirms the right of railways to give reduced rates to points where a railway has to meet water competition. The application under consideration was that of the board of trade of Sydney, B.C., which wanted the board to rule that coast terminal rates should apply to shipments to Sydney via the Great Northern and Canadian Northern Car Ferry services from Vancouver. Sidney is located on Vancouver Island, and is eighteen miles nearer Vancouver than Victoria, but the rates to Victoria are lower than those that apply to Sidney.

Ames, Holden, McCready

Limited

Report of the Directors

To the Shareholders,

Your Directors have pleasure in presenting herewith the annual statements of your company for the year ending April 30th, 1918.

The profits for the year amount to $624,201.33, a decrease from the previous year of $96,041.27. However, the deductions from profits for interest, bad debts and reserves amount to $320,107.34, compared with the previous year's deductions of $522,938.86, leaving a net profit for the year of $304,093.99, as compared with $197,303.74 for the previous year, or an increase of $106,790.25. The Surplus Account now amounts to $507,408.67.

The total domestic sales for the year amounted to $4,809,283.80, compared with $4,786,728.24 for the previous year, or an increase of $22,565.56. The total army business amounted to $69,965.56, compared with $1,094,111.80 for the previous year.

The net current assets show an increase over the previous year of $323,878.21, and now amount to over $2,000,000.00; Bank Loans show a decrease of $367,500, and Accounts and Bills Payable show an increase of $87,988.29. You will note that the improved condition of quick assets was brought about entirely through the results of the year's operations.

The inventories of raw materials and manufactured stocks have been taken at cost, which is below present market value, and the tendency during the coming year is for higher prices for leather of all grades. Inventories were reduced during the year by $249,912.20, and all stocks on hand at the close of the year have been carefully examined and are reported to be in excellent condition.

The consolidation of No. 1 and No. 2 factories in the latter plant was completed during the summer of 1917. The economies effected by this consolidation are reflected in our operations during only the last half of the year, but will be fully realized in the coming year. Savings in the overhead expenses, together with the rental received from the lease of No. 1 factory, will constitute a very substantial item in the future operations of your company.

Your directors feel that the organization of your company was further improved during the past year and look forward to the company's continued prosperity. The coming year will undoubtedly bring forth a substantial amount of army business, which, together with an anticipated increase in domestic business, should show satisfactory results.

Respectfully submitted,

D. LORNE McGIBBON,
President.

NEW INCORPORATIONS

The following is a partial list of charters granted during the past week in Ontario and British Columbia. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are the provisional directors:—

Nanaimo, B.C.—A. E. Planta, Limited, $10,000.

Prince Rupert, B.C.—Nippon Club, Limited, $10,000.

Sudbury, Ont.—Sudbury Dry Goods Company, Limited, $40,000; A. Turpin, V. Turpin, D. Turpin.

Stratford, Ont.—Stratford Flax Company, Limited, $40,000; W. Miller, W. G. Owens, W. E. Goodwin.

Vineland, Ont.—Vineland Wood and Lumber Company Limited, $2,400; F. Sumner, E. H. Moyer, R. J. Moyer.

Toronto, Ont.—Bodi-Tone Company, Limited, $5,000; J. A. Campbell, E. Annis, M. O'Brien. Clyde Cars Company of Canada, Limited, $50,000; J. S. Innes, J. B. Crockett, W. P. Armstrong. J. J. Higgins, Limited, $40,000; F. Regan, W. N. Irwin, E. Murphy. Fred Smith Company, Limited, $70,000; F. Smith, L. Fisher.

Vancouver, B.C.—Barons Motors, Limited, $15,000; A. A. Rerrie Lumber Company, Limited $20,000; Travis and Fotheringham, Limited, $10,000; Amalgamated Film Company, Limited, $25,000; Uneeda Printers, Limited, $10,000; S. and S. Transportation and Towing Company, Limited, $10,000; National Hotel Company, Limited, $10,000; Export Manufacturers, Limited, $20,000; Spruce Products Company, Limited, $10,000.

EDMONTON TAX SALES

The city of Edmonton is meeting with success in its tax sales, according to reports from that source. On Saturday, June 22nd, there was taken in $466,000. On account of heavy receipts and the consequent pressure of work upon the departments concerned, further sales were postponed for some time, but it is understood that they are being resumed at present.

Owing to expansion in the company's business, the Chartered Trust and Executor Company, of which Mr. John J. Gibson is managing director, has moved into larger offices in the Canada Life Building, 46 King Street West, Toronto.

POSSIBILITIES OF THE INCOME TAX

Incomes Have Increased More Rapidly than has Property and Business Assessment

Some phases of the income tax are discussed in a pamphlet recently issued by the Bureau of Municipal Research, of Toronto. Reference is made to four tests applicable to the income tax. These are, first, is it equitable and fairly certain of collection? second, is it convenient to collect? third is it economical in collection? and fourth, is it conducive to the public benefit?

"Taxes," it is pointed out, "must be paid out of income, whether they are on income or not, otherwise taxation would become confiscatory." Why then, it is sometimes asked, should not taxes be in proportion to income? Why collect any tax but an income tax?

A statement is given showing the rate of increase in property and business assessment and assessment on incomes of Toronto since 1909, as follows:—

Year.		Property and business assessment.	Rate of increase %.	Assessment on incomes.	Rate of income.
1909	....	$216,880,170	....	$10,919,830	....
1911	....	294,371,809	35.73	12,232,965	12.02
1913	....	420,583,306	42.88	15,536,743	26.10
1915	....	546,047,548	29.83	19,085,031	22.83
1917	....	567,585,311	3.94	20,837,702	9.18
1918	....	575,093,178	1.32	25,684,967	23.26

It is pointed out that the property and business assessment has increased in nine years more in proportion than has income assessment, and that since 1915 income assessment has increased more in proportion than has the property and business assessment.

Some of the criticisms more frequently aimed at the income tax are stated as follows: 1. Many people who should be taxed on income remain untaxed. 2. Some people never receive assessment forms to fill out. 3. People on a definite salary are more apt to be taxed and more apt to be fully taxed than people with a taxable income which is not a salary. 4. On the average, earned incomes pay more taxes than unearned incomes. 5. Because assessments on income are made in the year prior to the levying of the tax; (a) many taxes are lost to the city through removal of taxpayers; (b) an opportunity for avoiding an exact statement by the assessee of the total assessable income is afforded.

PREVENTION OF DUST EXPLOSIONS

The Bureau of Chemistry of the United States Department of Agriculture has issued a circular calling attention to the danger of dust explosions and fires. Recent accidents of this kind in mills and elevators killed 39 persons and injured 60; they destroyed 2,500,000 bushels of grain and property worth $8,000,000.

QUEBEC AND SAGUENAY RAILWAY

The Quebec and Saguenay Railway is now completed from St. Joachim to Baie St. Paul, and a train connection with the Quebec Railway, Light and Power Company service is being operated. It is expected that the road will be completed to Murray Bay by the fall, and a train service will operate to that point.

The Quebec and Saguenay Railway was originally promoted and commenced by private interests. When these failed, the road came into the hands of the federal government who will, it is understood, operate it as a part of the government railway system, connecting with the Quebec and Lake St. John and the Canadian Northern Railway system. There is, of course, a gap from St. Joachim, which is not owned by the government, but it is expected that a right-of-way over the Quebec Light, Heat and Power Company Railway will be used for some time.

It is announced that Hongkong is making a further gift of £250,000 to the Imperial government toward war expenses.

Canada's Capes

are the crowning climax of a trip that has no equal—"Niagara-to-the-Sea."

From the moment you board a "Canada Steamship Lines" boat at Toronto—you will find each hour of the journey filled with new and surprising delights. The route is one of wondrous beauty—the boats are floating palaces, providing a new experience in travel de luxe.

Through the kaleidoscopic beauty of the far-famed "Thousand Islands," winds this route of scenic enchantment. Then it traverses the River Rapids of the St Lawrence—the "shooting" of them is an experience that charms and exhilarates.

Then comes the quaintly interesting city of Quebec—rock-bound, and reminiscent of old world cities.

The final entrancement of the trip is found in the canyon of the River Saguenay—where the boat steams slowly past Capes that tower higher than the Rock of Gibraltar.

1000 miles of scenic splendor—each day of it so wonderful that you'll marvel why anyone ever went across the Sea for scenery when this vacation route is so readily accessible—at a cost so low that all can go.

Complete standard service maintained.

Satisfactory progress is being made on the new plant of Dominion Canners, Limited, which is being completed at Vancouver. It is anticipated that the plant will be in full operation for this season's crop of fruit and vegetables.

A new company has been incorporated at Calgary for the purpose of breeding and trading in livestock. The company is capitalized at $2,000,000, and this is divided into 20,000 shares of $100 each. It is understood that the land is in the vicinity of Calgary.

The Cost of Living Branch reports to the minister of labor that it does not know why the cost of living keeps going up so fast. Certainly it doesn't. What is more, it doesn't intend to try to find out. A man got fired out of that department not very long ago for allowing his curiosity to run in that direction.—Edmonton Bulletin.

CITY OF VANCOUVER FINANCES

Surplus Revenue Obtained—Arrears of Taxes are Still Heavy

Vancouver's assessment for 1918 as estimated by the assessment commissioner is $216,536,060, of which $75,716,910 consists of improvements and the balance of lands. The population is 102,550. The expenditure for the year ended December 31st, 1917, totalled $4,716,573. This included $1,653,446 general expenditure, $2,573,425 for school expenditure and $1,005,062 for interest and sinking fund purposes; interest, etc., on treasury notes and banking advances required $227,485. The expenditure on waterworks account, which is not included in the above total, was $398,184.

Total income for the year was $5,229,572, of which $430,484 came from the waterworks department, which yielded, therefore, a surplus revenue of $32,300. The general taxes for the year 1917 totalled $3,491,612, of which only $2,117,229 were collected, so that about 40 per cent. were still outstanding at the end of the year. The local improvement taxes for the year were $616,273. The balance of the revenue was derived from licenses, government grants for schools, interest on delinquent taxes, etc. The surplus on account of general revenue, that is not including the waterworks surplus, was $82,515. The arrears of taxes formed a rather large total of over $5,000,000, some of which are for 1913 and previous years.

The debenture debt of the city proper is now $29,120,858. In addition to this there is the property owners' proportion of the local improvement debentures of $6,353,926, so that the total debt of the city is $35,474,784. About one-half of this is in the form of general registered stock. Current liabilities total several millions of dollars. The total assets of the city are $51,810,019, a surplus of $9,950,279 over and above the liabilities.

The sinking fund at present totals $6,132,310, including a surplus of $267,146, which is held as a reserve against depreciation of assets. Over half of the funds are invested in the city's own debentures, and part of the rest is kept at the bank and in Dominion government bonds. There is, however, $886,322 due from the city to the sinking fund. This item is, of course, included among the current liabilities of the city.

Growth of City Since Incorporation.

A statement is included showing the changes in the assessment, taxation, etc., since 1886, the date of the incorporation of the city. The real property assessment reached its maximum in 1914, when it totalled $150,456,000. In the next year the improvements reached their maximum assessment of $70,004,253. The respective amounts are now $139,922,600 and $75,942,580, respectively. The following total shows the growth of total assessable property in periods of five years:—

1887	$ 2,639,077
1892	16,647,712
1897	17,442,359
1902	21,065,370
1907	54,727,810
1912	192,072,890
1917	215,865,180

The tax rate in 1888 was 12½ mills, at which rate it remained until 1892. It was 16 mills from 1892 to 1900, 18 mills from 1901 to 1905 and 20 mills from 1906 to 1913. In 1914 the rate was raised to 22 mills and in 1917 to 24 mills. The gross amount of taxes levied during the past year are, therefore, the highest on record, but on account of the large amount of arrears, the actual revenue is slightly less than it was in the year 1914. The amount of tax arrears outstanding at the end of five-year periods is as follows:—

1887	$ 3,510
1892	38,019
1897	221,000
1902	142,149
1907	126,975
1912	510,136
1917	5,043,110

The population grew steadily until 1913, when it totalled 122,1[illegible]. Thereafter it declined to 95,922 in 1916, but is now estimated at 102,550.

From 1895 to 1905 improvements were taxed at 50 per cent. of the value; from 1906 to 1909 at 25 per cent., and in 1910 they were made exempt from taxation entirely. About two months ago, however, the council announced its decision to resume the tax on improvements owing to the necessities of the public revenue.

INLAND REVENUE INCREASED

The inland revenue of the Dominion of Canada for June shows a decided increase over that for the corresponding month of last year. The total is $3,058,031 as compared with $2,219,060. The difference is to some extent accounted for by the war tax on railway tickets, telegrams, etc. These will undoubtedly be increased still further through the imposition of the new tax on matches, tea, etc.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended June 29th, 1918:—

Dominion Reduction, 83,500; McKinley-Darragh, 90,459; Buffalo, 88,000; Mining Corporation of Canada, 129,115; Nipissing Mining Company, 179,140.

The total shipments since January 1st, now amount to 14,376,404.8 pounds, or 7,188.2 tons.

TOWN OF BASSANO FINANCES

The total revenue of the town of Bassano, Alberta, for the year 1917, was $40,432, exclusive of that from the waterworks system. Municipal taxes amounted to $30,234, and lands which had been forfeited were sold for $6,453. Substantial items of revenue of $1,629 were derived from penalties for arrears of taxes, and $975 for coal mine revenue.

The revenue from the waterworks system amounted to $7,129, while expenses were $7,333. There was accordingly a deficit on this account of $204. The total deficit to date on account of the waterworks system is $2,313. This deficit is carried into the general expense account.

The total expenses for the year were: $34,964, so that there is a revenue surplus of $5,468. Interest on debentures required $13,316, and in addition to this there were items for debenture redemptions and sinking fund payments. The forfeited lands previously mentioned represented unpaid taxes of $6,548, so that there was a slight loss on this account. The operation of the coal mine cost $617, so that a profit was realized from this source.

The net taxable assessment of the town is now $1,186,853, and the debenture liability, including $14,504, is $250,104, or about 19½ per cent. of the assessment. A net surplus of $51,344 of assets over liabilities is shown. In valuing the debenture assets allowance is made for depreciation.

The populaton of Bassano is about 1,000, its area 800 acres, and its tax rate 27 mills.

A Practical Pointer on Salesmanship

It is of first importance in good salesmanship to select a worthwhile article to sell, something about which you can become enthusiastic with a reason—a reason that will last. In Life Insurance Salesmanship, for instance, a discriminating agent would naturally select the policies of the Mutual Life of Canada because—first, the Company is well-established—Second, it has an unblemished record—Third, it has a continental reputation as a dividend payer—Fourth, it is a democratic organization—Fifth, it is a wonderfully successful going concern—and lastly, being the only Canadian Policyholders' Company its contracts find a ready market. Where a company is so favorably known one half of the trouble of making the sale is avoided. If you get the best goods in your line and go to it, success is certain. Last year our agents placed $20,000,000 paid-for business.

MAKE A DECISION

If a man were offered an extraordinary opportunity to purchase a desirable property—a property he must have some day—on terms to suit himself, and knew that by delaying he would only increase the cost—would he shelve the affair for decision at some future time? Not he!

How much more important it is to decide on the matter of Life Insurance without loss of time. The vast majority of men must have insurance some day, or be guilty of serious negligence to dependent ones; the cost will certainly increase the longer the delay; the terms of payment may be arranged to suit the insured, and there is always the danger that illness or some unforeseen event may make delay fatal. Then why not make an immediate decision?

The Great-West Life Company issues policies to meet every need. Rates are low—conditions liberal—and the profits to policy holders are remarkably high. Ask for information, stating age: there will be no importunity to insure.

BANK CREDITS TO BE RESTRICTED

Essential and Productive Loans Only To Be Given Consideration—Banks are Entrusted With Control of Individual Finances

That bank managers in Canada should restrict loans in view of the requirements of the Dominion government, is the substance of a communication being sent by E. L. Pease, president of the Canadian Bankers' Association, to bank managers in Canada.

"The Federal Reserve Board at Washington," says Mr. Pease, "has recently issued a statement with regard to the necessity for the curtailment and conservation of banking credits, due to the exigencies of the war, which is entirely applicable to conditions in Canada. The Canadian banks in co-operation with the minister of finance have been, it is true, for some time past endeavoring to bring about the results aimed at by the Federal Reserve Board; but the statement of that board now issued so clearly and comprehensively, and on such practical lines, sets out the duty of bankers in the present emergency that a fresh consideration and a careful observance by Canadian bankers of these directions will materially aid in meeting the imperative obligations which the war has thrust upon us.

"Adapting to Canadian conditions the arguments and recommendations of the Federal Board, your president respectfully commends to your earnest consideration the following:—

"It is clear that if the war requirements of the government are to be financed without undue expansion of banking credits, not only must there be some reduction of existing credits, but there will have to be applied a rigid check upon the further expansion of credit in directions not clearly essential for the prosecution of the war and for the health and necessary comfort of the people. It is no more possible to superimpose upon the volume of pre-war credits the immense volume of additional credit required by the government for war purposes than to superimpose upon the volume of pre-war production of goods the immense volume of additional goods required by the government to prosecute the war. Our problem is to convert less essential into more essential credit, and to convert less essential to more essential production and distribution of goods. The saving of credit and money goes hand in hand with the saving of labor and materials in the programme of adjusting the business of the country to a war basis, and our best hope of avoiding competition between the government and its citizens for credit, money, labor and materials, which can only result in credit and price inflation and higher costs of living, is saving.

"As far as expenditures are financed by the sale of new securities they are scrutinized under the direction of the minister of finance. As trustee of the individual banking credit of the country, however, the bankers are charged with the duty of studying and understanding that programme, in order that each and every one may in turn educate his borrowers and the people of his community to the necessity of saving credit as well as food and other materials and may thereby conserve the credit of his bank for the use of the government as far as may be practicable. It will be clear to bankers, also, that credit conservation is necessary not only for government financing, but also for the prosecution and preservation of the banks themselves, individually and collectively, since undue expansion of bank credits leads inevitably to unsafe and unsound economic conditions, and no stone should be left unturned to keep our banking institutions sound and strong.

"It is not the purpose to suggest the specific ways in which credit should be conserved, or unnecessary expenditures curtailed; each banker must determine this for himself. The subject can only be discussed here in general terms, with emphasis on the necessity that while credit conservation should be undertaken promptly it should be carried out gradually, with reasonable discretion and with the least possible avoidable embarrassment to the business of individuals and industries. Proper education of borrowers and customers to the needs of the situation will accomplish far more than abrupt discrimination or pressure.

"In the absence of any official classification of the more essential and the less essential things and enterprises it will be necessary for each banker in determining how he may do his share in the conservation of credit to use his own judgment. There seem to be, however, two clearly defined groups of loans:—

"(*a*) Loans to facilitate production or distribution:
"(*b*) Loans for non-productive or non-distributive purposes.

Loans for Non-Productive or Non-Distributive Purposes.

"Loans for non-productive or non-distributive purposes are usually loans for non-essential purposes. The following are types of this class of loan:—

"Loans for purchasing or carrying property, whether real estate or personal securities;

"Loans for additions to or improvements of property not used in production or distribution;

"Loans to provinces or municipalities for improvements.

"By inquiring the purpose for which each new loan is required, and declining wherever practicable to grant loans of these classes, and by gradually causing existing loans of these classes to be reduced or eliminated, bankers could conserve credit without causing hardship and also give many people an impetus to save at a time when saving is of vital importance to Canada. But discretion must be used in not forcing borrowers to reduce loans to an extent that is unreasonable or would cause avoidable hardship or embarrassment; much can be accomplished by sound advice and the exertion of moral pressure.

Loans to Facilitate Production or Distribution.

"The three main groups of borrowers for productive or distributive purposes are farmers, manufacturers, and merchants.

"The farmers are being asked to produce more than ever before and loans for productive purposes must have the right-of-way. But the kind of loans which should be discouraged or declined are:—

"(*a*) Loans for carrying over grain, cattle or other marketable products in the hope of obtaining higher prices and loans for the acquisition of additional property, unless the area under production is to be increased thereby and immediate results may be expected;
"(*b*) Loans for any construction not necessary to the productiveness of the farm within the year; and
"(*c*) Loans for the purchase of articles of comfort and luxury.

"In sections where farming profits have been large an endeavor should be made to induce farmers to apply a good portion of them to the reduction of long-standing loans or to the financing of their seasonal requirements, thereby conserving bank credit.

"Manufacturers who are making large profits should be urged to reduce or extinguish their debts rather than increase capacity and output unless the industry is one which is clearly necessary to the prosecution of the war. All manufacturers should be urged to carry as small inventories as practicable; to eliminate from their products elements which add to its cost but not to its intrinsic value and serviceability, or which are introduced simply for fashion or appearance;

Solid Growth

UP-TO-DATE business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

Assurances in Force have more than doubled in the past seven years and have more than trebled in the past eleven years.

To-day, they exceed by far those of any Canadian Life Assurance Company.

EQUITABLE

and to avoid as far as practicable introducing new styles during the period of the war.

Manufacturers whose product is not clearly required either for the prosecution of the war, or to maintain the health and efficiency of our civilian population, should be urged to assist the government by adopting at least a part of their plants to the manufacture of articles clearly required for these purposes. Bankers would do well to scrutinize carefully the credits of those engaged in industries not clearly essential for those purposes since such industries are likely to be the first ones to suffer interruption from transportation, fuel or power embargoes.

"The payment of large dividends by manufacturers, under existing conditions is strongly deprecated. It is highly expedient that the present abnormal profits, due to the war, should be conserved to ensure, as far as possible, the continuance of ordinary dividends, and to provide for the unforeseen contingencies that will arise during the reconstruction period after the war. There will then be large demands for capital for new industrial development.

"Almost the same suggestions that have been made with regard to the production of goods by manufacturers may be applied to the distribution of goods by merchants, namely, reduction of stock carried, reduction or elimination of that portion of their stock consisting of articles of mere fashion or luxury and the substitution of plainer and more serviceable articles, and the avoidance of the introduction of new styles in clothing, articles of personal comfort, etc.

"While it is impracticable to deal with the subject more specifically at the present time every general manager is urged to assist in the movement and is respectfully invited to point out to each branch manager that the latter can have a part in thus promoting the national interests by—

"(*a*) Studying and understanding the economic necessity for the conservation of credit;

"(*b*) A careful analysis of each loan in his branch to ascertain those which are the least essential to the prosecution of the war;

"(*c*) Applying to each application for a new loan the test, 'Is it necessary for the prosecution of the war or the health and safety of our civilian population?'

"(*d*) Discussion with other bankers in the same place or neighborhood as to methods of credit conservation which it may be practicable for them to undertake;

"(*e*) Urging his local trade organizations and board of trade to study the subject and make definite recommendations for the conservation of credit and the conversion of less essential to more essential production and distribution;

"(*f*) Discussing the matter with his customers with a view to educating them to the necessity of keeping their demands for credit at a minimum;

"(*g*) Exerting his influence upon his neighbors and his municipality to reduce expenditures for improvements to a minimum during the period of the war. Postponement of every improvement not absolutely necessary for health and safety should become a national policy;

"(*h*) Acting always with discretion and reasonableness.

"The conservation of credit and money will result in the saving of labor and materials which the government needs for the prosecution of the war; and every improvement or expenditure which an individual, a corporation, or a municipality refrains from making during the war represents a requirement to be fulfilled when the war is over.

"Merchants and manufacturers will readily understand that present saving is laying up for the future an important reserve purchasing power which they may count on during whatever period of readjustment may follow the end of the war, and it must be apparent to every banker that the larger the savings his customers make the larger the deposits such savings will inevitably create."

The Italian military administration is requisitioning for its own use all the wool produce in Italy, and transactions between private parties are forbidden.

All eating places must be under license by July 1st, the time having been extended from June 1st to allow opportunity to handle some 5,000 applications.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Nanaimo, B.C.—June 24—Mr. F. Shelly's dwelling house was destroyed. Estimated loss, $3,000.

New Westminster, B.C.—June 25—House of Mr. Peter Bilodeau was damaged. Caused by spark falling on roof. Estimated loss, $200.

Norton, N.B.—June 28—Residence and a number of outbuildings of L. N. Schofield were destroyed.

Toronto, Ont.—June 28—Two barns at the Exhibition Grounds were damaged. Estimated loss, $2,000.

Vancouver, B.C.—June 2—Premises of W. H. O'Neill & Company were damaged. Estimated loss, $40,000.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Strome, Alta.—The business section of the town was damaged on June 13th. A total insurance of $34,455 was carried. The following companies are interested:—Caledonian, $3,300; Royal, $1,700; Norwich Union, $2,400; St. Paul, $1,000; General Insurance Company of Perth, $1,000; Hartford, $1,750; North British, $1,400; London Assurance, $1,200; Northern, $3,000; National of Hartford, $1,000; American Central, $7,000; North Empire, $6,000; Ocean Accident, $4,515. Loss about one-quarter.

Warner, Alta.—Large part of town was damaged on June 19th. A total insurance of $40,475 was carried. The following companies are interested: Globe and Rutgers, $625; Home, $1,000; Canada National, $5,000; Springfield, $15,050; Hudson Bay, $1,000; Canadian, $2,400; Occidental, $2,200; Phœnix of Hartford, $17,500; Law Union and Rock, $2,500; Northern, $400. Loss, $42,560.

NORTH AMERICAN ARMS COMPANY

A new industry of substantial size has just been organized under the name of the North American Arms Company. It will take over the old Ross Rifle plant at Quebec, and will manufacture automatic revolvers for the United States government. The capital of the company is $2,000,000. The president is Mr. T. A. Russell, vice-president of the Russell Motor Company, and the vice-president is Mr. H. C. Scully, assistant manager of the Russell Motor Company. Mr. Thomas Craig, formerly manager of the Ross Rifle Company, will be manager and most of the employees will be retained.

At the conclusion of last night's session of the Grey County Council the by-law appointing Mr. John Parker county treasurer, to succeed his uncle, Mr. S. J. Parker, was given the final reading. The former has been deputy treasurer for some time, and until about a year ago was principal in the firm of Parker & Company, the oldest drug firm in that section of Ontario. He is a director in the United Drug Company, and also a director of the Grey & Bruce Loan Company.

The Russian Enigma in Trade and Finance

Canadian Trade Commissioner Regards Field as Enormous—Manufactures Have Ceased and Imports are Largely Cut Off—Political Action Necessary as Preliminary to Trade Connections — Transportation and Finance Facilities also Necessary to Promote Trade.

THAT an unusual opportunity for the promotion of Canadian trade abroad exists in Russia is the opinion of Mr. C. F. Just, who for some time past has been Canadian Trade Commissioner in Moscow. Prior to 1914, of course, Russia's principal trade was with Germany, not only because of geographical contiguity, but also because the Russian market was carefully developed by the German interests. There are also in Canada at the present time two other Canadians who are familiar with Russian conditions, namely, Mr. R. S. Botsford, of the Russian Reclamation Company, of Petrograd, and Mr. J. W. Mitchell, of the R. Martens Company, of Petrograd. These two gentlemen, together with Mr. Just, recently addressed the Montreal Board of Trade regarding the possibilities of export business with Russia and outlined the following preliminary action which they considered necessary. First, co-operation on the part of Canadian manufacturers for the production of specialized articles; second, the provision of adequate transportation facilities to Russia; and third, the arrangement of financial machinery.

Mr. Just has been connected with the Canadian department of trade and commerce for a long time. Prior to the war, Mr. Just was Canada's trade commissioner in Germany and for nine months subsequent to the outbreak of war he was confined in Hambourg. His exchange, however, was effected by the British authorities and after returning to Canada he was sent to Russia in 1916. Mr. Just remained there until the outbreak of the revolution when he was compelled to give up his work. He accompanied the British, French and Italian Embassy officials to Helsingfors, in Finland. From there he succeeded in reaching Sweden and Scotland.

Regarding action on the part of the Allies, Mr. Just recently stated: "The main thing for the Allies to do at the present time is to impress on the Russians that they are their friends in spite of all. If commissions are seen to assist Russia, they must render practical help and take care not to give an impression that they intend to exploit the country. That is Germany's policy and one that must be avoided at all costs by the Allies."

Mr. Just views with alarm the nationalization policy which is being attempted by the Bolshevik government. He forecasts the overthrow of the present administration as soon as the peasant class becomes alive to the fact that the lands which they now hold are not theirs in fact, but are really held by the government, under the system which has been inaugurated. Mr. Just has great faith in the system of provincial government in Russia and believes that these units have helped to maintain the organization of the country.

Mr. Just is particularly firm in the view that the Allies must not abandon Russia, and favored the suggestion that commissions be formed by the allied countries to establish the national services of Russia on a solid basis, as soon as a responsible government has been formed. These views are in line with general opinions in England and the United States. The recent announcement of the United States government is, in fact, in the direction of still milder action. Suggestions regarding the political and economic reconstruction of the country are to be made and the services of the Allies are to be at the disposal of Russia. The only military force that will be sent, however, according to the recent announcement, is a small one, just sufficiently large to guard the actions of the Allies and to prevent interference from German sources.

It seems, in fact, that in this case a political arrangement must precede commercial relations. It is useless to attempt trading with Russia until a reasonable strong government is established and the necessary financial machinery is in working order.

Opinions of considerable authority on the Russian situation were recently expressed by Mr. William Martin, writing in the Swiss "Journal de Geneve," as follows:—

"Economic life has stopped completely. The strike has become general. The few offices that help in the search for employment are directed by illiterate and dishonest workmen. Trotzky himself, at a recent conference held in Moscow, said: 'I am compelled to admit that the results obtained by the workmen are equal to nothing.'

"The officials of the old government agree to do hard work to earn their living. Manufactured products are lacking because they are not being manufactured; food provisions are lacking because the farmers are keeping their products for themselves. In addition, the means of transportation are lacking, and the money, which is being concealed.

"Nobody carries any money to the confiscated banks, which are slowly being emptied. In Moscow alone the banks have paid out 1,700,000,000 rubles (nominally

$850,000,000, without receiving a single kopeck for investment. The strikes and the continual rise of prices are becoming complicated with each other, and as a result a very great part of the population is going from the cities to the country.

"The distribution of the land has been realized; but the organizations which were supposed to carry it out took no part in it; the distribution was performed in a simple manner and by force. The boldest have taken the most, the less bold have taken less, but the majority have received nothing. This distribution of the land has not resulted as it was expected in the suppression of private property, but in the cutting into extremely small bits of the entire land. The disbanded army has returned to the interior and the soldiers have become brigands."

Not long ago the Bolshevik organ, "Izvestia," stated that economic aid was not wanted if it would lead to a re-entrance of Russia into war with Germany. Apart from this, however, assistance would be permitted and even welcomed. It is evident, therefore, that the slightest move in the direction of coercion will result in the enmity of the Bolshevik government. How long that government will last is a different question, but there are signs already of disruption. The Czecho-Slovak forces have control of the Vladivostock region and of the eastern end of the trans-Siberian railway. As this element appears to be the most favorable to the Allies, their control of the road is important, especially in view of the danger of communication with Russia being entirely cut off by Germans and Finns seizing the road to Archangel.

Mr. Wilgress, who was formerly located as Canadian trade commissioner at Omsk, in the interior, is now in Vladivostock. The latter, therefore, appears to be the best centre for Canadian trade at present.

CITY OF TORONTO BOND ISSUE

City of Toronto 5 per cent. serial gold bonds, due 1919-1947, are being offered by a syndicate, headed by Dominion Securities Corporation, A. E. Ames and Company and Wood, Gundy and Company. They are offered at a 6 per cent. basis.

NEW ROAD WANTED IN BRITISH COLUMBIA

The Imperial Oil Company, of Port Moody, B.C., recently waited upon Premier Oliver at Victoria, requesting that a road be built to their refining plant in Port Moody. Two miles of road, costing about $10,000, would be required. The deputation pointed out that the company pays $30,000 a year in provincial taxes, and that at present its 250 employees have to make the trip by boat. The premier promised that the subject would have the consideration of the government.

FOR DISABLED OFFICERS

Nine disabled British army officers will arrive in New York soon to engage in the cultivation of orchard lands under the auspices of the Imperial Association for Assisting Disabled Naval and Military Officers, it has been announced. The Imperial Association is making a general effort in the United States to find places for men whose health will not stand the English climate, and a British officer who owns a large orchard in the state of Washington has placed a part of it at the disposal of his injured countrymen.—Reconstruction, July, 1918.

EXPORTS OF MANGANESE ORE

Permission has been granted by the Dominion government for the export of manganese ore to the United States. Formerly the ore could be exported under license, but it was practically impossible to secure a license. For a considerable time there has been some of the ore ready for shipment near the mines in British Columbia, and the provincial government approached Ottawa upon the subject, with the result that the necessary permit will be immediately issued and export shipments authorized. The limit set is 5,000 tons.

The Canadian General Electric Company, Limited, has opened a branch office and warehouse at 27 Notre Dame Street West, Montreal.

As part of Montreal's programme of reducing expenses, the city's legal department has come in for its share of criticism. This department, which cost $[illegible]8,450 in 1913, now costs $74,600. Included in the payroll is a chief attorney at $15,000 per year, an attorney at $6,500 per year, and a number of other attorneys at $5,000 per year, in addition to the clerical staff.

UNITED STATES TELEGRAPHERS TO STRIKE

July 8th has been set as the date for a strike of the Western Union telegraphers, according to Mr. S. J. Konenkamp, president of the Commercial Telegraphers' Union of America. Mr. Konenkamp predicted that 25,000 of the operators would be involved.

NICKEL PLANT AT PORT COLBORNE

The nickel plant of the International Nickel Company of Canada, Limited, which has been under construction at Port Colborne, Ont., for almost two years past, was opened on Monday, the 1st instant. It is expected that from 20 to 24 million pounds of refined nickel and 12 million pounds of copper will be produced annually. The plant is also so constructed that the output could be increased four times.

QUEBEC TO HAVE TRADE COMMISSIONER

The Quebec board of trade is planning to employ an expert trade commissioner to promote the city's industries. A finance committee of the board of trade has been named to take charge of raising the money required for this purpose. The industrial committee has appointed several sub-committees to look after special questions regarding the commerce of the city.

A commissioner of this kind has been employed by the city of Three Rivers and new industries with a payroll totalling $30,000 per month are attributed to his efforts.

PRIZES OFFERED FOR VICTORY LOAN POSTERS

At a meeting of the Victory Loan Publicity Committee, held in Ottawa on Friday, the 6th instant, it was decided to offer a number of prizes to Canadian artists for designs of posters to be used in the next war loan campaign. The prizes will be donated by prominent citizens. For the best prize a $1,000 Victory bond is offered, for the second best a $500 bond, and for the third, bonds to the value of $250. All other posters accepted by the committee will be paid for with $100 bonds. Mr R A Stephenson, 26 King Street East, Toronto, is in charge, and designs must be received not later than July 25th.

The aggregate value of the building permits of Vancouver for the half year just closed was $665,855. During the first six months of 1917 they totalled only $323,894. Permits for June this year show a considerable increase over June of last year, the past month's total being $50,300, while for June, 1917, the permits issued amounted to $44,555.

CROP CONDITIONS THROUGHOUT CANADA

Prospects are Still Very Uncertain—Much Variation in Localities

A summary of telegraphic crop reports received on the condition of field crops throughout Canada was issued on July 3rd by the Dominion Bureau of Statistics as follows:—

Atlantic Provinces.—In Prince Edward Island splendid growing weather has assured an excellent hay crop. Grain and potatoes are well up to average. Frost on 20th and 21st June damaged beans, tomatoes and early potatoes in some sections. Roots and corn are making good growth. In Nova Scotia (Kentville) June has been cool and very dry. Frost on the 21st reduced bean crop 15 per cent. Corn has made inferior growth. Grain and roots looking well. Hay very poor, about 40 per cent. of normal. Apples a fair crop; about half a million barrels. In New Brunswick (St. John) excepting local frost in some sections which damaged beans and potatoes, June has given favorable weather for seeding and growth of crops. More grain has been seeded than usual. The hay yield will be large. Pastures are excellent and dairy production good.

Quebec.—Bonaventure. General growth medium. Hay fine. Eighty per cent. of grain has germinated well. Frost caused damage to beans and other vegetables. Much rain and temperature cool. Ste. Anne de la Pocatiere. Hay will give an average crop. Wheat is good on drained land but rather backward on the whole. Other grain only fair and rather late. Potatoes are promising on dry land. Cap Rouge. Meadows and pastures look very well. Grain and silage corn are suffering from excess of precipitation and lack of heat. Potatoes are good on high land and poor on low spots. Swedes are coming up nicely. Actonvale. Gardens injured by recent frosts. Cereals have good appearance. New prairie hay good; prairie hay over two years medium. Pasturage very good. Cold weather to date greatly hindered development of vegetables and hay. Makamik. Hay suffered from winter killing. The condition of cereals is very good but growth late. Potatoes are late coming out. Shawville. Crop conditions fair; wheat and peas good; oats and corn backward. Some spots touched with frost; hay crop very thin, but improving rapidly with recent rains. Root crops and potatoes fair; beans doing well, but late.

Ontario.—Ottawa and district. Hay is poor to fair. Of wheat, which is little grown, the crop is only fair. Oats promise well. Corn for silage is very backward. This crop is also poor in south-western Ontario owing to bad seed which failed to come up. All kinds of roots and also potatoes promise well. Pasture has been good on the whole.

Manitoba.—Brandon. June very dry with hot winds. Crop prospects poor

Saskatchewan.—The Provincial Department of Agriculture reports (June 25) that while the whole province has more or less been affected by the recent drought, the crop in no district is entirely ruined. Rains throughout the province have proved beneficial, arriving just in time in many districts to save the situation. Indian Head. The early part of June was dry accompanied by hot winds which retarded growth to a considerable extent. However, during the past week rain fell on the 24th, 25th and 27th. This with cool, cloudy weather has greatly improved crop conditions, and prospects at present are for a fair average crop. Scott. Owing to drought, late sown grain has failed to germinate. Early sown oats have been frozen off badly. Rain must come immediately if any crop is to be harvested in the prairie section. Conditions more favorable in northern part of district.

Alberta.—The Provincial Department of Agriculture reports that during the past month growing conditions have been somewhat irregular. In the early portion growth was hindered by cool weather and lack of moisture with strong winds in a few disricts. Warmer weather prevailed after the tenth with light showers. Crops injured from early frosts, but recovered rapidly as weather became warmer. Good growing weather after middle of month, and all crops, excepting in a small area where more rain is needed, progressed very favorably. While conditions have not been ideal, an average crop over a very large portion of the province is assured. Hay, however, will be shorter than usual, but there is a good promise of an extra yield of vegetables. Warm weather and frequent showers during past week have greatly brightened outlook for the harvest. Lacombe. First three weeks of June were windy, warm and dry. Early sown crops made slow growth, being delayed by insufficient moisture, and in certain areas by drifting sand. During last week rain fell over greater portion of central Alberta supplying immediate needs of grain crops. Hay will be light.

British Columbia.—Agassiz. Weather conditions during June decidedly unfavorable for growing crops. Cereals, roots, hay and pasture badly in need of moisture. Livestock in fair condition. Summerland. June drop in all fruits very heavy. Present indications show only medium crop in apples, pears, plums and apricots. Peaches on trees well attended to have good crops. Hay crop will be short. Grain will be light under dry farming. Season very dry and getting hotter. Sidney, V.I. Drought conditions continued during the month. Hay, averaging one ton per acre, has been harvested in good condition. Autumn wheat fair. Spring grains short. Small fruits, vegetables, roots and potatoes will yield low. Orchard fruits fair. Rain needed.

The report of the executive of the Canadian Northern Railway Company, summarizes the conditions in the west as follows:—

"An optimistic tone characterizes the weekly report on the growing grain in Manitoba, Saskatchewan and Alberta. The report shows that rain has fallen over the larger part of the vast grain-growing areas served by the company's more than six thousand miles of line in the three prairie provinces in Canada. Where last week the majority of the agents reported a need of rain, that of the week under review shows but 44 agents calling for moisture. In a few cases there is a complaint of continued high winds, and consequently rapid drying out of the ground. But the great majority declare moisture as sufficient, and that conditions are satisfactory for the growing grain.

LEVIS LOAN APPLICATION TURNED DOWN

On Tuesday, the 3rd instant, a delegation of ratepayers of Levis, Quebec, waited on the provincial government for permission to borrow $134,000. The loan, however, had not been approved by the ratepayers and the government refused it until it had been submitted.

KELOWNA REQUIRES MORE WATER

At a recent meeting, held in Kelowna, British Columbia, the subject of an increased water supply for the Glenmore valley was discussed. A committee was appointed, which has been authorized to make every effort to obtain more storage accommodation by increasing the number of dams. At present there is one dam holding the supply of water for the district and a second is under the course of construction. The construction of two more is being advocated to ensure a plentiful supply.

QUEBEC TAX RATE

On June 28th the city council of Quebec approved of a by-law adding 40 cents per hundred dollars of assessment to the tax rate. This makes the rate $2.37 per hundred, or 23.7 mills. The budget at present shows a deficit of $256,466, which was largely the reason for the increase in the rate. The city also has a bill of $26,000 from property owners whose property was damaged in the recent riots in Quebec. The city will not be subject to any liability for deaths, as a proclamation had been issued, giving the necessary warning beforehand.

Y.M.C.A. PUBLISHES STATEMENT

There appears in this issue the annual statement of the National Council of the Young Men's Christian Association of Canada for the year ended December 31st, 1917. The total receipts were $4,329,654, including about $190,000 brought forward from 1916. Of the funds received during the year, $2,081,707 was derived from canteen sales and $1,151,030 from subscriptions, so that the contributions were 38 per cent. of the total business transacted. The cost of the goods sold was $2,368,486 which does not include transportation, etc. Apart from this, the largest items are for huts and equipment, entertainments and salaries.

The publication of this statement has been delayed by reason of the difficulty of sending the auditors to France.

PERSONAL NOTES

Mr. A. Norman Strang has become manager of the new Winnipeg office of C. Meredith and Company.

Mr. Norman B. Lambert, of Winnipeg, has been elected secretary of the Canadian Council of Agriculture.

Mr. S. Casey Wood, B.A., LL.B., has been appointed to the directorate of the Home Bank of Canada.

Mr. William Hay, formerly with the Travellers Life of Canada, at Winnipeg, has been appointed to the staff of the Northwestern Assurance Company.

Mr. George Wright, president of George Wright and Company, has been asked to accept a seat on the board of the Toronto Hydro-Electric Commission.

Mr. Chas. J. Haig, commercial agent of the Grand Trunk Railway system at Philadelphia, Pa., has been assigned to other duties. The office has been abolished.

Mr. J. A. MacKenzie, formerly agency manager for Canada for the London and Lancashire Life, is assuming an important position with the Northwestern Life Assurance Company.

Viscount Rhondda, the British Food Controller, died on Wednesday, the 3rd inst. As Mr. David A. Thomas he was one of the most prominent Englishmen, owning large coal mines in Wales.

Sir Edmund Walker, president of the Canadian Bank of Commerce, will, on July 24th, have completed fifty years of service with that institution. A new issue of notes will be made to commemorate the event.

Sgt. John Z. Machado, son of Mr. J. A. Machado, of the American Bank Note Company, Ottawa, has been awarded the Croix de Guerre and Silver Star by the French government for bravery in rescuing wounded.

Mr. Frederick Lieberman, formerly an insurance broker at Winnipeg, and who previously had a part-time contract with the Northwestern Life Assurance Company, has been appointed to the staff of that company.

Mr. L. O. David, city clerk of Montreal, has resigned, after holding that position since 1892. Mr. David was also called to the Senate in 1903. He was granted the pension to which he was entitled by Montreal by-law.

Prof. W. W. Swanson, of the University of Saskatchewan, is at present making a tour of the province of Saskatchewan, addressing meetings of grain growers, from Prince Albert in the north to Yellowgrass in the south

Mr. A. H. Mellor, who has been secretary of the Great North Insurance Company, Calgary, since it began business in 1911, recently died after a short illness. His position as secretary of the company has been assumed by Mr. T. J. North.

Mr John W. Woodthorpe, F.C.A., senior partner in the firm of Woodthorpe, Bevan and Company, of Vancouver and London, England, has been elected vice-president of the Institute of Chartered Accountants in England and Wales for the ensuing year.

Mr. R. G. Black, of the board of the Toronto Hydro-Electric Commission, has resigned his position. He has been with the commission for the last four and a half years and previous to that was general manager of the Toronto Electric Light Company.

Prof. S. A. Cudmore, of the Department of Political Economy, University of Toronto, has returned to Toronto after spending some time in Ottawa, where he was engaged in connection with the reorganization of the Department of Dominion Statistics.

Mr J. G. [illegible], who, for the past two years has been investigating deputy of the fire commissioner's office for the province of Saskatchewan, has resigned, to become claims adjuster for the western department of the United States Fidelity and Guaranty Company, with head office in Winnipeg.

Mr. Rene Bauset, formerly assistant city clerk, has been appointed city clerk of Montreal, in succession to the retiring clerk, Mr. David. Mr. J. Trepeau, second assistant, becomes first assistant clerk, and Mr. J. E. Gauthier, secretary, becomes second assistant. They have all been in the city's employ for some time.

Count Stephen Malczewski, a Polish nobleman, who formerly owned large estates in Poland, which he lost in the revolution, and who, after escaping to Canada, was employed by the Saskatchewan government, has joined the ranks of the Northwestern Life Assurance Company, and has a splendid record of new business to his credit.

Controller Wallace and Aldermen Heaps and Queen, members of the civic coal committee of Winnipeg, left on June 30th for a trip to the western coal fields in the interest of the city. They will probably go to Calgary and make that city their headquarters while conducting a thorough survey of the coal areas from which it is hoped to secure the city's supply for next winter.

Lieut. Douglas L. Macaulay, son of Mr. T. B. Macaulay, of the Sun Life Assurance Company of Canada, has been appointed to a position on the United States Commission responsible for the manufacture of aeroplanes in that country. Lieut. Macaulay is a graduate of McGill in both arts and science and has rendered excellent service in the flying corps in France. He will make his headquarters in Washington.

Mr. J. G. Foley, clerk of the Crown in Chancery, has been superannuated. Mr. F. Chadwick, deputy clerk, is in charge of the office for the time being. Mr. Foley was appointed clerk of the Crown in Chancery in April, 1908, in succession to the late Mr. Lamothe. He entered the Civil Service 35 years ago in the department of the interior, later transferring to the privy council office. He was appointed deputy clerk of the Crown in Chancery in 1892.

Mr. Charles G. Cowan, general sales manager of the American Bank Note Company, Ottawa, has been promoted to a responsible position in the foreign department of the company's head office in New York and leaves within a short time to assume his new duties. Mr. Cowan has been connected with the American Bank Note Company for 13 years, having acted for some years as assistant to Mr. Machado, vice-president in charge of the Ottawa plant. For the last five years he has occupied the position of sales manager.

LONDON AND LANCASHIRE LIFE AND GENERAL

A total of $5,791,518 has been invested in the securities of the governments of Great Britain, Canada and the other British Dominions by the London and Lancashire Life and General Assurance Association, Limited, of London, England, whose annual report appears upon another page of this issue. Another feature of the annual report, which is for the year ended December 31st, 1917, is the increase in the company's assets, which now total $24,668,447. The assets have more than doubled in the past nine years, as at the end of the year 1908 they totalled $12,133,780. In addition to the holdings of government securities, there are also large items of railway and other securities and mortgages on property in the United Kingdom. Loans on policies total $1,025,145. The number of policies issued during the year was 2,016, and the amount of new annual premiums resulting is $226,000. The total income from the life department is $2,919,350, and the life and annuity funds amount to $10,948,790.

The head office for Canada is in the London and Lancashire Life Building, Montreal, and Mr. Alex. Bissett has been Canadian manager for many years

Mr. Bissett is an experienced and competent underwriter, and the company's business in Canada has prospered well under his management.

Messrs. T. Bradshaw, Geo. Wright, Fred. Bancroft and T. A. Stevenson, all of Toronto, have been appointed arbitrators to deal with the civic employees' strike there.

The arrangement between the directorates of the Canada Permanent Mortgage Company and the Oxford Permanent Loan and Savings Society, by which the latter company is to be purchased by the former, was ratified by the shareholders of the Oxford Permanent at a meeting recently.

TORONTO'S FINANCIAL POSITION

The annual report of Toronto's finance commissioner, Mr. Thomas Bradshaw, is a lucid statement of the financial condition of the city, and points out with no less clearness the policy necessary for maintaining and improving the city's position. Mr. Bradshaw points out that sinking funds are provided for every loan, which sinking funds have been maintained, and if this policy is continued they will automatically repay the debt upon maturity. The gross debt, therefore, of about $100,000,000 is set off by about $25,000,000 of sinking funds, and the condition of the city is not as critical as first appearances would indicate. The high tax rate includes a considerable portion for the maintenance of the debt, which portion itself includes amounts levied for the sinking fund.

If no further obligations were assumed before 1921, much of the local improvement debt would be repaid, and a considerable part of the ordinary debt. All of the works being constructed at present are merely to carry out plans laid several years ago. No new works are at present being considered so that there is little prospect of borrowings for capital and expenditures in the near future, unless possibly for war purposes. There need, therefore, be very little addition to the city's debt for several years, and the production through maturities can more than offset the increase. This is greatly to be desired as opinion appears to be in favor of assuming the street railway system when the franchise of the Toronto company expires in 1921 and large obligations would in that case be added to the city.

Mr. Bradshaw is a high-priced civic employee, but his services have already more than repaid the investment. The difficulty is that proper attention is not always given to his recommendations, and civic officials who know nothing whatever regarding finance, take upon themselves the responsibility of criticizing his proposals. When the tax rate for the current year was being discussed, it was moved and very nearly carried that instead of raising the tax rate to meet the requirements a short-term loan should be issued. In support of this recommendation the usual arguments that rapid growth after the war would bring increasing population, assessments, etc., and that the cost of the war should be shared by citizens of future years, were made use of. Fortunately, however, the sounder counsels prevailed, and the tax rate was increased to 30½ mills, an unprecedented figure, with the result that the city did not need to resort to an unfavorable market to secure the funds which would otherwise have been required.

Before striking this high tax rate, efforts were made to prune the estimates wherever possible. The estimates were invariably just as high as usual, and many heads of departments submitted estimates requiring greater totals than previously. While it is a very desirable thing that heads of departments should be thoroughly absorbed in their work and desirous of furthering it in every possible way, there is at the present time a very excellent opportunity for a somewhat broader view to be taken by department heads. This applies equally to other municipalities in Canada. When municipalities are hard pressed to provide funds necessary for their essential works, it is somewhat inconsistent for heads of departments, such as the education and health departments, to submit estimates larger than usual. This has been the rule rather than the exception with Canadian cities since 1914. A different example is shown by the city of Minneapolis, which within a year after the United States had declared war, reduced its estimates by 50 per cent. and expects to reduce them to about 40 per cent. of their former amount. In the case of a city like Toronto, about 40 per cent. of whose expenditures is for the maintenance of the public debt, this is, of course, impossible, but there are a number of departments which afford ample lee-way for reduction, and such reduction may before long be required in order to assure municipal credit.

UNITED STATES RAILROAD SITUATION

Some surprise was brought forth by the recent action of the United States Railroad Administration in handing back to the owners the entire control of approximately 2,000 United States railroads. These were, of course, short-line roads, electric feeders and plant facility lines. There remain in the hands of the railroad administration about 200 short-line railroads. It is obvious, therefore, that it is the intention of the government to retain control of the great roads which are essential to the industries of the United States, and to leave those roads which serve particular industries or outlying communities. Many of the returned roads, in fact, were built merely to serve single industrial plants such as lumber concerns, coal mines, etc. About 200 are electric feeders to the main-line roads and less than 400 are short-line railroads doing the general business of the common carrier between two or more localities.

This action of the railroad administration has no doubt been influenced by the results of the first year's operation of the roads by the government. It was not necessary to operate these 2,000 short roads in order to determine whether they were essential to the industries of the country. It was clearly obvious in the first place that this was not the case. Had the government operation of the roads been successful in the economic sense, there is no doubt that these lines would have been retained together with the longer lines. Their return, therefore, is a frank admission that the government cannot operate the lines with the same efficiency as the owners themselves. Whether the lines are operated by the owners or by the government the former are going to do all in their power to make them safe and profitable investments. The work of the government cannot assist them in this direction and is, therefore, unnecessary.

In retaining the large lines, however, the government maintains with consistency its original policy. These are the ones upon which every industry depends to a greater or less extent. It is, therefore, for political, not for economic motives, that these are operated by the government. In fact, it is generally admitted by all who examine the results that the expenses of operation have increased more rapidly than would have been the case under private control. Not only was a general increase in rates of 15 per cent. insufficient to meet this increase, but also the government found itself with a substantial deficit to meet. After many years of consistent restrictions of rates and consequent depreciation in the value of railroad securities, the United States government found itself almost immediately after assuming the business of railroading, necessary to make a much larger increase in rates than had been even considered while the rates were in private hands.

SHARING THE WAR BURDEN

It is understood that at the next session of the Dominion Parliament, a measure will be introduced providing for the assumption of the patriotic fund by the Federal Government. This is a measure which will meet with wide approval, as the provision of the funds by voluntary giving has become impracticable. It is becoming more and more recognized that the expenses of the war should fall upon the body which is conducting it, and that is the Dominion Government, rather than upon individuals or communities who are willing on their own initiative to bear a portion of the expense. Not only has this fund been maintained by the contributions of individuals, but many municipalities have been for some time making regular grants. The change, if it is adopted, will relieve these municipalities of this expense, at a time when municipal finances are, generally speaking, not in too good shape. The same injustice applied as in the case of individuals, for some municipalities were making grants for this purpose, while others made none whatever.

At the same time, the fact that this will entail still another burden upon the national finance must be realized. This is one of the few items of war expense which, fortunately, has not been increasing to a large extent. So far the draft has applied only to single men, and voluntary enlistments of married men have practically ceased. At any time, however, a much larger burden may be involved under the allowances of the fund. In any case, the regulations of these payments can be adjusted more in accordance with the system of army pay and allowances, and with the work board of the pension commissioners. It also adds still another obligation to subscribe for war loans, and can be used in this way in the coming campaign. With the obligation to contribute to the fund removed, the arguments for subscription can be the more forcibly applied, and subscribers will then receive an excellent interest return upon their contributions.

FIRE INSURANCE COMPANY OF CANADA

Mr J. E. Clement, who founded and was up until a few weeks ago manager of the Mount Royal Assurance Company of Montreal, was in Toronto last week attending to matters in connection with his new company, the Fire Insurance Company of Canada, which will soon make its bow to the insuring public. Mr. Clement reports that prospects for the success of the new company are exceedingly bright.

During his connection with the Mount Royal Assurance Company Mr Clement proved himself a most capable underwriter, and succeeded in putting the Mount Royal on a most substantial basis

Under his guidance it is reasonable to assume that the Fire Insurance Company of Canada will meet with entire success. The new company has opened offices in the Lewis Building, Montreal.

On June 27th, Belgium was given another credit of $9,000,000, bringing the total loaned to that country up to $131,[illegible],000, and the total to the allies to $5,981,500,000.

BOND HOUSE OPENS NEW BRANCH

C. Meredith and Company, Limited, of Montreal, have opened an office in Winnipeg. A short time ago they also opened a branch in Toronto, and these, together with the head office in Montreal and the office in London, England, make a total of four. Mr. A. Norman Strang, formerly of Quebec, who was eleven years with the Canadian Bank of Commerce and five years in general financial business in the west, has been appointed manager of the Winnipeg office.

HAILEYBURY TO PURCHASE TOWN PARK

The town council of Haileybury, Ont., has resolved to purchase a site for a town park, and a piece of land adjacent to the north end of the town has been purchased. The land is about 57 acres in extent, has a frontage of about 800 feet on Lake Temiskaming, and is to some extent covered by trees. The Nipissing Central electric car line, as well as the automobile road, passes along the site. The name of the park will be Lakeview Park.

UNION OF CANADIAN MUNICIPALITIES

Tax Sales Favored as Only Method of Securing Arrears of Taxes

(Staff Correspondence.)

Victoria, B.C., July 11th, 1918.

At the annual convention of the Union of Canadian Municipalities held in Victoria, B.C., on Tuesday, Wednesday and Thursday, July 9th, 10th and 11th, resolutions were adopted to the following effect:—

First. Compulsory annual tax sales favored as the only method to prevent delinquency in taxes, which is so serious at present in the west.

Second. That the Dominion government be called upon to execute a survey in order to ascertain what public works will be required by municipalities after the war, so that provision may be made against unemployment.

Third. The work of the commission of conservation was approved.

The convention was attended by municipal officers from many parts of Canada and the Dominion Civic Improvement League met at the same time. The delegates were entertained by the Victoria City Council. In addition to a dinner given for them, the shipyards and Esquimalt Naval Yard were visited on Thursday. The new Dominion Astro-Physical Observatory at Saanich Hill, near the city, was also inspected.

The general effect of the war on municipalities was discussed and opinions seem to be that though prosperity prevailed at present, this was the result of artificial conditions, such as war contracts and high prices. The president, Mayor Hardie, of Lethbridge, said in his address that proper and intelligent municipal government is of greater importance in the upbuilding of Canada than either the provincial or federal governments, as the former bodies are closer to the life of the people and represent more truely than any other government the calibre of the citizens who made up the population. Mr. W. D. Lighthall reviewed the work of the year and secured the passage of a resolution endorsing the action of the executive in protecting public rights during the consideration of the Consolidated Railway Act in parliament. An attractive address was also given by the Hon. Wilfred Gariepy, minister of municipal affairs for Alberta, on the best method to face after the war problems. Mr. Gariepy claimed that property qualification for citizenship should be replaced everywhere by residence qualifications as ownership had ceased to command its former respect in Canada.

A letter was also received from the Canadian Bond Dealers' Association concerning the credit of western municipalities. This letter was filed after considerable discussion.

Mr. Thomas Adams, the town planning advisor of the Commission of Conservation, gave an address on Wednesday afternoon before a joint session of the municipalities union and the Dominion Civic League. This joint session was presided over by Alderman Owens, of Vancouver. Mr. Adams' topic was the housing question and details of his address are given elsewhere in this issue of *The Monetary Times*. The main points were that if government housing were resorted to in this country, it should be carried out by a joint partnership of federal and municipal authorities. He stated that the federal government should provide funds and set up a skilled advisory and supervisory board. It should not build houses directly under its own control except for employees in government factories, arsenals, naval establishments or railways. In all other operations housing operations connected with countries, industries and returned soldiers, should be carried out by municipalities with the aid of funds and expert advice provided by the federal government. Departments of provincial governments should, according to Mr. Adams, take the responsibility for the proper administration of municipal housing schemes under the regulations of the federal government, subject to its supreme control in matters of finance. For the present no housing scheme should be carried out unless for some purpose directly connected with production necessary for the prosecution of the war. Mr. Adams explained that he intended to press the matter in British Columbia as soon as work at Halifax was completed, and that he arranged to speak on the subject at the meeting of the Union of British Columbia municipalities in Penticton next September.

Mr. J. N. Bayne, deputy minister of municipal affairs for Saskatchewan, also spoke at the afternoon conference on municipal responsibility. In regard to economic development of land, Saskatchewan, he pointed out, had just adopted a town and rural development act, which brought all English-speaking provinces into line except British Columbia.

Mr. Thomas Bradshaw, of Toronto, who was to read a paper entitled, "The Maintaining of Municipal Credit," was unable to be present at the convention.

Municipal Accounting and Statistics.

A report of the committee on municipal accounting and statistics was presented by Mr. Henry J. Ross, of Montreal, as follows:—

"It is with gratification that we are able to report prospects of a considerable advance in the efforts begun some 11 years ago by the Union for the adoption of Uniform System of Accounting and Statistics. The subject has never been allowed to rest, and it was my privilege to attend a conference in the city of Ottawa on June 19th, 1918, called by Mr. R. H. Coats, Dominion statistician, and comprising representatives from all the provinces save British Columbia and Prince Edward Island. At this conference we had the advantage of the advice of Dr. Davis, of the Census Bureau, Washington, D.C. The principal work of this conference was the discussion of vital statistics. The interest shown was very marked and those present expressed themselves freely, and the result was the practical adoption of a model bill covering the subject. Resolutions were adopted confirming certain acceptable principles, and the schedules to be used in all cases of vital statistics were approved, so that in the near future all the provinces will be furnishing the Dominion Bureau with the same schedule as to births, marriages, deaths, etc. Some adjustments of the clauses and some slight changes in the verbiage were left to a committee composed of the different provinces, and this committee met on June 21st. I was able to have quite a talk with Mr. Coats, especially on the subject of municipal accounting, and went into the matter very thoroughly with a representative of his bureau and we found a common ground which promised to be quite acceptable to the province. The time seems opportune—the government is in a liberal frame of mind and is assuming all the onus and expense of the work, and it will, therefore, be up to the province to do their part in order that the results desired may be attained.

"It should be clearly borne in mind that whatever may be done by the Dominion Bureau is done without a desire or the least intention to dictate a policy, but in so far as these statistics are concerned, they were born and nourished by the Union of Canadian Municipalities, and whatever measure of success may be attained will reflect to the credit of the union. On behalf of the committee, therefore, I do not hesitate to urge upon the provinces and the municipalities a prompt recognition of the forms, and that the provinces may see fit to eventually adopt laws to make them regular or may we say compulsory.

"I regret that circumstances do not permit my attendance at the convention but perhaps may be permitted to wish one and all not only a pleasant sojourn in the old city of Victoria, where I spent the best part of a year (31 years ago), but that the matters that are discussed may prove of great benefit to those interested."

RUSSIAN BOND INTEREST PAID

The semi-annual interest on $50,000,000 of three-year 6½ per cent. Imperial Russian government bonds was due on Wednesday, the 10th instant. Payment was made at the office of the National City Bank of New York. The source of the funds is not definitely known.

NEW TORONTO SELLS BONDS

Messrs. G. A. Stimson and Company, of Toronto, have just purchased $27,658.02 town of New Toronto bonds, bearing 6½ per cent. interest, and repayable in fifteen annual instalments. These were issued for local improvement purposes. New Toronto adjoins Toronto on the west, and is bound to be a big manufacturing town.

TO PROMOTE AGRICULTURE IN THE WEST

Many Novel Suggestions Made by Canadian Problems Club, of Winnipeg

Various regulations regarding the sale and taxation of agricultural lands in the West, have been discussed by the Canadian Problems Club, of Winnipeg. This organization is composed of some of the leading citizens of Winnipeg, including several members of the staff of Manitoba University, journalists and business and professional men.

Some of the recommendations have been outlined to *The Monetary Times* by Mr. E. J. Tarr, who is one of the active members, as follows:—

"The Canadian Problems Club of Winnipeg recommends that legislation be enacted by the legislature of each of the three prairie provinces. The general objects of the suggested legislation are: (a) the promotion of land settlement; (b) the encouragement of immigration by the introduction of a regulating influence in the selling price of land; (c) the consequent increase in production; (d) the formation of a reasonable basis for a more comprehensive land settlement scheme with possible government purchase and government aid as a result of close co-operation between the Dominion and provincial governments.

"1. The owner of each parcel of idle agricultural land shall be required, on or before June 30th, 1919, to fix a selling price for same, such price to be filed by the owner with the clerk of the municipality in which the land is situated. 'Idle agricultural land' would be defined in the statute and a uniform definition in the three provinces would be desirable, although not necessary.

"2. In the event of the owner failing to fix the price, the same shall be fixed by the government, through provincial assessors or municipal assessors, or in any other equitable manner. This assessment would be comparatively simple on account of the price level which would have been previously set by the owners not defaulting in the fixing of prices.

"3. The prices fixed under 1 and 2 shall be returned by the municipal clerks to the municipal commissioner who shall have same classified and printed in booklet form and ready for distribution not later than November 30th in each year. Knowledge that every parcel of land in Western Canada had a readily ascertainable fixed price attached thereto would undoubtedly influence a great many American farmers to come up and look over the offerings of land, who would not think of going to the trouble and expense of making the trip if such a ready means of investigating the situation were not provided. This list would, doubtless, also be made use of by the Department of the Interior in connection with its lists of available wild lands which it already has under preparation. These Dominion government lists would be of much greater value when accompanied with information as to fixed selling prices. The fixing of a selling price for a definite term would stimulate immigration and settlement generally. For example, an American settler could readily ascertain just what lands were available around him and would know that the price was fixed so that it could not be raised as soon as any interest was displayed by an intending purchaser, and such American settler would be free to correspond with friends in the vicinity of his former home setting forth the advantages of moving to Canada. The improved social conditions for himself would be ample incentive for such a man to do his best to have friends settle in his district around him.

"4. The wild land tax shall be levied on the selling price as fixed under 1 and 2 instead of on assessments as provided in present legislation. This would have a regulating influence on the fixing of the price by owners under 1. An owner even though desirous of avoiding taxation could not afford to risk naming a price lower than that at which he would be willing to sell. Some owners might name higher prices in order to avoid the possibility of an early sale, but would, as a result, increase their tax burden and consequently the provincial revenue, without nullifying the general objects of the legislation, because the number of such owners would not be sufficiently large to retard settlement. In general the tendency would likely be for an owner to fix a reasonable price.

"5. The price fixed under 1 and 2 shall hold from January 1st, 1920, until December 31st, 1921, and shall continue in force thereafter until changed by the owner. The price for any subsequent calendar year may be fixed by the owner prior to June 30th of the preceding year. It is advisable to have notice of change given six months ahead, so as to give the government ample time to complete the lists of lands available under 3, and also desirable in order that intending purchasers for cultivation may have sufficient certainty as to the availability of the land.

"6. The Dominion government the provincial government, or any individual or corporation, shall have the right to purchase any parcel of idle land at the fixed selling price, provided full payment be made in cash. Although the price would be an all cash price, there would be several methods by which a man could buy. He might have sufficient cash—if not, he might raise a loan on his farm adjoining the land which he proposed to purchase. The loan might cover both properties and result in enough money being raised to pay for the new property. The purchaser might have some cash and be able to borrow enough to pay the balance of the purchase price. Even though the owner of the land is not limited from charging a higher price when selling on terms, yet the fixing of an all cash price which would be readily ascertainable by anyone would have a regulating influence on the term price to be charged.

"7. Any purchaser shall have the right to purchase through the Land Titles Registrar in whose district the land is situate by paying to the registrar a deposit of ten (10) per cent. of the purchase price and filing an affidavit of intention to purchase. The balance of the price shall be paid to the registrar within sixty (60) days and, in the event of default the deposit shall be forfeited and paid to the consolidated revenue fund of the province. The registrar shall pay the purchase price to the owner or distribute it amongst the encumbrances entitled to it, and from the purchase price there shall be deducted by the registrar one (1) per cent. for assurance fund and expense purposes. It is necessary to make provision for the purchase of land through the registrar or some other government official so as to make it impossible for owners to unduly hamper the purchase of land and also to avoid delay in the event of non-resident owners and other owners not readily accessible. Such a provision would also be necessary for the protection of purchasers in the event of complicated titles.

"8. At any time before the filing by a purchaser of an affidavit under the provision of 7, the owner of any piece of idle land shall be entitled to withdraw the same from sale by filing with the registrar an affidavit of intention to improve, and no government, person or corporation shall have the right to purchase the said land under the terms of this legislation within a period of six months from the filing of such affidavit. The owner upon so filing an affidavit shall not be entitled to an increase in the price of the land for the next following calendar year. Provision of this nature is necessary for the protection of owners desiring to improve their land and the denial of the right to increase the price is necessary in order to prevent the filing of affidavits of intention to improve merely for the purpose of preventing the land from being sold. On the other hand, if the intention to improve is bona fide, the absence of the right to increase the price does not prejudice the owner.

"9. In the event of an owner defaulting in the making of the improvements he shall have the privilege of at any time applying to a judge for an order allowing him to again file an affidavit of intention to improve. The judge shall grant such an order only when satisfied as to the bona fides of the first affidavit as well as the bona fides of the intention to improve under the terms of the proposed second affidavit. If the order be granted, the second affidavit may be filed with the same effect as the first one, but in no event shall the owner be entitled to file a third affidavit with respect to the same parcel of land. This provision is intended as relief against hardship to an owner of land who, through circumstances for which he is not responsible is prevented from carrying out the improvements contemplated when the first affidavit was filed.

"10. If a corporation or individual shall make a purchase the same shall be subject to the selling price already fixed to the same extent as if the land remained in the hands of the prior owner. If, however, the purchaser shall file an affidavit of intention to improve, he shall be protected from any repurchase for six months from the filing of such affidavit. The purchaser so filing an affidavit of intention to improve shall not be entitled to an increase in the price of his land for the next following calendar year. In the event of the improvements not having been made within the six months' period, the owner from whom the land was pur-

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning. Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

236 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint Stock Bank, Limited; The Royal Bank of Scotland

37

chased shall have a 30-day first privilege of re-purchasing at his actual selling price without subsequent interest or taxes, and this privilege shall be one out of which he cannot contract himself. The withdrawal of the right to increase the price does not prejudicially affect the purchaser if his intention to improve is bona fide and the giving to the former owner the first privilege of repurchasing in the event of default being made in the making of the improvements, protects him against a speculator purchasing the land to the owner's disadvantage.

"11. In the calculation of the six months' period referred to in paragraphs 7, 8 and 9, the months of December, January, February and March shall be eliminated. It is proposed to eliminate these four months because they are months during which agricultural work cannot be carried on.

"12. All encumbrances shall be obliged to accept payment in the event of sale and the maximum bonus chargeable shall be one month's interest for each unexpired year of the encumbrance, and in no case shall the bonus exceed five months' interest. The bonus would apply only to encumbrances under which there is no privilege of prepayment, or under which any bonus provisions are more onerous than those defined in this section.

"13. The owner of the land shall be at liberty to sell the land either for cash or upon terms at a less price than that fixed under these provisions and he shall be at liberty to sell on terms at a higher price than that fixed hereunder."

UNION OF CANADIAN MUNICIPALITIES

At the convention of the Union of Canadian Municipalities in Victoria, the following officers were elected: President, Mayor Costello, of Calgary; 1st vice-president, Mayor Bouchard, of St. Hyacinthe; 2nd vice-president, Mayor Todd, of Victoria; 3rd vice-president, Mayor Fisher, of Ottawa; secretary-treasurer, W. D. Lighthall.

CANADIAN NORTHERN NOTES IN LONDON

An issue of £2,000,000 of Canadian Northern Railway 5 per cent. notes falls due on August 12th in London. They are to be replaced by three-year 5 per cent. notes, maturing August 2nd, 1921. The issue price of the new notes was fixed at 98½, at which they yielded over 5½ per cent The new notes are guaranteed both as to principal and interest by the Canadian government. According to reports just received, about 67 per cent. of the new issue has been left in the hands of the underwriters.

CUARDIAN ASSURANCE COMPANY, LIMITED

Fire premiums totalling $3,818,905 were received during the year ended December 31st, 1917, by the Guardian Assurance Company, Limited, of London, England. This compares with $3,379,646 in 1916, an increase of $439,255. This is an increase of about 13 per cent., whereas the net losses increased by less than 1 per cent. Expenses of management were 35½ per cent. of the total premiums, Provision was made out of the income for losses and expenses, for the additional premium reserve, and a profit remained of about $4[illegible]. Interest on the reserve funds brought in $150,000, so that the total income was $560,000. Deductions had, however, to be made for depreciation of securities, for bad debts, and debts in enemy countries treated as irrecoverable, and an increase was made in the general reserve fund

In the life department new premiums amounted to $145,000 and new insurance of over $3,000,000 was written. The funds of the life department, including the investment reserve fund of over $1,000,000, now amount to $18,000,000. The reports from the accident, burglary, marine and general assurance department were also satisfactory. A balance of $180,000 was transferred to profit and loss.

The company's trustees in Canada are T Bienvenu, K. W Blackwell and J A Gravel The Canadian manager is Mr H M Lambert, who is an underwriter of wide experience.

CANADIAN CAR AND FOUNDRY COMPANY

New Directorate Likely to be Formed Representing Both Interests

According to latest reports from Montreal, an understanding has been reached by the rival interests in the Canadian Car and Foundry Company and a directorate representing both sections is to be secured. It will be remembered that at the last annual meeting a new director, A. Hicks Lawrence, was elected to the board. Mr. Lawrence demanded full access to the books of the company, which access he claims was not granted. Some time ago a committee of shareholders, allied with Mr. Lawrence, circulated a letter of protest among the other shareholders and requested their assistance by proxies at the coming annual meeting, in order to secure control of the company. The board of directors issued a reply immediately afterwards, which elicited a second letter from the shareholders' committee, and a second reply was issued on the 8th inst., by the directors.

A statement of the company's earnings for the seven months ended April 30th, 1918, is to be submitted to the shareholders at the annual meeting which will be held on Monday, July 15th. This statement will show combined profits of $2,917,004. Depreciation charges amount to $313,223, interest on bonds $298,998, bank interest $127,748, and the net surplus of profits carried forward is $2,177,034. The statement appears in full upon another page of this issue.

The surplus of the company, together with its subsidiaries is now $2,840,063. As the profits for the past seven months, after making all deductions, were $2,177,034, the financial position has, therefore, greatly improved. The invested assets, valued at cost, are now $21,240,912, and the current assets $14,429,492. The company also has $100,000 deposited with the Montreal Trust Company towards the redemption of bonds, and other assets of $866,267, making a total of $36,636,672. The plant at Fort William now has sufficient orders to keep it busy for about two years.

In his reply to the second circular, Mr. Curry, the president, after remarking that the continuation of the controversy is useless, makes the following statement:—

"Our whole organization is now in a highly efficient state; our works are well managed and are all making money. The breaking up of this organization would be suicidal. Over 80 per cent. of our business is with governments: British, French, American and Canadian. To hold this business we must retain the confidence of the governments, which means that we must maintain a thoroughly efficient and experienced organization, and that our directors must work together in harmony. I was instrumental in organizing this company nine years ago, and was also instrumental in organizing 41 years ago one of its predecessors, the Rhodes, Curry Company, and have been the active head of these companies ever since. My life's work and business reputation is bound up in these concerns.

"Shareholders have been naturally anxious about dividends, but it is impossible for any company to earn dividends without business. The car companies of Canada were practically without business for three years, except some export orders of an unprofitable character. None of them made money during that period and most of them made large losses. This condition, however, has changed; our order books are now well filled with profitable business; the net profits for the first seven months of the present fiscal year amounted to over two million dollars, and the outlook for speedily paying off the accumulated dividends is particularly bright. I am attaching a letter signed by Mr. J. C. Scobie, a partner in the firm of Price, Waterhouse and Company, chartered accountants, with a world-wide reputation. Mr. Scobie for nearly three years has been in close touch with the affairs both of this company and of Agency of Canadian Car and Foundry Company, Limited, New York.

"You will be asked at the annual meeting to vote to add the following gentlemen to the board: Hon. Geo. G. Foster, director Canadian Bank of Commerce; Mark Workman, Esq., president Dominion Iron and Steel Company, Limited; William McMaster, Esq., director Bank of Montreal; H. W. Beauclerk Esq. director Bank of Montreal; V. M. Drury, Esq. director Porto Rico Railways, Limited. I have asked and obtained the consent of these gentlemen to act as directors. It has been suggested that two prominent American business men should be added to the board to represent the American shareholders, and ex-governor E. C. Smith, president Central Vermont Railway, and Henry J. Fuller, Esq., vice-president Fairbanks, Morse and Company, have agreed to act in this capacity."

CANADA'S HOUSING PROBLEM

Shortage of Living Accommodation Is One of War's Effects

Mr. Thomas Adams, the town planning advisor of the Commission of Conservation, gave an instructive address on the housing problem, at the Convention of the Civic Improvement League and the Union of Canadian Municipalities on Wednesday, July 10, in Victoria, B.C. This problem has been pressing itself urgently upon the public, but no important government or municipal action has been taken as yet. The main points of Mr. Adams' discussion were as follows:—

"The working-class housing conditions in the industrial sections of Canadian cities were unsatisfactory before the war and even then the cost of housing accommodation was steadily increasing. Since the conditions caused by the war have begun to operate, private enterprise has practically ceased to engage in building operations. As a result, we are to-day faced with a Dominion-wide agitation to the effect that there is a shortage of houses in most cities and towns. The causes of this shortage differ in certain respects, but, in the main, they are due to scarcity and dearness of money and labor and the high cost of material. These causes have practically killed private enterprise, as there is not sufficient certainty that rents or purchase prices will rise to meet the increased cost, to justify private capital being invested in this class of undertaking. It may be assumed that private enterprise will cease to be much of a factor in connection with the building of houses until economic conditions become stabilized.

"There are different housing problems. One is connected with war industries, promoted wholly by government agencies. For instance, the British government, through the Imperial Munitions Board, has erected and financed munition plants to the extent of over 14 million dollars, employing 6,200 workers in Canada; the Canadian government has promoted war industries in different parts of the country and erected a new arsenal at Lindsay, Ont.; and there is said to have been appropriated for shipbuilding in Canada no less than $89,500,000. Whereas in Great Britain and the United States expenditure of the above kind is being accompanied by expenditure on the erection of homes for workers, no step in that direction has been taken in Canada. This means that a special housing problem is created as a direct result of the war.

"There is a second problem, due to the tendency of population to drift, following the channels of employment. The war has created new sources of employment and destroyed others. In certain districts there is overcrowding as a result. This may or may not be temporary, but it has created a special housing problem—not quite new, but in an intensified form. A third problem is the general one of housing the industrial classes. Most countries recognize that there has been failure to deal adequately and properly with the housing of the workers in manufacturing industries, except in those comparatively rare instances where the manufacturers have themselves taken the responsibility to provide dwellings.

Large Sums Spent by Britain and United States.

"The problems in Canada do not differ from those in Great Britain and the United States in their main aspects. Because of the speculative system of developing suburban land, it is, however, the case that the cost of land for industrial housing is much higher in Canada than in Britain, and this has an injurious effect on housing conditions. The housing problem, as a whole, is one of tremendous importance, but, for the moment, while we are at war, it is necessary to concentrate on the aspect of it dealing with war industries. Nothing matters at the present time but the winning of the war, and if houses are needed to assist in that object, they should be built by some one. Britain and the United States are erecting houses as a war measure by means of housing schemes promoted and financed by the national government. Several hundred million dollars have been invested in this connection by the British government and recently 110 million dollars was appropriated for the same purpose by the United States government. The initiative in this matter was taken in Britain after much research into the question of industrial fatigue and the application of physiological science to the details of industrial life. There is no illusion either in Britain or in the United States as to the necessity for spending money on houses and also on recreation and social facilities, with the direct object of winning the war." Mr. Adams here described the housing schemes at Gretna, Rosyth, Woolwich, England and in the United States, with illustrations.

"It is claimed that in Canada," continued Mr. Adams, "we also need houses to help in winning the war. Some of the leading manufacturers of munitions have informed me that their output is limited for want of labor, and that they cannot get efficient labor for want of housing accommodation. There is no doubt that doubling up of families and emigration of the best workers has followed from the shortage of houses in certain districts, resulting in both loss of efficiency on the part of those who are overcrowded, and the loss of some of the best men who are not prepared to stay under overcrowded conditions. Faced by such a situation as we have at present in Canada, it seems as if there is no other course than that the government should step in and assist in providing houses, where needed, to secure the maximum of production for war purposes. If it follows the lead given by Great Britain and the United States, it will not only assist with the provision of houses, or at least with the provision of capital, but will assume the burden of any loss that may accrue as a result of building houses during the war. All that they can do, and are likely to do, will be to lessen the shortage directly due to war industries and shipbuilding plants, relieving the general problem to that extent. In war industries must be included the production of food, and houses are needed in the rural districts.

"There is a fourth problem connected with the returned soldiers which should also be considered and dealt with by the government. In so far as the government is able to assist in providing housing accommodation for the returned men, they would help to relieve the pressure in connection with the general problem. Moreover, the need for giving the returned men the best available accommodation will be generally agreed to.

Methods of Government Housing.

"If it is accepted that the government must build houses as a war measure, how should they proceed? Under such conditions, there can be no question whether it is the business of the government to do the work, since there is no other who can do it. Before the war, the government did not engage in industry to the extent it does now, and it is only now doing what is necessary. When you come to deal with housing, however, the responsibility of carrying out the work should be divided among the Federal, the provincial and the municipal governments. War housing being the only question before us to-day, is a matter for which the Federal government may be regarded as primarily responsible. The Federal government is the authority under the War Measures Act. But owing to our constitution it is desirable that the responsibility for controlling building operations should, as far as possible, be delegated to provincial and municipal governments. Large employers of labor who need housing accommodation should be made to co-operate in any government scheme.

"It seems to be wrongly assumed that municipal governments do not at present help to finance housing in this country. As a matter of fact all the expenditure of the municipality is, in a sense, part of the cost of housing. From the appended statistics it will be seen that in the case of a working man paying $20 a month, he is enjoying the expenditure made by the community of at least $1,000 on his home and on the improvements and facilities given in connection with it. One fact in connection with this expenditure by the city is that it is the net cost of the service, whereas the investment of the private person in the same connection produces a profit of from 10 to 1,000 per cent., from the site and from 15 to 25 per cent. on the cost of the dwelling. By the city engaging in building operations, it would merely be helping to stabilize its investment in the development of the land.

"If government housing were resorted to in this country it should be carried out by a joint partnership between Federal, provincial and municipal authorities. The Federal government should provide the funds and set up a central expert advisory and supervisory board; it should only build houses directly under its own control for employees in government factories, arsenals, naval establishments or railways. In all other cases housing operations in connection with war industries and returned soldiers should be carried out by the municipalities with the aid of funds and expert advice provided by the Federal government. Departments of the provincial government should take the responsibility for the proper administration of municipal housing schemes, under the regulations of the Federal government and subject to its supreme control in

matters of finance. For the present no housing scheme should be carried out unless for some purpose directly connected with production necessary for the prosecution of the war. This brief outline of policy is not put forward as a recommendation to the government, but only as an indication of what the experience in other countries would lead us to believe to be the best policy—due regard being paid to our local conditions and forms of government."

Mr. Adams also gave an illustration of how the cost of a working man's dwelling is made up taken at a rental value of $20 per month which may be regarded as the maximum rental value when wages amount to $20 or $25 per week:—

"The rental paid per annum of $240 represents capital, at 10 per cent., of $2,400. This may be estimated to be made up as follows:—

Cost of site of dwelling at $15 per foot frontage for lot 25 feet by 100 feet	$ 375
Cost of development, including pavements, sewers, school buildings and other improvements $15 per front foot (from actual average cases)	375
Cost of dwelling	1,650
	$2,400

"Of the above amount the city invests $375 on a dwelling and recovers from one to two-thirds of same in local improvements taxes, and private enterprise provides $2,025—at a profit varying from 10 to 1,000 per cent. on the site, and 15 to 25 per cent. on the building.

"But the city invests equal to another $800 to $1,000 for each such dwelling in city management, education, etc., most of which has to be collected from properties having a higher value than the above. Altogether the city's investment may roughly be regarded as at least half that of the private investor—under present conditions, but the profit bearing part of the enterprise goes to the private party. In cities where local improvements are made at the cost of the government, the building of houses for the working classes would only be an extension of the principle and not a new form of investment. Private enterprise would still build the houses as they build pavements. But it would be unwise for municipalities to do more building than is necessary for purposes of essential industries or for war-time production."

NEW TAXATION IN UNITED STATES

The National City Bank of Chicago, in their monthly financial letter, comment as follows upon the proposed taxes in the United States:—

"Interest converges upon the efforts under way at Washington to frame a tax law which shall provide for war outlays during the new fiscal year beginning to-day. The indications are that there will be material increases in taxes on incomes, excess profits and war profits. In some quarters the suggestion has been made that the new schedules should provide for doubling the $4,000,000,000 tax fund collected by the government during the fiscal year just ended. Should this proposal be accepted, it would be imperative for the government to extend its list of taxes to take in a considerable area that has not been touched as yet. The whole nation is more actively interested in the war enterprise than ever, and on all sides there is a desire to co-operate with the administration authorities in the work of winning the war and providing the funds required by the government for this tremendous enterprise. It is not easy to see, however, how taxes could be doubled without recourse to additional expedients, as any such per capita tax as $80 for the people of the United States would impose a terrible burden upon the nation. The indications are that this problem will be worked out satisfactorily by the revenue experts of both parties, who have joined together in the effort to formulate an equitable tax law. The question is a difficult one, and however it is answered, the probability is that both corporations and individuals will have to effect new economies in the effort to bring all branches of business to a 'war first' basis."

The agricultural committee of the United States Senate has agreed upon an amendment to the $11,000,000 Emergency Agricultural Bill, providing for national prohibition.

INDUSTRIAL CONDITIONS IN ST. JOHN

Business Activity With Labor Shortage Being Experienced in Maritime Provinces

The midsummer report of the Board of Trade of St. John, New Brunswick, reviews present conditions in the city and province as follows:—

"Considering restrictions on food commodities and commercial disturbance incident to the war, the general business of the city of St. John and of the province has been particularly good. Commercial travellers are generally agreed on this point. Crop prospects for the province are good, though damage has been done in some quarters by frost.

"There is a labor shortage in many industrial lines. Shipbuilding and metal working plants are particularly affected by this shortage. The rolling mills and foundries have been working steadily. The same is true of the Atlantic Sugar Refinery, the flour and feed mills. The new sardine factory of the Booth Fisheries Company has begun operations with prospects of a good business. At present about 175 hands are employed. The pulp mill is running continuously. Sash, door and planing mills have been working overtime. Nail factories have been very busy. The lumber, box and shingle plants have begun work for the season. Considerable building repair work is going on. A splendid brick school building erected by the Roman Catholic denomination is nearing completion. St. David's Presbyterian congregation is preparing to reconstruct its church building. The second unit of the McAvity machine plant is being rushed to completion. The Imperial Oil Company is making large extensions to its tank area.

Activity in Ocean Transportation.

The federal government is negotiating for the resumption of Courtenay Bay development work and the establishment of a dry dock. The municipality and province are being asked to bonus a steel shipbuilding plant to the extent of $500,000. The British Colonies Transportation Company with a capital of $750,000 has been incorporated to do a shipping business here.

"The work of extending the grain conveyors from the Canadian Pacific Railway elevators to the new piers on the west side is under contract. The Canadian Government Railways elevator is complete and the railway department will probably utilize it shortly.

"The construction of the ballast wharf pier on the east side, south of the sugar refinery, has just been completed. Work has been begun on the upper ferry wharf, west side, the structure to be renewed.

"The wooden steamer 'War Fundy' will be launched on or about July 26th. Material for a second steamer is on the ground. The Marine Construction Company, who recently launched the schooner 'Dornfontein,' have begun work on a four-masted schooner. Launches of large-sized schooners at St. Martin's, Alma, Harvey Bank and Moss Glen are being arranged for this month.

"The city is carrying out an extensive street paving contract at North End.

"Civic grants have been made toward the establishment of three city playgrounds.

"The city has offered the Military Hospitals the free use for a term of years of one hundred acres of city land in Lancaster for soldier convalescent homes. The matter is under consideration.

"The War Gardens' Association is arranging for a fall exhibition of war garden products.

"Bank clearings from January 1st to July 5th, 1918, amounted to $58,196,419, as against $54,145,191 in like period 1917."

STOVE MAKERS WANT SUPPLY OF IRON

On Wednesday, the 3rd inst., a deputation, representing stove makers in the Dominion, waited on the War Trade Board in Ottawa and asked that efforts be made to supply them with sufficient pig iron to carry on business, even if on a reduced scale. Export of pig iron from the United States is permitted only under license, and it has been very difficult for the Canadian manufacturers to secure a supply. The War Trade Board promised that every effort would be made in this direction.

EXECUTOR'S FEES

The proper management of an Estate entails skill, experience and labor on the part of the Executor, whether he be an individual or a corporation. The Executor's remuneration, in either case, is a small percentage, and it is fixed by the court, so that in appointing your Executor the efficiency of the organized Corporation costs no more than the service of an individual. In drawing up your Will, we solicit appointment as your Executor, and refer to our thirty-five years' experience as a recommendation.

NEWFOUNDLAND FINANCES

Revenues and Expenditures of the Colony Have Reached Unprecedented Levels

For the fiscal year ended June 30th, 1917, the expenditure of Newfoundland was $4,555,000, and the revenue totalled $5,267,000, leaving a surplus of $652,000, this being the largest in the history of the colony, exceeding that of the previous year by $162,000. These were the primary facts in the annual budget speech recently delivered in the Colonial Legislature by Hon. M. P. Cashin, the finance minister. The estimated expenditure for the year ending June 30th, 1918, was $5,452,000, as against an estimated revenue of $5,702,000, so that a surplus of about $250,000 was anticipated. The reports of revenue and expenditure for the past few weeks have not yet been completed. From these two there will, however, be a surplus revenue of about $900,000, which it is the intention to apply to the cost of the colony's war expenses.

Some other features of Mr. Cashin's speech were as follows: For the fiscal year beginning in July, 1918, he estimated a total revenue of $6,500,000, and an expenditure of about $5,400,000, which would leave an apparent surplus of somewhat over $1,000,000, but as against that he took into account the fact that this year supplemental estimates for roughly $700,000 had been voted, and the same circumstance might occur next year, so that in such an event his available surplus would be between $300,000 and $400,000.

In order, however, to make assurance doubly certain he proposed various new taxes, the first being an income tax based upon those recently enacted in Canada and the United States requiring all persons having a yearly income above $1,000 if unmarried and $2,000 if married, or having dependants, at the rate of 5 per cent. on the income up to $6,000, and with the addition of a super-tax of from 3 to 5 per cent. on a gradually ascending scale. This was to be the complement of the business profits tax imposed upon commercial and industrial enterprises the previous year, which had yielded $400,000, contrary to the predictions of many leading business people who had declared that it would not pay the cost of collection, though, as a matter of fact, the collection charges only amounted to $10,000, or 2½ per cent. on the amount received. He was unable to estimate what the income tax would yield, but he thought it might contribute at least $100,000 additional to the revenue.

Other taxes he proposed were an increase in postage rate from 2 to 3 cents; 5 cents stamp tax on all internal telegrams; 10 cent stamp tax on all telegrams to outside countries; 20 cent stamp tax on every set of Customs forms; an increase of 2 cents a pound in the excise duty on tobacco, of 50 cents in the excise duty on cigars, and of $1.25 in the excise duty on cigarettes; and export duty of 20 cents a quintal on all fish: of 2 cents a gallon on all fish oils, of 20 cents a barrel on herring, of 50 cents a case on canned lobsters, of 25 cents on canned salmon, and of 30 cents a tierce on pickled salmon; and he calculated to obtain from all these sources a revenue of about $500,000.

He was able, in his review of the condition of the country, to congratulate it on having attained a degree of prosperity unequalled in its annals. Imports had increased from $15,000,000 in 1913-14 to $21,500,000 in 1916-17, and that exports had grown from $15,000,000 to $22,500,000 in the same period. He predicted that the Customs returns for the current fiscal year would show a total trade (imports and exports combined) of $50,000,000, against half that total four years ago. The products of fisheries, forest, mine and farm had grown enormously. This had been accomplished at the same time that the colony had made a substantial contribution of its man-power towards the conduct of the war, enlisting 6,500 men, and having made provision whereby an addition of at least another 1,000, and possibly 2,000, would be made immediately.

The savings of the people, as represented by the amounts deposited in the savings banks or on deposit with the banks, totalled $16,000,000, an increase of $2,250,000 over the previous year, this sum being about twice what had been deposited the previous year. The guarantee value of the life insurance policies in effect in the island amounted to over $2,000,000. Including hoarded gold, he felt confident there were at least $20,000,000 of savings possessed by the people, and he intimated that, in view of the difficulties to obtain money outside the island, an attempt would be made to raise a local loan for war purposes to be known as a Victory Loan.

It is the intention to raise about $10,000,000, of which one-half should be raised in the colony, and the other half abroad; $3,000,000 have already been borrowed in Canada, and a $2,000,000 domestic loan was recently. The time planned for the campaign extended over six weeks, but it was fully subscribed in six days, and, according to latest reports, it is expected that the total will be doubled.

TORONTO'S DEBT AND SINKING FUND

Debt Has Grown Rapidly But is Still Within Legal Limits—Sinking Funds in Good Shape

Mr. Thomas Bradshaw, the finance commissioner of the city of Toronto, recently presented his annual report on the city's funded debt and sinking fund, covering the year ended 31st December, 1917. The debt and statistics of the city are summarized as follows:—

Gross funded debt		$100,323,433.36
Deduct:		
(1) Specially rated and revenue producing debts as follows:		
Waterworks	$14,464,639.34	
Ratepayers' share local improvements	14,793,757.50	
Civic hydro-electric system	7,876,631.08	
Civic abattoir	415,608.00	
Exhibition buildings	1,230,075.00	
Toronto street railway pavements	4,231,733.74	
Civic street railway	2,082,737.00	
(2) Sinking fund on other than foregoing debts as follows: On gross debt, $24,427,756.91, less $12,137,144.98 on above special debts	12,290,611.93	
		57,385,793.59
Net funded debt		$42,937,639.77
Assessment, etc.:		
Assessed value of rateable property		$605,727,725
Exemptions not included in foregoing		87,375,684
Capital assets		100,074,126
Revenue from taxation for 1918		18,107,672
Revenue other than taxation for 1918		5,937,930
Population, 1917		473,829
Area of city (acres)		25,330
Tax rate for 1918 (including schools, 6 7/10 mills)		30½ mills

During the year the city's gross debt increased from $97,730,921 to $100,323,433, a net addition of 2.65 per cent. The debentures sold were for local improvements and war purposes, and were sold to the sinking fund at a 5¼ per cent. basis. No debentures were sold to the public during the year, and a considerable amount of temporary financing has been done during the past two or three years to avoid the high rates of interest now prevailing in the market. The total unnegotiated debentures outstanding on December 31st, 1917, were $6,117,700, representing for the most part public works commenced several years ago, and war expenditures. The only debenture issue expected during 1918 is one for $775,402.

The debt limit of the city fixed by statute is 12½ per cent. of the first hundred million dollars of assessed value, and 8 per cent. of the amounts beyond that sum. In determining this limit, however, certain exempted debts are not to be accounted as forming part of such debenture indebtedness. These include waterworks, local improvements, hydro-electric, Toronto street railway pavements, civic street railway and debts for war purposes. The limits of the city's debenture indebtedness is now $52,958,218, and the actual debt after excluding exempted debts amounts to $44,893,375, so that there is a margin of $8,064,843.

Regarding the future prospects, Mr. Bradshaw comments as follows: "Having regard to the unsettled conditions, due to the prolongation of the war, it cannot be expected that the assessed value of real property will be increased in the near future to any appreciable extent. This, coupled with the uncertainty of what may take place in business and other spheres of activity after the close of the war, makes it essential that we should not estimate or rely upon probable increases in the city's borrowing power, which alone can come through increases in the assessed value of rateable property."

A table is also included showing the gross debt classified according to the purposes for which it was issued. Local im-

provements have required 24 per cent., schools 14.72 per cent., and the hydro-electric system 14.42 per cent. Practically two-thirds of the debt has been contracted for what are usually regarded as the five most essential services of a municipality. These are as follows:—

Services.	Amount.	Per cent. of whole.
Local improvements	$24,143,574	24.06
Education	14,768,919	14.72
Water	14,464,639	14.42
Light and power	7,876,631	7.85
Sanitation	5,910,970	5.89
Total	$67,164,734	66.94

Forty-five per cent. of the entire debt has been incurred for undertakings of a revenue producing nature as follows:—

Revenue Producing Debts:

Services.	Amount.	Per cent. of whole.
Local improvements, ratepayers' share	$14,793,757	14.75
Waterworks	14,464,639	14.42
Toronto hydro-electric system	7,876,631	7.85
Toronto street railway pavements	4,231,733	4.23
Civic street railway	2,082,737	2.08
Exhibition buildings	1,230,075	1.23
Civic abattoir	415,608	.41
Total	$45,095,181	44.97

Regarding the revenue producing debt, the commissioner states as follows:—

"The special assessment in connection with the ratepayers' share of the local improvement debt, takes care of the debt charges of that debt. The surplus revenue of the waterworks system is amply sufficient to meet the debt charges of the waterworks debt. The Toronto hydro-electric system has met all charges on its debt, and the city's share of the revenue from the Toronto Street Railway Company is more than sufficient to meet the charges on the pavement debt.

"The surplus revenue from civic street railway, civic abattoir, and Canadian National Exhibition has, however, been insufficient to meet the charges on those debts, though they have been classed as revenue producing undertakings. According to the general acceptance of this term, the revenue from a service shall not only cover the operating expenses, etc., but also meet the annual interest and repayment of principal involved in the debt on the service. This condition does not hold in these cases. If all these enterprises were conducted on the basis that revenue should be sufficient to meet debt charges, it would tend to equalize the taxpayers' burden, remove the stigma of recurring deficits in the operation of municipally owned enterprises, increase public confidence in civic undertakings, preparatory to the time when the city will be required to deal with the important public franchise which expires during the next few years, and materially strengthen the city's credit and financial position.

"The local improvement debt while no doubt, heavy, will be rapidly paid off, and by 1925 over 72 per cent. of the existing local improvement debt will be cancelled.

"During the past ten years the gross funded debt has increased from $27,543,743 to $100,323,433, the greatest increase being in the year 1913. With reference to the proposed purchase of the hydro-electric system in 1921, Mr. Bradshaw states that during the next four years, $13,729,205 of the debt will be retired, and if no further debts are incurred, the city should be in an excellent financial condition for an undertaking of that kind. It should, therefore, be the constant aim of the city to minimize the amount of new securities issued."

Sinking Fund is One-Quarter of Debt.

The total amounts in the sinking fund are $24,427,757; so the net debt of the city is $75,895,676. This is 6.7 per cent. of the city's assessment of $505,046,937. The tax rate is 30½ mills. Practically all of the sinking fund is invested in the city's own bonds, the balance of the assets consisting of Dominion government bonds, cash and accrued interest.

The city has also guaranteed bonds to the amount of $6,725,000, most of which are the bonds of the Toronto Harbor Commission. The annual charges entailed by the debt amount to $8,898,976, of which $4,577,107 represents interest and $4,321,869 repayment of principal.

FARM CONDITIONS IN ONTARIO

No Great Shortage of Help Reported — Crop Yields Should Average Well

The following is a summary issued on July 1st, of reports made by agricultural representatives to the Ontario Department of Agriculture:—

The heavy rain that fell on Thursday night was of much benefit to all field crops, more especially potatoes, roots, beans and tobacco. Potatoes will be early this season, and at present promise a heavy yield, but there are complaints from Haldimand and Welland of injury from leaf curl, mosaic and blackleg. Fall wheat is said to be coloring already in Essex, and has headed out better than was expected early in the spring. Spring grains look well, although reports come from Waterloo and Peel of smut in barley. An increased acreage of buckwheat is reported in different parts of the province. Considerable millet has been sown in Leeds. Peas are doing unusually well, especially those being raised for the canning factories.

Haying is general. Clover is thick but rather short, and will hardly yield as well as was hoped for. Timothy also is somewhat lacking in length. Lanark reports that about a third of the apple trees in that county have been ruined by the severe winter. The trees leafed but have been gradually dying off.

Good Supply of Stock in Sight.

Live stock generally are in fine condition, as there has been an abundance of grass. A larger number of calves are being raised this year. Very few beef animals are changing hands, taking the province over, but Lambton reports fat cattle as moving freely, cars being loaded at local points. Dairy values are being fully maintained. Milch cows bring from $100 to $150. Frontenac quotes milk at $2.25 a hundredweight, cheese at 22 1-16 cents a pound, and butter at from 43 cents to 45 cents a pound. Hogs are selling at from $17.50 to $18 a hundredweight. Little pigs range from $10 to $16 a pair. Durham reports that sheep are rapidly increasing in that county.

There does not seem to be the general urgent demand for help that was anticipated a couple of months ago. A large number of National Service girls have recently been placed on mixed farms, as the comparatively short strawberry crop will not cover the entire period that was planned for picking. Prince Edward, however, reports that locally there is a decided tightening up of farm labor on account of the canning factories beginning the season's operations.

VOCATIONAL STATISTICS

Over a thousand courses of re-education for returned soldiers so disabled that they cannot resume their pre-war occupations were approved during the month of May. The table of statistics prepared by the Vocational Branch of the Department of Soldiers' Civil Re-Establishment shows that on June 1st 4,876 men had been granted courses while the figure for May the 1st was 3,861. The number of courses in progress on the latter date was 2,077, of whom 2,038 were discharged men. The number of men who have completed their courses and gone out into employment was increased from 351 to 481, a total of 130 during the month.

The number of men who have refused to accept courses of training granted them is 263. In addition 323 men have discontinued their courses after beginning. There are, therefore, at the present time 996 men who have not yet commenced training, chiefly because their health has not reached the point where they can be discharged from the army.

The number of men attending the occupational therapy classes, conducted in the military hospitals by the Department of Soldiers' Civil Re-Establishment, increased slightly during the past month, the enrolment in the classes now being 1,690. This does not include the ward occupations such as basketry, embroidery, weaving, etc., which are conducted at the patients' bedsides. Another activity of the Department is represented in evening classes of instruction for discharged men. There are at present 55 attending these classes.—Reconstruction, July, 1918.

London and Lancashire Life and General Assurance Association, Limited

Extracts from the Report of the Directors presented at the Fifty-Fifth Annual Meeting held in London, England, 1918

LIFE BUSINESS

During the year 2,016 policies were issued for sums assured amounting to $4,526,548, producing a new annual Premium Income of $226,007, and Single Premiums of $16,238, making a total NEW PREMIUM INCOME of $242,245. Re-assurances were effected for $109,500.

The sum of $108,983 was received for the purchase of Annuities.

The TOTAL LIFE PREMIUM INCOME after Deduction of premiums paid for Re-assurances amounted to $2,026,113.

The INCOME from INTEREST and DIVIDENDS on the Life and Annuity Fund was $784,058 after deduction of Income Tax.

The TOTAL INCOME of the Life Department was $2,919,350.

The CLAIMS by death with bonus additions, amounted to $1,164,733 including $154,635 directly attributable to the War.

ENDOWMENT POLICIES matured during the year, representing Sums Assured of $714,252 including bonus additions.

After payment of all outgoings and providing for depreciation in securities, the LIFE and ANNUITY FUND amounted to $19,948,790.

ALEX. BISSETT, Manager for Canada.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Coal Company.—The company has declared a dividend of 3½ per cent. on the preferred, payable August 1 to shareholders of record of July 15.

Dominion Steel Corporation.—The company has declared a dividend of 1½ per cent. on the preferred, payable August 1 to shareholders of record July 15.

Maple Leaf Milling Company.—The company has declared a dividend of 2½ per cent. and a bonus of 1 per cent. on the common and 1¾ per cent. on the preferred, payable July 18 to shareholders of record July 3.

Tooke Brothers, Limited.—The annual report of the company for the fiscal year ended May 31, shows the trading profits for the year to be $135,757, compared with $97,270, an increase of $38,487, compared with a year ago.

Trinidad Electric Company.—The following are the earnings of the Trinidad Electric Company, of Halifax, for May, 1918: Railroad, gross, $11,228; net, $3,437; light and power, gross, $9,595; net, $3,384; refrigeration and ice, gross, $3,116; net, $461; total, $7,283.

Brazilian Traction, Light and Power Company.—The total gross earnings of the company for May, 1918, were 9,030,000 milreis, an increase of 1,166,000 milreis over 1917. The operating expenses totalled 4,388,000 milreis, compared with 3,575,000 milreis in 1917. Net earnings compared with last year show an increase of 353,000 milreis.

Pacific Gas and Electric Company.—The gross operating revenue of the company for 1917 was $19,813,380. After deducting $12,854,690 for operating expenses, taxes, maintenance and reserve for depreciation, and adding $508,347 for profits on sales, the net income stood at $7,467,037. When $4,100,906 was allowed for bond and other interest, and $185,050 for bond discount and expense the balance to surplus amounted to $3,181,079.

Buffalo Mines, Limited.—During the year ended April 30, the company produced close to three-quarters of a million ounces of silver, and made a net income of over $250,000. Over 26,000 tons of ore were drawn from underground, while 2,000 tons came from the stock piles. A total of more than 88,000 tons of sand tailings were treated during the period. The company has paid in dividends and capital disbursement a total of $3,037,000 to its shareholders.

Ontario Steel Products, Limited.—The fiscal year of the company came to a close on June 30th last. It is impossible as yet to obtain details of earnings, but the statement is made that these ran at about the same rate as in the previous year, when they were approximately 12 per cent. on the common stock. No unusual events took place in connection with the operations of the company during the year, save that negotiations were carried on for the purchase of a factory at Lewiston, Me., which manufactures handles. By the acquisition of this factory the company would be in a position to provide not only its own requirement but would, in addition, have a surplus of handles for sale. The company still owes 6 per cent. deferred dividends to preferred shareholders, being the equivalent of $45,000, but it is considered that this will be further reduced before a great length of time.

VICTORY LOAN PUBLICITY COMMITTEE

A publicity committee has been appointed to have charge of this branch of the campaign for the coming war loan. The chairman of the committee is Mr. R. A. Stephenson, and other members are: A. S. Muirhead, T. H. Andison, W. N. McIlwrath and J. M. Black.

Introduction to Y.M.C.A. Statement

The National Council of the Y.M.C.A. herewith presents a complete statement of its finances for the year 1917, covering its entire service. Overseas and in Canada.

The Executive Committee of the Council arranged last November to have a complete statement for the year 1917 ready for publication before the recent Red Triangle Fund Campaign, but owing to conditions arising out of Military operations in France, this has been unavoidably delayed. It is presented now at the earliest date that existing conditions have permitted.

The portion of the following statement which concerns England and France has already been submitted to the Overseas Military authorities. Audited statements of the funds handled have been submitted to the Militia Department at Ottawa and for the past two years regular accounting has been made as well to the authorities in England and in France. In addition to the regular audit in France, the canteen business is checked every month by the Military Field cashiers, to determine the amount which is paid to Military units as indicated in the Expenditures. Printed copies of the audited statements are posted up in the huts for the information of the soldiers.

The General Operation Account shows on the one hand the entire receipts of the National Council; first, from the gross sales of its Military canteens in Canada, England and France, and second, from subscriptions received during the year. On the other hand, there is shown the entire expenditures for the year, including, first, the cost of the goods sold in the canteens and, second, the expenditures connected with the entire service which is carried on under the direction of the National Council.

The Balance represents the excess of receipts over expenditures. Of this the sum of $118,351.43 was the balance at the National Headquarters at Toronto, and the remainder was Overseas. This balance at the end of the calendar year represents the amount available to carry on operations until the time of the campaign in 1918. While the financial statement is drawn up on the basis of the calendar year, the receipts from the campaign of one year have to serve until the campaign of the next year. The above balance at the National Headquarters was by April 30th, just before the new campaign, not only used up but changed to a deficit of $237,930.13. This deficit was, however, offset by the balance overseas, which has to be maintained there as a working balance to carry on operations.

The item of $240,524.86 is a special amount which had to be expended for the purchase of canteen and other supplies in Canada for shipment to France. Beginning with June, 1917, on account of the scarcity of supplies in Great Britain, much of the purchasing formerly done there had to be transferred to Canada. The long period of time required for the shipment of these supplies to France involves the continuous employment of a large sum. The amount expended for this purpose, as at December 31st, has had to be treated as an expenditure and placed in a Reserve Account against the merchandise in hand. It is, however, a possible asset and will, when realized upon, be devoted to other forms of service to the soldiers, when it is no longer required to maintain the canteen service in France.

It was possible to provide for this expenditure only because the amount asked by the National Council in 1917 was oversubscribed by more than the amount required just at the time the Canadian Purchasing had to be undertaken. But for this it would have been necessary either to borrow this large amount or greatly curtail the service in France.

It is to be remembered that the goods at the front in France, where the greater part of the stock is carried, are subject to enormous risks. The English Y.M.C.A. in the German offensive of March and April suffered losses in huts and canteen supplies of nearly One Million Dollars. In the more recent offensive the American Y.M.C.A. has suffered losses nearly as large, and the National Executive have deemed it a matter of prudence to be prepared to meet a similar loss if it should fall on the Canadian Y.M.C.A.

The National Council has from the first declared the policy of devoting to the service of the soldiers whatever balance remains in the Military Fund at the close of the war. This policy has been made known to and accepted by the Overseas Military authorities. The need for the Y.M.C.A. service will continue all through the period of demobilization and the plan of the National Council is to use whatever balance then exists to keep up the efficiency of the service to the soldiers during that important period.

The National Council of the Y.M.C.A., under which the Military Work is conducted, is a representative body of the various Y.M.C.A.'s throughout Canada, but it has no authority over or financial responsibility for any local branch. The funds which it handles have no connection with those of any local branch of the regular Y.M.C.A. It wishes to make clear, therefore, that the funds which are acquired in or subscribed for the Y.M.C.A. Military Work have not been and will not be used in connection with the regular work of any of these branches, but will, according to the policy already announced, be kept in the Military Work and devoted exclusively to the service of soldiers.

The service represented in the expenditures of the accompanying statement covered at the opening of the present year, 96 centres of operation in France and 76 in England, including all regular camps and units, base camps, convalescent camps, hospitals, railway troops, cavalry, London and Paris, and forestry units from the north of Scotland to the South of France.

There were on the Overseas staff 133 Secretaries carrying honorary commissions, 50 of whom were at the expense of the Y.M.C.A. for pay and allowances and the remainder at the expense of the Government. There are also a considerable number of other ranks, non-commissioned officers and men, detailed to the Y.M.C.A. staff by the Military authorities. A number of these, who are given non-commissioned rank because of special responsibility, are at the expense of the Y.M.C.A. for the extra pay over that of their regular rank. Civilian help is also employed where required and where circumstances permit.

In Canada the soldiers are served in 38 centres, including camps, barracks, Red Triangle Clubs, hospitals, naval stations and on troop trains. This has required approximately 100 Secretaries, who work on a civilian basis and are entirely at Y.M.C.A. expense. There is also required a considerable staff of employed helpers, exclusive of the committees of ladies who render their service free.

The scope and variety of the entire service, in so far as expenditures can reveal them, are indicated in the accompanying statement.

Signed on behalf of the National Council of the Y.M.C.A.

G. H. WOOD, Chairman.
F. L. RATCLIFF, Chairman of Finance Com.
CHAS. W. BISHOP, General Secretary.

AUDITOR'S CERTIFICATE

We have audited the books, vouchers and accounts of the National Council Headquarters at Toronto, and of the Central Territorial Division, for the year ended 31st December, 1917, and have been furnished with the audited statements of the Maritime and Western Divisions of the National Council for the same period. We have also been furnished with the Annual Statement for England for 1917, duly audited, and the Annual Statement for France for 1917 with the auditor's Certified Statement for the six months to June 30th. Owing, we understand, to Military restriction on civilian travel between England and France, it was impossible for the auditor to go to France and complete the audit to 31st December, 1917. We have agreed the Canadian and Overseas statements with the above General Statement, which combines them, and, according to the books and statements furnished, the above statement in our opinion, correctly sets forth the operations of the National Council at home and overseas.

OSCAR HUDSON & COMPANY,

Toronto, July 3rd, 1918.

PAINT CONCERN BRANCHES OUT

Will Produce Their Own Linseed Oil in the West, Bring It East in Their Own Tank Cars

Montreal, July 10th, 1918.—An important evolution of the large paint industry controlled by Brandram-Henderson Limited, has just been announced. This concern has acquired the plant of the Alberta Linseed Oil Mills at Medicine Hat, Alberta.

This information was given out on the return of Mr. George Henderson, President and General Manager of Brandram-Henderson Limited, on his return from a five weeks' trip in the Western Provinces.

It is announced that Brandram-Henderson Limited will control and operate the big Medicine Hat plant for the production of linseed oil—which is one of the most important raw materials entering into the manufacture of white lead, paints and varnishes.

"The purchase of the mills," said Mr. Henderson, "places our Company in a position of independence, in the matter of an essential raw material. Until the present time, although we operated our own lead-corroding and dry-color plants, it was necessary for us to buy our Linseed Oil in the open market—frequently from competitors. This was something in our practice which we were anxious to eliminate, and the action we have now taken will eliminate it."

"This matter of independence as regards raw materials," added Mr. Henderson, "gives emphasis to another fact that I am anxious to have generally known, namely, that Brandram-Henderson Limited is in every sense an independent Company. It has come to my knowledge that statements have been made by irresponsible people to the effect that our Company is closely allied with other interests in the paint and varnish business. In some cases, our name has been linked up specifically with one of our leading competitors, possibly to their annoyance as well as to ours."

NOT CONNECTED WITH OTHER PAINT CONCERNS.

It was emphatically stated by Mr. Henderson that these rumors have absolutely no foundation, in fact, "Brandram-Henderson Limited are not," he stated, "in any way associated with any competing organization—our only desire is to continue our development as an independent and strictly Canadian Company."

NEW PLANT AN IMPORTANT ACQUISITION.

It was explained by Mr. Henderson that in taking over the Alberta Linseed Oil Mills, they had made a move that would be of the greatest value to the Company in the East as well as in the West. It will afford an uninterrupted supply of Linseed Oil to the Brandram-Henderson factories in the East where the Company has been so well known for so many years, and will also give the concern greater prominence in the West.

"Some time ago," said Mr. Henderson, "we made up our minds that a Linseed Oil plant was essential to our continued development. A question then arose as to where this plant should be located. Should it be in the West, in close proximity to the flax supply, or in the East where it would be convenient to our factories in Montreal, Halifax and Toronto?

"The transportation problem was the crux of the whole question. After careful investigation we satisfied ourselves that it would very often be a simpler and more expeditious matter to transport the oil, in our own tank cars, than to bring down the flax in the usual way. This would be particularly true in the winter and spring months, when our manufacturing requirements are heavy.

"For a time we thought of building our own plant, but when the opportunity presented itself of acquiring the Alberta Linseed Oil Mills, we took advantage of it, especially as investigation proved that this plant was one of the most modern and efficient in Canada."

ALBERTA PLANT TO BE ENLARGED.

Already steps have been taken to extend the newly acquired plant at Medicine Hat, and to increase the output of that mill. The present output does not give the Company a sufficient margin over its own manufacturing requirements—accordingly additional equipment was decided on, and is in fact already ordered. This will increase the capacity of the plant by 20 per cent. This new equipment will, it is hoped, be installed in time to enable the company to handle its full share of the 1918 flax crop. Mr. Henderson points out that this arrangement will enable them to offer Linseed Oil for sale, as well as to fill the requirements of their own factories. Stocks will be carried, not only at Medicine Hat, but also at Montreal, Halifax, St. John, Toronto, Winnipeg, Calgary, Edmonton and Vancouver, where the Company already have factories or distributing warehouses.

The purchase of this plant amplifies the Brandram-Henderson organization very satisfactorily. Having for many years been corroders of Lead and manufacturers of Dry Colors, Brandram-Henderson were "first hands" with regard to essential pigment raw materials. They are now in the same position with regard to "vehicle" as they have been with respect to pigment, and the acquisition of the Alberta Linseed Mills added to the long-established Varnish and Siccative plants of the Company, will make this big Canadian paint concern a well rounded out and closely knit organization.

PROXIMITY OF MILL TO FLAX FIELDS.

"Medicine Hat is an ideal location for our Linseed Oil enterprise," said Mr. Henderson. "It is in the centre of a most important flax producing territory, and is in the very enviable position of having apparently inexhaustible supplies of natural gas for power and light. This has attracted many large manufacturing plants to Medicine Hat, and has made it the leading industrial centre of the West. The citizens are progressive in a marked degree, and are enthusiastic over the industrial future of their city. The Linseed Oil Mills will be conducted as 'The Alberta Linseed Oil Company, Limited, owned and operated by Brandham-Henderson Limited.' We have appointed Mr. W. A. Church as Manager of the Alberta Linseed Oil Company. He has been associated with us for nearly fifteen years, and for some years past has been Assistant Manager of our Maritime Division, with office at St. John, N.B. We have also been fortunate in arranging with Mr. W. W. McNeely (formerly General Manager of the Alberta Linseed Oil Mills), for the retention of his services for a time, to assist in the direction of the mill and further instruct our Manager in duties with which he is not yet altogether familiar."

A THOROUGHLY MODERN PLANT.

Speaking about the Linseed Oil plant itself, Mr. Henderson said that he was more than pleased with its facilities. "The property," he said, "consists of several large buildings. There is the Mill building proper, modern and complete. A gang of coopers is employed in a separate Cooperage building. The elevator, a building erected only two years ago, has a capacity for storage of 60,000 bushels of flax, most of which will be purchased in carloads and wagonloads in the immediate vicinity of Medicine Hat. Separated by ample yard space from the other departments, is a fine office building.

"The plant has a storage capacity of 42 cars of Linseed Oil and 30 cars of Linseed Oil Cake, in addition to its elevator storage facilities for flax.

"The manufacturing process employed is the most modern and efficient known, and will ensure the continued high quality of our finished products."

Brandram-Henderson Limited is a strictly Canadian concern—its products are well and most favorably known throughout the Dominion. With its own Lead-corroding and Dry-color plants, its Varnish and Paint Manufacturing Plants together with the new Linseed Oil Mills all within its own organization, Brandram-Henderson Limited is in an unique position in the Paint business.—(Advertisement.)

It has been stated, on good authority, that the Ames-Holden McCready Company has begun work on a contract for military boots for the Canadian government, the total value of which is $500,000.

The head office of the Exchange Bank of the Republic of China has been opened in Peking. The institution is capitalized at $5,000,000, the bulk of which was said to have been subscribed by Japanese interests.

JULY DIVIDEND PAYMENTS

The present month is looked upon in financial circles as being one of the best dividend-paying months of the year, and it is expected that this year, July will prove no exception to the rule Business being good, and profits fairly good, few concerns have found it necessary to postpone their usual dividend. A good many industrial corporations could undoubtedly have increased the percentage of the dividends which they have declared, but, in view of the uncertainty of after-war conditions, the disposition generally is to build up substantial reserves rather than increase dividends. In this they are acting upon the timely advice of the banking interests of the country.

Taking purely Canadian corporations and ones in which Canadian investors are more or less interested, there are probably nearly one hundred and fifty concerns paying dividends during the month, which in the aggregate will reach the substantial sum of eighteen or more million dollars. It is not unlikely that most of this amount will either be reinvested or find its way into savings accounts with the banks. —Bradstreets.

DRYDOCK AT ST. JOHN TO BE BUILT

The Dominion government has arranged with the St. John Drydock and Shipbuilding Company to assist it in the construction of a drydock in St. John, New Brunswick. The government is to pay an annual subsidy amounting to 4½ per cent. or thirty-five years on an expenditure of $5,500,000. The drydock is to be commenced within six months after the signing of the contract, and is to be completed in four years. The estimated cost of the work is $4,000,000. The same company was recently awarded a contract for harbor improvements involving an expenditure this year of $600,000.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Ethelbert, Man.—J. A. Thompson, of Winnipeg, has purchased a block of $9,750 6 per cent. 15-year debentures.

Tilbury, Ont.—Tenders will be received up till July 15th, for the purchase of $13,000 6½ per cent. 10-instalment bonds.

Fort Frances, Ont.—Tenders will be received up till July 15th for the purchase of $6,565 6 per cent. 20-instalment bonds.

County of Lincoln, Ont.—The Dominion Securities Corporation of Toronto, has purchased a block of $30,000 6 per cent. 10-year bonds. The price bid was 99.27.

York Township, Ont.—Tenders will be received up till July 15th for the purchase of a block of $175,000 6 per cent. 25-instalment bonds, and a block of $25,000 6 per cent. 25-instalment bonds.

Stockton, Man.—J. A. Thompson, of Winnipeg, has purchased a block of $4,000 consolidated school district debentures bearing interest at the rate of 6½ per cent., and payable in 20 years.

Victoria, B.C.—On Saturday, the 6th inst., Victoria voted upon a by-law to authorize the purchase of Ross Bay Cemetery, and to issue debentures therefor, to the amount of $37,950, maturing serially in 20-years, with interest at 5 per cent. per annum.

Teeswater, Ont.—A by-law has been passed authorizing the expenditure of $6,000 to acquire and improve the local electric light plant. Bonds will be issued to this amount, bearing interest at 5½ per cent., and it is expected that they will be sold locally.

Dauphin, Man.—The town of Dauphin is offering for sale tax sale certificates of the years 1915, 1916 and 1917. On their face values the accrued interest on the 1915 and 1916 certificates is 20 per cent., and on the 1917 certificates it is 10 per cent. until November 1st, 1918, when they will also draw 20 per cent. The purchaser is entitled to all of this accrued interest.

Norwich, Ont.—Messrs. G. A. Stimson and Company, of Toronto, have purchased $5,074 township of South Norwich bonds, issued for hydro purposes and maturing in 19 annual instalments, with coupons attached. South Norwich has an area of 35,488 acres, and is one of the best and richest townships in Ontario. We believe G. A. Stimson and Company are offering these to the public to yield 6⅛ per cent.

Edmonton, Alta.—Sealed tenders will be received by the debenture branch of the department of education until Thursday, July 18th, 1918, on two blocks of school district debentures amounting to $9,750. Separate tenders are to be made on each of the following blocks: Block No. 1, Rural, 10-years 7 per cent.—White Earth S.D., $1,800; Duffield S.D., $500; St. Julien S.D., $1,950; Bouchard S.D., $500; total, $4,750. Block No. 2, Rural, 10-years 7 per cent.—Shoal Creek S.D., $1,000; Grey Eagle S.D., $2,000; Earlie S.D., $1,000; Riverford S.D., $1,000, total, $5,000.

Gladstone, Man.—The citizens of the town of Gladstone have a chance of investing sums amounting to $1,000 and upwards and receiving a return of 6 per cent. per annum on the amount invested, by purchasing debentures of the town, which are now being sold by the town in order to raise sufficient funds to pay for the electric light equipment and costs of installing same. These debentures have all the resources and assets of the town of Gladstone behind them, and are absolutely a safe investment. A number of outside investors have offered to purchase these debentures, but the town council has decided to give Gladstone citizens the first opportunity of purchasing them.

The output of new security issues in the United States during June amounted to $25[illegible]86,800. Of this total, about $40,000,000 represents railroad securities and $70,000,000 obligations of traction companies.

A $2,000,000 Victory Loan, which Newfoundland expected to raise in six weeks, was obtained by popular subscription in six days, and it was announced on July 5th, that the amount would probably be doubled.

AMERICAN TELEPHONE AND TELEGRAPH ISSUE

American Telephone and Telegraph Company seven-year convertible 6 per cent. bonds are being offered by Kidder, Peabody & Company, of Boston and New York. The bonds are dated 1st August, 1918;, and are due 1st August, 1925, bear interest at 6 per cent., and are convertible into the stock of the company after two years at 106. The issue is being offered at the market price, about 94½ to 95 and interest, yielding about 7 per cent.

ESTIMATED CROP REPORT .

The wheat crop of India is estimated at 380,205,000 bushels by the International Institute of Agriculture, compared with 379,402,000 in 1917 and 348,998,000, the average production of the five years, 1912-16.

The production of wheat in Tunis is estimated as 9,406,000 bushels, against 6,963,000 last year, and a five-year average of 5,600,000.

Crop conditions on June 1st were very good in Ireland, good in France, Great Britain and Tunis, satisfactory in Holland and Sweden and average in Switzerland and Egypt.

TAX COLLECTIONS AND SALES IN EDMONTON

Edmonton had a total of about $4,000,000 of short-term obligations falling due this year; a considerable portion of this amount was paid off in cash raised by collecting arrears of taxes and by tax sales, and the balance of the debt has been renewed. The mayor, Mr. Evans, outlined the operations to *The Monetary Times* as follows:—

"Owing in great part to the lack of continuing penalties and of proper tax enforcement provisions, arrears of taxes accumulated from 1914 to 1917. Of necessity there was a corresponding amount of borrowing for current requirements on short-term securities, a great part of it falling due this year. The chief item was two-year debentures secured on the 1914-15 tax arrears maturing July 1st, to a total of $2,653,000, of which $2,000,000 were held in the United States having been placed by Messrs. Otis and Company, of Cleveland. Through the good offices of that firm the holders of these debentures were approached as to whether they would accept renewal debentures for a further two years or whether they wished payment. With extensions thus secured and an underwriting by Messrs. Otis and Company themselves, $1,100,000 were renewed for the two years and the balance of $900,000 was paid in cash out of the collections of these particular arrears before and at a tax sale which is now being held. Incidentally, proper penalties and tax sale provisions were secured at the last session of the Alberta legislature and under these the tax sale is producing excellent results. The extension debentures bear interest at 6 per cent., and were taken at 98, the price of issue of the original debentures, making about a 7.10 per cent. interest basis. At the present rate of exchange and assuming that exchange has become normal at the maturity of these renewals this was much better for the city than borrowing money in Canada even at 6 per cent. and then paying exchange to send it to the United States. Of the remaining 1914-15 tax arrear debentures held in this country $316,000 were met out of collections and the balance renewed on the same basis as the above. All of these renewal debentures are redeemable by drawings.

"In order to take care of other maturities 5-year 6 per cent. debentures secured on the 1917 tax arrears are being issued and private sales of these have been arranged to the extent of $626,000 on a basis to yield 6.85 per cent.

"At the beginning of the year the city was faced with nearly $4,000,000 of maturing short-term obligations in addition to its current requirements, but the payment of sundry items and the above operations have taken care of all but comparatively small amounts falling due later in the year. In 1919 the amount of such obligations is less than $200,000, which, by comparison, is almost negligible. Thus what looked in advance as though it might be something of a crisis in the city's financial position has been successfully passed and this fact is showing itself immediately in an excellent general tone of confidence within the city and outside."

FOOD COMMODITIES IN CANADA

Amount in Storage—Increase in Quantity of Butter, Eggs, Pork, Mutton, Lamb and Fish

Reports from the cold storage companies for June 1st, according to the Cost of Living Branch of the Department of Labor, indicate an increase in quantity in store of butter, eggs, pork, mutton, lamb and fish; and a decrease in the quantity of cheese, beef and fowl, compared with May 1st of this year.

As compared with June 1st, 1917, there is more butter, beef and fish stored. Cheese, eggs, pork products and fowl have decreased compared with last year. The most striking comparison is in the case of beef, of which there is 111.72 per cent. more than on June 1st, 1917. Since the Purchasing Commission of the Allies is fully aware of this fact, and the statement of these gentlemen to the effect that a large proportion of this stock is already under contract to them, is in the hands of the department, no grounds for any charge of hoarding can be found.

The most striking feature recently in the market situation of storage products has been the great rise in the price of beef. There has been a general rise in all beef products throughout the Dominion, but the West, starting from Port Arthur and Fort William, has suffered the worst. Naturally, the consuming public has resented the rise very much.

Increase in Meat Prices.

The matter has been carefully investigated with the view to detecting profiteering, and while the merchants in some localities have apparently used the general rise in prices to cover an undue increase, evidence that the general increase throughout the country was due to unlawful action on the part of the meat packers, has not been found. The increase is general throughout the whole of North America, and is fully as marked in the case of live cattle as in the case of meat. The increased price is due entirely to the war situation; particularly to the fact that the purchasers of the United States army and the purchasing commission of the other allies, have considered that the increased price to the farmer was necessary to stimulate the production of more beef on the farm. The necessity arose on the demands of shipping facilities to place the United States army in France, with the consequent lack of ships to bring as much meat as formerly from South America.

Reason for Increases.

The necessity has arisen for North America to provide a larger proportion of beef, and it was not thought possible to do this at the former price. The increase was given more to stimulate production in the future than to hasten selling in the present. The result has been that the price of live cattle went up in all markets several cents, and that the wholesale price of the best meat by the carcass rose accordingly. It is impossible to make an exact statement for the country as a whole, but the evidence available indicates that the rise was most evident in the price of live animals and in the retail price. Apparently, if any of the dealers have taken advantage of the situation to raise the price unduly, it is the retailers.

This is probably due, in part at least, to the fact that the wholesalers have large stocks on hand, on which they are not allowed by the Canada Food Board to advance their prices. It is now unlawful for wholesale dealers to make more than a certain limited percentage of profit on meats, no matter what change may come over the market. It is noteworthy that wholesale prices of beef have advanced very much more in the United States than they have in Canada. In the United States the increased cost of the carcass has been taken up mostly by added charges for the cheaper cuts with consequent added burdens upon the labor classes. The evidence shows that such was not the case in general in Canada, but that the best cuts were advanced as much as the common cuts.

Food Commodities in Storage.

The amount of food commodities in storage June 1st, were:—

	Lbs.
Butter	2,251,674
Cheese	2,966,997
Eggs (dozen)	8,422,588
Beef (fresh and pickled)	19,333,470
Pork (fresh and pickled)	31,218,944
Bacon, ham and smoked meats	14,721,221
Mutton and lamb	1,507,824
Fish (all varieties)	16,154,305
Fowl (all varieties)	904,075

The preceding figures cover only goods reported as held in storage. To estimate the quantity of any such goods available from cold storage companies for consumption and export, 10 per cent. may be added to represent goods in transit and certain comparatively insignificant quantities unreported.

Owned by Firms.

Goods owned by firms reporting June 1st, 1917, show the following comparisons:—

	June 1, 1917. Lbs.	June 1, 1918. Lbs.	Inc. or dec. %
Butter	1,469,781	1,689,260	+ 14.93
Cheese	3,102,210	2,190,098	— 29.41
Eggs (dozen)	6,568,873	5,911,113	— 10.02
Beef (fresh and pickled)	8,125,422	17,203,918	+111.72
Pork (fresh and pickled)	31,829,362	29,458,903	— 7.45
Bacon, ham and smoked meats	18,557,089	13,113,987	— 29.35
Mutton and lamb	1,466,731	679,596	— 53.67
Fish (all varieties)	8,857,154	9,264,535	+ 4.61
Fowl (all varieties)	3,542,344	770,072	— 78.27

Comparison of Holdings.

The following is a statement of comparison of holdings of May 1st, 1918, with June 1st, 1918:—

	May 1. Lbs.	June 1. Lbs.	Inc. or dec. %
Butter	1,182,211	2,251,673	+ 90.46
Cheese	3,141,771	2,966,997	— 5.55
Eggs (dozen)	3,766,997	8,422,588	+123.58
Beef (fresh and pickled)	21,592,408	19,333,470	— 10.47
Pork (fresh and pickled)	27,235,400	31,218,944	+ 14.62
Bacon, ham and smoked meats	13,279,961	14,721,221	+ 10.85
Mutton and lamb	1,449,655	1,507,824	+ 4.01
Fish (all varieties)	15,534,328	16,154,305	+ 3.99
Fowl (all varieties)	1,640,150	904,075	— 44.88

PRODUCTION OF BREAD IN CANADA

Slight Increase in Cost for April—Statement of the Leading Cities of Canada

In comparing the April report of the cost of production of bread in Canada with the previous month, the tables compiled by the Department of Labor, show the slight increase of the cost of one-tenth per cent. per pound, caused by flour four one-hundredths, delivery four one-hundredths, and management two one-hundredths, while ingredients such as lard, oil, sugar, were stationery. The slight increase in flour appears to be due to the quality of the grades used.

The average cost per pound for March was 6.81 cents, and for April 6.91 cents, and the quantity of bread used is slightly in excess of March, the figures after equalizing the days, being March 18,114,521 pounds, and April 18,300,076.

Consumption of Flour.

Comparing the large centres of population the following consumption of flour is found, the same number of bakers reporting:—

	March, barrels.	April, barrels.
Montreal	18,230	18,820
Ottawa	4,090	4,130
Toronto	18,625	18,536
Winnipeg	6,894	7,100
Totals	47,839	48,586

From the conservation and economic point of view, the yield is satisfactory, namely, 201 pounds of bread per barrel of flour.

Details of Costs.

The details of the various costs, showing the average cost per barrel, are as follows:—

Locality.	March.	April.
Halifax, Amherst, New Glasgow and Sydney Mines	11.20	11.02
St. John, N.B.	11.15	11.20
Montreal and Westmount	11.11	11.10
Ottawa	10.80	10.97
Toronto	10.95	11.00
Kingston, Belleville and Peterboro'	11.10	11.10
Hamilton	10.96	11.02
Brantford	10.83	11.00
St Catharines and Niagara Falls	10.95	11.00
London	10.96	10.99
Guelph, Stratford and Kitchener	10.91	10.74
St Thomas	11.02	10.96
Chatham	11.02	10.94
Cobalt	11.45	11.53
Port Arthur	10.52	10.56
Winnipeg	10.50	10.49
Moose Jaw	10.45	10.33
Saskatoon	.....	10.10
Medicine Hat	10.01	10.13
Edmonton	10.09	10.11
Calgary	10.21	10.03
New Westminster, Victoria and Vancouver	10.52	10.54

The total amount of flour purchased was 58,589 barrels.

Cost of Production.

The following abstract statement shows the cost, (in cents), of producing one pound of bread in the leading cities of Canada:—

Locality.	Cost of flour per barrel.	Cost of one pound of bread.
Halifax, New Glasgow, Amherst and Sydney Mines	11.19	6.543
St John, N B	10.34	6.037
Montreal and Westmount	10.98	7.450
Ottawa	11.06	6.406
Toronto	11.07	6.703
Kingston, Belleville and Peterboro'	10.[illegible]8	6.391
Hamilton	11.00	6.300
Brantford	10.87	6.550
St. Catharines and Niagara Falls	10.90	6.708
London	10.69	6.478
Guelph, Stratford and Kitchener	10.92	7.004
St. Thomas	10.55	6.634
Chatham	10.98	6.601
Cobalt	11.52	6.841
Port Arthur	10.53	6.706
Winnipeg	10.30	6.781
Moose Jaw	10.10	8.122
Saskatoon	10.21	6.369
Medicine Hat	10.18	6.341
Edmonton	10.17	6.581
Calgary	9.97	6.834
Victoria, Vancouver and New Westminster	10.53	7.303
Dominion average	10.84	6.903

The total amount of bread produced in April was 17,716,676 pounds, and the total amount of flour manufactured was 67,723 barrels.

CANADA'S COMMERCIAL FUTURE

Colonies as Well as England Must Look Abroad for Expansion

"The Financier," of London, in its issue of June 11th, discusses the future of Canadian trade and industry as follows:—

"The war has broadened all our horizons, and we are not surprised to find that the participation of the United States and Canada in the European struggle is leading to a recognition of the fact that these countries have too long regarded themselves as self-contained entities, and have made little or no effort to develop international financial and trade relations, in which Great Britain was pre-eminent in the days when cosmopolitan finance still existed. This attitude on the part of the peoples of the New World is excusable enough when the vast extent of their territories and the varied character of their resources is considered. But in the future, whether the idea of a League of Nations as a political force comes to fruition or not, it is quite certain that the business relations of the Old and the New World will be interdependent to a far greater extent than in the past. Already the United States is playing a great part in international finance. By her loans to the Allies and to neutral countries she has become a great creditor nation, with interests distributed all over the world, and the logical result must be the development of her trade with these nations after peace. In Canada also the view is gaining ground that fresh avenues for trade must be opened up. In a series of articles published by *The Monetary Times*, of Toronto, Dr. A. T. Drummond points out that the external trade of Canada, which in the past has been so largely restricted to Great Britain and the United States, is capable of great expansion if as much energy is thrown into the foreign as into the home trade. The war has opened up new markets among the Allies, not only in war munitions but in railway and special engineering equipment, military clothing, food supplies, aviation material and ship construction, and the problem for the Dominion government and the manufacturers will be not only to retain this advantage but to extend it after the war to other lines of production in which Canada can excel.

"Dr. Drummond recommends that the Dominion government should give direct encouragement to the formation of a great trade corporation on the lines of the British model, not only to promote foreign trade and its long-credit requirements and the gathering of information regarding foreign credit, but also to encourage new enterprises in Canada, the insurance of foreign and domestic bills and other lines which do not compete with the business of the present Canadian banks. The government has also an opportunity of encouraging by direct aid chemical and electrical research, which the last four years have shown to be of such vast importance to the development of the natural resources and the manufacturing interests of the country. And there are new markets

waiting to be opened up. For some time there has been a growing desire throughout the British West Indies for closer commercial relations with Canada, while Brazil and the Argentine are other markets waiting to be investigated. As means to this end the study of the decimal system and of foreign languages is recommended.

Transportation Essential to Trade.

"The control by the Canadian government of two of the great transcontinental railway systems will place it in a position to develop a comprehensive trade policy after the war. But overseas transportation has in the past been unduly neglected, although on both the Atlantic and the Pacific oceans there were splendid opportunities for a maritime trade. 'Why is it,' asks Dr. Drummond, 'that except for sugar our direct trade with the West Indies has languished, that our merchants so extensively buy tropical products in New York and Boston, instead of importing them direct, and that our manufacturers have practically lost the West Indian markets to the superior enterprise of New York, Boston and New Orleans? And the markets of Venezuela and the Central American States were involved at the same time. Why is not trade cultivated with the Argentine, Uruguay and Brazil, where there are increasingly progressive people and extensive markets both for our own products and for many which we in turn need?' The lack of adequate transportation forms an important reason, and to remedy this it is suggested that the Dominion government should enter into trade agreements with foreign nations to subsidize ocean transport lines, promote fast freight services on its own and other railway lines in Canada, and by trade information from its representatives in other countries to encourage individual enterprise in building up a foreign trade. With the seas infested by German submarines, the application of such a policy in war time is clearly impracticable, but the way can even now be paved for a return to normal conditions by the conclusion of agreements which will bear fruit later on. In our opinion the Dominion should aim at such a development of her own shipbuilding industry as to ensure that the tonnage required for the projected State-subsidized lines shall be built by Canadian labor in Canadian yards. The resources are there, and only require to be developed. Shortage of labor is at present the chief difficulty, but it is one that will be automatically solved when the armies are disbanded. No better employment could be found for returned soldiers than that of constructing the ships which are so urgently required for the development of Canada's overseas trade."

LETTER TO THE EDITOR

The Fuel Situation in the West

Edmonton, Alta., July 4, 1918.

Editor, *The Monetary Times*:—

Dear Sir,—I have read with interest your article under the above heading in *The Monetary Times* of June 28th. Answering your query, "Will Alberta mine-owners guarantee to supply the fuel needs of Manitoba and Saskatchewan?" and repeated at the end of your article, "Will the Alberta mine-owners deliver the goods?" I would say that they probably can and will. This, however, is by the grace of God, rather than by reason of any steps that have been taken by those most interested, to make reasonable provision against a possible fuel shortage next winter. Though there is now little probability of a shortage, other than such as occurs at some points at some period during every winter, if there should be any unusual difficulty to get fuel on the prairies next winter, it is perhaps desirable that it should be clearly understood just where the responsibility therefor will lie. It will not rest upon the Alberta mine-owners.

Early in the present year representatives of the Edmonton group of mines journeyed to Ottawa for the purpose of explaining to the fuel controller some features of the situation and the necessity of timely action if the Alberta mines were to be expected to supply the entire needs of Manitoba and Saskatchewan next winter. They took with them the statement of the chief inspector of mines for Alberta, who is also the representative of the fuel controller in this province, to the effect that the Alberta mines could, if necessary, undoubtedly increase their production by nearly three million tons over last year's output without any increase in the number of men employed. This would be accomplished simply by keeping the men working full time instead of only part time, and by keeping on through the summer men usually released after the winter rush. The 34 mines around Edmonton employ all the men they can use during the cold weather; but when the weather begins to moderate and the demand for coal slackens, they must gradually reduce their crews, the men finding work on the farms or elsewhere. For instance, one Edmonton mine manager told me that he had produced 815 tons a day in January, but in April he was down to an average of less than one hundred tons owing to lack of demand. Some mines in the Edmonton group close down altogether for the summer. The men employed in the winter could have been retained upon assurance of steady employment at full time.

All this was carefully explained to the authorities, and it was urged that if the usual supply of Pennsylvania coal for the West was to be cut off or curtailed, throwing an increased demand on the Alberta mines, positive and unequivocal announcement of the fact should at once be made, so that the Alberta producers could retain their winter crews and operate continuously at full capacity, and that prairie dealers and consumers, knowing that they must look to Alberta and not Pennsylvania, would place their orders. Another important factor was the matter of transportation. It was pointed out that the winter's coal must be moved before the fall grain movement started, and that if sufficient was to be moved, the movement must commence in the spring and proceed continuously.

Had action been taken in time, practically every ton required in consequence of the stoppage of the Pennsylvania supply, could have been delivered from Alberta. Unfortunately, notwithstanding the representations referred to above, no action was taken for months. When announcement was finally made by the fuel controller that no Pennsylvania coal would be permitted to go west of Winnipeg, a majority of the lignite mines were working with greatly reduced forces and their men dispersed; and besides, much valuable time during which shipments might have been moving forward to Manitoba points, had already been lost.

Even then, much might have been done to make up for lost time; but the Winnipeg papers fatuously started a violent agitation against the use of the only fuel available to their readers, doing their utmost to prevent the placing of orders with Alberta mines, thus further retarding developments by several weeks, and thereby very materially reducing the prospects of their readers having a sufficiency of coal next winter. Though the chance is fortunately now remote, if some of those readers have to shiver along about January or February, the responsibility will not rest with the Alberta mines. It now looks as if these are going to be able to meet the situation fully, in spite of the very serious difficulties put in the way by the ill-advised and utterly senseless agitation against Alberta coal, and the dilatory handling of the situation by the fuel controller. If, however, there should be any shortage, the first premises to be closed down should be those of the Winnipeg publications which headed the agitation to keep out Alberta coal.

Yours truly,
F. T. FISHER.

UNITED STATES WAR TRADE BOARD

Some of the recent orders issued by the War Trade in Washington provide as follows:—

June 16th—All outstanding licenses for the importation of kapoc were revoked except for government purposes.

June 16th—All outstanding licenses for the importation of caffeine, caffeina, theine and trimethylxanthine were revoked.

June 16th—All outstanding licenses for the importation by ocean transport of castor oil and castor beans, except for the United States government, were revoked.

June 16th—Importation of copper ore restricted for the purpose of encouraging the importation of copper concentrates in its place.

June 16th—Importations of hides, skins, leather, tanned skins and manufacturers of leather were restricted.

July 2nd—Restriction upon the import of plumbago or graphite was extended throughout 1918.

July 5th—Foodstuffs, funds, clothing and other articles might be sent to alien enemies interned in the United States.

July 5th—Magnesite might be imported as a return cargo from Europe and Africa.

July 5th—All outstanding licenses for the importation by sea of flaxseed and linseed were revoked.

DIVIDENDS AND NOTICES

THE STEEL COMPANY OF CANADA, LIMITED

Ordinary Dividend No. 6

Notice is hereby given that a dividend of one and one-half per cent. on the issued and fully-paid Ordinary shares of the Company has been declared for the quarter ending June 30th, 1918.

Preference Dividend No. 28

Notice is also given that a dividend of one and three-quarters per cent. on the issued and fully-paid Preference shares of the Company has been declared for the quarter ending June 30th, 1918.

The above dividends are payable August 1st, 1918, to shareholders of record at close of business July 10th, 1918.

By order of the Board.

H. H. CHAMP,
Treasurer.

Hamilton, Ontario, July 3rd, 1918.

Approved on behalf of the Board.

N. CURRY, Director.
GEO. E. DRUMMOND, Director.

Submitted with our Report to the Shareholders on July 9th, 1918.

PRICE, WATERHOUSE & COMPANY,
Auditors.

Consolidated Statement of Surplus and Profits April 30th, 1918

Combined Profits for the seven months ending April 30th, 1918, after charging all expenditures for the maintenance and renewals of plant and equipment, and including additional Profits on the Russian Shell Contracts		$ 2,917,004.51
DEDUCT:—		
Provision for Depreciation and Renewals		313,223.07
Profits before charging Bond Interest		$ 2,603,781.44
DEDUCT:—		
Interest on Bonds outstanding	$298,998.40	
Interest on Bank Loans, etc.	127,748.28	
		426,746.68
Profits for the seven months		$ 2,177,034.76
Combined Surplus of the Canadian Car & Foundry Company, Limited, and its subsidiary Companies at September 30th, 1917		2,840,063.00
Surplus carried forward,, April 30th, 1918		$ 5,017,097.76

To the Shareholders of the Canadian Car and Foundry Company, Limited

We have audited the Books and Accounts of the Canadian Car & Foundry Company, Limited, and its subsidiary Companies for the seven months ending April 30th, 1918, and have been furnished with all the explanations and information we have required.

During the period of our audit, only actual additions have been charged to Property Account, and sufficient provision has, in our opinion, been made out of the profits for depreciation of plant and the amortization of special equipment.

The Inventories of materials and supplies at April 30th, 1918, have been valued at or below cost. Provision has been made for bad and doubtful accounts and for all ascertainable liabilities of the Company at April 30th, 1918, and the Bank balances at that date have been verified by certificates from the depositories.

AND WE CERTIFY that, subject to the realization of assets of the Agency of the Canadian Car & Foundry Company, Limited, aggregating approximately $1,000,000.00, which are the subject of litigation (but which the Directors consider are collectable) the attached Consolidated Balance Sheet at April 30th, 1918, is, in our opinion, properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given to us, and as shown by the Books of the Companies.

PRICE, WATERHOUSE & COMPANY,
Chartered Accountants.

NIAGARA TO THE SEA

Send two cent stamp for illustrated Booklet, Map and Guide. Address: Canada Steamship Lines, Limited, C.S.L. Building, Montreal.

TUMBLING, tossing, seething, frothing—the mad-cap River Rapids of the St. Lawrence provide a scene of grandeur, as unique as it is beautiful. In all the world, no rapids so magnificent as these—to "shoot" them is a two-hour experience that thrills and delights.

A different charm—but one just as certain to entrance the traveller—attaches to the experience of a boat ramble through the "Thousand Islands." Still another kind of interest is awakened when the rocky outline of Quebec City looms on the horizon. Here the traveler finds many a sight to recall the days when early Canadian history was in the making. When the boat finally steams past Capes Trinity and Eternity interest turns to awe and amazement. The Saguenay River scenery is unsurpassed by any in America.

Extravagant pleasures are not to be encouraged in wartime. But there is real economy in taking the kind of vacation that keeps one's efficiency above par. So make it a water-trip this year—a holiday that promotes health and refreshes the mind.

CANADA STEAMSHIP LINES

Limited

Complete standard service maintained.

MONEY MARKETS

Messrs. Glazebrook & Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter
N. Y. funds	2 5-16	2 21 64	....
Montreal funds	Par	Par	1/8-1/4
Sterling—			
Demand	4.8620	4.8635	4.88½
Cable transfers	4 8725	4.8750	4.89½

Rate in New York—Sterling demand, 4 75 5-16.

Bank of England rate, 5 per cent.

The tax rate for Newmarket will then be 20 mills, the same as last year. Estimates for 1918 were completed for submission to the town council on July 6th, and, although the county rate is higher, an increase for the town rate is not expected.

PROMOTING EXPORT BUSINESS

Foreign Trade Must Be Energetically Pushed and Proper Banking Facilities Provided

The Canadian Bank of Commerce in a pamphlet entitled "Export Business," discusses the question of foreign trade as follows:—

"One of the topics which is being seriously discussed at the present time by thinking men the world over is, business after the war. All the leading countries are making strenuous efforts to broaden the market for the goods they have to sell and the pertinent question with us is—What is Canada doing in this respect?

"During the past few years our factories have been deluged with war orders, our plants have been greatly enlarged to meet these demands and, we are proud to say, a skill in workmanship has developed which has quite exceeded our expectations. As a consequence our production has increased enormously and we have enjoyed unparalleled prosperity, but a time will come when war orders will cease, there may be little use for many of the plant extensions and numbers of workmen will be idle, a situation which will be aggravated by the return of our soldiers from the front. We shall then be faced with smaller incomes and a heavy national debt, which means burdensome taxation.

"We have borrowed very large sums in both England and the United States, the principal and interest on which we must endeavor to pay in goods. Our country is liberally endowed with natural resources, the production of foodstuffs and raw materials can be greatly increased, and fortunately these commodities can be marketed with comparative ease. In the production of manufactured goods we shall be subjected to the very active competition of other manufacturing countries, but we believe that the skill exhibited in the production of munitions has forcibly demonstrated our ability to compete with any other country where reasonable wages are allowed to employees, and there appears to be no reason why our manufactures should not find a ready sale. Our aim for the future, therefore, should be to increase the production of the factory as well as of the fishery, farm, forest and mine, in order to create an exportable surplus and thus assure to our country at least a reasonable proportion of the prosperity it has enjoyed in recent years.

"We should endeavor to seek a fair share of the world's commerce. It is a recognized fact that extensive trade over the seas tends to stabilize industry by ensuring to manufacturers and producers a larger sphere of activity. Increased orders from foreign countries tend to change seasonal demands to steady demands the year round, and this is the ideal condition we should seek to bring about in this country.

Our Natural Advantages.

"Until recently Canadians, with a few notable exceptions, felt that the home market was sufficient for their activities, and few of our manufacturers and producers gave any consideration to the question of entering foreign fields. Now, however, we realize our ability and necessities and if we are aggressive our foreign trade will doubtless develop rapidly. In the export of foodstuffs and raw materials we possess a decided advantage over many other countries, an advantage due primarily to nature's generosity in the provision of resources, and we should therefore make the most of our opportunities.

Must Be Prepared to Grant Credit.

"A large number of our producers show a reluctance to enter foreign markets, apparently labouring under the impression that a foreign importer is not as reliable to do business with as a domestic client. This is quite an erroneous idea. It is true that the foreign importer frequently seeks time on his purchases, so that if our exporters hope to secure orders in countries where it is usual to allow 30, 60, 90 or 120 days on purchases, credit must be granted in accordance with the prevailing custom. Credit risks must, of course, be as carefully scrutinized in the foreign markets as in those at home, but the banks and mercantile agencies are only too pleased to secure reports on foreign traders and to place their facilities at the disposal of all shippers. It is a recognized fact that a reliable foreign importer is very jealous of his credit and meets his obligations in a prompt and satisfactory manner. A great many of our exporters are inclined to insist on cash with the order or cash on production of the documents at the shipping port, but little can be gained in endeavoring to develop an export business along these lines. These are, of course, ideal ways in which to do business, but other exporting countries have seen fit to grant reasonable credit where conditions warrant it, and if our exporters hope to succeed in their foreign endeavors they must at least accord similar terms; otherwise the business will go elsewhere. In this connection we have in mind a recent order involving over $100,000 which might have been filled in this country, but which went abroad simply because cash was insisted upon before the goods were shipped. If, on the other hand, the reasonable terms requested had been acceded to not only this order but many future orders might have resulted.

Selection and Study of Foreign Fields.

"In considering foreign trade the market is so wide that it is bewildering, and it is difficult to know just what country or countries to cultivate. Naturally a producer, no matter how large, cannot cover all the countries which import his particular line of goods, and the selection of the field in which to commence operations is a matter of individual choice. Once the decision has been made, the exporter should study the territory carefully, noting geographic and climatic conditions, general adaptability of his products to the market, competition, prosperity of the inhabitants and their peculiar needs, tariffs, local laws, credits required, most suitable manner of packing goods, steamship connections, and so on. To carry on a successful foreign trade it is essential that the local conditions and requirements should be thoroughly grasped before one can hope to give entire satisfaction to the foreign client.

Foreign Agencies and Representation.

"Some of the larger corporations are already well established in a number of foreign countries where they maintain fully stocked branch houses or agencies, presided over by their own representatives who are naturally conversant with local conditions. This is, of course, the best method of building up a connection abroad, as purchasers can inspect the goods with the further advantage of securing immediate delivery, which is necessarily an important factor in effecting sales. While the small manufacturer may not be able to establish a local warehouse he can always secure an energetic and reliable local representative through whom, if he gives satisfaction to his customers, he should be enabled to do a satisfactory and profitable business.

"In view of the expense incidental to conducting a foreign business a number of small manufacturers in somewhat similar, but non-competitive lines, may agree to send a joint representative to a foreign field, thus dividing the expense among several, and this plan has been found to work well in many cases in which not only the ability to organize, but also the willingness of the individual to subordinate his own interests to those of the whole group have been in evidence. The best results, however, cannot be expected from one salesman endeavoring to handle several absolutely different lines such as, for instance, automobiles, dress goods and canned meats. This, of course, would not necessarily apply to a representative sent to a foreign country simply to arrange for the appointment of manufacturers' agents.

Export Companies.

"The formation of numerous export companies owned and controlled by various manufacturing concerns is one of the logical developments of after-the-war trade. In this connection an export association has been formed in Canada, the functions of which are to secure detailed information and actual orders for its members, to introduce buyers, to find reliable agents where representation is required, to collect, finance and make shipments and to assist in organizing production in Canada so as to make possible the successful execution of large export orders."

NORTH AMERICAN LIFE GIVES PRIZES

During the month of June business to the amount of over $1,500,000 was received by the agency force of the North American Life. This is the largest monthly total in the history of the company.

Prizes ranging from $125 down to $15 have been distributed as a result of the company's sealed handicap contest, which closed on June 29th.

A Practical Pointer on Salesmanship

It is of first importance in good salesmanship to select a worthwhile article to sell, something about which you can become enthusiastic with a reason—a reason that will last. In Life Insurance Salesmanship, for instance, a discriminating agent would naturally select the policies of the Mutual Life of Canada because—first, the Company is well-established—Second, it has an unblemished record—Third, it has a continental reputation as a dividend payer—Fourth, it is a democratic organization—Fifth, it is a wonderfully successful going concern—and lastly, being the only Canadian Policyholders' Company its contracts find a ready market. Where a company is so favorably known one half of the trouble of making the sale is avoided. If you get the best goods in your line and go to it, success is certain. Last year our agents placed $20,000,000 paid-for business.

Canadian Refractories, Limited, $20,000; E. Lafontaine, N. Gordon, J. Johnson. Peterson Fruit Company, Limited, $25,000; P. T. Peterson, W. Stewart, S. Ahern. Toplis and Harding, Limited, $3,000; J. W. Blair, F. J. Laverty. N. C. Polson and Company, Limited, $300,000; N. C. Polson, Jr., N. C. Polson, Sr., S. M. Polson. Faro Investment Company, Limited, $1,000,000; F. H. Markey, J. G. Hyde, R. C. Grant.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 5th, 1918:—

Penn Canadian, 47,296; La Rose, 65,805; National, 60,000; Coniagas, 88,000; McKinley Darragh, 347,046; Nipissing Mining Company, 217,045; Buffalo Mines, 153,980. Total, 718,980.

The total shipments since January 1st now amount to 15,095,375 pounds, or 7,547.6 tons.

UNITED STATES INVESTMENTS IN CANADA

About fifty branches of United States firms have been established in Canada during the past two years. With an average investment conservatively estimated at $300,000, these plants represent a new investment of $15,000,000, making a grand total, with existing plants, of about 150,000,000.

The total of United States investments in Canada is estimated at $978,000,000. Up to 1914 branch plants were the largest item, but since then Canadian securities have been sold in the United States in far greater volume than ever before, and, consequently, that item now represents the largest portion of United States investments in Canada, branch plants coming second.

GOVERNMENT MAY CONTROL COAL MINING

Government control of coal mining is being discussed in Washington, and also in Canada. This is the result of the acute fuel shortage in both countries. It is generally admitted in the United States that no greater production can be secured by the operation of the mines by the government, and the only change might be the elimination of profiteering.

The taking over of this industry by the United States government would necessitate at least some further control of the industry on the part of the Canadian government. At present a director is located in Calgary. He supervises labor conditions and regulates the price, the operators being allowed only a certain percentage of profit.

The western mines are looked to this year more than ever before, and a recent delegation went from Winnipeg to Alberta to ascertain if there was any profiteering in the industry.

MINING CONDITIONS IN BRITISH COLUMBIA

A meeting of the Mine Owners and Operators Association was recently held at Nelson, B.C. The mine owners had been asked to recommend a member to represent them on the Royal Commission to investigate the fairness of smelting rates. They recommended Sydney Norman, of Spokane, and F. A. Starkey, of Nelson. The following resolution was also drawn up regarding the appointment of the commission:—

"Mining men of the interior of British Columbia, in meeting assembled at Nelson, earnestly urge immediate creation of a permanent royal commission empowered to enquire into all matters pertaining to the mining and smelting industries, as they naturally affect each other, and to make such recommendations as would place them upon a more amicable and equitable basis with justice to both the smelter and producer. We believe that to ensure permanent results the commission must be empowered to take evidence under oath, have access to all books and records of all parties concerned, or who may be able to throw light upon conditions, [illegible] all allied enterprises of the smelting companies, and, in fact, to thoroughly investigate every phase of the industry upon which this country depends so largely for its prosperity.

"We believe that such investigation will lead to stabilization of investment in mines, and thus encourage capital, remove friction between capital and labor, ensure production of metals essential to conduct of the war and add to the general prosperity of the province."

Another resolution was passed and is to be submitted to the Board of Railway Commissioners. It reads:—

"Whereas the Canadian Pacific Railway is reported to have refused to handle ores produced in the Slocan district consigned to smelters in the United States; and

"Whereas, owing to congestion and unfavorable rates at the only smelter in this section, production is thus restricted; therefore be it

"Resolved, that mine owners of the interior of British Columbia call upon the Board of Railway Commissioners to make an immediate investigation, and, if consistent with such conditions, order provision of cars necessary to the movement of the product."

Another resolution, regarding the present zinc bounty, is being drawn up and will be submitted at a future meeting, which will be held some time next month.

About twenty-eight mining men were in attendance, and the meetings covered the larger part of two days.

Penniless Old Men

You know many of them—men who in their prime made plenty of money, but who spent as freely as they earned. Old age finds them in a sorry plight.

You can escape their bitter experience if you will. A few dollars saved each year and invested in an Imperial Endowment will provide for your comfort in old age. Or it will take care of your family should death call you early.

Write for a free copy of our very interesting booklet entitled "Penniless Old Men." Address:

Winnipeg, Man.—July 8—The Macock and Toms Fruit and Produce Company warehouse was destroyed. Estimated loss, $30,000.

FIRE WASTE IN CANADA

A special report, entitled "Fire Waste in Canada," has been issued by the Commission of Conservation. This report, which has just been issued gives thorough information regarding fire losses and their causes. It also discusses questions of building construction and methods of fire prevention. In addition to nine chapters, there are also appendices devoted to an account of some of the large fires in Canada, the need of provincial legislation governing building construction, fire conditions in New Ontario and fire prevention in Germany. A summary of the report will appear next week.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week of July:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.

DOMINION PERMANENT LOAN COMPANY

A preliminary conference between committees representing the debenture holders and shareholders of the Dominion Permanent Loan Company was held recently in the offices of G. T. Clarkson, the liquidator. It is understood that legal action will be commenced against the estates of former directors.

Power of International Finance

Fallacy of a "Rich Man's War" Has Been Exploded—Interests of Capital Are Invariably in the Direction of Peace—Common Interests Are the Surest Guarantee of Permanent Peace—Importance of Supplies of Raw Materials.

By W. W. SWANSON

THE Bolsheviki in all countries have seen in the present strugle only a "rich man's war," and behind it merely the grasping greed of the capitalist class. To them the war, reduced to its simplest terms, is only a struggle for markets and economic advantage. That these are important factors in the situation no one conversant with the facts will deny. To assert, however, that capital stands to gain by the havoc and ruin and disruption of trade and commerce occasioned by the present conflict, displays not only ignorance of history but inability to understand elementary economic principles.

Before the war, the United Kingdom had invested in every quarter of the world not less than $26,000,000,000, of which about $3,000,000,000 was placed in Canada, a like sum in the Argentine and approximately $4,500,000,000 in the United States. The remainder was invested in Mexico, Chile and Brazil, in China, Australasia, Africa, India, Asia Minor—in almost every civilized as well as barbarous country in the world. And wherever British capital went, there went also British power to maintain good government and order. It never was in the interest of British capitalists to provoke revolution or to disturb the peace. On the contrary, British capital was one of the most potent and effective forces making for peace and order everywhere throughout the world. It remained for a predatory power dominated and controlled by a military oligarchy to disturb the peace, for only such a power had anything thereby to gain. And in that fact is found the only semblance of truth for Bolshevist and socialistic indictments.

Far from being a class war, as far as the Allies are concerned, it is becoming more and more one in which the masses will benefit most. Not only from the political, but from the economic standpoint as well, the war is being waged in behalf of democracy—and by democracy. Witness the recent Liberty Loan drive in the United States, with its 17,000,000 separate subscriptions. That is democracy waging war with a vengeance. Witness the improved economic status of artisans, farmers and laborers in the United Kingdom, the United States and Canada. That is war waged in behalf of democracy. Whoever raises the "class" cry is a traitor to his country as well as to the hope of democracy in the world.

This great struggle is breaking down class barriers not only within the nation itself, but barriers that have hitherto separated liberty-loving peoples. In the United States it is estimated that in the next fiscal year beginning July 1st, 1918, the government will spend not less than $20,000,000,000, of which $8,000,000,000 will be provided by taxation. In Great Britain the policy has been adopted of paying the entire interest upon the national debt by current receipts from taxation. That debt now stands at $31,000,000,000, and requires heavy taxation for its support, national income being considered. Before the war the income of the United Kingdom was estimated by Sir George Paish at $12,000,000,000, and it has been largely increased by high wages and active trade since 1914. So tremendous a national effort as this war demands has rallied all classes to its support. In common efforts and sacrifices, the old class prejudices are rapidly disappearing, especially in view of the fact that the rich are bearing every whit as much of the burden as other elements in the population, measured by the principle of ability to pay.

It is our firm conviction that the power of finance will in the future be the most powerful force making for world peace. It is both foolish and idle to attack the present capitalistic system on the score of provoking war, when one reflects upon the fact that, in the long run, capital can be increased only by peace and security. A League of Nations, whatever form it may assume, superimposed upon the nations can never maintain peace. Peace must be founded upon common interests and common benefits if it is to be lasting.

It is in this direction that the capitalistic system has made its power felt in the years gone by. France, for example, had heavy investments in Russian bonds and other government securities—aside from Germany—throughout Europe. While it is true that French financiers stipulated that part of the loans advanced to Russia should be used in equipping the Russian army, it was done to make peace secure and not to provoke war. At the same time French investments gave the Republic power in the political sphere wherever these were placed. That investment and political influence are inseparable is made clear by the relations of Germany to Turkey and the Balkan States. In South America, Mexico, Morocco and China, capital investments made for political prestige and power.

True, in many instances this made for conflict rather than co-operation. The Morocco affair and the Agadir crisis, Chinese loans and Mexican oil concessions made patent the dangers inherent in the situation where international interests come into conflict. They do so, however, only whenever undeveloped territories are regarded as fields of exploitation and as presenting opportunities for political aggrandizement. British investments, however, carried with them ideals—ideals of responsibility to backward races and to the territories inhabited by them. Above all, Englishmen asked for only a fair field and no favor in the realm of international trade and investment. Under the driving power of these ideas, British finance became a great stabilizing and harmonizing force in the world.

Economic Aspects of Struggle are Apparent.

These considerations have an important bearing upon the economic struggle with the Central Powers after the signing of peace. Herr Dernburg, ex-German colonial secretary, has recently had much to say in the Vienna Neue Freie Presse concerning Germany's need for freedom of the seas and a supply of raw materials—materials which, if need be, must be secured by force. This apostle of German "steadfastness and righteousness" insists that the whole world will have to ration itself in raw materials according to the German decree. Herr Dernburg adds that ultimately a large part of the world's shipping must sail under uniform control; and that the output of raw material by the separate States must be regulated for the common benefit—"if necessary by force"; and that a common basis of settlement for raw materials must be found in the exchange for them of German manufactures. Herr von Kuehlmann, German foreign secretary, explained recently to the German Chamber of Commerce also what were the motives that compelled the Fatherland, under the terms of the Treaty of Bucharest, to deal so "faithfully" with Roumania. Answering the criticism that no money indemnity had been imposed, he explained that raw materials, in grain and oil, had been secured up to Roumania's ability to deliver them, and that it was economic advantages and not money that Germany required. In addition, favorable tariff concessions had been secured for the Central Powers.

Shrewd observers have discarded the belief that the war is being waged against a caste or oligarchy, and not against the German nation itself. Pan-Germanism, and all that it implies, is too deeply embedded among the German masses to permit one longer to hold that opinion. When the German people repudiate their false and anti-social doctrines based upon militarism and power, then only can they be admitted into the family of civilized nations and resume normal conditions of trade. Business men in the United States and the United Kingdom will never consent to any agreement to restore the old conditions of commerce and trade with Germany unless there is a change of a fundamental nature in that country's attitude to the rest of mankind. International finance and commerce must, and will be relied upon to enforce and maintain peace in Europe. If, as the kaiser recently asserted, this is a battle to the death between Teutonism and Anglo-Saxon ideals, we accept that challenge and shall fight it out until the issue is decided once for all.

Since the outbreak of war, England has come to the support of Russia, Italy, Belgium and France to the extent of over $5,000,000,000, and the United States has made advances of a like amount. For the ensuing fiscal year, the United States government plans to loan the Allies $5,000,000,000, and the United Kingdom is prepared to make further sacrifices. In part, these loans have been made directly by the governments concerned, and in part by the people through subscriptions. It is plain that if for any reason the debtor nations cannot or will not pay—as is the case with Russia—the loss of interest will involve additional taxation such as has been recently imposed in the United Kingdom, to make the deficit good. That means that the masses are now deeply concerned in the policies and problems of financiers and great banking corporations. And thereby democracy widens both its interests and its power.

Finance Will Play an Important Part.

Wherever British and American loans have been placed in Europe, we find the people already heavily encumbered with domestic loans of their own. The war costs are staggering; pensions for the disabled and the dependents of those killed in battle are a heavy and inescapable burden. And so widely are the war loans held by all classes in the community, that to default in the payment of interest thereon would, for many of the smaller investors, work untold hardship. If interest payments are not met and must be postponed or funded, past experience in the United States, in South America and elsewhere goes to show that it is the foreign bondholder who will first suffer. It is doubly essential, therefore, that England and the United States come to the financial support of those countries to which they have made advances in order that industry and trade may be made fruitful. More than ever, depression on the one hand or prosperity on the other in France, Italy, Belgium and Russia, will be matters of more than ordinary importance to London and New York. The relations established in war will endure for generations after the signing of peace.

Much has been heard in the past of the alleged connection between armament making and the military class. There was a modicum of truth in all this, of course: munition-making, in private hands, was a business undertaking carried on for profit. In Germany especially a sinister relationship was proved to exist between the Krupp concern and officers in the army. Whatever truth was in these allegations is not worth considering now: what is important to note are the new and powerful factors making for peace. Capital will fight desperately to maintain the peace of the world, not only because of the vast sums at stake by England and America, but because peace is essential to repair the ravages wrought by war.

It is true that British and United States loans to continental Allies may, conceivably, be used to check as well as to extend the growth of democracy and democratic polity. Nevertheless, this danger is more apparent than real. Mr. Bonar Law recently announced in parliament that it had been decided to write off a large part of the loans advanced to Russia, and that the British government had no intention of interfering in Russia's internal affairs. Only as a necessity, to counteract German influence, will the Allies land forces on Russian soil—and then certainly not to destroy the revolution, but to save it. It is comforting to recall that whatever extreme newly-born democracies have gone to in the first flush of their revolutionary ardor, that they have in the long run fulfilled their national obligations.

The Allies, therefore, are vitally interested in maintaining stable government, and democratic government, throughout the world. And Germany's serious financial condition will prevent her from enforcing her programme of aggrandizement upon the rest of the world for many years to come. In March last the Reichstag granted the

German government a war credit of 15,000,000,000 marks, or $3,570,000,000, estimating the mark at its full value of 23.8 cents. This brought the war credit voted since the outbreak of hostilities up to 124,000,000,000 marks or $29,512,000,000. The previous votes of credit were as follows:

No.	Date of vote.	Amount (marks).
1	Auguts 1st, 1914	5,000,000,000
2	December 3rd, 1914	5,000,000,000
3	March 22nd, 1915	10,000,000,000
4	August 31st, 1915	10,000,000,000
5	December 24th, 1915	10,000,000,000
6	June 9th, 1916	12,000,000,000
7	October 30th, 1916	12,000,000,000
8	February 23rd, 1917	15,000,000,000
9	July 18th, 1917	15,000,000,000
10	December 1st, 1917	15,000,000,000
	Total	108,000,000,000

The cost of the war, according to Count von Roedern, secretary of the imperial treasury, has risen from 2,000,000,000 marks (approximately $500,000,000) on the average for each month of the winter of 1915 to 1916 to 3,750,000,000 marks in the last five months. It is obvious that Germany, already compelled to fund part of the interest payments on its national debt, will be constrained for financial reasons alone to keep the peace for a generation to come.

MUTUAL LIFE AND CITIZENS ASSURANCE COMPANY, LIMITED

Insurance companies throughout the British Empire have played an important part in war finances, but there is probably no company with a record of this kind quite equal to that of the Mutual Life and Citizens Assurance Company, Limited. The whole of this company's accumulations since August, 1915, have been invested in war loans. The total holdings of government securities are now $30,000.000, or just half of the total assets.

The annual report of the company for the year ended December 31st, 1917, was presented at the annual meeting of May 16th, 1918, at the company's head office in Sydney, N.S.W. In 1913 the holdings of government securities were about $12.000,000, or about 27 per cent. of the total assets at that time. Loans on mortgages now amount to $12.000,000, as compared with $15 000,000 in 1913, or about 24 per cent. and 45 per cent., respectively. While mortgage loans have decreased, therefore, both absolutely and relatively, during the past five years, holdings of government securities have increased. Holdings of municipal securities and other loans to public bodies have also increased from about $6,000,000 to $8,000,000.

The year's business produced a premium income of almost $4.000.000. Interest and rents brought in another $2,000,000. The expenditure for claims and maturities of endowment policies and other surrenders amounted to about $14,000,000. The amount of profits divided during the year was $1.200.000, part of which went as a bonus to the shareholders. Provision was also made for depreciation of securities. The company's operations in the industrial and employers' liability branches produced satisfactory results.

The total assurance funds are now approximately $50.000.000. There are now in force 118.738 ordinary policies and 286.905 industrial policies. The year 1917 was the thirty-first year of business, and during the past five years the assets have increased by almost 50 per cent. The company's director in Canada is Mr. Frank Coffee, and the secretary, Mr. J. P. Moore, A.I.A. The branch office is in the Imperial Bank buildings, Montreal. Other branches extend over Australia, New Zealand and the United Kingdom.

Welland building permits for June this year amounted to $96,715, compared with $22,530 in June last year.

HALF CENTURY IN CANADIAN BANKING

On July 24th, Sir Edmund Walker, president of the Canadian Bank of Commerce, will have completed a half-century of service with that institution. To celebrate this event a new series of bank notes will be issued, upon which years of preparation have been spent. The note, it is understood, is considerably different from ordinary Canadian bank notes, being much more ornamented with artistic decorations.

Sir Edmund Walker was born in Haldimand County, Ontario, on the 14th of October, 1848, and was educated in the Central School, Hamilton. In 1861 he entered the office of his uncle, Mr. J. W. Murtin, who was then a private banker in Hamilton. In 1868 he joined the Canadian Bank of Commerce, Hamilton, as discount clerk. He became its junior agent at New York in 1873, and held several positions as manager of branches from 1875-1880. In the latter year he became inspector of the bank, but the next year was sent to New York as joint agent. In 1886 he became general manager and was appointed president in 1907.

His work in New York was largely in connection with foreign exchange, as the Bank of Commerce was then prominent in financing the movement of the cotton crop. His work was influential in placing foreign exchange departments of banks upon a sound basis. He is an honorary member of the Canadian Bankers' Association, and the author of many important articles on banking and financial matters, having delivered addresses to meetings of bankers at many places over the North American continent.

Sir Edmund Walker, C.V.O., LL.D., D.C.L.

The 50 years during which Mr. Walker has been connected with the Bank of Commerce has seen many important changes in its business. During this period it has absorbed the Gore Bank of Hamilton, the Merchants' Bank in Prince Edward Island, the Bank of British Columbia, the Halifax Banking Company and the Eastern Townships Bank. These, it will be seen, cover every province of Eastern Canada. Sir Edmund Walker was also responsible for the establishment of the pension fund in the Bank of Commerce.

He was also known widely as a collector of art. In 1904 he presented the University of Toronto with an excellent library and collection. He is author of books entitled "Canadian Surveys and Museums," and of a paper on early Italian art, and is president of the Federal Commission to select art works for the National Gallery.

He is also a chairman of the Toronto Conservatory of Music, a trustee of the Toronto General Hospital, of the University of Toronto, and honorary president of the Mendelssohn Choir since its foundation in 1900.

The Manitoba wool crop this year has exceeded all previous records, more than 300,000 pounds having been secured.

DEATH OF SENATOR J. MASON

President of Home Bank Had Long Military and Business Career

On Wednesday, the 17th instant, Brigadier-General Hon. James Mason died at his home, 25 Queen's Park, Toronto, following an operation on Saturday for appendicitis. His illness was quite sudden, as he was in his usual health about the middle of the week.

General Mason was born in Toronto on August 25th, 1843, and was educated at the Model School. He then entered the service of the Toronto Savings Bank, which was afterwards converted into the Home Savings and Loan Company, and later into the present Home Bank of Canada. In 1873 he became general manager and president of the Home Bank, in which position he remained until he was called to the Senate in 1914. Mr. Mason was also a director of several companies.

Photo by International Press, Limited.

Late Senator James Mason

General Mason began his military career as a private in the ranks, and served in the Queen's Own Rifles during the Fenian raids. At Batoche, the seat of the North-West Rebellion, he was severely wounded. He became a lieut.-colonel in [illegible], and was in command of the Royal Grenadiers, from which position he retired in 1899, when he was appointed to the command of the 4th infantry brigade. In 1915 he was promoted to brigadier general.

In all matters of public interest and service Gen. Mason was ever at the front. He was one of the founders of the Canadian Military Institute and of the Empire Club. He was a Knight of Grace of the Order of St. John of Jerusalem, and was vice-president of the St. John Ambulance Association, and has long been treasurer and faithful worker for the Red Cross Society. The noble memorial to the heroes of the South African war that stands in University Avenue is largely the result of Gen. Mason's activity in honor of Canada's great dead. In religion he was a devoted Catholic and attended St. Basil's Church.

Gen. Mason was one of the first to see the need in Toronto of a public library, the "People's University," and was one of the founders of the Mechanics' Institute, the precursor of the Toronto Public Library, of which he was one of the original trustees, and later chairman of the board. No philanthropic cause that had any logic of appeal ever appealed to him in vain. He loved his native city, and worked earnestly and unostentatiously for its good. Those who knew him best speak of his quiet and unassuming spirit and of his transparent and democratic disposition. In the death of Gen. Mason Toronto has lost one of her worthiest sons, and the Empire one of her most loyal and devoted servants.

UNION INSURANCE SOCIETY OF CANTON

This is one of the oldest and strongest of British insurance companies doing business in the colonies, and the annual report for the year ended December 31st, 1917, is in keeping with its past record. After paying an interim dividend of 30 per cent. on the paid-up capital and a bonus of 20 per cent. to contributors, in accordance with resolutions passed at the previous annual meeting, there remained a balance of over $1,700,000 for distribution. The board recommended that from this sum be appropriated a final shareholders' dividend of 20 per cent. and a bonus dividend of 10 per cent.; also that $500,000 be added to the reinsurance fund and $50,000 to the special reserve fund. The balance was carried forward to the underwriting suspense account.

Speaking on the growth of the society within the last twenty years, Mr. Ross Thompson, in seconding the chairman's speech at the annual meeting, spoke as follows:—

"I have recently returned to the colony after an absence of twenty years, and when I got this balance sheet I turned back to the old balance sheet of 1896, and the comparison I was able to make between the two bore most striking testimony to the strength of the progressive development of this society during these twenty years. I noticed that the net income had increased 500 per cent., and the proportion of losses had increased by approximately the same figure in spite of lower rates of premium and steadily increased competition."

As Mr. Ross Thompson also says, the shareholders owe a great debt of gratitude to the general manager, Mr. C. Montague Ede. The value of the business man to the Empire after the present war will be an important factor, and those astute business men in the dominions and colonies of the British Empire, the heads of world-wide institutions, such as the Union Insurance Society, of Canton, Limited, ought to receive more recognition than they have hitherto. It would be difficult to find any company so able to afford its constituents such facilities as this society, which again is due entirely to the wise policy adopted for many years of building up reserves, which have now reached the stupendous figure of over eight million dollars. As the chairman remarked in his speech, it is the "union" spirit which prevails amongst the employees throughout the world that has carried on the enormous strain consequent upon the character of the business and the depletion of the staff. This society is one of those institutions that go to make up the great resources of the British Empire which will prove to be the foundation and mainstay of that everlasting peace which is nearing consummation.

The assets of the Union and its allied companies are now $30,000,000, and the combined incomes for 1917 amount to over $14,000,000. An insurance business is done throughout the world. Mr. C. R. Drayton, of Toronto, is the manager for Canada.

The British government, it is reported, has sanctioned the amalgamation of Lloyd's Bank and the Capital and Counties Bank, and of the National Bank of Scotland and the London and River Plate Bank.

Mr. G. T. Milne, British Trade Commissioner in Australia, is in Toronto, discussing the possibilities of extending British trade abroad, with Mr. Fred. W. Field, the British Trade Commissioner here.

Just before going to press we are advised that the syndicate which purchased $900,000 of Montreal Protestant schools 6 per cent. bonds is composed of C. Meredith and Company, Hanson Brothers and Company and N. W. Harris and Company, of Montreal, and of A. E. Ames and Company and R. C. Matthews and Company, of Toronto.

THE BUSINESS OF BORROWING

According to a recent report from England there are 16,750,000 holders of British war securities, and more than 13,000,000 accounts in savings banks. As this was a statement of Sir Robert Kindersley, chairman of the National War Savings Association, it may be accepted as authoritative. Commenting upon the statement, he said: "It may be safely alleged, not only that saving has been commenced by many millions who before the war never saved, but that there is every evidence that the efforts of these savers increase in intensity as the war proceeds."

This total of 16,750,000 is just about one out of three of the population of the United Kingdom, and the number of holders of British securities outside of the United Kingdom may be regarded as being a negligible fraction of the whole. Now, one out of three of our own population in Canada would be almost 2,500,000, whereas the number of subscribers to the Victory Loan was only 820,000. As the ability of Canadians is at least as great, if not greater, than that of British citizens, it is evident, therefore, that a vast field in Canada has been left untouched. This field may to a considerable extent be utilized during the next, or succeeding war loan campaigns. The goal of 2,500,000, however, seems very remote, and it is quite evident that a large proportion of the British total is represented by holders of securities other than ordinary bonds, that is by holders of war saving stamps and war saving certificates.

The smallest denomination of ordinary bonds so far issued in Canada has been $50, but war savings certificates in amounts from $10 upwards have for some time been available for small investors. The war savings certificates here have not met with phenomenal success in spite of the co-operation of many large employers of labor. A war savings stamp system is to be adopted by the Dominion government after the coming war loan compaign is completed, and this may meet with greater success. Success in national finance, however, is not measured by the number of holders of securities, but by the total of funds secured and the smallness of the cost of financing. As the number of subscribers is increased, it is inevitable that the average subscription must be smaller, and when amounts such as those produced from the sale of war savings certificates and war savings stamps are reached, the cost of flotation must be considerably greater. The argument that money raised by the sale of war savings stamps represents savings which would otherwise be wasted is not conclusive, and is at best doubtful. The primary source of the necessary funds must remain the sales of ordinary war bonds, and issues of other classes of securities must be judged in relation to this source, both as regards the total yielded and as regards the expense of flotation.

SPECULATIVE ELEMENT IN WAR LOAN SUBSCRIPTIONS

Many subscribers to the war loans do so not only with the object of receiving a good interest return on an investment in a thoroughly sound security, but also expecting to sell their bonds at some future date at par or at a premium, and thus realize some profit. The ordinary subscriber to the Victory Loan considered his investment as costing him about 99 and as yielding him 5½ per cent., and if he sold at par, he would regard the one per cent. as a clear profit. The same thing applies to a greater extent to the previous 5 per cent. loans which were issued at still further discounts. There is, therefore, an element of speculation in the motives of the average subscriber, quite apart from the general expectation of falling interest rates and consequent rises in security values which is shared by the majority of Canadians.

To this unavoidable element of speculation in war loans there are other features of the same nature which might be added, which have been suggested in some quarters, but not as yet seriously proposed, *viz.*, that premiums should be offered on certain bonds which would be drawn by lot. It is doubtful if a feature of this kind would, quite apart from any ethical considerations, be worth the trouble and expense connected with it. Raising money by public lottery was long ago discarded in the most advanced circles of public finance. Canada, moreover, would not be a good field for an experiment of this kind.

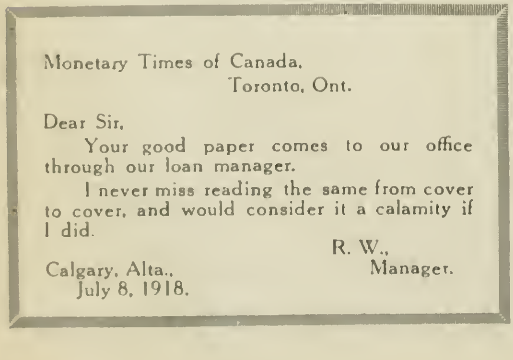
Some measure of worth, however, seems to have been added to the suggestion by the proposition that only original purchasers should be entitled to the chance of drawing a prize, and that the prize should be issued upon maturity, or at least some time after the exigencies of war finance had been passed. The effect of this would be nothing else than to discourage dealings in war loan securities. The fact that bonds of this kind are the most marketable security we have at present has been one of the most valuable arguments in their favor, and the fact that a ready market with a stable price has been maintained in the case of the Victory Loan bonds will go a long way towards the success of the next loan. However desirable it may be that the bonds should be placed in the hands of permanent investors, the occasional necessity of disposing of the bonds must not be overlooked. No individual, however well his personal finances are planned, would overlook the feature of marketability and the prospect of a loss or rather the foregoing of a possible gain, as in the case of a bond with a lottery attachment, would militate considerably against the success of an issue.

BOND ISSUES AND BANK LOANS

It is supposed that as a result of the bond flotations of the last two or three months, there will be seen a decrease in the total of bank loans to municipalities. As shown by the table published in *The Monetary Times* of July 5th, these loans on May 31st, 1918, at $57,728,226, stood at high record figures. This has been largely due, according to the general belief, to the various special loans negotiated by the municipalities, sometimes for the purpose of redeeming an issue of bonds falling due in New York. During May, June and July the refunding issues placed in Canada have been numerous, and when the syndicates turn over to the municipal authorities the proceeds of their sales, the tendency would be to bring down the aggregate of bank loans to the large cities and towns. It is to be remembered that during the period referred to, the ordinary or routine loans of the banks to the municipalities would tend to increase. These advances are granted to enable the municipal treasurers to meet ordinary current expenses pending the tax collections. In case of many of the cities and towns the taxes come in towards the end of the calendar year. Consequently, the bank loans to municipalities in anticipation of taxes are usually at the low point on December 31st, or January 31st—the aggregate rising subsequently month by month. There are exceptions to this rule—some of the large cities collecting the bulk of their taxes at other times.

The bank loans to provincial governments, though not nearly so important as the loans to municipalities, should be considered in this connection. Before the war these rarely got so high as $5,000,000; but since August, 1914, special loans to certain of the provinces raised the total at times to $12,000,000 or thereabouts. On December 31st, 1917, the loans to provincial governments amounted to $9,700,000; in the first five months of 1918 the tendency has been downwards—the balance shown on May 31st being $5,777,757. A news item of last week stated that the province of British Columbia has applied $2,000,000 of the proceeds of the $3,000,000 loan just procured from the Dominion government to the liquidation of an overdraft carried by the province at the Canadian Bank of Commerce. This constitutes another instance in which the banks have been strengthened through repayment of special loans. British Columbia, it will be remembered, recently asked for tenders from the bond-dealers for the new issue; but when the bids were opened no award was made, it being considered by the provincial representatives that the offers were all too low. Subsequently the province succeeded in arranging for a loan direct from the Dominion treasury. The interest cost of the Dominion loan is said to have been 6.50 per cent., as against a cost rate of about 7½ involved in the best offer from private sources.

The liquidation of special loans of this nature has its bearing on the banking policy regarding ordinary commercial loans and discounts. If the special loans are largely cleared away the banks will be able to advance so much more to the finance minister in the form of temporary loans without curtailing or reducing their loans and discounts to ordinary customers. It is understood that the commercial discounts will be carefully regulated, and perhaps in some cases loans may be curtailed where the proceeds are not being used for productive purposes; but it may be presumed that the reasonable financial needs of business men and others engaged in essential and useful enterprises will be provided for as in the earlier stages of the war.



Monetary Times of Canada,
Toronto, Ont.

Dear Sir,

Your good paper comes to our office through our loan manager.

I never miss reading the same from cover to cover, and would consider it a calamity if I did.

R. W.,
Manager.

Calgary, Alta.,
July 8, 1918.

ARGENTINA WANTS LOAN IN UNITED STATES

It is understood that a loan of approximately $40,000,000 is being arranged for Argentina in the United States. It will probably be arranged as a government credit.

The Trades and Labor Congress of Canada will convene for their thirty-fourth annual session on Monday, September 16th, in Montreal, when it is expected that delegates representative of all branches of labor will be present to discuss problems of vital importance to the workingman. After-the-war questions will demand considerable of the conference's attention, and it is stated that organized labor intends to place itself on record as being opposed to the indiscriminate securing of immigrants, who, having lower standards of living, are willing to accept lower wages, and hence jeopardize the position of the native worker.

BRITISH CROWN ASSURANCE CORPORATION

Terms of Amalgamation with Eagle, Star and British Dominions Ratified

Shareholders of the British Crown Assurance Corporation are to receive one share of stock in the Eagle, Star and British Dominions Insurance Company in exchange for every three shares of British Crown Stock. The latter, with a par value of £2 paid up, had recently sold at about 50 shillings, while the £3 paid-up shares had been selling at £9 each. On this basis the holders will receive one share worth about £9 in exchange for three worth about £7 10s., an advantageous transaction for them.

An extraordinary general meeting of the British Crown shareholders was held on June 10th, and the agreement ratified. Regarding the merger, the Right Hon. J. Parker Smith, chairman, spoke as follows:—

Considering the manner in which the difficulties, which were encountered in the early days of the establishment, have been tenaciously faced and successfully overcome, also considering the excellent results obtained last year, as disclosed by our recently published report, it might well be argued that the company had developed a staying power which was about to have its reward in continuing and increasing dividends, and that the time was not opportune that we should now invite you to agree to merge our business in that of another office. I believe I shall be able to satisfy you that urgent reasons exist, and that what you now propose is much in your interests as shareholders. I hope that you will unanimously give our proposals your approval.

"It is now just over eleven years since the office was established, along with a number of others, about the same time, largely tempted by the hope of obtaining, among other things, a share of the new insurance to be effected under the Workmen's Compensation Act, then coming into force. Unfortunately for the sanguine anticipation of every newcomer who engaged in the business, the old companies sat tight, and continued for years to be satisfied with unremunerative rates, until to-day all of the newcomers I refer to have been starved out, with the exception of ourselves, and most of them have gone into liquidation. It is not owing to such financial difficulties as these that your directors have called you together to approve of a resolution to join our fortunes with an office which has in a short time attained a very remarkable success. Our capital is intact. We have valuable assets in our goodwill and connection, and our business is now on a remunerative basis.

"Our real difficulty for the last two years has been that of maintaining an efficient staff, capable not only of enabling us to share in the great expansion of insurance business since the war, but to help in conducting the business we have already. During this time we had to put up with the enlistment of all our trained staff, with the exception of about six or seven men between all the branches and the chief office, and the day seemed approaching when it would be impossible for us to get through even the daily routine. This imposed, as you can readily understand, a very great strain upon our remaining staff, and particularly upon our general manager, upon whose good health and ability to carry on so much depended. This condition of affairs developed lately to such an extent that we felt we were not justified in continuing to rely entirely on a single man. If we had set the question of amalgamation aside for another year, and events had turned out favorably, we should, no doubt, have found ourselves in a position to make even better terms with our new friends, or with other people, than we are now about to set before you. But, on the other hand, we knew that if our general manager were by any chance put out of action we should find it impossible to fill his place, and we thought it our duty to you to entertain overtures which were made to us from different quarters, and what we believed to be a favorable offer was made to us to join our forces and fortunes with those of the Eagle, Star and British Dominions Insurance Company, we provisionally accepted.

"The Eagle, Star and British Dominions is a company which has made a very remarkable progress in the last few years, both by its own merits and by the value of the older companies which it has absorbed. When considering its offer, we had in mind that fact that, like ourselves, it exercised a freedom of action in regard to underwriting which is not enjoyed by the associated offices, and which, we believe, leads, and has already lead, to great improvements in the conditions of insurance.

"The contents of the agreement were very simple. Their shares were of the nominal value of £5, with £2 paid up. They had been gradually rising for some time, from 30s. before the issue of the last report, to 50s. just before the issue of their circular, and since the publication of the proposed deal, there had been transactions from 57s. 6d. to 60s. The ordinary shares of the Eagle, Star and British Dominions, which were to be issued to them in exchange, were of £3 fully paid up. They had for some time stood firm at £9, and received for last year a dividend of 12½ per cent. free of tax. The offer of the Eagle, Star and British Dominions was to give one of their shares for three of those of the British Crown Assurance Corporation, a proposal obviously, but not extravagantly to the advantage of the latter, and one which the directors unanimously recommended the shareholders to accept. Assuming, continued the chairman, that there is no further appreciation on the present price of the British Dominions shares, it means that we get the equivalent of £3 for each £2 paid, and get rid altogether of the uncalled liability of £3 on each of our shares. Also assuming that the British Crown would continue to pay its last dividend of 5 per cent., less income-tax, and that the British Dominions never exceed their present dividend of 12½ per cent., free of tax, you get in return for your shares an investment yielding net 6¼ per cent., against 3¾ per cent., besides getting rid of what is always something of a bogey in insurance shares —the uncalled liability. Therefore, I feel that your directors may congratulate you and themselves on the proposal, and also the shareholders of the British Dominions, for having in Sir Edward Mountain such a shrewd and able manager, as to be likely to secure this company's valuable business and connections from under the nose of his less enterprising colleagues."

PROVINCE OF MANITOBA BOND ISSUE

Upon another page of this issue appears an advertisement of the Manitoba government requesting tenders for $1,000,000 of 6 per cent. ten-year bonds, with interest payable half-yearly at Winnipeg, Toronto, Montreal and New York. The bonds are to be dated August 1st. The province has, we are advised by the Hon. Edward Brown, provincial treasurer, some obligations of about this amount falling due, which the proceeds of the present issue are intended to meet.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

FIFTY YEARS OF CANADIAN BANKING

Half Century Has Witnessed Enormous Growth in Size and Strength of Canadian Institutions

Next week, on July 24th, the Canadian Bank of Commerce will issue a series of new bank notes—this date of issue having been selected because it marks the completion of 50 years service with the bank by its president, Sir Edmund Walker. During a considerable part of this half century Sir Edmund has taken a leading part in guiding the development of Canadian banking, and he along with his contemporaries has worked continually and effectively to keep our banking laws sane, sound, and up-to-date. So the story of Sir Edmund's career largely covers the history of Canadian banking during the period. It was in 1868, just one year after Confederation, that Sir Edmund joined the staff of the Commerce as a junior in the Hamilton office. It should be noted that the Commerce opened its first branches—at London, St. Catharines and Barrie—on May 14th, 1867; and that the Toronto office of the bank opened for business on May 15th, 1867. Thus Sir Edmund's connection with the bank dates practically from its commencement.

It will be interesting to review briefly the banking situation as it existed 50 years ago, and to note a few of the important changes that have since occurred. In his "Canadian Banking System, 1817-1890," Breckenridge gives the following list of chartered banks carrying on business in Ontario, Quebec, Nova Scotia and New Brunswick on the day that Confederation became a fact, July 1st, 1867.

Ontario and Quebec.

	Capital Paid-up.
Bank of Montreal	$6,000,000
Quebec Bank	1,476,250
Commercial Bank of Canada	4,000,000
City Bank	1,200,000
Gore Bank	809,280
Banque of British North America	4,866,666
Banque du Peuple	1,600,000
Niagara District Bank	279,376
Molsons Bank	1,000,000
Bank of Toronto	800,000
Ontario Bank	1,999,100
Eastern Townships Bank	375,380
Banque Nationale	1,000,000
Banque Jacques Cartier	953,135
Merchants Bank of Canada	941,182
Royal Canadian Bank	866,626
Union Bank of Lower Canada	748,665
Mechanics' Bank	227,725
Canadian Bank of Commerce	384,181
	$29,467,773

Nova Scotia.

Bank of Yarmouth	$ 128,600
Merchants' Bank	64,000
People's Bank	309,789
Union Bank	400,000
Bank of Nova Scotia	560,000
	$1,552,389

New Brunswick.

Bank of New Brunswick	$ 600,000
Commercial Bank of New Brunswick	600,000
St. Stephen's Bank	200,000
People's Bank	80,000
	$1,480,000

Of the 18 chartered banks operating in Ontario and Quebec at Confederation, all but eight have failed, liquidated or lost identity through amalgamation, and when the Montreal-British merger is completed there will be but seven of these banks left.

Important Changes in the Business.

According to the Canada Year Book, the chartered banks reporting to the Dominion Government in 1868 had average total assets of $79,860,000. This means that the total assets of all banks calculated on a monthly average amounted to $7[illegible],000. One way to illustrate the striking growth that has occurred in the half-century is to take the total assets of the banks as at May 31st, 1918—$2,319,000,000—and divide by 21, the number of banks in active business. The result, $110,000,000, represents the average assets per bank. It exceeds by $30,000,000, or nearly 40 per cent. the total assets of all banks fifty years ago.

One of the important changes in the business of banking is seen in the decline in the relative importance of the bank note circulation. In the early days the bankers were obliged to depend very largely on their capital and the note issues for the means of discounting the paper of their regular customers. Deposits were scarce and the total grew very slowly. So it was necessary to push the circulation, and the paid-up capital represented a much larger percentage of the total assets than is the case to-day. Thus in 1868 the paid-up capital of the banks was $30,500,000; note circulation, $9,300,000; deposits, $33,600,000; loans and discounts, $52,300,000. At that time the capital represented roundly 38 per cent. of the total resources; now, the capital constitutes but 5 per cent. of the resources, and capital and rest together make up roundly 10 per cent. The important part played by the note circulation prior to the "nineties" may be seen when its growth is compared with that of the deposits.

	Note circulation.	Deposits.
1869	$ 9,500,000	$ 40,000,000
1870	15,100,000	48,700,000
1871	20,900,000	56,200,000
1874	27,900,000	77,100,000
1879	19,400,000	73,100,000
1882	33,500,000	110,100,000
1885	30,700,000	104,000,000

For a considerable portion of that period the circulation was practically one-third of the deposits. One can better understand, upon noting these figures, why the bankers opposed so vigorously the various measures introduced to parliament, having for their object the mutilation or destruction of the note issuing powers of the banks. Had these powers been abolished, the bank's power to discount would have been most seriously impaired. The note issues still furnish an important part of the resources which the banks provide for their agricultural, mercantile and industrial borrowers, also they benefit the Canadian borrowing public through keeping down the rates of discount—this being specially the case with accounts such as grain dealers, lumbermen, etc., in connection with which large amounts of currency are required. On May 31st, 1918, the bank note circulation as shown in the government return was $181,000,000. This represented a little less than one-tenth of the banks' total deposits of $1,849,000,000. Actually, however, the bank note circulation representing uncovered issues represented a a smaller percentage of the deposits. On May 31st, 1918, the banks had roundly $70,000,000 of their outstanding notes covered by gold and Dominion notes in Central Gold Reserves. As these notes were fully covered by actual cash, this part of the bank note issues would not give any funds for discounting purposes. If we take the uncovered issues as at May 31st, 1918, $111,000,000, it will be seen that they represented but one-sixteenth of the deposits.

Growth of Savings Deposits.

The fall in the relative importance of the note circulation was due to the development of the deposits. Around 1890 the banks generally introduced the savings departments and these have been of very great value in developing the deposits. The average annual increase of deposits from 1890 to 1900 was $12,000,000, as against an average annual increase of but $5,000,000 in the decade 1880-1890. The great increase of banking resources, however, dates from the opening years of the 20th century, following the branch bank extension movement that began to attain velocity in 1902. Canada's population, wealth, and business activity were growing rapidly; and the banks entered into the liveliest competition in the matter of establishing new branch offices in all likely places, particularly in the western provinces. In the last decade of the 19th century the branch bank extension movement proceeded more rapidly than in any earlier period. In 1890 the number of branches was 426, this being increased to 708 by 1900. The average increase per year was 28 offices. In 1901 the net increase in number of banking offices was 42; in 1902 it jumped to 154; in the six years following 1902 the average annual net increase was 170 offices; and in the five years ending 1913 it was 222 offices. With the commencement of the war the branch extension movement generally

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

236 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint Stock Bank, Limited; The Royal Bank of Scotland

was checked, although the French-Canadian banks have been active in providing new facilities for the small places in their own province. At the end of 1913 the banking offices in Canada and elsewhere operated by the Canadian chartered institutions numbered 3,046, as against 426 in 1890. This represented an important economic revolution and its effects on the banking situation have been far-reaching and profound.

During this period of 50 years, some very important changes have been made in our banking laws. In 1870 was passed the first general Bank Act for the Dominion. By this the law governing the operations of the banks chartered by the several provinces prior to Confederation was made uniform. The charters were renewed by the Acts of 1880 and 1890. During this period the bankers had to work hard to preserve from mutilation some of the excellent features of our banking system. The Bank Circulation Redemption Fund is one of the interesting new features introduced by the Bank Act of 1890. This provided for a 5 per cent. fund, which with the guarantee of the associated banks, has effectively preserved from loss all the holders of notes of banks failing since 1890. It was also provided at this time that notes of every chartered bank should go at par in every part of the Dominion. In 1908 the Bank Act was amended so as to permit the banks, during the crop-moving season, to issue notes in excess of paid capital to the extent of 15 per cent. of capital and rest, subject to tax at a rate not to exceed 5 per cent. In 1913, after a protracted discussion of all clauses of the act, the shareholders' audit was introduced; also the Central Gold Reserves plan of issuing excess note circulation was inaugurated.

The Japanese government has advanced $10,000 to the Chinese government, the security being the surplus from the salt revenue.

A proposal to borrow $40,000 to improve the Protestant schools of Outremont, Quebec, is meeting with considerable opposition. The expenditure would require an addition of about four mills to the tax rate of the Protestant ratepayers.

PROVINCE OF MANITOBA
(Treasury Department)

TENDERS

The undersigned will be pleased to receive tenders, up to and including the 27th instant at noon of that day, foran issue of provincial bonds amounting to one million dollars.

Term 10-years. Interest rate six per cent., payable half-yearly at Winnipeg, Toronto, Montreal and New York.

The issue to be dated August 1st.

Definitive bonds can be delivered within thirty days from the date of receiving tenders; or, if it is any advantage to the purchaser, Interim bonds can be delivered within ten days thereafter.

The issue will be a direct obligation of the Province, and a charge upon the Consolidated Revenues thereof.

The purpose of the loan is to retire an issue of like amount which matures shortly; so that it does not increase the debt of the Province.

The Legislature has provided the necessary authority for the issue, and the Minister of Finance has intimated that he will approve of same in due course.

The bonds will be delivered to the purchaser in Winnipeg, but the proceeds of the issue may be deposited to the credit of the Government in Toronto, Montreal or Winnipeg at the option of the purchaser.

The lowest or any tender not necessarily accepted.

EDWARD BROWN,
Winnipeg, July 15, 1918. *Provincial Treasurer.*

PERSONAL NOTES

Mr. H. R. Warren has been appointed manager of the Sterling Bank at Almonte.

Mr. C. B. Graham has been appointed manager of the Sterling Bank's branch at Thornhill, Ont.

Mr. W. L. Acton, formerly in the head office of the Sterling Bank, has been appointed manager of their branch at Shedden, Ont.

Mr. Gilbert C. Langley, of Calgary, has been appointed a fishery overseer for the province of Alberta, to replace N. J. Hoad, resigned.

Mr. J. Deslongchamps, for past ten years cashier of the Mount Royal Assurance Company, has been promoted to the position of secretary-treasurer.

Mr. J. E. Quick, general baggage agent of the Grand Trunk Railway, retires after 47 years' service, and is succeeded by Mr. L. L. Grabill.

Mr. R. E. Marks has been appointed passenger train master, Grand Trunk eastern lines, with headquarters at Montreal, vice W. E. Weegar, transferred.

Mr. S. G. Harrington, formerly manager of the Sterling Bank at Almonte, Ont., has been transferred to Goderich as manager of the Goderich branch and district supervisor. Mr. Jackson, who formerly was located there, is taking a holiday, after which he is to be transferred to a new field.

Mr. Wensley B. MacCoy, K.C., of Halifax, has been appointed by the Nova Scotia government to the position of secretary of industries and immigration in the department of immigration. Mr. MacCoy will continue to act as secretary of the Nova Scotia Soldiers' Commission, and will take the duties of that office to the immigration department.

Mr. Arthur A. Lefaivre, for the past fourteen years inspector of the Norwich Union at Montreal, has resigned that position to accept the position of inspector for the province of Quebec for the Mount Royal Assurance Company. Previous to his connection with the Norwich Union, Mr. Lefaivre was for thirteen years inspector of the North British and Mercantile.

Mr. D. McEachern, assistant secretary of the Canada Trust Company, and of the Huron and Erie Mortgage Corporation of London, Ont., has been appointed Canadian director of the Financial Advertisers' Association. This association is a department of the Associated Advertising Clubs of the World, a session of which was recently held in San Francisco.

Mr. L. B. Beale, it is announced, who, up to a short time ago, had charge of the Toronto office of the British Columbia government, paying special attention to the lumber interests of the Pacific province, is to return to Toronto soon. Before re-opening the Toronto office, Mr. Beale is to make an extensive trip to Europe in the interests of British Columbia lumber industry.

Mr. D. H. MacDougall, formerly general manager of the Dominion Iron and Steel Corporation, has resigned and has become president of the Nova Scotia Steel and Coal Company. He succeeds Mr. F. H. Crockard. Mr MacDougall was born in Cape Breton in 1870, and has been connected with the Maritime coal and steel interests since early in life. In 1910 he was assistant general manager of the Dominion Coal Company, and in 1912, manager. He has been manager of the Dominion Steel Corporation since 1916. Under his direction both of these companies made unusually good progress, as Mr MacDougall was particularly successful in his dealings with the employees He is a member of the Canadian Mining Institute, the Royal Astronomical Society of Canada, the American Iron and Steel Institute, the Canadian Forestry Association, the Canadian Society of Civil Engineers, and many other business and social organizations. At an early age he has attained to one of the foremost positions in Canadian industrial life

WHY EXCHANGE IS HIGH

Reasons Lie in Fundamental Trade Conditions, and Banks are Not to Blame

The Sterling Bank of Canada has issued a pamphlet dealing with the exchange situation between Canada and the United States. This question is discussed as follows:—

A rate of exchange of over 2 per cent. on remittances of funds to the United States has developed of recent months. The American holder of Canadian funds has been chagrined to find that they are subject to a very considerable shrinkage, while the Canadian importer has resented the 2 per cent. premium on his purchases in the United States which he must pay in addition to the cost price and duty. In many cases there has been a tendency to blame banks and banking for the situation, because customers have not taken the trouble to look beyond the banks to the international trade developments which are at the root of the high exchange rate.

In order to arrive at a clear understanding of these developments, it is necessary to bear in mind the fundamental truth that exchange is something which must be bought before it can be sold and that United States funds are just as much an article of commerce as United States oranges.

The Canadian banks do not create these funds; they buy them. According as the supply is plentiful or scarce, they pay a low or a high price. When they come to dispose of this exchange, they do so at the quotation of that particular day, which may be slightly lower or slightly higher than the price at which they bought. In other words, the banks stand to lose as well as to gain as the price fluctuates. But in any event, the major part of the premium which the customer pays goes, not to the bank, but merely through the bank, to the original holder of the exchange.

Law of Supply and Demand Applies.

The law of supply and demand, which governs the price of all commodities, applies equally to exchange. When the demand in Canada for United States funds is greater than the supply, the premium which must be paid for these funds, increases as naturally as the price of a bag of potatoes during a potato famine. The bank which requires such funds has to buy them where it can get them, and it has to pay such an increased price as the scarcity at that particular time will warrant. In order, therefore, to answer the question: "Why is exchange high, it is necessary to ascertain why United States funds are at present scarce. And the answer is: United States funds are scarce, and therefore at a premium, because Canadians have to remit to the United States more than they receive from the United States.

This excess of remittances southward is due, in turn, to the excess of goods coming northward for which they are the payment; in other words, it is due to the amount by which Canada's imports from the republic exceed her exports to the republic. The unfavorable balance of trade is the greatest factor in the scarcity of United States funds and the consequent high rate of exchange.

The sequence of events might be outlined as follows: Canada, in her trade with her neighbor, buys more than she sells; hence owes more than is owed her. It naturally follows that American dollars (whether in drafts or currency or any other form of exchange) are scarce in Canada and sell at a premium, while, on the other hand, there is a surplus of Canadian funds in New York, and the Canadian dollar shrinks in value there as a consequence.

It may be objected that this unfavorable trade balance is a matter of long standing, while an exchange rate of 2 per cent. is something unusual in the history of the two countries. Though these statements are both true, it is also a fact that the unfavorable trade balance has never been so great as during the past year, during which a number of other factors have also tended to aggravate the situation. One of these has been the ban upon the sale in New York of Canadian securities; another has been the cessation, by government order, of gold shipments which might have helped to adjust the balance; a third has been the absence of British moneys which, in ordinary times, flow into Canada in exchange for Canadian commodities and are utilized to meet Canadian obligations in the United States.

All these forces acting together have contributed to the present situation, but at the bottom of it all is the fact that Canada buys from the United States much more than she sells. This is particularly true at certain seasons of the year, and less marked during the period when Canadian grain is moving across the boundary line. When this happens in the autumn there may be a fall in exchange, but it is likely to be a temporary one and not nearer par than one-half of one per cent. unless governmental measures are taken to correct existing conditions.

Sells United States Much, But Buys More.

The increase in the value of Canadian imports has been due to a number of developments; in part to higher prices, but these operate also to inflate exports. The Dominion activities as a manufacturer of munitions for the allies have undoubtedly accounted for a considerable part of the advance in importations. Coal, machinery and other products which enter into the manufacture of war goods have contributed to the total. And Canada has been prosperous. Her people have been buying freely both abroad and at home.

For the fiscal year ended March 31, 1918, the Dominion's exports to the United States totalled $440,000,000, but her imports from across the border reached the phenomenal sum of $790,000,000. There was, therefore, for the year, an unfavorable trade balance against Canada of $350,000,000. That the balance should be unfavorable was nothing new; that it should reach $350,000,000 was a matter which caused some concern, and various remedies have been sought. The discrepancy between imports and exports has continued, however. In the first three months of the present calendar year there seemed to be an improvement, as imports from the United States decreased $36,000,000 (while exports from Canada increased $20,000,000). But during April and May there occurred a marked falling off in Canada's exports of manufactured and agricultural products. To quote the finance minister, there was less grain to come out than in the previous year and there had been a considerable diversion of shipping to the service of carrying American troops. Thus with Canada selling a minimum of goods to the States and continuing to buy a maximum of goods, remittances from across the border have been abnormally low, while remittances which Canada has had to make have been abnormally high.

This accounts for the scarcity of United States funds, and the scarcity of these funds accounts for the premium at which they have been selling. There are, of course, sharp variations in the state of trade from time to time; hence variations are bound to occur in the scarcity and price of New York funds. But the governing trend will be high as long as the excess of Canadian imports over Canadian exports, in trade with the United States, continues to be abnormal.

Canada Must Meet Her Commitments.

In addition to the excess of imports which operates to maintain a high rate of exchange with the United States, there is the considerable factor of Canadian commitments which keep falling due in New York. The interest and principal paid upon Canadian securities there must be added to the unfavorable balance of trade in arriving at the discrepancy between what Canada is paid for the things she sells and what Canada owes for the things she buys. In selling securities in the republic, she was selling a commodity. Added to the amount of her merchandise exports, it tended to stabilize the trade balance and keep down the exchange rate. But such sales have for some time been forbidden, and the stabilizing factor thereby removed, while, on the other hand, the payment of interest and principal has had the opposite effect. This is, it has increased the demand for New York funds and operated towards a high rate of exchange.

In the earlier years of the war, the Canadian government alone raised loans of $185,873,000 in the States, all but $45,000,000 of which is still outstanding, and upon which over $7,000,000 in interest is due during the current fiscal year. With the entrance of America into the war, however, Canada fell back upon her own resources. It has been suggested that the Dominion should now seek to stabilize exchange by further flotations in New York, but it has been pointed out that this would add seriously to the expense of Canada's credit, as interest and commission rates are abnormally high in New York for all outside securities. It would also react unfavorably upon the impending second Canadian Victory Loan and the rate of interest which the government would have to pay on that issue.

British Funds are Not Available.

The question is sometimes asked why Canada, which has a favorable balance of trade with Great Britain, cannot utilize this balance to overcome the unfavorable balance with the United States. In this connection, it is pointed out that, in the fiscal year ended March 31, 1918, Canada exported $860,-

000,000 worth of goods to Great Britain and imported only $80,000,000 worth.

Normally, this tremendously favorable trade balance of about $780,000,000 would mean that Canada would have available, to meet her obligations in the United States, a vast resource of British moneys. These have been used to stabilize trade in the past, but at present they are unfortunately unavailable. To understand the situation, it is necessary to take into account the terms upon which Britain is securing her munitions from the Dominion.

Early in the war, the Mother Country actually lent money to Canada. That condition is now reversed, and Britain is buying in the Dominion on credit. Arrangements were made last year whereby the Federal government advanced a minimum of $25,000,000 per month to finance British war purchases in Canada. On many occasions this minimum has been largely exceeded. It follows that, instead of British money flowing into Canada and being available to stabilize exchange with the United States, the Dominion's own funds have been used to pay Great Britain's debts here. In return, Britain is maintaining Canada's army abroad, but Canada's payments on behalf of Britain exceed Britain on behalf of Canada by about $100,000,000.

Cut off from the resources usually available to restore the trade balance with the United States, Canada for the present pays a high exchange rate. In order to reduce it, an embargo has been put upon certain imports, but the reduction thus effected is not large in comparison with the total unfavorable balance. Other means have been tried; among them, the placing by the United States of munition orders in Canada. Still others are under consideration, including, probably, some arrangement between the governments of Britain and the United States which (perhaps by the payment of cash for Canada's grain crop) will render available for stabilization of exchange a part of the debt which is owing by Britain to Canada for munitions supplied.

In the meantime, the point to remember is that exchange is not something which, in mysterious manner, "grows" in the banks. It is a commodity which they must buy where and when they can get it, and they have to pay such price as its scarcity warrants.

In Canada the scarcity of New York funds is very real. It is not a matter of "sending out and getting them," but of buying them from those who have them and who, because of the scarcity, are able to demand a handsome premium. An American banker is able to buy New York funds readily and easily, but because of the trade conditions already outlined, the Canadian banker is forced to pay more than 2 per cent. exchange. In brief, the situation may be summarized as follows: Imports from the United States have to be paid for by: (a) Exports to the United States; (b) proceeds of sales of securities; (c) drafts upon Great Britain or other countries outside of Canada and the United States; (d) gold shipments.

If the sum of all these means of payment—a, b, c, d—does not equal the total value of imports from the United States, then the individual owing money in the United States will have to pay a premium for American funds or buy at a premium and export to the United States some commodity—e.g., silver or gold, in order to satisfy his creditor's claim.

The comparatively small balance regulates the price. The exporter gets more for goods shipped to the United States and the importer has to pay more for goods imported. And with the sale of securities forbidden, drafts upon Great Britain scarce because Canada is financing Britain's purchases in the Dominion, and, finally, gold shipments cut off, the rate of exchange will continue to be high until Canadian grain is moving. So far as the Canadian banks are concerned, the scarcity of American exchange actually means more trouble and less profit. It is a matter of international trade and beyond their control.

CAPTURING ENEMY TRADE

At Brighton, England, Bernard Oppenheimer is spending £100,000 on a scheme for employing disabled soldiers and sailors in the diamond cutting industry. He is working in conjunction with the Ministry of Pensions and is building a factory capable of employing 1,500 men. A minimum weekly wage of £[illegible] after six weeks' training is agreed upon. The project is an effort to capture this trade from the Germans, who almost monopolized it before the war. Ninety-nine per cent. of the diamonds the Germans were cutting came from British possessions.

GREATER WINNIPEG BOARD OF TRADE

Plans are being developed for the organization and work of the Greater Winnipeg Board of Trade, which is to be a comprehensive organization including many of the institutions which have been working for the city's welfare. For the purpose of more directly interesting each member, and enhancing the efficiency of the organization, the membership is divided into five main divisions, namely, industrial, commercial, transportation, civic and agricultural. These divisions are again sub-divided into bureaus. There will be standing committees and administration bureaus corresponding to the different sections and a board of fifteen directors at the head of the whole organization. These plans are, of course, tentative, and alterations may be made as occasion warrants.

UNITED STATES SECURITIES IN CANADA

The Hew R. Wood Company, of Montreal, make the following suggestion in their July Bond News:—

"In our opinion the present is a time that warrants the consideration of disposing of your United States investments, and the reinvestment in Canada. Canada's position is well secured to-day and the balance of trade is well in our favour, except with the United States, placing the investor in a very good position to dispose of his holdings there with exchange in his favour and benefit the financial position of the country."

Canadian brokerage firms which have wire connections with New York Stock Exchange firms will in future be required to pay a fee of $10 a month for the privilege.

LONDON AND LAKE ERIE RAILWAY

The London and Lake Erie Railway and Transportation Company, which operates a road from London, through St. Thomas to the town of Port Stanley, on Lake Erie, has been forced to discontinue its service. The company was chartered on March 17th, 1910, as successor to the Southwestern Traction Company, which was sold on October 21st, 1909. The franchises expire in twenty-five to fifty years. The number of miles operated are 29.02, of which 14 miles are over private right-of-way. The gauge of the road is 4 feet 8½ inches, the rails, 60 pounds in weight, and the company has sixteen passenger, seven freight and two work cars.

Although the company has never made profits to any extent, it succeeded in paying operating expenses and bond interest, with a small margin, until recently. The capital is $2,000,000 of stock and $700,000 of bonds. The total earnings have ranged around $125,000 and net earnings around $45,000. The interest on the bonds amounts to $35,000.

The London and Port Stanley Railway was acquired by the city of London, and since that date has been operated by the London Railway Commission. This line competes with the London and Lake Erie, the roads being practically side by side. The traffic is sufficiently large to support one road, but not large enough to maintain two roads. The London and Port Stanley line was electrified at a cost of $1,174,948, which entailed a fixed charge upon it of $64,600, being at the rate of 5½ per cent. There was also a fixed charge of $76,000 on the bonds for the original cost and some provision for sinking fund. Part of the original cost, however, is being borne by the city.

Some time ago the London and Lake Erie offered to sell its road to the London and Port Stanley at 85 per cent. of the bonded indebtment, that is, $595,000. Upon receiving a reply that the best offer that could be made would perhaps be about 60 per cent., the road offered to sell out at this price. The best actual offer that could be received, however, was an offer of $278,500. Payment was to be made in bonds by the London and Port Stanley to the amount of $241,000, bonds of the city of London to the amount of $25,000 and and bonds of the township of New Westminster to the amount of $12,500. As the bonds were for forty years and bore interest at 5 per cent., they would only be worth about 80 cents on the dollar, which is approximately a 6½ per cent. basis. This would mean that the price of the line and property would be just about $225,000. The London and Lake Erie Railway declined the offer, and a meeting of the bondholders is to be held on Friday, the 12th instant, for the purpose of discussing what remains to be done.

A Guaranteed Investment

Protected by such security as first mortgage on improved property, and further guaranteed by the Capital and Reserve of this Corporation, our Guaranteed Investment, paying a good rate of interest, should be most attractive to investors. Interview or correspondence solicited.

SHOULD GOVERNMENTS CONSCRIPT LAND?

Productive Use of Land Can Be Enforced Without Resort to Heavy Taxation

"Conservation of Life," in a recent issue, discusses as follows some methods of putting idle land to productive use:—

"It is estimated that there are approximately 30,000,000 acres of good farming land in Manitoba, Saskatchewan and Alberta in the districts served by railways. This is the land upon which soldiers should be settled and upon which incoming settlers should be placed until it is all in use. . . . Let the government conscript it at a price about one-half its value for productive purposes."—"Grain Growers' Guide."

To conscript land at half its real value—probably much less than the fictitious value now given to most land as a result of speculation—would be to confiscate real property. Whether the government has given such vacant land as a consideration to railway companies, or whether it has been purchased by the present owners it has been acquired under contract, and to make such a contract a "scrap of paper" would not be in keeping with principles of social justice.

Of course no such contract should confer on the owners the right to use his property to the injury of his fellows. Life is higher and more valuable under the law than real property, even although the courts have not always held it to be so, and land should not be permitted to be used in such a way as to injure life—say as the site of a slum or for a sky-scraper with dark rooms. Nor should land be permitted to be held except for productive use. But both the protection of life and the prevention of absentee ownership of land can be effected without confiscation. To confiscate private rights in land would not only be opposed to justice, but would have the effect to driving capital and private enterprise away from land as an investment, thereby causing serious injury to the country. Conscription of life is on a different footing—since it does not involve the breaking of a sacred contract. It is the duty of every citizen to defend his country—subject to equality of treatment. For the same purpose it is the duty of all owners of wealth to contribute to the measures needed for defence; but the contribution should be collected on a uniform basis, from owners of all forms of wealth. We should deal with bad ownership by direct prevention or punishment. The right to ownership of land under proper conditions should be encouraged.

Now it is admitted that the holding of land in an idle state is improper ownership. How should that be prevented? Placing an extra tax on such land is not entirely satisfactory. For the government to collect a tax on bad use of land or non-use of land is to make it a partner in the impropriety of the owner; and when the tax becomes a sufficient burden to really punish the owners it is often uncollectable.

To promote the economic use of land in rural parts of Canada and to prevent its unhealthy use in crowded cities, are two of the most urgent problems before the country. The first step required is for the governments themselves, in their capacity of owners and developers of land to set a good example by eliminating from their policies and administrative machinery everything that encourages speculation. Some of the worst examples of speculation in Canada have been initiated by governments and large corporations having the support of governments. The present methods of land settlement and transfer still give every encouragement to speculation.

In cities the improper and crowded use of land should be prevented by adequate building regulations and town planning schemes. In both the cities and the rural districts it should be made illegal in future for any person to acquire a title to any area of land except for use. This would merely be extending the principle at present in force in connection with homesteading, to all landed transactions. The effect of such a law would be to eliminate most of the competition which now raises the value of land against the bona-fide user. If I want a lot to build a home I have usually to compete with numbers of others who may want it for speculation. That is why the sites of our homes are so dear. Real estate operators, whose proper function should be to act as agents for the transfer of property, have, as things now are, become primarily speculators and only as a secondary sense agents for others. If land could only be bought for use this would limit the holdings of such operators and all other speculators to what they needed either for homes, business, or production. And why not? The land was originally alienated from the government at a nominal price or for nothing—under a contract (specific or implied) that it would be used.

When the governments, through their colonization departments, have adopted a proper method of land settlement and show a good example to private owners, and when they have made such a law as is suggested, to prevent the acquisition of land except for purposes of use, there will still remain the big problem to settle of how to deal with existing owners of unused and badly used lands.

Bad use can only be prevented by restrictions and development schemes under town planning legislation, accompanied by some form of tax. Unused lands should be dealt with as follows: The law having first provided that the purchaser of land must have some object of use, then existing owners of idle lands should receive notice to sell all such lands within a period of five or ten years or to show cause why they should not sell it or themselves put it to economic use. By selling it in the open market they would receive for the land its full value as a usable article. It is true that the price of land would fall—but only from its fictitious speculative value to its usable or revenue producing value. When land has reached its revenue producing value for a proper and healthy purpose, it will attract more capital than at present; it will be a proper subject for investment of trust funds; it will make it certain that it will be used to the best purpose; and industry and production will no longer be burdened with the losses due to excessive speculation. High land values do not constitute wealth, but on the contrary are a tax on wealth.

The returned soldier would get land more easily by direct purchase. Land near to the railways would be "cheaper" for many years than land obtained for nothing in remote districts—until the demand by users overtook the supply. If the government wanted land to develop closely-settled communities for soldiers, it would be able to buy at a reasonable price, and lose little or nothing on the transaction.

One advantage of the proposed reform would be that a proper and equitable basis would be obtained for valuation of land for assessment purposes, which is not possible to obtain under present conditions. Another would be that cheap land would be made available for housing schemes and waste land having no productive value would be available for open spaces.

It is not suggested that the land question would be solved by the measures proposed in this article; but it is suggested that no solution can be effective which does not begin by making it illegal to hold land except for healthy and proper use.

INCREASED BUSINESS IN KITCHENER

The following are the official returns for the month ended June 30th for the city of Kitchener:—

	1917.	1918.
Bank clearings	$2,612,861.83	$2,699,793.16
Customs returns	111,618.83	117,023.87
Building permits	14,450.00	5,040.00
Building permits for the first six months	126,732.00	66,315.00

BRITISH COLUMBIA ELECTRIC RAILWAY

Recent reports from Vancouver state that offers received for the British Columbia electric road were largely in excess of the amount offered by the city, both as to guarantee and bonus. The directors are submitting the offers to the shareholders. The company was offered by Vancouver $241,500 in 30-year 5 per cent. debentures and a bonus of $12,500 from the city and $25,000 from New Westminster. The capital stock, it may be mentioned, is £4,320,000, in addition to which there are considerable amounts of bonds outstanding.

A rail car ferry was recently launched at Quebec for the Canadian Northern Railway, to be used to transport passenger and freight cars between Vancouver Island and the British Columbia mainline.

The Government Statistician of New South Wales has calculated the total number of sheep in New South Wales at present as being 36,179,730. This is considerably more than last year. The wool crop should, therefore, be proportionately larger.

CANADA'S EXCESSIVE FIRE LOSS

Compares Unfavourably With Any Other Civilized Country—Causes and Remedies Outlined by Conservation Commission

Canada's annual fire waste is $2.73 for every man, woman and child, and is larger than that of any other civilized country in the world, according to an exhaustive report by the Commission of Conservation on fire waste in Canada, just made public. This enormous waste, the Commission asserts, is sapping the economic vitality of the country, and the immediate adoption of compulsory fire-prevention measures is necessary. The investigation also revealed the fact that the expense of conducting fire insurance in Canada is unduly high, and that there are grave abuses inherent in the present agency system.

Excessive Fire Loss.

The report says that since Confederation fire loss in Canada, excluding forest fires, has been $700,000,000. Of this sum $350,000,000 is made up of direct fire losses, $150,000,000 represents the cost of maintaining public and private fire protection services, whilst $197,000,000 is the amount of insurance premiums paid, but not returned to policyholders in compensation for losses. In addition, nearly 200 people are burned to death and about 500 seriously injured by fire every year. In the four normal years, 1912-15, Canada's annual per capita fire loss was $2.73, as compared with $2.26 in the United States, 64 cents in England, 74 cents in France, 28 cents in Germany and 13 cents in Switzerland. A disquieting feature is that the losses in this country are increasing with great rapidity.

The Commission says that 70 per cent. of the fires in Canada are caused by carelessness, faulty building construction, arson, and lack of fire prevention laws, such laws as exist being but poorly enforced. Canadian fire departments are declared the best in the world, but they are not preventing a steady growth of fire losses.

Compulsory Legislation Needed.

In dealing with the remedy for present conditions, the Commission says that compulsory legislation, making individuals responsible for their own careless acts, is imperative. The public, it is asserted, must be aroused to their collective responsibility so that the public opinion will urge and support the adoption of restrictive legislation. The Dominion Government not being given direct jurisdiction by the British North America Act, it should, the Commission thinks, conduct a campaign to educate the public to their responsibility. The purpose of this would be to assist provincial fire prevention efforts. The Dominion Government, it is said, should also maintain a testing laboratory to establish standards in building materials and devices.

Extravagant Administration.

The Commission contends that the high cost of doing business implies extravagant administration on the part of insurance companies, and says that from 1869 to 1916 the public has paid the insurance companies 65 cents for distributing every dollar of indemnity. This, it continues, gives food for thought, when it is remembered that, under present Government management, the collection of customs and inland revenue cost less than five per cent. of the receipts. Since the estimate of Government insurance in New Zealand in 1905, the rates on mercantile risks have been reduced 10 per cent. and on dwellings 33⅓ per cent. The report asserts that insurance agents in Canada are paid, on the average, a commission of slightly over 20 per cent., obviously a large expenditure on middlemen. It is also stated that the number of agents is excessive, a circumstance which makes necessary a higher commission than is economically necessary.

Comission Basis Root Evil.

"The root evil of the insurance business, and one of the greatest factors in the excessive fire waste in Canada, is undoubtedly the method of compensating agents solely on a commission basis," the report declares. The careless agent is paid equally well with the careful agent. This tends to over-insurance, carelessness in the use and care of property, and arson, all of which cause a heavier fire waste. The remedy for this, the Commission states, is a profit sharing commission for agents whereby those who write good risks would be more highly remunerated than those who write bad ones.

The Canadian Fire Underwriters' Association, it is pointed out, has attempted, but failed, to enforce a similar system of contingent commissions on account of the disadvantage under which it would place its members in competition with non-board companies. The Commission of Conservation therefore recommends that uniform legislation be drafted into the Dominion and Provincial Insurance Acts to establish the principle of profit-sharing commissions for all companies, leaving the companies and their agents to work out the details.

DOMINION CROP CONDITIONS

Bad Weather and Labour Shortage Prevents More Than Normal Crop

The Dominion Bureau of Statistics issued on Saturday, the 13th July, the usual revised estimate of the areas sown to spring grains, an estimate of the areas under later sown cereals and hoed crops, and the condition of grain crops on June 30, as compiled from the returns of crop correspondents.

For all crops, except peas, the estimate of areas sown to spring grains is less than it was a month ago, the decrease being caused by unfavourable weather conditions in the West. For wheat, the total acreage is now estimated at 15,838,000 acres, or 7 per cent. more than last year, spring wheat occupying 15,497,300 acres, or 10 per cent. more than last year, and fall wheat 340,700 acres, or 53 per cent. less than last year. For oats the area sown is now placed at 13,784,000 acres, or 4 per cent. more than last year; for barley the area is 2,403,750 acres, and for rye 201,900 acres. Peas occupy 205,730 acres, mixed grains 501,400 acres, hay and clover 8,015,250 acres, and alfalfa 102,900 acres. In the three prairie provinces the area sown to wheat is 14,964,000 acres, comprising 2,618,000 acres in Manitoba, 9,101,000 acres in Saskatchewan, and 3,245,000 acres in Alberta.

Later Sown Cereals and Hoed Crops.

The estimated acreages of later sown cereals and hoed crops, as compared with 1917, are for all Canada as follows: Buckwheat, 407,800, as against 395,977; flax, 927,300, as against 915,500; corn for husking, 213,400, as against 234,339; beans, 105,560, as against 92,457; potatoes, 686,300, as against 656,958; turnips, etc., 216,970, as against 218,233; sugar beets, 13,200, as against 14,000, and corn for fodder 344,700, as against 356,518. The area under beans shows an increase of 14 per cent., and that under potatoes an increase of 4 per cent. The areas sown to both of these crops is the largest on record; the increase of beans is chiefly in Quebec, and of potatoes in Quebec and in Alberta.

Condition of Grain and Hay Crops.

In general, the condition of grain crops in the Atlantic provinces is not so good as it was this time last year, and there is also a slight falling off as compared with a month ago; but the prospects for good yields are fair. In Prince Edward Island the condition of wheat is 2 above, in Nova Scotia 1 below, and in New Brunswick 1 above the decennial average. Oats are 2 points below average in Prince Edward Island and Nova Scotia, but 1 above average in New Brunswick. In Quebec conditions have gone back during June, but are still much more favourable than they were a year ago. Spring wheat is 103, oats are 101, and barley is 100. In Ontario fall wheat remains poor, being 70, or 30 per cent. below average, but spring wheat is 101. Oats and barley are equal to the average. In the prairie provinces drought and continuous high winds during June have caused serious damage to wheat crops, and large areas have had to be re-sown to other crops. In the northern parts of these three provinces, however, the rainfall has been sufficient, and conditions are fairly promising. For spring wheat the condition is expressed numerically by 88 in Manitoba, 85 in Saskatchewan and 83 in Alberta; i.e., 17 to 12 per cent. below average. In British Columbia, hot, dry weather in May and the early part of June retarded growth, and the condition of wheat is 10 and of oats 14 per cent. below average.

Reports of Provincial Governments.

Telegraphing on July 9, the Saskatchewan Department of Agriculture reports that more rain is greatly needed throughout the province. In many sections wheat has headed out, but is very short; and not more than half a crop is anticipated. Conditions are better in the north-western and north-eastern districts, where prospects are excellent. In the south-western and south-eastern districts crops are nearly ruined, a few points reporting better prospects than the majority. The Alberta Department of Agriculture telegraphed (July 6) that while the grain crops of the whole province, except the Edmonton, Peace River and Grand Prairie districts, have been seriously affected by the lack of moisture, recent rains covering most of the province have helped the general situation.

CONDITIONS OPPORTUNE FOR INVESTMENT

That the present is an excellent time to purchase securities is maintained by Peabody, Houghteling & Co., of Chicago, in a circular recently issued as follows:—

"We have been requested many times to express our opinion as to the advisability of making investments at the present time and the proper kinds of securities to purchase.

"It is our opinion that, on account of the physical and financial strength of the country and the protection and encouragement afforded industries by our Government, there has never been a time when funds could be placed with greater certainty of safety.

"Unusually attractive interest rates have been caused by the unprecedented demand for money by our Government and industries. The same conditions obtain with Canadian investments which we have handled actively for years.

"We firmly believe that surplus funds remaining after Liberty Loan purchases can be invested safely in other securities, but proper care should be taken to see that such funds are loaned to industries and upon properties essential to winning the war and to the welfare of our country."

The Canadian Express Company has closed its offices in the United States. Its business there will be now handled by the American Railway Express Company.

LOBSTER INDUSTRY IN CANADA

A convention was held on the 3rd instant in the Board of Trade rooms at Charlottetown, P.E.I., regarding the lobster industry. It was pointed out that the industry was worth about $1,000,000 per year to the island, and that it represented a capitalization of $700,000 and $800,000. It would not, therefore, be wise to close down temporarily, as this would disorganize the industry and leave the plant idle. It was resolved that the lobster season should remain unchanged, namely, from May 1st to June 30th. Mr. Tidmarsh maintained that the industry was not in a depleted condition and pointed out that in 1917 the packing exceeded that of 1897 by 200,000 cans. Professor Perry, of Acadia University, also spoke regarding his investigations along the island coast and made certain recommendations.

The Prudential Insurance Company of America has just issued a pamphlet of 101 pages with the title, "The Malaria Problem in Peace and War." The pamphlet is the work of Dr. Frederick L. Hoffman, 3rd vice-president and statistician of the Prudential. Dr. Hoffman has gone into his subject with thoroughness. His presentation of environments in which malaria is prevalent is exhaustive. He carefully reviews the various methods generally adopted to combat the disease and its breeding places. Not the least interesting part of the work is the section devoted to malaria experience in war time.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Brockville, Ont.—The corporation has just sold to Neelys, Limited, Toronto, municipal bonds to the extent of $16,800 for $16,989.84. They are twenty-year instalments bearing interest at 6½ per cent.

Montreal Protestant Schools.—The following tenders for $900,000 6 per cent. bonds were received:—Harris, Forbes & Company bid 91.77 for $300,000 with an option on the balance at the same price; Hew. R. Wood Company bid 93.06 for $250,000 with an option on the balance at 90.15; Meredith & Company and associates bid 90.05 for all or none, and their bid being the only one for the complete amount was accepted. The syndicate is composed of C. Meredith & Company, A. E. Ames & Company, Henderson Brothers & Company, and Harris, Forbes & Company.

Halifax, N.S.—Halifax will probably be in the market shortly to borrow at least $500,000. Permission to make a loan has been requested from Ottawa. The amount required is estimated at $598,700. Of this amount $278,000 will be appropriated for paying the cost of repairing twenty-three school buildings. Repairs to eighteen schools will cost $100,000, and repairs to five others will cost $178,000 and the city council has accepted the recommendation of the board of control that this amount be borrowed for this purpose. Large amounts are included in the total above for permanent sidewalks, pavements, water extension, hospital for infectious diseases, tuberculosis hospital, fire equipment, and $90,000 is included to meet the balance owing on the North-West Arm trunk sewer.

York Township, Ont.—The following tenders were received by the council for waterworks debentures at its regular meeting held on June 15th, 1918:—Waterworks debentures, section "A," $175,000; waterworks debentures, section "B," $25,000. Canadian Bank of Commerce, (for $25,000 issue only), 100 or $25,000; Oxford Securities, Limited, 99.10 or $198,200; Canada Bond Corporation, 98.676 or $197,352; George A. Stimson & Company, 98.60 or $197,200; A. E. Ames & Company, 98.52 or $197,040; Neelys, Limited, 98.50 or $197,000; Æmilius Jarvis & Company, 98.32 or $196,640 Housser, Wood & Company, 98.18 or $196,360; W. A. Mackenzie & Company, 98.06 or $196,120; Brent, Noxon & Company, 98.04 or $196,079; Wood, Gundy & Company, 97.88 or $195,760; C. H. Burgess & Company, 97.66 or $195,327; Dominion Securities Corporation, Limited, 97.285 or $194.570; MacNeil & Young, 96.54 or $193,080; C. Meredith & Company, 96.52 or $193,042.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from June 24th-July 6th, 1918.—

School Districts.—*Schuler, $1,000 5-years not ex. 8 per cent. instalment; John Politeske, Lenora Lake. *Senlac, $4,300 10-years not ex. 8 per cent. annuity; I. D. Walker, Senlac. Beautiful Plains, $5,650 20-years not ex. 8 per cent. instalment; Thomas Murray, Yellowgrass. Hepburn, $1,000 10-years not ex. 8 per cent. annuity; H. W. Friesen, Hepburn. *South Porcupine, $1,600 10-years not ex. 8 per cent. annuity; Alec Aronec, Ilyas. Howendale, $3,000 10-years not ex. 8 per cent. instalment; W. Richardson, Collins.; *Rhondda, $3,000 10-years not ex. 8 per cent. annuity; J. H. Macey, Rosetown. *Duffville, $2,500 10-years not ex. 8 per cent. annuity; J. J. Benson, Guernsey. Foch, $2,500 10-years not ex. 8 per cent. annuity; J. F. Schlatthauer, Sagathun. Borderland, $2,800 10-years not ex. 8 per cent. annuity; J. C. Moen, Quantock. Wheatwyn, $1,000 8-years not ex. 8 per cent. instalment; L. Blazer, Markinch. Hoey, $2,000 10-years not ex. 8 per cent. annuity; Thos. Williams, Hoey. *Stony Knoll, $2,300 10-years not ex. 8 per cent. annuity; Mrs. M. M. Bowie, Piapot. Jupiter, $2,000 10-years not ex. 8 per cent. annuity; Adolph Jaster, Big Stick Lake. Normanton, $1,500 10-years not ex. 8 per cent. annuity; R. T. Carr, Keppell. *Dilley, $1,500 10-years not ex. 8 per cent. annuity; V. E. Bell, Dilley. Ensdale, $2,700 10-years not ex. 8 per cent. annuity; R. A. Bryce, Riverhurst. *Westerham, $3,400 10-years not ex. 8 per cent. instalment; W. G. Horstman, Westerham.

Rural Telephone Companies.—Speers, $2,000 15-years not ex. 8 per cent. annuity; Thos. C. Crowther, Speers. Rockland, $8,800 15-years not ex. 8 per cent. annuity; John McCallum, Semans. Eagle Lake, $9,800 15-years 7½ per cent. annuity; John Lowry, Netherhilll. Lloyd George, $800 15-years not ex. 8 per cent. annuity; P. Bacon, Colgate. Bethune South-West, $650 11-years not ex. 8 per cent. annuity; N. P. Fogerty, Bethune. North Hazenmore, $500 15-years not ex. 8 per cent. annuity; T. H. Bristow, Hazenmore. Assiniboia, $22,000 15-years 7½ per cent. annuity; J. B. Smith, Assiniboia. Khedive, $1,000 15-years not ex. 8 per cent. annuity; A. B. Smith, Khedive. Lajord, $350 10-years not ex. 8 per cent. annuity; Ward Jones, Lajord. Pheasant Hills, $1,600 15-years not ex. 8 per cent. annuity; J. W. Mathews, Melville. Hughton, $2,200 15-years not ex. 8 per cent. annuity; P. C. Winter, Hughton.

The following is a list of debentures reported sold from June 24th-July 6th, 1918.

School Districts.—Carnduff, $2,500; Regina Public School Sinking Fund. Salvador, $600, Tantallon, $18,000; W. L. McKinnon & Company, Regina. Shellbrook, $6,000, Rosetown, $5,000; Nay & James, Regina. La Porte, $2,200, Hill Sixty, $2,300, Brookfield, $2,500; Waterman-Waterbury Manufacturing Company, Limited, Regina. Flinton, $2,000; Saskatchewan Life Insurance Company, Regina. Little Cut Arm, $1,600; Donald Bruce, Hazelcliffe.

Rural Telephone Companies.—Tessier, $2,500; E. J. Young, Tessier. Kindred, $800; H. P. Measner, Holdfast. Prairie Lily, $250; R. C. Rogers. Lothian, $11,900; Thos. P. Taylor. Storthoaks, $900; W. L. McKinnon & Company, Regina.

Towns.—Shaunavon Union Hospital, $10,000; W. L. McKinnon & Company, Regina.

*Being sold by the Local Government Board

GROWTH OF CANADA'S DEBT

Canada's total net debt at the end of June was $1,154,007,715. For the month of June the debt increased by $9,772,087, or a sum approximately five million dollars less than the war expenditure for the month. The increase for June in the net debt is considerably lower than the average for the twelve months ended June 30th, the increase for the year being $314,034,548, an average of over twenty-six millions per month.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 12th, 1918:—

Coniagas Mines, 86,446; Buffalo Mines, 66,355; La Rose, 72,419; O'Brien Mine, 64,030; Right-of-Way, 87,985; Aladdin Cobalt 65,000; Nipissing Mining Company, 218,620; Dominion Reduction Company, 187,200. Total, 848,055.

The total shipments since January 1st now amount to 15,043,430 pounds, or 7,071.7 tons.

BRITISH COLUMBIA'S DEBT FUNDED

The province of British Columbia has liquidated its $2,000,000 overdraft with the Bank of Commerce with a portion of the $3,000,000 loan which was obtained from the Dominion government. With the balance outstanding treasury bills have been retired. In an interview, Hon. John Hart, the provincial minister of finance, announced that the aim of the government was to clean up the bank arrears necessitated through providing for deficits left by the late administration, and with this latest loan from the Dominion the consolidated fund has been cleared up and there is a balance to go on. The best rate the minister stated, that the government could get from private sources was about 7½ per cent., but the million floated last year was secured at a rate of 6.86 and the present three millions obtained from the Dominion government at 6.50 per cent., which is a favorable showing and means a considerable saving to the province.

A Grand Trunk Pacific steamship service has been inaugurated from Vancouver and Victoria to Prince Rupert and from there north to Alaska.

Exempt from Dominion Tax

WAGES, WORKING HOURS AND LEISURE TIME

Leisure Resulting from Shorter Hours Must be Occupied in Raising Standard of Workers

BY A. T. DRUMMOND, LL.D.

Notwithstanding the attitude assumed by some extreme socialists, the relations between capital and labour continue to improve. Wages are higher than perhaps ever before known, working hours are in many trades reduced to eight and nine per day, and the environment in which men and women work is much more conducive to health, comfort, and even, in some respects, enjoyment, than it formerly was. The Welfare department, usually managed by a committee of the managers and the men, has become an important feature in the organization of numerous industrial establishments. Whilst these changes are tending towards the betterment of the workers in material conditions, how far is the obligation they impose on them being carried out, to raise their standard of education, both general and technical, and thus to, in turn, render their services more valuable in the special industries in which they are engaged, and, in addition, enable them to take a broader view of their duties and privileges as citizens? With higher wages, is thrift being encouraged by the workers' leaders, and adopted by the workers themselves? With more leisure time on their hands, how are the spare hours being employed? These are subjects which are engaging attention in Great Britain at the present time, and are equally important here. It is, there, better recognized, now, that workers have brain as well as brawn, minds as well as souls. Under the systems hitherto in vogue there, ninety per cent. of the children have been allowed to become wage-earners before their minds were properly stored and their characters formed, and this has, it is seen, its serious effect on their intelligence in their more mature years, and on their usefulness to their employers and the state.

Whilst the British Board of Education is providing for compulsory, whole-time education until the age of fourteen, and compulsory, part-time education for some years afterwards, Sir William Lever—now Lord Leverholme—makes a drastic proposal that the working day should be limited to six hours for each employee, the manufactory to run for twelve nours each day with two such shifts, or, where there was continuous running, then four such shifts in the twenty-four hours. It would be a condition, however, that both boys and girls up to eighteen years of age should be compelled to devote an additional two hours each day to studies at school or college, and that men from eighteen to thirty years of age should also be compelled to devote the same two hours each day to further education, physical exercises, and military training. On reaching thirty years, these courses would no longer be compulsory. Whilst this has in view the greater usefulness in the future of the employee in his work, and is in the interest of both the worker himself and the state, it will still be a problem in most industrial establishments whether the same amount of work can be accomplished in the six hours as in eight hours, just as it is debatable how far the work of nine and ten hours can be fitted into eight. The competition between the rivet drivers in the British shipyards would appear to show that it depends very much on the man himself and his ability and eagerness to work continuously at his best throughout the day, and in this respect his physical condition and his intelligence would have their important place. Apart, however, from such questions, there is no reason, considering the possibilities which exist in every man, why, with trained intelligence, large numbers of the workers should not rise above their special lines of work to become experts in organization and management, and even inventors and discoverers. Presently, young men who might become captains in industry and science, float with the current into dead end occupations. And the start begins with the boy. The possible Edison becomes a plumber's drudge, and he who might develop into a Faraday enters the shops as a machinist's apprentice, and with a limited training and a restricted environment that could not well develop ambition, neither, in after life, mounts far on the rungs of the ladder.

Essential Difference in Quality of Labour.

We in Canada must bestir ourselves in this matter of education, not merely to give, by encouragement as well as by compulsion, the working man his chance to rise, but also, by its means, to develop in the workers' organizations, which are growing so rapidly in numbers and assertiveness, a broader and less centred spirit, that will look at social, industrial and national problems from the standpoints of others in the world as well as themselves. If working men and employees generally are to participate in the profits of industrial undertakings, are to have representation in Parliament and in the government of the country, and are to be recognized as entitled to a better place, socially, politically and industrially, than they have hitherto attained, they must have impressed on them that higher educational standards are absolutely necessary among themselves. If there is, as there should be, a dignity in labour, then labour should be associated with education and breadth of view. Men without education cannot look far beyond their own individual wants, and pay but small regard to the needs of others, especially where they think that these needs interfere with their own. Nor can they properly understand the larger problems of the country. The average working man has still to realize that brain power, developed by education, is greatly more important in this world's operations than physical strength, or mechanical experience in a special line of industrial work, however important in their proper place these are; that the educated employee has not only a higher social status, but is more useful to his employer, and of more service to the community in the larger world of citizenship; and that the progress of the country, industrially and otherwise, would be greatly accelerated, if all working men would, each in his individual sphere, bring to bear on their work that intelligence and capacity which education tends to develop.

GOVERNMENT FINANCING IN THE UNITED STATES

The American National Bank, of San Francisco, reviews the present situation in Government finance as follows:—

"Government financing, of one form or another, is absorbing more and more the attention and the resources of the banks. The particular event of the current month was the payment of income and excess profits taxes, to the amount of more than two billion dollars. As an illustration of the magnitude of transactions, the Internal Revenue Collector at San Francisco during three days collected a larger sum than the total receipts of his office for the preceding two years. On June 15th the receipts of the Collector's office were $20,000,000, practically all of which was in cheques on San Francisco banks, with the result that the bank clearings of the 17th exceeded all records. The proceeds of the cheques were immediately re-deposited in the banks, thereby lessening the strain, and the entire operation of tax collection was handled with practically no disturbance to the money market.

"On the heels of the revenue payments came the announcement of the Secretary of the Treasury that $6,000,000,000 of treasury certificates will be issued beginning June 25th, at the rate of about $750,000,000 every two weeks, in anticipation of the proceeds of the Fourth Liberty Loan, which will probably appear in October. Every national and state bank is asked to buy these short-term obligations of the Government, in an amount equal to five per cent. of the bank's resources each month. For example, a bank having total resources of one million dollars is expected to subscribe for $50,000 a month of treasury certificates, for about four months. There is no doubt the banks will respond patriotically and do their best to reach the desired quota. The plan of anticipating government receipts in this manner is one of the wisest ever devised by financial experts, as it keeps the stream of credit flowing steadily, and enables payment to be made for guns, ships, munitions and the thousand-and-one necessities of war, out of bonds yet to be sold and taxes yet to be collected. The banks are the beneficiaries of the scheme, since they avoid the necessity of accumulating idle funds in vault to meet the recurring demands. Many individuals and corporations have learned also the wisdom of providing against government tax payments in good season, by laying aside monthly a definite sum, which is invested in the treasury certificates.

"So accustomed are we becoming to big figures, that only passing notice is attracted to Secretary McAdoo's estimate of $24,000,000,000 needed for government disbursements during the next fiscal year. Yet this means roughly 65 cents a day for every man, woman and child in the United States. Any citizen, therefore, who contributes less than 65 cents a day for Liberty bonds, thrift stamps and federal taxes, is paying less than his share of the war expense. The Secretary proposes to raise one-third, or eight billions, by taxation, and two-thirds by further bond issues. If his recommendations are carried out by Congress, income and excess profits taxes for 1918 will be about double those of 1917. There is reason to hope, however, that some of the inequities and absurdities of the present tax law will be eliminated in the revision."

Three vacancies in the War Purchasing Board are to be filled by the Civil Service Commission.

THE MATTER OF PENSIONS

A Budget of Interesting Facts Made Clear to Parties Affected

Correspondence regarding pensions on account of members of the Canadian Expeditionary Forces or the Canadian Naval Service should be referred to the Board of Pension Commissioners for Canada, Union Bank Building, Ottawa, or to any of its branch offices.

These offices have been opened to assist pensioners and prospective pensioners in all matters relating to pensions. The offices are always willing to advise returned soldiers or their dependents in all pensions matters. If the applicant does not live near one of the district offices the local Canadian Patriotic Fund office will advise him.

Pensioners are requested to quote their pension number in all communications.

The payments of pensions involve an expenditure of millions per annum. It is necessary, therefore, that every Canadian should know as much as possible about the subject. Interesting figures along this line have just been received and clearly indicate the magnitude of the task allotted to the Board of Pension Commissioners. When the Board of Pension Commissioners took over the work from the Pensions and Claims Board they had a staff of twenty-three. The staff of the Board of Pension Commissioners, all branches included, is now nearly six hundred. The total number of pensions awarded up to and including May 31st, 1918, since the commencement of the war, is 34,879, and the total number of gratuities is 3,013.

The daily average number of pensions awarded is 120. In some months over 3,000 have been awarded. Since April 1st last 2,550 existing pensions have been increased and 1,323 have been decreased. The increase and decrease in these cases has been due to various causes. Since the 1st April last 6,625 addresses have been changed and 2,495 medical re-examinations have been held.

It will be clearly seen from the foregoing paragraphs that the changes made have involved an enormous amount of detail work and this in addition to the ordinary routine work done by the Board of Pension Commissioners.

Up to and including April 31st, 1918, the Canadian Government have paid pensions in foreign countries as follows: The British Isles, 1,878; United States of America, 158; Australia, 3; United South Africa, 2; Newfoundland, 25; France, 1; Japan, 3; Bermuda, 2; Jamaica, 1, and New Zealand, 5. An interesting feature in connection with the payment of pensions in foreign countries is that the Canadian Government has entered into an agreement with other governments in respect to the reciprocal payments of pensions.

The Government of the Commonwealth of New Zealand and the Canadian Government have made arrangements whereby a Canadian pensioner residing in either New Zealand or Canada is paid by the government of the country in which he resides, but at the Canadian rate of pension. In return for this consideration the Canadian Government likewise pays New Zealand pensioner residing in Canada, but at the pension rate as laid down by the respective governments.

In order to make this point more lucid an example might be quoted as follows: A man is awarded a Canadian pension at the rate of $25.00 per month. He goes to New Zealand and lives there. The rate of pensions paid by the New Zealand Government is not so high as the rate paid by the Canadian Government, but the man is still paid at the Canadian rate. The same instance would apply in the case of a man who served in the New Zealand forces being awarded a pension under the New Zealand Government's scale of pension. He would be paid through the Canadian Government, but at the New Zealand rate of pension. At the termination of the fiscal year statements are prepared by the various governments and a balance struck, and any difference existing between the accounts of the different governments are settled.

The Board of Pension Commissioners has received from time to time communications from pensioners residing in the United States, asking if it is possible to have their pensions paid in the United States in such a manner that no exchange will be charged upon their cheques. This matter has been taken up and it is found at the present time that it is not possible to make any other arrangements than to pay the pensioners by cheque which, of course, will be subject to the rate of exchange existing between the two countries.

Vancouver is preparing a fish market and New Westminster is also considering the erection of one.

RETURNED MEN FAVOURED

Following a recommendation from the advisory committee, the executive of the Canadian Patriotic Society recently decided to modify its policy in regard to post-enlistment marriages and to authorize local committees to grant assistance to women who, having married Canadian soldiers in Great Britain, are now coming to Canada.

Obviously, such women are in a different position from those who at the time of their marriage had been resident in Canada for a considerable period, if not since their birth, and were in all probability engaged in some profitable occupation. The woman newly arrived from England is faced with difficulties that do not exist for the woman who has been resident in Canada for a more or less lengthy period. She is a stranger to Canadian customs. She probably has no friends to whom she can appeal for advice and help. She is unused to Canadian currency and not qualified to make her government money go as far as a Canadian woman could. It may be weeks or even months before she can obtain suitable employment. The committee, therefore, have now ruled that such women may be granted assistance at the usual rates in force in the localities in which they settled.

The committee are also of the opinion that some of the disadvantages of post-enlistment marriages disappear when a man has performed his service overseas and been invalided back to Canada. It sometimes happens that such men, after a prolonged absence from the country, wish to marry immediately after their return to Canada and without waiting for their final discharge. The committee does not feel that there is any good reason why Patriotic Fund assistance should be withheld in such cases and has ruled accordingly.—Reconstruction, July, 1918.

A committee of the holders of Grand Trunk securities has been formed in London to uphold the interests of the road in its dealings with the Canadian Government.

The semi-annual meeting of the Eastern Canada Passenger Association was held on Tuesday, the 9th inst., in Quebec. Representatives were present from the Canadian Pacific, the Grand Trunk, Canadian Northern and Quebec Central Railway.

BRITISH COLUMBIA MINING FOR 1917

Decrease in Output Reflects Rising Costs—Fixed Value of Product Also Retards Production of Gold

The annual report of the British Columbia Department of Mines, for the year 1917, describes very fully the operations in the province. The volume is the work of the Hon. William Sloan, Minister of Mines, and Mr. William Fleet Robinson, Provincial Mineralogist.

The progress of mining during the year is summarized as follows:—

The gross value of the mineral production for 1917 was $37,010,392, a decrease from that of the year 1916 of $5,280,070, or 12.5 per cent., but an increase over that of the previous record year 1912 of $4,569,592, or 14 per cent. The gross value of the metallic minerals recovered in 1917 was $27,284,474, which represents a decrease from last year of $4,779,040, a percentage decrease of about 15 per cent.

The decrease in total value of the 1917 mineral production as compared with that of the previous year would appear at first sight to show a very serious decline in the mining industry; this condition, however, was not due to any decline in mining itself, but to the cumulative effect of several adverse influences acting on the mining industry as a whole. It must be remembered that the year 1916 was a record one of high metal prices and of demand for metals, which therefore made that year a banner one for mining, not only for British Columbia, but for the whole American continent. In comparing the 1917 production with any previous year excepting 1916, it is seen that the 1917 output easily exceeds any other; for instance, it is nearly $5,000,000 greater than the former record year of 1912.

Labour Difficulties Were Felt.

The adverse influences which retarded mineral production in 1917 may be summarized as industrial troubles, reduced metal prices in the last quarter of the year, a very much lessened demand for lead and zinc for munition purposes, and the economic conditions which severely handicapped the mining of gold.

Industrial troubles in 1917 were more frequent and extensive than usual; in the early months of the year a protracted strike in the Crows Nest district not only cut down the output of coal and coke, but forced the copper and lead smelters to close for lack of fuel, and, as a direct cause, stopped mining in the most productive parts of the province. These troubles were followed by the closing of the mines at Rossland for several months, with the consequent curtailment of gold production. Apparently in this case, although there was some disagreement between the miners and operating company, and a strike seemed imminent, the properties were closed down before such actually took place.

Gold Mining Not Profitable.

The great decrease in gold production this year is mainly due to the heavy falling-off in the Rossland output, which camp usually makes over one-half the total yearly output of the province. Early in November labour troubles again occurred at the Trail smelter, which closed the whole plant until practically the end of the year; this in turn stopped productive mining during that time throughout East and West Kootenay.

Metal prices during the year 1917 were favourable to the stimulation of productive mining, as, while there were many fluctuations in price, the general averages were as a rule quite as good as in 1916. The average price of zinc for 1917 was considerably below that of the previous year., but to offset this both silver and lead were considerably higher, while copper was practically the same. During the last quarter of the year the market price of lead declined materially, as the high prices prevailing in the earlier months of the year had so stimulated production as to cause a surplus of lead in the market, with consequent lowering of price. Due to the curtailment of orders for lead by the Imperial Munitions Board, the Trail smelter was forced to decrease its output of lead, as no Canadian market was available; a considerably larger production of lead could have therefore been made but for the inability to market it.

Details of the market prices of metals will be found under the discussion of each metal, but it may be noted here that the rise in silver from an average of 50 cents an ounce in 1915 to nearly 86 cents at the close of the year 1917 has proved very beneficial to the silver-lead mines of the Slocan.

The higher cost of labour and supplies—especially powder—has made the cost of new development very high, but in spite of this much work has been done.

Gold mining also suffered from the increased costs of labour and supplies, with no corresponding increase in the value of the metal produced, thereby causing a smaller margin of profit, and, in many cases, making it unprofitable to mine gold.

But for these untoward circumstances the hope anticipated at the commencement of the year, that the mineral output of the province for 1917 would reach the $50,000,000 mark, would probably have been realized. Taken in the aggregate, our mineral production and development in the year 1917 and the future prospects of the industry are conditions for congratulation at this time.

Coal Output More Stable.

The value of coal produced in 1917 shows an increase of $230,588 as compared with the previous year, but the coke production shows the large decrease of $646,920. The coal production in the coast district was considerably greater than in 1916, but labour troubles materially decreased the output in the Crows Nest of both coal and coke; it is in this latter district that most of the coke production of the province is made.

Had it not been that the Crows Nest Collieries, through a series of mishaps—accompanied by a serious shortage of labour due to the war, followed by a labour strike—were unable to make as large an output as expected and intended, the coal and coke production would have been much greater; but as it was, there resulted such a shortage of coke as to partially close the copper smelters, and these in turn compelled the copper mines to very much curtail their outputs.

The outputs from metal-mining and coal-mining are intimately related to one another, as any increase in production from the former causes an increased production from the latter for fuel for smelting, power, and transportation purposes. On the other hand, a stoppage of production of coal and coke immediately curtails the metalliferous production.

TRUST COMPANY ESTABLISHES BOND DEPARTMENT

The British American Trust Company, with head office in Vancouver, and a branch in Victoria, has established a department to deal in government, municipal and corporation bonds, which will be in capable and experienced hands. The company is in a position to purchase full or partial issues of municipal or government securities, which it will place by sale among its clientelle, both locally and in the east. The British American Trust Company was established in 1901. The present officers are headed by H. N. Galer, president, and F. L. Beecher, vice-president. Mr. J. A. Grieve will be in charge of the bond department.

A committee of the Intercolonial Railway recently inspected the property of the Quebec and Saguenay Railway, which is to be taken over by the government.

INCREASE IN WEST-BOUND FREIGHT RATES

On Saturday, June 29th, the Dominion Board of Railway Commissioners issued its general order, No. 241, providing for an increase in transcontinental freight rates from eastern Canada to British Columbia, similar to the increase in rates on the United States lines. The order reads as follows:—

"Whereas the west-bound transcontinental freight rates on specific commodities from eastern Canada to destinations in British Columbia, recognized as Pacific coast terminals, have been in the past, and are now, lower than the regular scale of rates under the Canadian freight classification, and the said commodity rates were definitely related to the rates on the same or similar commodities shipped from the eastern States of the Union to Pacific coast points, including those in British Columbia, until March 15th, 1918, when the last-mentioned rates were increased without corresponding increases from eastern Canada;

"And whereas the director-general of the United States Railroad Administration has ordered the United States carriers to increase the rates which were in effect from the eastern States immediately before June 25th, 1918, by 25 per cent., effective from that date, and because of the competitive character of the traffic it is expedient to continue at least the equilibrium existing before March 15th, 1918:—

"It is ordered that the railway companies in Canada engaged in the said west-bound trancontinental traffic be, and they are hereby permitted to increase the present so-called commodity rates from eastern Canada so as to place them on at least an equality with the rates now in effect from the neighboring States of the Union, and that the rates so increased be permitted to become effective not earlier than the first day of August, 1918, upon not less than five days' notice to the board and to the shipping public by filing and posting in the manner prescribed in the Railway Act."

According to the report of the Workmen's Compensation Board for the first six months of this year, the number of workmen injured was 22,702, compared with but 15,954 in the first half of last year. There was a daily accident average of 149. There were only 212 fatal accidents, compared with 242 in the first half of 1917. During the six months $1,762,362 was awarded, compared with $1,307,386 during the first half of last year.

Union Insurance Society of Canton

(A British Company) LIMITED

ESTABLISHED 1835.

Report of the Annual General Meeting of Shareholders Held May 23rd, 1918.

The Annual Meeting of the above named Company was held at the Society's Offices, Hongkong, May 23rd.

In presenting the Report, the Chairman, Hon. P. H. HOLYOAK, said, in part:—

Times are abnormal, the future is full of uncertainties, and your Society holds the proud record of having at least maintained its dividend for the last 26 years. The policy of our predecessors in building up reserves enables us to-day to afford our constituents facilities which we feel it our duty to undertake, and we are incurring risks which in normal times there would be no difficulty in guarding against. Many Companies present their shareholders with the bare interest earned by their funds, or even less, but your directors feel that in addition to paying in dividend the whole of the interest earned, the Society can safely distribute part of its underwriting profit. Turning to 1917 you will notice a marked increase in our net premium receipts. The equivalent in round figures of $7,780,000 for 1917 compares with $5,105,000 and $4,510,000 for the first year's working of 1916 and 1915 respectively. Gentleman, I think we have cause for thankfulness that in the fourth year of this unexampled war, which is taxing the resources of the nation to the utmost, the business of the Society should still be maintained in so great a condition of efficiency and prosperity. At this stage we cannot make more than a passing reference to 1917 losses, but it is satisfactory to note that although the German super-submarine frightfulness was advertised to commence in the early part of 1917 our loss ratio for the first twelve months' working of the year is less by one per cent. than that experienced in 1916 for the same period. Gentlemen, the wonderful results we are gratified in being able to place before you could not have been obtained without the loyal and whole-hearted co-operation of our staff. The enormous strain consequent upon the character of our business and the depletion of the members employed has been cheerfully met with what has been aptly described as the "Union Spirit" which, I am glad to say, prevails amongst our staff throughout the world During the year, as in the past, varying sums have been subscribed to such charities as your Directors felt the Society should support, which action will doubtless meet with your approval.

AUDITORS' REPORT.—We report that we have examined the Accounts of the Society at the Head Office with the Books and Vouchers in Hongkong, and Returns received from the various Branches and Agencies for the year ending 31st December, 1917. We have also satisfied ourselves as to the existence and value of the Securities for Investmenst, the Cash at Bankers and on Mortgage to the amounts specified. The premium on new shares issued has been credited to Reinsurance Fund Account. We have obtained all the information and explanations we have required, and in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Society's affairs according to the best of our information and the explanations given to us, and as shown by the Books of the Society.

A. R. LOWE,
C. BERNARD BROWN, } *Chartered Accountants*
Auditors.

A total insurance of $5,000 was carried on the building. The following companies are interested: British Crown Assurance, $2,500; British Colonial, $1,000; Mechanics and Traders, $1,500.

The publication of a newspaper in the English language by citizens of Quebec is being considered. The object of the journal would be to promote a better understanding of the French Canadians by the rest of Canada.

The Brazil Railway Company, which is at present in the hands of a receiver, is to be reorganized and it is understood that the holders of the company's 50 year 5 per cent. debentures will receive new securities par for par, which securities will be of a better grade than those which they now hold.

On account of the unusual volume of water in the Fraser River, the inhabitants of Nicomen Island have been having difficulty in maintaining their dykes to keep out the flood. During the past few days, however, the water has subsided and no further difficulty is anticipated.

The exceeding dry weather which has prevailed in the forests of British Columbia and Alberta during the last few weeks, accompanied by strong, hot winds, has resulted in many forest fires. Several have been raging along the eastern watershed, while the British Columbia side reports a large number.

On account of the difference in the method of transportation and shortage of wheat, Argentina requires a much larger supply of sacks in proportion to its crop than does Canada. Mr. Webb, Canadian Trade Commissioner in Buenos Aires, reports that sacks are very scarce at the present time, and that there is an excellent opportunity for export trade in this product.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

British Columbia Fishing Company.—The company has declared a dividend of 1¼ per cent. payable August 21, to shareholders of record of August 9.

Montreal Tramways.—The directors of Montreal Tramways Company have deferred the payment of the dividend on the common stock due August 1. Directors state the dividend is deferred until appeal is heard regarding the increase in fares. The company has been paying at the rate of 10 per cent.

Dominion of Canada Investment and Debenture Company.—Modest increases in profit and in the balance brought in gave the company about £200 more to dispose of for the year to April 30. The dividend is 5 per cent., as for the preceding year, when it was advanced from 4 per cent., and £5,280 is put to reserve, against £5,000, leaving £724 to go forward, against £793 brought in. The reserve fund is now £21,000, which amply covers the depreciation in the railway and industrial holdings, which form a relatively small part of the investments, as farm and city mortgages are the principal subjects of the company's operations.

Maple Leaf Milling Company.—The profits for the year ended March 1, 1918, were $1,021,266, which, added to the balance brought forward from the previous year of $1,402,332, gave a total available of $2,423,598. This sum was appropriated as follows:—

Interest paid to bank on direct advances	$ 113,590
Dividends on preferred stock at the rate of 7 per cent. per annum	175,000
Dividends on common stock	562,500
Balance forward	1,572,508
Total	$2,423,598

The total assets of the company are now $8,892,683.

Dominion Telegraph Company.—The following is a statement of the assets and liabilities as at June 30th, 1918:—

Assets:	
Capital expenditure	$1,281,819
Toronto, Grey and Bruce Railway Company, 1983 bonds, and interest thereon	1,595
Cash in bank and on hand	26,305
	$1,309,720
Liabilities:	
Share capital paid up	$1,000,000
Dividends unclaimed	2,490
Dividend No. 168, payable July 15, 1918	14,000
Suspense	1,000
	$1,017,490
Balance at credit of profit and loss account	292,230
	$1,309,720

For the past 39 years, during which the property of the company has been under lease to the Western Union Telegraph Company, the latter has paid the guaranteed 6 per cent. capital stock in accordance with the contract.

Some of the municipalities of France have issued their own coins in small denominations. The usual amounts are 5 and 10 centimes, that is, one and two cent pieces. The coins are made of aluminum and circulate locally.

Lieut.-Colonel Henry Brock, president of the W. R. Brock Company, of Toronto, and Mr. John N. Fulton, of New York, have been appointed to the directorate of the British-America and Western Assurance companies.

Premier Oliver, of British Columbia, has given instructions to the chief engineer of the Pacific Great Eastern Railway to get in hand another thirty-six miles of new construction, taking the railway more than fifty miles beyond Clinton, northward. The work is to be rushed to completion.

Messrs. Homer L. Gibson and Co., have closed their office in Timmins, Ontario, on account of the small amount of business being done.

According to reports from Melbourne, the acting Premier of the Commonwealth, Watt, said that heavy direct taxation would be necessary in the near future.

A system of coal rationing has been decided upon in the City of Guelph, Ontario. The rations are to be based upon the usual supply, and deliveries are not to be made to those who have one ton or more in their possession. and not more than 200 pounds are to be delivered at a time.

The population of the City of Quebec, according to the new directory issued by Mr. Edouard Marcotte, is 103,462. These figures accord with the census taken in April last. The total valuation of the city is placed at $90,015,657, of which $70 782,957 is assessable and $19,232,857 non-assessable. The city is divided into six wards, the area being 5,660 acres.

The employees of the Thetford Asbestos Mines went on strike about two weeks ago for higher wages. It is understood that a settlement has been arranged.

The largest office in the world is that which is now being completed in Washington for the use of the United States Navy. The building covers 42 acres of ground, is three stories high, and will accommodate 15,000 officials and employees. The cost was $5,750,000. With the exception of one section, which will be used by the War Department, the building will be entirely for the use of the Navy Department.

The new officers of the American Institute of Actuaries as elected at the recent Chicago meeting, are: President, Charles H. Beckett, State Life of Indiana; vice-president, George Graham, Missouri State Life; secretary, Carroll B. Carr, American Central Life; treasurer, J. B. Stookey, Illinois Life; board of governors, James Fairlie, Illinois insurance department, and Franklin B. Mead, Lincoln National Life, for three years, and R. M. Webb, Kansas City Life, to fill out the unexpired term of Mr. Beckett.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Aylmer, Ont.—July 5—Stables owned by J. Miller were destroyed. Estimated loss, $1,800.

Canora, Sask.—July 3—Livery barn of Tim Callaghan was damaged. Estimated loss, $3,000.

Cardston, Alta.—July 1—The O.K. livery barns, owned by Ernest Low, were destroyed. Estimated loss, $15,000.

Drummondville, Que.—July 5—Premises of Robertson and Watkins, Main Street, were damaged. Estimated loss, $25,000.

Graham, Ont.—Eighteen places of business were destroyed on Monday, July 6th, by a fire of unknown origin. The loss is estimated at $150,000. The fire commenced in the Cosco store, which was destroyed, as was also the four-story Graham Hotel. Only two buildings in the business section of the town were left standing, these being the Lakeview Hotel and the office of Dr. Brandon.

Ladner, B.C.—July 6—The old horse shed in the Delta Agricultural Association grounds, containing eighteen valuable dogs, was destroyed. Estimated loss, $10,000.

Melrose, Ont.—Fire of unknown origin destroyed the house and contents of Edward Sholbrock, concession 6, London township, Sunday forenoon, July 14th.

Montreal, Que.—July 6—Coal and wood yard of Joseph Juteau, 378 Rachel Street East, was damaged. Cause believed to be of incendiary origin. Estimated loss, $10,000.

Monteith, Ont.—July 6—The Union Church and parsonage were destroyed. The church was insured for $1,000.

North Vancouver, B.C.—Slight damage was done to the roof of the house of Mr. Morrison, on Kilmer Road, by fire recently.

Pembroke, Ont.—A considerable section of the town was destroyed by fire on Monday, the 15th inst., with a loss estimated at about $500,000. The destroyed property was mostly located on Main Street, and includes the plant of the Thomas Pink Company, in which the fire started, and which was valued at about $400,000. Other properties destroyed or damaged were the Chapman block, H. Fullerton's blacksmith shop, Wm. Beamish block, Lamothe building, James Stewart building, Berube's shop and Shooham's store.

Quebec, Que.—July 5—Store of George Avens was damaged. Caused by defective wiring. Estimated loss, $300.

Saskatoon, Sask.—June 26—Operator's room of the Bijou moving picture house was damaged.

Toronto, Ont.—The four-story warehouse of Sanderson, Pearcy and Company, 61-65 Adelaide Street West, was destroyed by fire on Sunday, July 14th. The loss is calculated at $150,000, and is largely covered by insurance. The cause of the fire is not known.

Vancouver, B.C.—Damage amounting to about $200 was done to the residence of H. O. Bell-Irving, 1210 Harwood Street, by fire recently. The fire commenced on the roof and is supposed to have originated from a spark from the chimney.

Vancouver, B.C.—July 6—Premises at 109 Hastings Street East were damaged. Caused by lighted cigarette. Estimated loss, $100.

GROWTH OF ROYAL BANK OF CANADA

With the amalgamation of the Royal Bank of Canada and the Northern Crown Bank, which went into effect July end, the latter institution passes out of existence and the former receives a substantial increase in size. The Northern Crown Bank had 112 branches, of which 24 were in Ontario and 88 in the central west and British Columbia. Of these, only 15 were duplicated by Royal Bank branches, leaving 97 to be operated as offices of the Royal Bank, that is, 21 in Ontario and 76 in the central west and British Columbia. The total number of branches of the Royal Bank is now 521, 144 being in Ontario and 103 in the central west and British Columbia, 51 in Quebec, 81 in the maritime provinces and Newfoundland, 56 in the West Indies, Central and South America, one at Barcelona, Spain, and branches in New York and London, England. The principal effect of the merger is to strengthen the position of the bank in the provinces of Alberta, Manitoba and Saskatchewan. The paid-up capital of the Royal Bank is now $14,000,000, reserve fund approximately $15,000,000, and assets over $365,000,000. Only two Canadian banks are larger, namely, the Bank of Montreal, with a paid-up capital of $16,000,000 and a rest of $16,000,000, and the Canadian Bank of Commerce with a paid-up capital of $15,000,000 and a rest of $13,500,000.

A Practical Pointer on Salesmanship

It is of first importance in good salesmanship to select a worthwhile article to sell, something about which you can become enthusiastic with a reason—a reason that will last. In Life Insurance Salesmanship, for instance, a discriminating agent would naturally select the policies of the Mutual Life of Canada because—first, the Company is well-established—Second, it has an unblemished record—Third, it has a continental reputation as a dividend payer—Fourth, it is a democratic organization—Fifth, it is a wonderfully successful going concern—and lastly, being the only Canadian Policyholders' Company its contracts find a ready market. Where a company is so favorably known one half of the trouble of making the sale is avoided. If you get the best goods in your line and go to it, success is certain. Last year our agents placed $20,000,000 paid-for business.

The Mutual Life Assurance Co. of Canada

PROGRESS OF INSTITUTE OF ACTUARIES

Business of English Society Still Carried on in Spite of Decrease in Membership

At the seventy-first annual general meeting of the Institute of Actuaries, held in London, England, on June 3rd, the recent progress of the society was reviewed. The president, Mr. S. G. Warner, presented the annual report, which reads in part as follows:—

The council have the pleasure to report to the members upon the work of the institute during the session of 1917-1918, the seventieth year of its existence.

There has been a decrease of 36 in the total number of members as compared with the previous year. At the end of the official year in which the institute was incorporated by Royal Charter the number of members was 434; twenty-two years later, at 31st March, 1907, it was 956. Since that time the numbers have been as follows:—

On Mar 31.	Fellows.	Associates.	Students.	Corresponding members.	Total.
1908	253	313	421	22	1,009
1909	254	325	400	19	998
1910	259	335	348	21	963
1911	267	339	308	20	934
1912	278	354	268	20	920
1913	282	355	252	19	908
1914	295	358	238	19	910
1915	304	361	263	17	945
1916	308	345	247	17	917
1917	303	344	231	18	896
1918	295	332	215	18	860

The following schedule shows the additions to and the changes and losses in the membership which have occurred during the year ending March 31 last:—

Schedule of Membership, March 31, 1918.

	Fellows.	Associates.	Students.	Corresponding members.	Total.
i. Number of members in each class on March 31, 1917	303	344	231	18	896
ii. Withdrawals by					
(1) Death	8	11	6	..	41
(2) Resignation or otherwise		6	10	..	
	295	327	215	18	855
iii. Additions to membership					
(1) By election	..	2	..	..	5
(2) By examination	..	..	..	..	
(3) By reinstatement	..	2	1	..	
	295	331	216	18	860
iv. Transfers					
(1) By examination: *from* Associates		.	..	..	..
to Fellows				..	..
	295	331	216	18	860
(2) By examination: *from* Students		..	1	.	..
to Associates		1	..	..	..
v. Number of members in each class on March 31, 1918	295	332	215	18	860

There are also 156 candidates admitted as probationers, and 70 as students conditionally on their passing Part I. of the examination. These are not included in the above schedule of membership.

The council have, with great regret, to report the loss by death since the last annual meeting, of eight Fellows, Messrs. H. W. Andras, D. A. Bumsted, G. D. Doucet, J. Graham, F. A. Newton, W. F. Somerville, G. Todd and A. H. Turnbull; seven Associates, Messrs. F. S. Blake, G. A. Brown, R. A. Craig, G. S. Fielden, J. Hogg, E. Litchfield and J. J. Stuckey; and five Students, Messrs. T. N. Askwith, H. J. Hammond, T. Holgate, B. Needell and H. Orrell. Nine of these members—namely, Captains F. S. Blake, H. J. Hammond and J. Hogg, Lieutenants T. N. Askwith, G. D. Doucet and G. S. Fielden, Sergeant B. Needell and Privates T. Holgate and H. Orrell, have fallen in the service of their king and country; as also have three probationers of the institutes, Captain W. E. Smith and Lieutenants W. Askham and S. G. Weatherdon. The council have sent letters of sympathy to the relatives of all who have thus sacrificed their lives in the nation's cause.

Messrs. H. W. Andras and G. Todd had both filled the office of vice-president, and had for many years been members of the council. Mr. Todd had also served the institute in the capacity of joint honorary secretary, and Mr. Andras rendered valuable assistance for many years as joint honorary librarian.

The annual subscriptions and the entrance fees appearing in the revenue account amounted to £1,376 0s. 6d., as compared with £1,476 6s. in the previous year. The income and expenditure for the year were £1,812 2s. 11d. and £1,609 5s. 2d. respectively.

The number of members and probationers on the roll of service with the army and navy has, since last year, increased to 403. The council have to deplore the loss of 47 who have been killed in action or died of wounds.

The position of candidates whose preparation for the examinations has been affected by the war has been receiving the sympathetic consideration of the council, and with the view of giving candidates every possible assistance, having regard to the special circumstances, the council have decided for the present to revise the syllabus so as to limit the amount of the necessary reading; to request the board of examiners to afford some guidance as to such reading; and to hold examinations more frequently than has hitherto been the practice. The first examinations under the new syllabus will be held as soon as possible after the termination of the war.

The revised regulations and syllabus of examinations have already been published in the April number of the Journal.

Mr. Arthur James Cook, who died on February 25th, 1917, bequeathed to the institute a share in the ultimate residue of his estate for the furtherance of the objects of the G. F. Hardy Memorial Fund, and in remembrance of his long connection with the institute as an associate. An intimation has been received to the effect that the memorial fund thus benefits to the extent of £135 11s. 3d., and the council desire to take this opportunity of placing on record their appreciation of the bequest.

The president spoke as follows: "In rising to move the adoption of the annual report and accounts, I did not know that so far as the general run of the report is concerned, there is very much to which to draw special attention. There is a slight decrease in the number of members, due to the present conditions, and the examinations are at a standstill. There is, I regret to say, a long obituary list. I give the place of honor on that list, as I think we always should, to those of our number who have fallen in the service of their country. As you know from the report, the total number connected with the institute who have entered military service is 403, and of those 47 have fallen on the field. Five of those have suffered that fate since I last addressed you. I would like to say something about one of those, Mr. H. T. Kay Robinson. He became a Fellow of the institute by examination in 1905, joined the army at the outbreak of war and rose to the rank of Lieut.-Colonel and was awarded the Distinguished Service Order and bar for conspicuous gallantry in the field. I think this is a record of which the institute should be proud. And we are proud of all who have made this supreme sacrifice. They were too young to have gained that distinction in our profession of which many of them gave such promise, but they have attained a distinction which nothing can take from them, and which will live imperishably in the memories of their kindred and their friends.

"You will notice in the report an expression of regret at the loss of a number of valued members of the profession. Mr. Henry Walsingham Andras was well known to us all. He took a keen interest in the institute, and though his failing health prevented him in recent years from taking an active part in its affairs he had served it as vice-president and librarian, and was for 14 years a member of the council. Everybody who knew him appreciated the geniality of his character, the value of his friendship and his service to the institute. Following in a brief space of time was the death of Mr. George Todd. His actuarial career had much in common with that of Mr. Andras. They were contemporaries, both

taking a great interest in the institute's affairs, and held in high esteem by its members. Mr. Todd was for 23 years a member of the Council and for four years honorary secretary. The remaining two losses by death have a special, and what may be called a historic, interest. In the preamble to their charter there is a reference to 15 gentlemen there named, about whom it is stated that 'being members of a collective body established in the year 1848 under the name of the Actuaries' Club and exercised the calling or profession of actuary, they are desirous of becoming entitled to such privileges as may arise from the incorporation of the members of the Institute of Actuaries under a Royal Charter.' Those fifteen names represent what may be called the actuarial profesion of the past; and by the deaths, within the last month or two, of Mr. Priestley and Mr. Stevens, the last of them disappeared. A link with the past is thus severed, and the tribute of respectful memory is due to the last survivors of the men who, in long bygone days, did the work and maintained the honor of the profession.

"An important subject which requires a few words of notice is the question of examinations. A movement which has been on foot for some little time among members of the council to deal with this subject in view of the immediate future after the war has during the present year taken a practical form, and the revised syllabus approved by the council is now in your hands in the current number of the Journal.

"This has been decided upon by the council after much careful consideration. Its object is to make it easier for those of their members who had not passed all the examinations necessary for the Fellowship when they went to the war to complete their curriculum on their return with a minimum expenditure of time and labor. I might add that the close attention which we have thus had to give to the general subject of the qualifying study required for our profession, may have a value beyond its immediate use, and that some of the simplifications now adopted may assume permanent form.

"Another subject about which a few words are necessary is that of the recent alterations in the institute's by-laws, agreed to at a general meeting held at the institute a week or two ago. Their object is to give by practical means a properly exercisable freedom of choice to the members in the annual selection of new members of council, and we all hope that this power will be freely used. My chief purpose in this connection to-day is to appeal for an adequate attendance at the necessary confirmatory meeting, to be held here at 5 p.m., on Monday, June 17th (this day fortnight). It is difficult as a rule to get attendance at a function so brief and uneventful as a confirmatory meeting must necessarily be; but if we do not get 20 members present, we cannot postpone but must dissolve it, and so all our work will be wasted. I feel sure that in these circumstances you will loyally support the institute, and provide the necessary quorum.

"In conclusion, gentlemen, I would only say one word about the national position in which we find ourselves today. Each year since the war began we have met together thus in the hope that before another such gathering took place it would be over; and each succeeding year has brought disappointment of that hope. To-day the conflict still rages, and the outlook is as stern as at any time since its outbreak.

"None the less, our resolution remains unbroken and our faith unshaken. As a part of this great nation, engaged in a branch of its work which we know to be important, we go forward into the future sharing to the full the national spirit, with 'courage never to submit or yield' till the objects before us have been attained."

Mr. Geoffrey Marks, O.B.E., was elected president for 1918-19.

In Japan, the government and the manufacturers are jointly spending $2,000,000 on an Institute for Physical and Chemical Research.

At a meeting of twenty-seven delegates, representing the boards of trade of Victoria, Duncan, Ladysmith, Nanaimo and Alberni, held at Nanaimo on July 6th, the Associated Boards of Trade of Vancouver Island was organized, with Mayor Todd, of Victoria, president; John Shaw, of Nanaimo, first vice-president, and executive to consist of president, vice-president and presidents of the several boards of trade affiliated with the associated board, the appointment of secretary-treasurer and adoption of by-laws being referred to the executive.

LIFE UNDERWRITERS' CONVENTION

On September 4th, 5th and 6th, 1918, a joint convention of the National Association of Life Insurance Underwriters and the Life Underwriters' Association of Canada will be held in New York. The meetings will be held in a room of the Hotel Astor, which will accommodate an audience of 3,000, which is about the number expected to be present. Living accommodations of the hotel provide for about 500, and we are advised that practically all of this has been reserved already.

The discussion will be almost entirely devoted to questions of life insurance salesmanship. One of the features will be a discussion of "War Time Arguments" by Mr. H. B. Rosen, of the New York Life, who is one of the biggest insurance writers in the world. There will also be a discussion on "Canada's War Time Experiences." This is particularly of interest to United States men, as so many demands are being made upon the salesmen there for voluntary work in connection with Liberty Loans, Red Cross and similar campaigns. President Wilson, of the Canadian association, and Mr. J. Castle Graham, secretary, were recently in New York completing the plans for the convention.

PUBLICATIONS RECEIVED

Labor Gazette for June, 1918, contains the usual statistics regarding labor and the general condition of trade and commerce.

Ontario Agricultural College Annual Report for 1917 contains an outline of the work of the college during the year. The usual work has been maintained. The total attendance at the college was 398.

Labor Organization in Canada during 1917.—This is the seventh annual report of the department. It describes very fully the different labor organizations in Canada, the growth of trade unions here, and the relations of labor to the war. It also contains a complete directory of the unions of Canada.

Canadian Quarterly Review for May, 1918.—Published by the Alumnæ Association of the Montreal Polytechnique School. The volume contains articles by Edouard Montpetit, Antonio Perrault, Leonce Jolivet, A. S. Archambault, Leon Mercier Gouin and Metty Koetz. It also includes reviews of recent publications of interest to French-Canadians.

Alexander Hamilton Institute, Modern Business Problem No. 14 and Modern Business Talk No. 28. The former is entitled, "Routing One Million Bushels of Grain to Europe," and discusses various freight routes to the Atlantic, and the different rates for each route. The latter is entitled, "Our Chief Common Carriers," and discusses some questions regarding railroads.

Round Table for June, 1918.—This is the thirty-first issue of this excellent journal which is conducted by citizens of all parts of the British Empire, and published quarterly for the purpose of reviewing the political affairs of the Empire. The Canadian section of the June issue contains articles entitled "The First Three Months of Union Government," "Quebec and the Draft," "Titles in Canada." In addition to the usual sections devoted to the different parts of the Empire there are also special articles on the Growth of America, War Power, the Irish Crisis, and articles on Russia, Germany and Asia. The Canadian representative of the Round Table is Mr. A. J. Glazebrook, of Toronto. Published by MacMillan and Company at 2s. 6d.

The French Government has arranged to conduct a banking business of a limited kind through the post office. By opening a drawing account any depositor may draw cheques and transmit funds in this way.

A number of large mining companies with property within the limits of the town of Cobalt, Ontario, have had their assessments reduced considerably. That of the mining corporation was reduced from $2,740,000 to $2,260,000; that of the Cobalt Lake Company was reduced from $500,000 to $58,163, and that of the Buffalo Mines from $200,000 to $66,750.

Provincial Farm Loans in the West

Canada Has Had Several Experiments in This Direction—Review of the Action of Manitoba, Saskatchewan and Alberta Governments—Money Stringency Has Held Back Loans—Loans Should Be on a Business Basis—Comparison of Private and Government Loaning

CANADIAN efforts during the past two or three years to establish government loans to farmers upon a sound basis have been handicapped by the high rates of money in the market. The intention in each case has been for the province to borrow on its superior credit and to reloan to the farmers at a higher rate of interest, the difference being intended to cover the cost of administration.

As the Hon. Edward Brown pointed out in his speech in Manitoba, in discussing the question, government loans to encourage agriculture are by no means new, having been used in Germany, Belgium and other countries for the past 150 years. They have, however, only recently been introduced in Canada, and a summary of the action of the three prairie provinces may be opportune at the present time.

In Manitoba, about 1916, the feeling prevailed for many years that the loan companies were charging too high a rate of interest. They pointed out that mortgage loans in Ontario could be secured at 5½ to 6 per cent., while in Manitoba it was necessary for the farmers to pay 7 per cent., even on loans of the very best grade. In January of that year a proposal was made in the legislature by the Hon. G. W. Prout that a board should be established which would issue provincial bonds to farmers in return for mortgages, which bonds could then be left at the banks as security for cash loans. This proposal aimed at getting around the clause of the Bank Act which forbade banks to loan on mortgages.

A more direct method of provincial assistance was, however, established by the Manitoba Farm Loans Act, which was assented to on March 9th, 1917. This act established a farm loan board to loan money to farmers at 6 per cent. interest. The association was capitalized at $1,000,000, of which the province was to subscribe $100,000 immediately. Each farmer who secured a loan from the board was to subscribe for stock up to the amount of 5 per cent. of his loan. The bulk of the funds required were to be raised by the issue of bonds to the amount of not more than 90 per cent. of the loans and guaranteed by the province. The stock subscribed by the government and the 5 per cent. subscribed by each farmer accordingly was intended to provide the other 10 per cent. required. As the bonds only bore interest at 5 per cent. and the dividend on the stock was to be 5 per cent., there was a margin of profit of 1 per cent., which was intended to pay the expenses of the organization. The association was also to accept deposits at 4 per cent., which would provide an alternative method to the issue of bonds, and in this case the margin of profit would be 2 per cent. (The act incorporating the association provided that the services of the secretary-treasurers of municipalities should be provided free of charge to the association. The organization was also to be free from all taxes, office rent, payment of land titles, fees for registration, etc., and all prior liens, such as seed grain charges, etc.)

Up to June of this year it is understood that about $1,250,000 had been loaned to farmers, and the money is reported to be going out at the rate of about $125,000 per month.

No official statement of the results in Manitoba has as yet been made. The provincial treasurer, Hon. Edward Brown, has advised *The Monetary Times*, however, that the association is proceeding in a satisfactory way, and that the money being loaned by the organization does not in any case cost the government more than 5 per cent., and also that a very considerable amount has been received on deposit at 4 per cent. It is expected that a complete statement will be prepared for the next session of the legislature.

In Saskatchewan a measure of this kind had been in discussion for some time, but it was the spring of 1917 before any action was taken. In Saskatchewan the interest rate on the loans was not fixed, but was to vary in accordance with the rate which the province had to pay in the market for bonds, which it was intended to issue to provide the funds. A sufficient margin was to be added to cover the expenses of management. A board was appointed, consisting of three commissioners, all of whom had experience in the loan and real estate field.

A greater production loan was issued by the province at about 5½ per cent. and the province could, therefore, loan money to the farmers at somewhat above 6 per cent. One year's operation of the board in Saskatchewan has not yet been completed, and we are advised by the provincial treasurer, Mr. Charles A. Dunning, that a complete statement will be furnished when the legislature meets in the fall.

The province of Alberta also passed an act of similar character. The government, however, had relied on securing the money in the United States, and after the United States entered the war this was no longer feasible. No action was taken, and in this connection the following explanation made by the government is instructive:—

"War conditions and unforeseen developments incident thereto have prompted the provincial government to make a statement of the situation with respect to the operation of the Farm Loan Act.

"The act was passed in April, 1917, and the matter of bringing it into operation has been constantly before the government. It will be remembered that up to that time the United States had not entered the war, and that the American market was then open to the world for borrowing purposes. As soon, however, as the United States joined the Allies, her markets were closed to outside borrowers, with the result that our source of supply—one from which in recent years a substantial portion of our borrowings had been received—was cut off. There remained only the Canadian market, and it is hardly necessary to add that the large requirements of the Dominion government for war purposes preclude our borrowing in that quarter at a rate low enough to make the plan a success.

"The main principle of the Farm Loan Act involves the borrowing and the reloaning of money with a percentage added to cover administration charges, and it will be seen that to insure effective results a continuous supply of money at a reasonable rate of interest is essential. The government has, therefore, determined that in the interests of the farmers themselves the present is not an opportune time to commence the loaning of money under the Farm Loan Act, and it has been decided to postpone its operation until conditions become more normal."

Somewhat later the provincial treasurer, Hon. Mr. Mitchell, again outlined the position of the government in his budget speech of March 21st, 1918, as follows:—

"It is unnecessary for me to make any extended reference to the fact that this government has not brought into active operation what is known as the Farm Loan Act, the act that was designed to give long-term loans to the farmers of this country on the mortgage security of their farms. The reasons why that bill was not proceeded with are quite apparent to every member of this legislature, as they are, I think, to almost every farmer who was interested in this class of legislation. The government saw fit to make a public announcement, setting forth their reasons, and there is no necessity for me to repeat these reasons on this occasion, other than to say that that act presupposed the securing of a continuous flow of money in order that the spread of 1 per cent. which we were charging for administrative purposes might be sufficient to cover the cost of administration. Circumstances arose after the passing of that act whereby we were shut out of the money market that we intended to go to—that of the United States—and a sufficiently large sum of money to properly operate the act in the way it was contemplated is not now available. We could borrow it to the extent of a million or two million, or perhaps three million dollars, but that is not the principle on which that act is based. That act presupposed a continuous supply of money, year by year, until possibly the amount involved would run up to eight or ten million dollars, and then the act would be on a self-sustaining footing. As we all know, it was utterly impossible to provide that amount of money and to get it at a rate that would enable us to add 1 per cent. to it and reloan it to the farmer at a price it would pay him to borrow it."

The other two provinces of Manitoba and Saskatchewan have, in spite of the adverse conditions, pursued the policy as actively as possible. Until an official statement, based on actual operations, has been issued any specific criticism would be premature. There are, however, important principles upon which the acts were based which have been the occasion for much discussion in the provinces concerned.

In the first place, the feeling generally prevails, even among the farmers themselves, that the loaning systems should be operated upon a strict business basis. The scheme outlined by Saskatchewan at least appears to fulfil these conditions, and the government may carry it out. The tendency in government operations of this kind is, however, to neglect certain items of cost which would have to be met were the system operated by a private concern. The item of printing, for instance, may be secured from a public printing service, which is operated below cost, and the deficit from which is met by the public purse; office accommodation and the services of agents and members of the board may be secured at nominal cost. In the case of Manitoba this is quite obviously the case; freedom from taxation, office rent, agents' remuneration and legal fees evidently place the systems upon an entirely different basis of cost from that under which private loan companies operate. This means additional work by the other departments without remuneration, and the cost is finally borne by the general taxpayer. As was recently pointed out to *The Monetary Times* by a Canadian prominent in the loaning field, it is safe to say that the loan systems will increase the cost of provincial government.

Even, however, if every item of cost were included, even an allowance for the expense of the legislative enactment, some consideration should be given to the fact that the province pledges its credit to secure the necessary funds. Provincial credit, it must be assumed, is higher than that of private companies, and the cost of the money raised by the governments is, therefore, less than the cost of that raised by private loan companies. This alone places the provinces in a superior competitive position. It may be argued that this does not cost the government anything. But it does; every increase in the actual or provincial debt reflects on the credit of the province concerned and increases the cost of money borrowed for other purposes. This also must be borne by the taxpayer. The result is, therefore, almost inevitable that agricultural interests are favored by the provision of money at below cost at the expense of other interests in the province.

The net effect of the loan operations has so far not been large. Loan companies have felt the effect adversely, but not to any serious extent. Some funds invested by British investors in the Canadian loan field have found their way back to the United Kingdom, attracted by the unprecedented investment yields there. Investments in mortgage loans in the west by loan companies, life companies and other institutions have fallen off very appreciably during the past three or four years. In addition to the government loaning systems, however, the agricultural prosperity of the west has contributed to this effect, and the funds released have been invested even more satisfactorily in other fields.

FACULTY OF ACTUARIES IN SCOTLAND

Institution has Suffered Loss of Membership through War—New Regulations for Examinations are Expected

The annual general meeting of the Faculty of Actuaries in Scotland was held on the 10th inst. in the Faculty's Hall, 14 Queen Street, Edinburgh, Mr. George M. Low (president) in the chair.

The minutes of the ordinary general meeting, held June 4th, 1917, and also the minutes of the special general meeting, held April 22nd, 1918, were read and approved.

The report and accounts for the past year, which had been printed and circulated, were taken as read.

Report by the Council.

The war still entails a suspension of the faculty's activities. To this cause is due the fact that no sessional meetings have been held or papers read. Time has been found, however, to edit and publish the paper by the late Sir G. F. Hardy, "Notes on Compound Interest Formulas and Tables," referred to at last annual meeting.

The situation as regards examinations remains unchanged, these being necessarily held over during the war. Before they are resumed some revision of the by-laws will be required. Consideration will also have to be given to the case of students who have been absent on military service.

The council have been in communication with the authorities of the University of Edinburgh in regard to a diploma in actuarial mathematics, to be granted to students who elect to take a university course of training, preparatory to the examinations of the faculty in applied actuarial science. Some points of detail still await adjustment and approval. The council gratefully acknowledge the interest taken in this matter by Professor Whittaker and the great assistance he has given them. It is hoped that the scheme will be matured in readiness for the time when the faculty is to resume its ordinary functions.

With deep regret the council have to report the deaths of Mr. A. H. Turnbull, F.I.A., F.R.S.E., admitted a fellow in 1862, a past president of the faculty, and late manager of the Scottish Widows' Assurance Society; Mr. D. J. Surenne, admitted a fellow in 1866, and late secretary of the Caledonian Insurance Company; Mr. R. Blyth, C.A., admitted a fellow in 1893, and for some time manager of the Scottish Amicable Assurance Society; Mr. James Graham, F.I.A., admitted a fellow in 1883, manager of the Mutual Life and Citizens' Assurance Company of Australia. Also the deaths on active service of Captain W. G. Walker, Military Cross, admitted a fellow in 1910; and Second Lieutenant J. B Jackson, admitted a fellow in 1910.

During the year Professor E. T. Whittaker, M.A., F.R.S., Sc.D., of the University of Edinburgh, has been elected an honorary fellow; and Sir A. W. Watson, F.I.A., F.S.S., government actuary, and Mr. S. F. Macnaghten, F.I.A., actuary of the Standard Life Assurance Company, have been elected ordinary fellows under Rule 4.

The total membership is now 217, viz., three honorary fellows and 214 fellows.

No new student has been admitted during the year. Ten have died on military service as above mentioned, one has left the faculty on obtaining a commission in the regular army, and one has resigned. The number remaining on the roll is 145

Since hostilities began 40 fellows and 153 students have joined His Majesty's forces for active service.

The honorary treasurer's accounts for the year ended December 31st, 1917, audited by Mr. David A. Clapperton, C.A., F.F.A., showed that the income of the year was £595 17s. 3d. and the outgo £389 11s. 7d.

The funds at the close of the year amounted to £3.435 4s. 3d. in the general fund, and £41 10s. in the commutation fund, subject, however, to depreciation in value of the investments.

Donations of books for the library have been received from Messrs. G. H. Knibbs, I. J. McLauchlan, A. McLaughton, J. A. Thomson, Walter A. Smith, Harry Allcock, C. B. Smith and Burton Mansfield, and from the Actuarial Society of America, the Casualty Actuarial and Statistical Society of America, the Royal Society of Edinburgh, and others, to all of whom the thanks of the faculty have been conveyed.

Rules 28 and 30 have been altered, the former to read:—

"Gentlemen, other than associates, on becoming fellows, shall pay the annual subscription for the year then current."

And the latter to read:—

"Any fellow or associate whose subscription shall be in arrear for six months shall be applied to in writing by the treasurer, and shall be incapacitated from exercising his rights as a member till such subscription be paid. If it be paid not within one year from the dtae on which it became due, the name of the defaulting member shall be removed from the roll; but the council shall have power to suspend the operation of this rule, or to repone a defaulting member on such terms as they ma see fit if, in their opinion, the circumstances so warrant."

The president, in moving the adoption of the report and approval of the accounts, said:—

Once more our report begins on the too familiar note of suspended activities owing to the war. It also contains a list of additions to the sad record of losses sustained by us as a faculty in the death of fellows and students who have sacrificed their lives, not for their country only, but for the cause of righteousness and human freedom. Believing that "God is in His heaven, all's right with the world," we cannot doubt that their cause and ours will ultimately prevail, and while we mourn their loss and the loss of so many thousands of brave men who have fallen in the same conflict of right against wrong, of freedom against aggression and despotism, we feel confident that they have not given their lives in vain. Through the dark days that are still before us, and after the dawn of peace, when we shall all have to help as we may in the rebuilding of economic order, their memory will remain with us as a noble example of devotion and patriotism.

The report also records the loss of other members who have filled a large place in our esteem. Of Mr. Turnbull, I need not speak to you. We have already endeavored, in a minute passed at a special meeting, to express our sense of the high regard in which he was held among us, and of the services he rendered to his profession from the time when he entered the faculty as one of its first group of student graduates. Mr. Surenne, less prominently known, and for some time retired from business life, was also in former days an active and useful member and office bearer, first of the Actuarial Society, and afterwards of the faculty. Mr. Blyth entered the faculty by election when he became manager of the Scottish Amicable Society, and he remained with us after the transference of his service and abilities to the business of banking in which, as among ourselves, he was held in high honor. Mr. Graham was perhaps better known to myself than to most of you as he began his career under me. He was a man of sterling character and considerable attainment, and, had he remained in this country, would no doubt have taken a prominent place in his profession here. As it was, be became the head of an important mutual office in Australia, and in that capacity proved himself a credit to the faculty.

During the year we did ourselves the honor of electing as an honorary fellow Professor Whittaker, of the Edinburgh University, a distinguished mathematician, who has shown a keen practical interest in the faculty and the training of its students, and to whom we owe in great measure, the initiation and successful progress, so far, of the movement of which I shall speak presently, for linking on university training to the scheme of preparation for our fellowship.

Owing to the absence of students on war service, we have admitted no new members by examination, but we have elected as fellows two gentlemen whose attainments and qualifications rendered it desirable that they should be associated with us—Sir Alfred Watson, the new government actuary, and Mr. Macnaghten, the actuary of the Standard Life Office, who is well known to us all.

The report mentions the negotiations that have been taking place between the council and the university in regard to a diploma course in actuarial mathematics to be instituted for the benefit of our students.

These negotiations are not yet concluded, and therefore I must speak with some reserve, but I may say that the attitude of the university authorities, with whom we have been in communication, and their evident desire to meet our wishes and the requirements of our students, give every encouragement to hope for a successful issue. There will be no compulsion to attend the university classes or to take the diploma, but those who have had experience in preparing students for the examinations of the faculty assure us that the course of study proposed will be a very fitting introduction to the purely technical subjects that have ultimately to be mastered, and will supply some rather serious defects which they have observed in the preliminary training of men who come forward to qualify for our profession. This being so, there is every encouragement to expect that students will as far as possible avail themselves of the university course of instruction, and the council earnestly hope that in the years to come this will result in much benefit to them and to the faculty itself.

Mr. Gordon Douglas: Mr. President, I rise to second the motion which you have just made. After the interesting remarks and résumé of the report you have given, there is little left for me to add.

I think that the outstanding part of the report is that to which you last referred, namely, what I hope I may call our prospective connection with the University of Edinburgh. I am sure we are much indebted to you and to the other gentlemen who took a special interest in this matter for the trouble you had in connection with it. I trust that in due course the scheme will be brought to a successful issue; in which case, many of our young men, who are spared to return from the war, will find a new and valuable opportunity open to them of perfecting themselves in the science on which our profession is based. We may take for granted that they, at any rate, will feel that the past session which opened the way to that circumstance has, by no means, been a barren or unfruitful one.

In these annual reports we are accustomed to find one note of sadness, as it very rarely happens that we have not to record the death of one or more gentlemen who were connected with the faculty in one way or another. These deaths are usually of men well advanced in years, and who, like our good friend, Mr. Andrew Turnbull, and the others referred to in this report, have served their day and generation. But, sir, the note of sadness is greatly emphasized when we see these long lists of the death of young men whom we were entitled to look upon as the actuaries of the future, who have had to lay down their lives on the threshold of their careers, and before they had really entered upon the profession they had marked out for themselves. We would wish, I know, to express our sympathy with the bereaved relatives, and to concur in our own sense of loss as a faculty.

There is only one other point to which I would like to allude, namely, the election of Professor Whittaker to be an honorary fellow, and Sir Alfred Watson and Mr. Macnaghten to be ordinary fellows of the faculty. There is, I am sure, only one feeling among our members, and that is that these appointments were well made, that in honoring these gentlemen we conferred an equal or a greater honor upon ourselves, and that the faculty can only be strengthened by having these gentlemen connected with it.

I have much pleasure in seconding the motion that the report and accounts, as submitted, be adopted.

The president: The motion is adopted.

We now come to the election of office bearers. You have the lists in your hands of the gentlemen recommended by the council, and a ballot will be taken as usual. It will be your duty, if you wish to substitute any other names, to mark them upon the ballot paper.

I ought, perhaps, to make an explanation here. The council, in their wisdom, were of opinion that in present circumstances it would be as well that I should remain in the office of president. You have done me the honor of re-electing me more than once already, and I would gladly have given way to someone else better fitted to occupy this office, but I can see, as things stand at this moment, that it is convenient I should go on, and if it is your pleasure I am more than happy to do so. There is a slight departure from precedent in the nominations of vice-presidents. The president, on retiring, usually becomes a vice-president. This rule has been followed for some time, but on the present occasion there would be no new vice president but for what I am about to mention

We found that under the rules, four of the ordinary members of council must retire, and could not be re-elected, unless elected members *ex-officio*

That would have deprived us on this occasion of one member of council whom we could not afford to lose, especially in present circumstances, and pending our negotiations with the university. I mean Mr. Lidstone, who has taken an active part in these negotiations, and whose skill in actuarial mathematics has been of the greatest value to us

In order to save the situation, Mr. McLaughlan offered to retire from the office of vice-president, an offer which we could not have accepted unless he agreed to remain in the council, so Mr. Lidstone is proposed as a vice-president, and Mr. McLaughlan as an ordinary member of council. The names of the other new ordinary members proposed will, I am sure, commend themselves to you.

WHALEN PULP AND PAPER MILLS, LIMITED

The capitalization of the Whalen Pulp and Paper Mills, Limited, is being increased by the issue of 7 per cent. mortgage debenture stock, due May 1st, 1932. This makes the present capitalization as follows: 6 per cent. serial mortgage bonds, $2,500,000; 7 per cent. mortgage debenture stock, $2,500,000; 7 per cent. preferred shares, $2,102,500; ordinary shares, $8,000,000.

The debenture stock is secured by mortgage on the company's present and future assets, subject only to the deeds securing the serial mortgage bonds. The assets are valued by the company at $15,000,000, so that there is a margin of $12,500,000 as security for the stock. The stock is being offered by Graham, Sanson and Company, of Toronto, at par with a bonus of 50 per cent. of common stock.

The Whalen Pulp and Paper Company owns the entire assets of three mills and their nearby timber limits in British Columbia. These are the mills at Creek Mill at Howe Sound, the Empire Mill at Swanson Bay and the Colonial Mill at Quatsino Sound, Vancouver Island. The first-mentioned has been in operation for six years, and the others have been commenced comparatively recently. Among the directors of the company are James Whalen, of Port Arthur; George M. Seeman, of Chicago and New York; M. J. O'Brien, of Ottawa; W. H. Whalen, of Vancouver; W. D. Ross, of Toronto; and M. J. Haney, of Toronto.

FUR MARKET REACHES NEW HIGH PRICE LEVEL

Furs have long been considered to be necessities rather than luxuries in Canada. The long, cold winters encouraged their use, and the supplies, until recent years, were readily available. The general level of prosperity in Canada has been fairly high and Canadians have been able to buy furs on any market. In the face of rapidly rising markets, the present abnormal war-time prosperity has enabled a large percentage of the population to maintain, or even raise, their standards regarding necessities.

But the line between luxuries and necessities is frequently not very clearly defined, and the fluctuations of the market often determine whether a given commodity is really a necessity or merely a luxury. During the past two decades the prices of furs have risen steadily. Substitutes were found for many of the more costly furs, which, if available at all, were purchased only by people to whom the price was merely a secondary consideration. Since the war commenced, however, the prices of all furs, including the substitutes, have risen greatly, and trade opinion indicates that the high prices will continue to increase. Factors in a further rise in prices, it is contended, will be the import embargo placed on furs from many countries and the further depletion of the ranks of United States and Canadian trappers by the war's demands for man power.

At the recent quarterly sale of raw furs in New York—at present, the most important fur market in America—more than $4,000,000 worth were disposed of. This was the largest amount ever recorded at a sale in New York. Fashion kept a few furs down to former prices, but many others went up by leaps and bounds. Thus, northern wolf pelts advanced 140 per cent. for the season, while south-western wolf pelts showed a total rise of 90 per cent. These instances were, in large measure, due to their being substituted for foxes, the catch of which was short. Muskrat showed a rise of 120 per cent. and beaver 105 per cent. for the season. With the exception of northern raccoon, which only advanced 15 per cent., the prices advanced from 30 to 140 per cent. for the season

These increases are for raw furs only. When the increased cost of dressing, dyeing, etc., is added, the consumer will have to pay handsomely for the finished product, and many may be led to conclude that, after all, furs are only luxuries anyway.—Conservation.

WONDERFUL FRANCE

France has afforded the world a lesson of unparalleled devotion and sacrifice. For months before the United Kingdom was seized with the reality of the menace that threatened civilization, France bore the burden and the brunt of the Hun onslaught. And now, after three years and more of war, France stands proud and undaunted before the foe. Such superhuman heroism and devotion to duty has rarely, if ever, been witnessed before in the world's history.

And not only on the field of battle, but in the sphere of finance as well, has the French nation proved its fibre. The government, on each appeal to the people for funds to carry on the struggle, has met with a proud and prompt response. In addition to financing its own heavy requirements, the French republic has extended generous aid to its allies, and notably to Russia, Italy, Belgium, Serbia and Roumania.

It is difficult to unravel inter-allied financial transactions, since the complete data have never been made public. It is well known, however, that both Great Britain and the United States have come to the support of French credit; while France in turn has given aid to the other continental allies. A short time since in the Chamber of Deputies, the French minister of finance, in presenting the budget for 1918, stated that up to December 31st, 1917, France had loaned her allies 6,365,294,100 francs. In the 1918 budget provision was made for external loans amounting to 56,632,100 francs—a great reduction from the 1917 figures. Nevertheless, by the end of the fiscal year (1918) France will have loaned to her allies 6,421,926,200 francs, or $1,120,000,000. And it must not be forgotten that these advances have been made by a nation invaded by a ruthless enemy, despoiled of its richest mines and agricultural resources, and with the flower of its people called to the colors. This is, at one and the same time, both an inspiration and an achievement.

The magnitude of the sacrifice made by France in men, materials and money, has never been adequately grasped by those of us on this side of the water. For example, both in Canada and the United States, there have been complaints among the farmers and others regarding the prices received for products. Let it be understood once for all, that no decent-minded person is in this war for gain. Let it be widely known that through loss of territory, loss of man-power and scarcity of necessary materials, French agriculture is not more than 50 per cent. as productive as it was in August, 1914. In France, bread is the staff of life—literally. To those of us who remain at home, let French heroism connote the ideal in national effort. Let nothing be neglected, whether in the providing of money, soldiers or food to sustain and encourage France, Italy and the Motherland, who have reckoned no sacrifice too great that liberty and justice might prevail.

INTER-ALLIED LABOR WAR AIMS

The British Labor and Socialist parties have never quite forgiven the government for refusing permission to them to send delegates to the abortive peace conference at Stockholm. Even while Mr. Arthur Henderson was a member of the Cabinet he could ill conceal his chagrin at the attitude taken by Premier Lloyd George and his confrères, with respect to socialistic agitation. Some months ago, there was held in London a conference of the labor and socialistic parties of the United Kingdom, Belgium, Italy and France; which, after four days' deliberations, drew up a programme outlining the terms for the successful termination of the war, as well as for post-bellum economic rehabilitation and international relationships. The document in question was published in full in the London "Times" of February 28th, and thus given an importance which cannot well be discounted.

Mr. Sidney Webb, the founder of the London School of Economics, a prominent British publicist and a voluminous writer on social questions, has given the American press a resume of the findings of the conference, and his own interpretation of the results thereof. Writing before the launching of the great offensives on the western front, he argued that, if the programme as formulated in London by the Socialists, were carried across the frontiers into Germany and Austria, it would compel the holding of an European labor conference—in Switzerland or elsewhere—whose deliberations would end the war. He charges that the "old" diplomacy, as well as the appeal to arms, have proved futile as far as the achievement of peace is concerned; and that the only hope of reaching an understanding lies in a rapprochement of the Socialists of all nations.

There is nothing new in the programme formulated by the delegates to the conference at London. Mr. Bertrand Russell, Mr. Norman Angell, and other pacifists and ultra-democrats, have long since made us familiar with its main outlines. These include the setting up of a high court of conciliation and arbitration; the establishment of a league of nations; the abolition of secret diplomacy; the settlement of frontiers by the self-determination of the nationalities concerned; reparation and the restoration of Belgium; and finally—after the war—the democratization of industry, of politics, of diplomacy, and the abandonment of Imperialistic programmes; colonial self-government, and the holding of undeveloped territories in Africa and elsewhere, for the benefit not only of the natives, but also of the free industry of the world.

From the theoretical, apart from the practical, point of view, there is much of importance and value in these suggestions. There is no sympathy, however, due to the general assumption that permeates the entire discussion—that the war was caused by the autocracies of Europe, and that it is being pursued for selfish motives by the capitalist class. The United Kingdom, the United States and France entered the war to achieve no selfish object; and, moreover, they entered the war with the united support of their peoples. It is no less absurd to charge the old diplomacy with treachery, selfishness and greed, than to assert that capital is gaining anything from the continuance of the struggle. Moreover, while we are ready to listen to the voice of any section in the community, it must be by the united will of the nation that peace terms shall be made.

BOND INVESTING IN CANADA

Activity in bonds for a decade before the outbreak of the war went a long distance towards facilitating the issue of large amounts of Canadian government bonds, but results of campaigns, such as the Victory Loan campaign, will go very much farther towards developing the capacity of Canadian investors for bonds. The loan campaigns in Canada and the United States have been primarily campaigns of education. The fact that large insurance companies, trust companies, banking institutions and large investors have purchased Canadian Victory Loans and United States Liberty Loans indicates their intrinsic value as investments. If they are desirable for purchasers of this kind, they are even more desirable to small investors, who wish their investments to be absolutely safe and to be readily saleable at any time. The educational campaign has not been limited to the mere technicalities of bonds, but also has included their distinct features as compared with mortgages, etc., namely, marketability, convenience in the collection of interest, etc. This knowledge, when once it is spread, increases of its own accord and forms an asset of great value to the governments, municipalities and borrowing companies which may be in the market for funds after the war, and to the investment houses whose business it is to deal in these securities. It is a more difficult thing to bring about an initial purchase of bonds than it is to persuade the holder of a Dominion war bond to purchase other securities of similar character.

The province of Quebec, which is reputed to be, next to Ontario, the wealthiest province in the Dominion, ranked fourth in the amount of subscriptions per head of population to our first Victory Loan. If its relative position in the case of the previous Victory Loans were determined it would no doubt be found to be higher. It must be remembered in this connection that in Quebec the wealth is not so evenly distributed as in the other provinces, a larger proportion being represented by the accumulations of industrial and financial institutions. Aside from occasional speculative flurries, provincial and municipal finance in Quebec province has always been conservative. Its growth, as it is now seen, has been sounder than that in many other sections of the Dominion. The province, like Ontario, enjoys a diversity of industry, and is not, therefore, very greatly affected by slackness in a particular industry. These facts are of importance from the point of view of finance, because once the bond-buying habit has been acquired it insures a relatively stable market at all times for securities.

A great deal has been done within the past few months in the way of local sales in Quebec. A number of municipal issues have been disposed of almost entirely in the province. A recent issue of the very considerable sum of $6,100,000 of city of Montreal bonds has been more than half sold, and the larger part of the sales were made throughout Quebec province. We are advised by the syndicate that many sales have been to purchasers who have not been in the habit of buying bonds at all. There is in Quebec, more than in any other Canadian province, a preference for local issues, but the impression is spreading, slowly but surely, that issues of the Dominion and of the other provinces and high-grade municipalities constitute investments which at the present time cannot be duplicated for desirability. Our war loans are loans to Canada as a nation, and not to the government which may happen to be in power at the time of issue. French-Canadians have not had the advantages of bonds brought to their attention to as great an extent as have inhabitants of Ontario, but the activity of the banks and investment houses in the province during the past few months indicates the increasing power of this field.

It is proposed to establish degrees of commerce in the University of London. The senate of the university recently resolved to this effect and a deputation was sent to the Lord Mayor of London.

The council of Hamilton, Ontario, has invited the city council of Toronto to go on record with regard to the passage of legislation by the Dominion government to afford insurance and protection to the dependents of Canadian soldiers and volunteers and draftees for overseas service.

A large number of lots in the district of Saanich, B.C., were sold for taxes on Tuesday, July 16.

The National Abrasives Company, formerly of Hamilton, is erecting a new plant at Renfrew, Ontario.

The lumber property known as the McFarlane property of Cascades, near Ottawa, Ontario, has been purchased by the Bate, McMahon Company of the latter city. A logging and general lumbering business will be carried on, and operations, it is said, have already been commenced.

BANKING STATEMENT FOR JUNE

One of the principal features of the bank statement for the Dominion of Canada for the month of June, is the increase in deposits during the month. They increased $32,150,546, and the total is now $1,515,261,643. Most of this gain is in the savings deposits. Compared with the same month last year, the increase is more than double. Call loans both within and outside of Canada have decreased, but current loans, on the other hand, have increased considerably. They are now substantially in advance of current loans last year. Note circulation, as might be expected, continues to grow. The following are some of the principal figures:—

	June, 1918.		Changes during June, 1918.
Note circulation	$ 194,681,710	+	$12,791,751
Reserve fund	114,344,068	+	10,550
Demand deposits	549,327,078	+	13,973,347
Notice deposits	965,934,556	+	18,177,199
Total deposits in Canada	1,515,261,634	+	32,150,546
Deposits elsewhere	210,118,939	+	5,945,654
Current coin	75,564,627	—	1,005,959
Dominion notes	183,814,738	+	6,159,061
Deposits, central gold reserve	84,470,000	+	4,600,000
Call loans in Canada	76,970,920	—	1,495,662
Call loans outside	170,034,476	—	2,225,403
Current loans in Canada	897,226,012	+	2,408,899
Current loans outside	103,033,289	+	3,732,363
Total liabilities	2,101,467,370	+	30,923,646
Total assets	2,349,836,297	+	29,877,895

The complete statement will be given in *The Monetary Times* next week.

COMMERCIAL UNION ASSURANCE COMPANY, LIMITED

The annual report for the year 1917 of the Commercial Union Assurance Company, Limited, appears upon another page of this issue. The net premiums in the fire department increased by about $2,500,000, and the claims amounted to 48 [illegible] per cent. of the premium income. The premiums in the marine department on the other hand, decreased by about $2[illegible]. Both departments, however, show a substantial profit, $1,500,000 being transferred to profit and loss from the fire department, and $1,000,000 from the marine department. The business in the accident department showed an even larger increase than that of the fire department, being over $[illegible],000 in advance of 1916. $1,500,000 was transferred from this department to profit and loss. The sums carried to profit and loss accordingly totalled $4,000,000.

2,7[illegible] new policies were secured in the life department, the net amount retained by the company being $7,500,000. According to the eleventh valuation which was carried out during the year the total surplus is now well over $1,000,000. The Commercial Union Assurance Company was established in 1861, and is one of the largest and strongest companies doing a general insurance business in the world. Its agencies extend throughout the United Kingdom, the British colonies and many other parts of the world. The Canadian branch is under the management of Mr. James McGregor, assisted by Mr. W. S. Jopling. Branch offices are also maintained at Winnipeg, Toronto and Vancouver.

NEW YORK LIFE CONVENTION IN VICTORIA

The western division of the New York Life Insurance Company will hold its annual convention in Victoria this year, probably during the first week in September. The western division of the company extends from Los Angeles north and from the Pacific coast as far east as Boise, Idaho. All New York Life agents in that territory who have written $100,000 of insurance during the year are entitled to attend the sessions, and it is expected that several hundred will make the trip. The convention will probably last about five days.

NORTHERN ASSURANCE COMPANY, LIMITED

For the year 1917 the Northern Assurance Company received from the fire department premiums totalling $8,439,570, or considerably more than for the previous year. The loss ratio was 54.8 per cent. and the expense ratio 35.1 per cent. The former is somewhat higher than in previous years and brings the general average up to 58.9 per cent. The expense ratio, on the other hand, is lower than usual, being 37.4 per cent. in 1916. This includes commission to agents and charges of every kind. In the life department 1,166 policies were issued for new assurances amounting to over $2,000,000 of new business. The premium income from the life department was $1,450,000 and from interest about $750,000. Claims amounted to $1,250,000, and expenses of management were about 10 per cent. of premiums received. The Northern Assurance Company is one of the oldest of British companies, having been established in 1836. Its financial position is strong. Of a subscribed capital of $15,000,000, only $1,500,000 is paid up, and there is a balance in the profit and loss account amounting to $878,950. The head office for Canada is located in Montreal, and is under the management of Mr. G. E. Moberly. The Canadian branch was established in 1867, so that the Northern Assurance Company is a pioneer in the Canadian field.

CANADA'S BANK CLEARINGS

The following are the bank clearings for the weeks of July 14th, 1917, and July 18th, 1918, respectively, with changes:—

	Week ended July 14, '17.	Week ended July 18, '18.		Changes.
Montreal	$ 99,320,057	$ 93,087,198	—	$ 6,232,859
Toronto	66,663,014	68,499,433	+	1,836,419
Ottawa	6,500,889	6,451,604	—	48,285
Hamilton	5,054,234	5,389,782	+	335,548

DEFECTIVE MUNICIPAL FIRE PROTECTION

Report on Toronto Disaster Finds Too Many Dead Ends and Consequent Weakness in Pressure

An investigation into the fire at the Thor Iron Works on April 2nd was held recently in the City Hall, Toronto, by Mr. George F. Lewis, deputy fire marshal for the province of Ontario. The investigation revealed undoubted weakness in the city's system of fire protection, much of which is due to the unwillingness to spend money for this purpose.

The cause of the fire remains unknown, as the building was completely destroyed. It is supposed, however, to have been either carelessness in throwing away match ends when the workmen were leaving the plant, or else a short circuit in the electrical connections. The total value of buildings, plant, machinery, and ships under construction was about $2,000,000. The buildings destroyed were valued by the vice-president and general manager at $45,000 to $50,000, and the replacement value of the machinery he estimated at $240,000. During the course of the evidence it was found that dead ends located near the plant did not provide sufficient water power, and that when a hose line was laid to another hydrant at the foot of Spadina Avenue, 1,400 feet away, the friction in this length of hose practically cancelled the water pressure.

The relation of an improvement in the fire protection system and the city's finances was discussed with the fire chief, W. J. Smith. He said: "I think our department in particular is one of the departments which should be kept up to date all the time, irrespective of taxation, because you have to pay it one way or the other." The chief pointed out that where adequate protection was not provided, the increases in insurance rates were equivalent to the cost of the additional protection. Officials from the waterworks department of the city gave evidence that there were 556 dead ends in the city which were not merely located in the suburbs, but throughout the central part of the city itself. In the administration of the city 35 per cent. of the expenses of the waterworks department is charged to the fire department, this being regarded as the proportion of the water expenses that should fall upon the fire department. As a matter of fact, however, Mr. George C. Powell, deputy city engineer in the waterworks department, stated that the proportion of the water used by the fire department was much less than one-third. Two-thirds of the cost of the waterworks department is accordingly derived directly from the users of the service, the remaining one-third being derived from the general taxpayers through the expense of the fire department, which is non-revenue producing.

Alderman William H. Hiltz, chairman of the works committee, when questioned regarding the policy of the council, stated that he was quite free to say that even though the attitude of the city council and the works department this year would be not to enter into increased capital expenses, nevertheless if there was any serious defect in the fire protection system, such as was suggested, it should be remedied as soon as possible.

Mayor T. L. Church in giving evidence pointed out that the responsibility for the maintenance of adequate protection rested in the first instance on the fire chief, but that it was a case of responsibility without authority, as he had to apply to the council in each case to secure the necessary apparatus. More co-ordination between the fire department and the works department was also strongly recommended.

Inadequate Protection Means High Rates.

Discussing some of the points brought forth when the mayor was giving evidence, the report reads as follows:

The mayor said that the underwriters had not complained about the city's fire protection. It was pointed out to his worship that the requirements of the underwriters should be considered as a minimum, and that the city must be protected to a greater extent than the underwriters demand. They do not usually argue over fire equipment, but simply raise the rates if fire protection is not adequate. The insurance rates were already increased, and it was pointed out to him that once the rates go up, it is very hard to get them down. It is like the merchant who fails in business; it is hard for him to again re-establish his credit.

The matter of cleanliness was taken up, and it was suggested that a systematic "cleanup" of every back yard, cellar and attic ought to be made in the spring and autumn, taking possibly a week for the east end of the city, and a week for the west end, so that the wagons of the departments could handle accumulation of stuff to be removed.

Inspection.

The matter of inspection was taken up in connection with fire-prevention work, and it was pointed out that inspection should be made by the uniformed force. Men who have grown old in the department and are trained fire-fighters, are especially fitted for this class of work. An annual, or still better, a semi-annual inspection should be made of all dwellings and residential sections, and a monthly inspection should be made of all shops, warehouses, and factories, especially store-rooms, attics, cellars, and back yards, and see that all accumulations of dirt, rubbish, papers, packing, lumber, boxes, or other inflammable matter is promptly removed and the premises regularly swept and kept in good order.

A systematic inspection every month by members of the fire-fighting force in industrial areas would be beneficial, not only as a fire-prevention measure, but also as a means of familiarizing the officers and members of the fire department with the various factory buildings, etc., so that, should a fire occur, they would be familiar with the conditions and lay-out of the buildings; in short, the fire menace would be removed and the department would know how to fight the fire before it occurred.

The mayor agreed that a greater effort should be made in respect to fire-prevention, especially with regard to inspection.

Smoking should be prohibited in all stores, warehouses and industrial plants, except and unless there is a room especially provided for the purpose, of a fire-proof character, and permission granted by the chief of the fire department before it could be used as such.

Grass Fires.

The enactment and proper enforcement of a by-law preventing the setting out of grass fires, except under special conditions, was gone into. The time consumed, and enormous expense with which the fire department is unnecessarily burdened, was emphasized by the chief stating that they had over four hundred grass fires so far in April. Not two-thirds of the month was over.

It was explained to the mayor that it was not only the time and direct expenses incurred by the department being called out to these grass fires, but the more important matter of fires starting in the business portion of the city, which might do thousands of dollars damage, while the department is called out to put out a grass fire carelessly started by boys.

Where factories are located in isolated places grass should not be allowed to grow within twenty feet of the building, especially where there are wooden structures or platforms involved.

Another matter which was brought up for the mayor's attention was the removal of old shacks and tumble-down buildings that are a fire menace to valuable surrounding property.

Watchman Service.

The possibility of fires being started by alien enemies, and the employment of alien enemies in industrial plants, especially those engaged in the manufacture of munitions and war orders, was next taken up. It was suggested that the city officials, through educational propaganda and moral support, could do much towards getting the manufacturers to employ sufficient watchmen, and organize systematic patrons for the protection of their plants. Returned soldiers should be well fitted for this work.

The further enlargement of the salvage corps for the protection of merchandise when a fire starts in a mercantile building, was urged on the mayor, as this means the saving of a great deal of valuable property from water damage.

Sundry Equipment.

It was suggested that the following equipment should be furnished the fire department:

High powered search light that would cut through dense smoke, so that the firemen could properly fight fires at night.

An oxy-acetylene burner for the purpose of cutting iron bars, so that the firemen would not be hampered from getting into a building to fight a fire.

Standard smoke helmets to supply the men with pure air when they have to enter buildings to fight fires, with

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning. Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

236 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint Stock Bank, Limited; The Royal Bank of Scotland

37

a sufficient number distributed in every district in the city.

Dead ends, mains, hydrants:—The chief of the fire department and commissioner of public works should co-operate. They should get together and select the sections of the city where large industrial institutions are operating, and where the fire menace is great, and connect up those dead ends, and in that way the city would get beneficial results quickly without any great expenditure of money. The replacement of four and six-inch mains in industrial and business sections by water mains of sufficient size to properly protect the property should be considered and proceeded with in a systematic manner, as the seriousness and requirements of the locality demand.

Harbor Improvements.

The expenditure of millions of dollars in developing, enlarging, and improving the water front sections of the city, and the contemplated fire protection planned in connection therewith, was considered. It is a short-sighted policy to make these enormous expenditures and bring outside capital and manufacturers to the city, and not properly protect their buildings and homes from destruction by fire, and to emphasize this point, the mayor stated, with regard to outsiders locating in Toronto, that the first thing they ask about is fire protection.

By-Laws.

Educational propaganda, and systematic work, especially inspection on the part of the city officials, is necessary, but efforts in these directions will be unavailing unless supported by by-laws which are easily and uniformly enforced. The city appears to be lacking the authority to enforce the requirements of a proper inspection system, and should, without delay, enact a by-law substantially as follows:—

Section 1.—It shall be the duty of the chief of the fire department to inspect, or cause to be inspected, all buildings, yards, and alleys, as often as may be necessary, but not less than four times a year in the mercantile and manufacturing districts, and twice a year in other districts, for the purpose of ascertaining, and causing to be corrected, any conditions liable to cause fire, or any violation of any by-law affecting the fire hazard. Whenever said chief or other duly authorized person shall find any buildings especially liable to fire by want of repair, or by reason of dilapidated conditions, or defective chimneys, stoves, furnaces, etc., or by reason of any other cause, and when he or they shall find in any building, or upon any premises, dangerous combustible or explosive substances, or accumulations of rubbish, waste paper, empty boxes, or other inflammable material, especially liable to fire, or shall find obstructions to or on fire escapes, stairs, passageways, doors, etc., a record shall be made of such inspection, the chief of the fire department, the deputy chief, or the district chiefs of the fire department shall order the aforesaid matters and things repaired, removed or remedied within a reasonable time specified in said order.

Section 2.—The chief of the fire department shall keep a permanent record of all notices given pursuant to the power herein conferred and of all inspections and the results of such inspections, together with details of the measures taken to correct any defects or inadequacies so found.

Section 3.—The chief of the fire department, deputy chief or district chiefs or the police, or either or both of them, are authorized to enter at all reasonable times, upon any premises in order to ascertain whether the provisions of this by-law are observed, and to enforce and carry the same into effect.

Section 4.—Penalty.—Every person found guilty of failure or neglect to comply with any of the provisions of this by-law or with the requirements of any notice or order issued under the authority of this by-law, shall be liable upon summary conviction to a penalty of not less than five dollars ($5.00) nor more than fifty dollars ($50.00).

Section 5.—All former by-laws or parts of by-laws inconsistent herewith are hereby repealed.

By-laws along protective or preventive lines already enacted by the city should be strictly enforced.

In conclusion, the report states that the fire fighting equipment of the Toronto Iron Works and of the Dominion Shipbuilding Company was inadequate, as was also the watchman service. Laxity also prevailed regarding the employment of alien labor.

PERSONAL NOTES

The Hon. P. E. Blondin, postmaster-general in the Dominion government, has been appointed to the Canadian Senate.

Mr. E. W. Reynolds, formerly of the "Globe," has entered the service of the advertising firm of McConnell and Ferguson, of London, Ont.

Mr. W. W. Butler, vice-president of the Canadian Car and Foundry Company, was re-elected to that office at the annual meeting held on the 22nd inst.

Mr. R. J. Kimmel, formerly city representative for the New York Life at Winnipeg, has been appointed Winnipeg city manager for the Northwestern Life.

Mr. Ewing Buchan, assignee and liquidator, of Vancouver, died recently. The late Mr. Buchan, previous to his death, was liquidator of the Bank of Vancouver.

Mr. W. F. Steedman, of the Sun Life Assurance Company, Montreal, has enlisted for overseas service. Mr. Steedman acted as editor of the publications of the company.

Mr. H. R. Sharp, son of Mr. H. F. Sharp, registrar, St. Mary's, who has been acting manager of the Molsons Bank, Clinton, has been appointed manager, as Capt. Dowling has resigned.

Mr. J. B. Heckendorn has been appointed lake and rail agent, Chicago, Ill., for the Grand Trunk Railway, vice Mr. G. J. Harris, who, owing to ill health, has been assigned to other duties.

Mr. G. E. Long, who has been in charge of the Safety First Department of the Canadian Government Railways, has resigned to accept a position with the Delaware and Hudson Railway. He will be stationed at Albany, N.Y.

Mr. H. J. Thorne was recently elected president of the Vancouver Stock Exchange. Mr. Thorne held this office in the year 1909-10, which was one of the most prosperous years for the exchange. Recently new premises were secured, and there is increasing activity in transactions in the stocks dealt in.

Mr. George L. Courtney, formerly general freight agent for the Canadian Pacific Railway at Hong Kong, has been appointed by the government of British Columbia, general manager of the Pacific Great Eastern Railway Company at a salary of $5,000 per annum. Mr. Courtney was formerly a resident of Victoria where he represented the Canadian Pioneer Transcontinental service.

Mr. John H. Poff, who has been for the past ten years the British Columbia manager of the Sun Life Assurance Company, has been appointed manager for the company in the United States of Columbia. He leaves on September 1st. He will be succeeded in British Columbia by Mr. H. O. Leach, who has been in the head office, prior to which he was vice-president of A. M. Best and Company, of New York.

Mr. W. C. Riddell has been appointed advertising agent of the Grand Trunk Pacific Railway, with headquarters at Winnipeg. After August 1st he will be assistant to Mr. H. R. Charlton, advertising agent of the Grand Trunk system. Mr. Riddell is a native of Port Dover, Ont., and has been chief clerk in the Montreal advertising department of the Grand Trunk for some time, previous to which he was engaged in the newspaper and printing business in Ontario.

Sir Edmund Walker, who has completed 50 years of service with the Canadian Bank of Commerce, was honoured on the 25th inst., by a gathering in Toronto. Among the visitors were Mr. H. B. Walker, of the Canadian Bank of Commerce, Montreal; Mr. E. L. Pease, president of the Royal Bank of Canada; Mr. G. H. Fulton, president of the First National Bank of New York, and many others. A special issue of $5 and $10 notes is being made by the bank in honor of the event.

J. C. Mackintosh and Company, of Halifax, are offering $100,000 of 7 per cent. cumulative preferred shares of the Maritime Telegraph and Telephone Company, Limited, at par and accrued dividend. The dividends of the company have been paid regularly for over thirty years, and 6 per cent. is now being paid on the common stock as well.

TAXATION OF MINES IN BRITISH COLUMBIA

Government Has Aimed to Secure More Revenue Without Crippling Essential Industry of the Province

Speaking recently at the International Mining Convention at Revelstoke, B.C., the Hon. John Hart, minister of finance for British Columbia, reviewed the taxation of the mining industry in the province as follows:—

"The subject which I wish to discuss to-night is one of very great importance to the mining industry; that is, the question of taxation. For over a year I have been in very close touch with the mining interests of the province and have had a great many opportunities of hearing the pros. and cons. of our Taxation Act discussed.

"For the benefit of those of you who have not had experience with British Columbia taxation of mines, I might state that until 1896 the output of mines was made a subject of personal property tax. In 1896 an amendment to the Taxation Act was passed placing mines and minerals in a separate class of property. The amendment stated that there shall be assessed, levied and collected from every person owning, working or leasing a mine, a tax of one per cent. on the assessed value of ore raised from the land, the value of the ore to be determined by smelter returns.

"In 1900 a further amendment was passed to the act making the rate two per cent. on ore produced, provided, however, that all ore producing mines not yielding a market value of $5,000, and on placer or dredging not producing a gross value of $2,000 in any one year, shall be entitled to a refund of half the tax paid in case of ore mines and of the whole tax in case of placer and dredging mines. The tax imposed by this amendment was in substitution for all taxes upon the land and upon personal property used in the working of said mines.

"In 1901 there was a further amendment, stating that the owner of a mine shall be exempted from payment of income tax on income from mines. In 1902 a further amendment was put through to the effect that the gross output of placer or dredging mines to the value of $2,000 should be exempt from taxation.

"In 1903 an amendment was put through repealing the portion of the act exempting mines from income tax, but substituting a clause that in addition to exempting ore mines from income tax, also exempted coal mines from the income levy.

"In 1911 a commission was appointed to revise the statutes and when its work was completed it was found that instead of having repealed the amendment of 1903 regarding the exemption of mines from income tax, part of it was left out, with the result that only coal mines were exempt from income tax. As there were no provisions in the consolidated act to treat the two per cent. tax as being in substitution of all other taxes, the assessors in 1912 assessed the Granby Company and the Consolidated Mining Company on income. In 1913, by an amendment the omission was corrected, and ore mines were again exempted from income tax. From the 1913 amendment until the 1917 amendment mines were only taxed two per cent. on the output. This two per cent. tax for the year 1917 from all mines amounted to approximately $285,000.

Changes in 1916 and 1917.

"When the present government took office in 1916, the late Ralph Smith became minister of finance. He immediately commenced an investigation of the taxation, particularly as to its effect on mining, but his untimely death lost to us the benefit of his experience and study on the subject. The late Mr. Brewster, who was then premier, was obliged to take charge of the finance department for the first session, and although he suggested amendments to the act, he had not sufficient time to supervise the details of the amendments and their effect on the mining industry, with the result that the amendments as passed were not considered equitable.

"In 1916 the rates of taxation were as follows:—

"A. 1 per cent. taxable income up to $2,000.

"B. Over $2,000, and not over $3,000, taxable income 1¼ per cent.

"C. Over $3,000, and not over $4,000, 1½ per cent.

"D. Over $4,000, and not over $7,000, 2 per cent.

"E. Over $7,000, taxable income, 2½ per cent.

"By Section [illegible] of Amending Act 1917 the clause exempting mines from income tax, inserted in 1913, was struck out, thereby bringing mining companies under the above scale of income tax, but in addition to this, there was a sur-tax passed which imposed a further tax of one-half of one per cent. on incomes above $3,000 and not exceeding $4,000; two per cent. on incomes over $4,000, but not exceeding $7,000, and 2½ per cent. on incomes above $7,000; and further, there was a special sur-tax of 7½ per cent. on the excess of incomes over $50,000. Therefore, for 1917 the total income tax was 5 per cent. up to $50,000 of taxable income, and 12½ per cent. on excess income above $50,000.

"By a further amendment to the Taxation Act of 1917, the income tax for 1918 and until further amended is as follows:—

"On taxable incomes not exceeding $2,000, 1 per cent.
"Over $2,000, not exceeding $3,000, 1¼ per cent.
"Over $3,000, not exceeding $4,000, 2 per cent.
"Over $4,000, not exceeding $7,000, 4 per cent.
"Over $7,000, not exceeding $10,000, 5 per cent.
"Over $10,000, not exceeding $20,000, 7½ per cent.
"Over $20,000, 10 per cent.

Assessment Required Revision.

"I took the office of minister of finance in June, 1917. One of my first duties was to assess mining companies under the terms of the 1917 amendments and Sur-tax Act. On a close study of the conditions, I found that mining companies were taxed, not on profits, but nearly on gross income. In ascertaining the taxable income, no deductions could be made for depreciation of plant, for development work, or for managers' or directors' salaries resident in the province, while shareholders receiving dividends from mines were obliged to pay further tax on such dividends, and in addition to this, the two per cent. ore tax had to be collected.

"After having explained in detail to the cabinet the drastic effect the enforcement of the act would have on the mining industry, I was authorized not to assess under the act as it then was but to investigate and prepare amendments that would refine the act to a more reasonable and equitable measure and make these retroactive to 1917.

"During the year 1917, and prior to the 1918 session, I had many opportunities of discussing the taxation of mines with representatives of mining interests, and I can say that the point of view of the mining men was very forcibly placed before the government. The government realized from the outset of the conferences with the mining men, that they were not trying to evade a just and fair tax, but that they were anxious to assist us in the solution of the difficult problems with which we were confronted. On the other hand, I think I am right in saying that the mining men soon realized that they had the sympathy of the government, and, while we were anxious to increase our revenue, we were determined not to do so at the risk of crippling the great industry of mining on which this province depends so much for its progress and prosperity.

Suggestions of Mining Men Crystallized.

"During the session of 1918, I am pleased to say, the whole of the suggestions of the mining men, with one exception, were crystallized into legislation. The following allowances for deductions were made:—

"In addition to administrative expenses and necessary expenditures made for mining, an allowance for depreciation of plant not exceeding 15 per cent. per annum of value.

"Development work in connection with ore from which an income is derived.

"Salaries of managers and directors who reside in the province and who thus are liable for income tax themselves.

"Dividends from mines are not again taxed, and in addition, it was arranged not to collect income tax and the 2 per cent. ore tax, but only whichever is the greater.

"All these changes apply to the 1917 tax, as well as to 1918, and have a very material effect on the amounts to be paid by the companies.

"A little misunderstanding existed about the year's operations on which to base the returns. Some companies requested that they be allowed to pay taxes for 1917-18-19 on the basis of 1917 returns, but when it was pointed out to them that provision was made in the act to credit the 2 per cent. tax paid in the year that might be used as a base for income tax against said income tax, they readily agreed to pay taxes for 1917 on 1915 balance sheet, for 1918 on 1916 balance sheet, and for 1919 on 1917 balance sheet, because by accepting this method their account for income tax for the three years would be credited with the 2 per cent. tax paid in the years 1915-16-

17, while, if the taxes for 1917-18-19 were based on 1917 income, credit could only be had for 2 per cent. tax paid in that year.

"Gold mines were treated a little differently on account of the price of gold being fixed and the increased cost of production. The 2 per cent. tax is struck out altogether, and they pay on their profits, without regard to whether or not the amount is greater than the 2 per cent. tax. The only other deduction that the mining companies can reasonably ask for is that the capital invested be allowed to earn a reasonable interest before profits are taxed, but this would also have to apply to lumbering and other industries as well. We are in sympathy with this idea, but before arriving at a decision on the point, we are waiting for complete returns from mining companies and other corporations, so that we may have sufficient information before us to see what effect such deductions would have on our revenue.

"It is hardly necessary for me to again repeat that Premier Oliver and the government are determined that taxation shall not interfere with the progress of mining in this province, and when your returns are all in our possession we will give the matter our fullest consideration and study, so that adjustments may be made, if necessary."

FIRE PREVENTION IN BRITISH COLUMBIA

Excessive Losses in Recent Months Have Impressed Insurance Men With Necessity for Action

By Henry Lye.

Startled by the frequency of fires by which large losses have been incurred during the past three months the attorney-general of British Columbia has convened a meeting of experts by whose concurrence a system of fire prevention is proposed to be established. The meeting was attended by the fire underwriters' representatives in British Columbia and Hon. J. W. deB. Farris, attorney-general. It was decided to provide for the better inspection of plants in the province by means of local fire prevention bureaux. Authority to establish these will be given by an amendment to the fire insurance act. Those present at the conference with the attorney-general were Fire Chief Carlisle, of Vancouver; Fire Chief Watson, of New Westminster; Fire Chief Davis, of Victoria; J. L. Noble, secretary of the Vancouver Island fire underwriters; and Mr. Foster, secretary of the Mainland fire underwriters. The proposed fire prevention bureaux are to consist of a member of the manufacturers, a member of the Rotary Club, one from the board of trade, one from the city council, the fire chief and a member of the underwriters' organization.

Situation is Quite Serious.

In *The Monetary Times Annuals* of 1915, 1916 and 1917 I drew attention to the fact that, for some years to come, the efficient inspector would be the most valuable officer of a fire insurance company in view of the many changes in processes and articles of manufacture all presenting their special risks and dangers. The experiences of the past few years have demonstrated the valuelessness of statistics based upon conditions which no longer exist and therefore are not reliable guides as to equitable rates of premiums, nor as to requirements of precautions.

The fire committee of the commission on conservation established by the Dominion government has proved itself of no use because its members have had no practical experience in fires nor in the adjustment of losses.

The proposed system of inspection in British Columbia may justify itself if the work is done thoroughly and intelligently, and if its operators have authority to enforce the precautions [illegible] should be observed.

During the past thirty years I have explained the various risks in the cities and towns and suggested their special opportunities [illegible] of [illegible] of hazards. The coming year will bring great [illegible] and difficulties because of the many [illegible] manufactures and the ever recurring introduction of new goods and materials, so it is to be hoped that the [illegible] [illegible] will be exercised without partiality and [illegible] application of authority.

Had the commission of conservation been composed of experienced persons we might have seen some benefit from its operation instead of having an expensive organization without adequate results.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended July 19th, 1918:—

Edwards & Wright, 65,990; Buffalo Mine, 88,000; National Mine, 43,440; Nipissing Mine, 92,310; Hudson Bay Mine, 63,739; Kerr Lake Mine, 60,181; McKinley-Darragh-Savage Mine, 169,412. Total, 583,092.

The total shipments since January 1st now amount to 16,526,522 pounds, or 8,263.3 tons.

ANOTHER FIRM OPENS BOND DEPARTMENT

Messrs. Mackay & Mackay, Canadian Pacific Railway Building, Toronto, have opened a bond department under the management of Mr. C. M. Macdonald. They will deal in all classes of Canadian government and municipal bonds. Mr. Macdonald was formerly a member of the firm of Macdonald, Bullock & Company.

MISUSE OF THE WORD "PROFITEER"

That all profit makers are not profiteers is pointed out in the "Bache Review" of July 20th.

"In these days great care should be taken not to mislead the public in regard to the large industries of the country, upon which so much depends for winning the war as quickly as possible.

"It appears that the public, and it may be concluded also, the politicians, have a very vague idea of the meaning of the word 'profiteer.'

"It should not be applied to the earnings of large business where those earnings have been made by only a small percentage of profit, but where, notwithstanding, because so much business has been done, the aggregate earnings foot up heavily.

"This is the condition of the earnings of the five large packers who have been pilloried as profiteers by the Federal Trade Commission in their recent report on war profits.

"The business of these five packers, as shown by government figures, accounted for only about one-third of the meat business of the country. Their sales for the last three years were over $4,500,000,000 of product. The earnings were about 3 cents on each dollar of sales. This amounts to only a small fraction of a cent profit on each pound of product. But because of the great volume of business done, this aggregate profit amounted to $140,000,000 in the three years.

"What was the profit for a similar period made by the large number of smaller packers who did the other two-thirds of the meat business of the country? It is fair to assume that it was nearly as much in proportion—perhaps even fully as much or more. If it was not as much in proportion, it is because of the better results from larger capital and larger brain-power used in business by these five, which gave them a more perfect organization.

"This is not profiteering. It is only a fair profit on a big business created by superior efficiency and business ability. The advantage to the government has been that, for one instance, in a very brief time, these packers were able to promptly fill the government's demand for $29,000,000 worth of products. If the business had not been so large and well organized, the government could not have been served promptly, and suffering to the Allies and the soldiers might have followed.

"These great concerns, through their superior management, have increased production enormously. That is the test of patriotism in business—the measure of production achieved in output needed to win the war.

"Let us suppose that the coal business was organized as is the packing business and had been managed by equally able leaders. There would, then, have been no coal famine last winter. There would be now no worse famine threatening next winter."

The Union Trust Company, with head office in Toronto, has closed its branch office in Regina until the return of normal conditions. The provincial manager, Mr. Robert F. Johnson, will, however, remain in the city.

Who Shall Be Your Executor?

Selecting an Executor is as important as choosing a manager for a business. In either case, it is necessary that the executive should have special training and experience for the work. The thirty-six years' record of this Trust Corporation shows ample qualification for its being appointed as Executor of your Estate by your Will.

LIFE INSURANCE REVIEW

Old Line Companies Have Demonstrated Their Superiority in the Field

BY WILLIAM H. ORR

For many years it has been my habit to give an enquiring glance over the official reports from Ottawa in order to note the progress of the life insurance companies doing business in Canada. It is pleasing to see that it *is* "progress" that they have been making, year by year, since it indicates increasing intelligence on the part of the people. One might expect some decrease on account of the war; but, on the other hand, a great amount of insurance, and at high premiums, has been written upon the young men going across the sea.

In the case of the old-line companies—as they are sometimes called—the business has been carried on of late by 26 Canadian, 15 United States and 16 British companies. Of the latter two classes, however, there are 13—six United States and seven British—which have not, for many years past, been issuing any new policies in Canada. They maintain single offices here at which they collect gradually decreasing amounts of premiums, and pay their losses or claims, by death or endowment, as they mature.

Handsome Increase of New Issues.

Leaving those 13 out of consideration, there are the 26 Canadian, 9 British and 12 United States companies, being a total of 47, that issue new policies, and thus continue to add to the amount of business on their books from year to year, and this through peace or war, as the case may be. During the year 1917 those three classes of companies issued new policies in number and amount as follows:—

The 26 Canadian companies	135,145	for	$172,703,621
The 9 British companies.	7,849	for	5,109,843
The 12 United States companies	354,754	for	104,145,626
Making a total of	497,748	policies for	$281,959,090
For 1916, the totals were.	457,668	" "	233,101,645
An increase of	40,080	policies for	$ 48,857,445

The great number of policies issued by the United States companies (354,754) in proportion to the amount of insurance written thereon, is caused by the industrial issues of the Metropolitan and Prudential. The one issued of these 194,990 and the other 114,916, carrying, respectively, $24,226,835 and $16,459,495

The Assessment Societies.

Having called attention, as above, to the handsome increase made by the regular or old-line companies during the past year, in the matter of their growing patronage by the people, let us now take a look at what the assessment societies have been accomplishing the past year as compared with 1916. Have they also been making progress in obtaining new business from a people of growing intelligence, or have they been having a hard time of it, and harder and harder as the years go by?

For convenience in ascertaining how they are prospering we find much help in the Bulletin Life Insurance Chart, a very useful little pamphlet, which has been issued during more than a dozen years past by the Bulletin office, 18 Toronto Street, Toronto. It also gives the rates used by the several societies doing business in Canada, and other valuable tables.

The number of those societies collecting monthly assessments in Canada is now twenty, about half of them transacting most of their business in the United States, and some of them also in nearly all parts of the world. Conspicuous examples of the latter class are the Independent Order of Foresters, the Maccabees and the Royal Arcanum. These three carry insurance at the present time of $175,786,918, $359,824,688 and $246,382,161, respectively.

In what direction are those 20 assessment societies travelling, as compared with the 47 regular companies, whose new business done in Canada alone, the past two years, is shown in the above table—the year 1917 compared with 1916, and a handsome growth made, very much to their credit.

A similar table for the assessment societies, taking in both Canadian and outside business, gives the following showing:—

The 20 wrote 58,723 certificates for	....	$65,973,255
For 1916 wrote 71,590 certificates for	....	88,551,577
A decrease of 12,867 certificates for	....	$22,638,322

The number of new members obtained during 1917 by the three largest societies above mentioned from all over the world, numbered, respectively, 11,010, 19,182 and 5,320. During a previous year not long ago they received as many as 32,644, 80,052 and 17,731. These figures show that they now enjoy only about one-quarter to one-third of the confidence the people formerly had in their system of business.

The Reason for the Slump.

It has been said, "There is reason in all things." It is not difficult to see the reason why the well-tried-out system of the companies continues to succeed, and why they will continue to prosper, and why the new, wonder-working assessment plan has so soon fallen down, as it was so sure to do in the course of time under the test of experience. It is all in a nutshell. The companies recognized the need of a solid, well-invested "reserve fund" to provide for the "last man," whether the life of the company should be long or short. The assessment workers asserted that provision for the increasing deaths caused by old age could be made when the occasion arose, so that in the meantime the funds could be left in the pockets of the members. And so they went on, deceiving the people with the idea that a mere contingency fund of $20 or $30 or $50 per $1,000 insurance was all that should be accumulated. During the first twenty years of their existence their rates were so low and so attractive that this was about all that any of them could lay by. But new light has of late dawned upon them; and, by means of higher rates and of cutting down of the amount of individual certificates, no matter how long in force when the death occurs (and by charging up interest-bearing liens), most of them are now paying heed to the advice of the actuaries. The result is that the three societies named above have now a "reserve fund" of $265, of $58.17 and of $21.46 for each $1,000 of insurance in force. The Knights of Pythias have $100.52, the Sons of Scotland $160.35, the Woodmen of the World $130.26, but most of the others are away below even $50.

A Big Swell in Income.

The Independent Order of Foresters, differing from most of the societies, makes returns or reports to the Dominion government. The result is that this past year's income shows a most surprising leap. It has for many years past been slightly above five millions of dollars, but for 1917 it is shown to be no less than $12,473,234. The explanation of this is that, having placed a major assessment of $50 per $1,000 upon all certificates, the superintendent of insurance at Ottawa required the face of those liens to be entered up as part of the 1917 gross income. And as a disbursement, a big item of $2,590,089 was entered as "adjustment of book values and profit and loss account," so that the amount of assets is increased by less than four millions. This increase is wholly in the form of "liens, loans and interest thereon"—a kind of asset which disappears immediately in the case of a member dropping out, as so many do, while still in good health. Of the $16,488,028 of certificates which "terminated" in 1917, only $3,890,678 were by death. This shows how little value there is in "liens" compared with the other items of "admitted assets," which are now some millions less than a year ago, while the "liens" are $6,209,638 greater. A lien, especially when it bears accumulated interest, is a poor substitute to the widow and orphan for cash when the time for settlement comes in their case.

Proof that the System is Fatally Defective.

A few items from the last number of the Royal Arcanum Bulletin will show how far short of 100 per cent. cash many of their certificates yield to those whose owners have left widows and orphans:—

Paid 98 orders at first amount	$ 98,000
Paid 93 orders at third amount	279,000
Paid 3 orders at third amount, Option C........	6,300
Paid 22 orders at second amount	44,000
Paid 26 orders at half-rate	39,000
Paid 18 orders at half-cash option	19,084

Interest Paid on the Date at Your Local Bank

No bother; no waiting for your interest. Simply call at your bank, present your coupon, and the interest is paid over the counter in cash.

No tales of woe from the mortgagor who can't pay. No foreclosure proceedings and loss of time; and no lawyers fees to eat up your earnings. Just call for your interest, it is cheerfully paid over every six months.

5½% MORTGAGE CORPORATION DEBENTURES

are issued in sums of $100 and upwards for a period of time to suit the purchaser. Nothing so simple or so safe. Thousands of people have invested their savings in these debentures without the loss of a dollar invested.

$100 invested at 5½% doubles itself in less than 13 years.

$100 saved at 3% takes 23½ years to do the same thing.

Write for Booklet entitled "Profits from Savings."

A few more of such make up the "paid 313 orders for $553 283.73 disbursed for death claims in May, 1918, against [illegible] assessments for the month, ending June 15th, were estimated to produce only $551,000. The new members for the year were 5,320, while the terminations numbered 36,987. So much for the Royal Arcanum's present-time practice in paying its death claims.

And from page 3 of the United Workman's monthly paper, printed at Orillia, we learn that of the 34 death claims settled in May, only three were for the full original $2,000, the others being settled with the widow and orphan by such amounts as $1,260, $1,250, $1,244.70, $343, $640, $621 and $829, etc.

Since writing the foregoing paragraph, the July number of the "Canadian Workman" has come to hand, with statement of how the 22 certificates for June were paid. Only one full $2,000 was paid, and only three of $1,000. The other eighteen cases were settled at a long distance short of 100 cents per dollar, such as $955, $715, $1,161, $644, $832, $[illegible]65, $670, $594, and other such sums.

Surely, surely, the proofs herein given—the latest figures available—show that the assessment system has fallen down on the way, and can no longer be relied upon to produce satisfactory results, as compared with the record of the regular life insurance companies now doing business in Canada.

STRINGENT FINANCIAL MEASURES IN SOUTH VANCOUVER

The municipality of South Vancouver, B.C., is doing everything possible to meet the heavy debt obligations with which it is burdened. With a population of not more than 25,000 and an area of only 9,200 acres, this municipality has a general debenture debt of about 5½ mills, which is more than quarter of the total assessment. Even allowing for the sinking fund and water works debentures which are over $1,000,000 the net debt is more than 20 per cent. of the assessment.

Mr. F. J. Gillespie, the commissioner of taxation, in sending out the tax notices recently attached to each one the following statement:—

Dear Sir or Madam:—In consequence of an appeal for assistance to meet South Vancouver's financial liabilities, the provincial government decided that a change must be made in the administration, and has placed upon me the task of restoring the financial credit of the municipality.

"As it is not possible to meet each ratepayer to discuss the problems facing me, I wish to take this opportunity of asking for your hearty co-operation, for I realize that without your personal assistance my task is impossible of achievement.

"After careful consideration of the financial situation, I find it absolutely necessary to depart from the straight tax on land, which has failed to meet the requirements of the municipality, and I am compelled to ask owners of property carrying improvements to contribute more during the next few years towards administrative expenses caused by the existence of those improvements. A moment's thought will, I think, convince you that this is not unreasonable, and though it may appear that departure from the straight land tax is somewhat drastic, in view of the financial situation I trust you will agree that the remedy is not too drastic, and that I may rely on your cordial co-operation in the task confronting me.

"One of the most important matters is the education of South Vancouver children. Our schools are amongst the most efficient in the province. The records prove this. There are approximately 5,000 pupils on the rolls, and 147 teachers on the staff. The prompt payment of your taxes will make for continued efficiency, and in the near future place this fine municipality on a sound financial basis. I bespeak your help to this end."

The tax rate of the city of Winnipeg for the fiscal year has been fixed at 21 mills, an increase of four mills over last year.

British Columbia has taken over the Pacific Great Eastern Development Company, which owned town lots and other lands situated along the coast of the Pacific Great Eastern Railway.

BRITISH TRADE REPRESENTATIVES IN CANADA

Extensive Organization to Thoroughly Develop Market for British Products

Mr. G. P. Milne, who was for five years the trade commissioner for the British government in Australia was in Toronto recently on his way to Montreal. Mr. Milne has come to Canada from Australia to assume the duties of chief commissioner here for the British government. After leaving Melbourne, Australia, in May, he visited the principal cities of New Zealand and arrived in Vancouver on July 4th. He then visited Winnipeg and came to Toronto to confer with Mr. F. W. Field, who is in charge of the Ontario branch of the service. It is expected that there will be an exhibit of British products at the Canadian National Exhibition in Toronto this year.

There will be about 16 British trade commissioners altogether in place of four as formerly. The representatives so far have been located in Canada, Australia, New Zealand and South Africa, but the new organization is to provide four for Canada, two in Australia, one in New Zealand, two in South Africa, two in India, one in the West Indies and one in the Straits Settlements. The commissioners will collect information which may be utilized to increase trade between Great Britain and the colonies.

"I recognize that Canada is an immense territory for an investigation of trade possibilities from the official side," said Mr. Milne recently, "but I look to secure the hearty co-operation I met with in Australia, co-operation in official quarters as well as from the business community. Of course, the war is the dominant factor to-day, and the work of the department is more in the nature of studying the possibilities of after war expansion, rather than any immediate trade development."

Mr. Milne said that most of the civilized countries of the world now realize the value of official trade representatives.

"Shortly before the outbreak of the war," he said, "your big neighbor across the border appointed through its department of commerce at Washington 12 commercial attaches in various parts of the world, and, speaking from personal knowledge of the American representatives in Australia, I can say they have shown activity and resource."

A point which Mr. Milne emphasized, was that the efforts of the Imperial Department of Overseas Trade must not be regarded as taking the place of, but rather supplementing the work of existing agencies, such as chambers of commerce, boards of trade and manufacturers' associations. These bodies themselves, he said, recognized in turn that without the support of individual manufacturers and merchants, no organization, official or otherwise, for trade promotion and expansion can make headway.

Trade with Australia.

Referring to Canada's trade interests in Australia, Mr. Milne said:—

"Canada is ably represented in Australia by its own trade commissioner, my friend and colleague, D. H. Ross, of Melbourne, and indications are not wanting that, after the war, Canadian exports to Australia should considerably increase in value and volume.

"Like the rest of the world, Australia is profoundly affected by the war situation. At present, owing to the enhanced values of her products, such as wool, meat and metals, and to the expenditure of the loan money raised for the prosecution of the war, the island continent is apparently enjoying a period of great prosperity. But the people over there are conscious that there is an element of artificiality in this prosperity. For the moment the tonnage question is the dominant factor regarding Australia's external trade. For instance, at present there are millions of tons of wheat awaiting shipment. The government has, however, after considerable delay, initiated a shipbuilding programme, while the construction of vessels for the government has been contracted in the United States. The main difficulty in connection with ship building in Australia is in the securing of materials. The country's steel works have only recently essayed the rolling of steel plates."

Mr. Milne touched on the labor situation in Australia.

"When I left, the industrial position was fairly settled," he said, "but of course in such times as these it is impossible to predict what the future may hold."

There are no food restrictions in Australia, Mr. Milne said, and no prohibition laws beyond the enforcement of early closing. Mr. Milne's office is at 367 Beaver Hall Square.

CITY OF WINNIPEG FINANCES

Tax Rate of 21 Mills is an Advance of Four Mills Over Rate Last Year

At a recent meeting of the city council of Winnipeg, the tax rate was fixed at 21 mills. The rate for last year was 17 mills. Several items in the estimates had to be reduced in order to bring the estimates within the 21-mill figure.

The following is a summary of the estimates:—

Expenditure.

	This year.	Last year.
General government	$ 243,516	$ 233,982
Protection of persons and property.	1,249,784	1,164,076
Preservation of health and sanitation	678,037	528,731
Highways and bridges	341,265	310,825
Education	1,511,012	1,301,275
Recreation	200,779	199,668
Miscellaneous service	403,075	347,398
Expenditures not already classified.	1,520,015	1,319,501
Totals	$6,147,487	$5,405,058
Balance preceding year's appropriations	62,083 (debit)	178,939 (credit)
Grand total	$6,209,570	$5,226,518

Revenue.

	This year.	Last year.
Miscellaneous	$ 580,355	$ 580,300
Business tax	343,156	333,866
Total	$ 923,511	$ 914,166
Net amount to be raised by taxation.	5,286,059	4,312,352
Rateable assessment	252,528,800	253,667,790
Rate of taxation	21 mills	17 mills

Estimates are Hard to Reduce.

The principal reason for the jump in the tax rate is the increased cost of wages and material. Among other changes in the city's finances an amalgamation of the tax collectors and the assessors department has been suggested. This subject was before the council some years ago but no definite action was taken at the time. It is expected that a change of this kind would make possible a reduction in the number of members of the staff.

Regarding the police estimates one alderman suggested that a substantial reduction be made. The number on the staff is now 210, and the police commission report that they had reduced the estimates as far as they possibly could consistent with safety. It was finally decided to reduce the estimates by $47,000. The amount estimated for the year 1917 as the city's share of the gross earnings of the street railway was $100,000. The actual amount received was $99,437, and the slight difference is attributed to the competition of jitneys. The sum of $110,000 from this source is included in the estimates for the year 1918-19.

PURCHASING MADE-IN-CANADA GOODS

A prominent manufacturer of western Ontario has pointed out to *The Monetary Times* the practice of many Canadian manufacturers buying United States goods which could just as well be purchased in Canada, and at the same time advertising for their own clients to buy their goods because they are made in Canada. He takes, for instance, paper and envelopes. Letters are frequently received from Canadian manufacturers, advertising their goods and requesting support on grounds of patriotism, and these same letters are written upon paper bearing the water mark, "Made in U.S.A."

The Brant Farmers' Co-operative Society, Limited, meeting at Brantford on July 1st, declared a dividend of 6 per cent. on capital stock. The annual turnover was $19.481.24. Mr. W. C. Good and Mr. U. O. Kendrick, retiring directors, were re-elected.

A NATIONAL POLICY

Summary of an Address by Sir John Willison, at Galt, Published by the Canadian Industrial Reconstruction Association

IT is often suggested that while the war lasts we should not consider the conditions and problems that will arise when peace is restored. This, however, is advice which no other country seems willing to accept. The British Empire, the United States and Germany are all making thorough preparation for the development of industry and trade after the war. Vessels are being built in German shipyards for overseas trading, German agents are accumulating stores of raw material in neutral countries, and an even more effective organization of industry is being worked out along the lines of co-operation between the state and the industries and between labor and capital. Factories are being organized in industrial unions and research institutes are being established to develop business. Germany is, moreover, looking forward to a commercial federation in Central Europe, which will give to German manufacturers a domestic market of nearly 200,000,000 people.

When peace is declared, enormous quantities of allied shipping will be required to carry back the overseas forces of the United States and of the British Dominions. This shipping cannot be applied for commercial purposes. It may be the case that the peace terms will impose trade restrictions on Germany, but past history would indicate that normal relations are restored with remarkable rapidity. There will, unquestionably, as in the past, be the keenest competition between Germany and England, and both nations are doing everything they can in the way of preparations for export trade. England and the United States are at present, owing to the heavy demands upon their resources, somewhat handicapped, but in spite of this fact, they are doing active work in the way of developing business. The elimination of Germany has created a vacancy in the foreign trade markets which provides an excellent opportunity for countries fitted for manufacture. When these facts are considered it is evident that Canada cannot neglect her own interests in this direction.

Reconstruction After the War.

What will be the position of Canada when peace is restored? The needs of those employed in munitions or other industries directly depending on the war, will have to be utilized in other industries. These, together with the men returned from Europe, will release between 600,000 and 700,000 men for industry. Considering their dependants, also, 1,500,000 people will be affected by the advent of peace. Proper employment must be provided for these men, and where necessary, they must be fitted for suitable work. Some may be used in agriculture, but it is the general opinion that not very many will be attracted to this occupation. We will also be burdened with a tremendous financial obligation and a national revenue of $350,000,000 at least will be required, which is more than double our national revenue before the war. To carry this expense with a minimum of hardship our industries must be expanded and production increased.

Of all our industries agriculture is by far the most valuable and will continue to be so for an indefinite period. Recent years have seen a much more liberal policy adopted by the provincial and Dominion governments towards agriculture, and substantial appropriations have been provided for its encouragement. Agriculture has never been a favored industry in Canada, and the unusual profits obtained during the war years have also been to some extent secured by other industries. In this connection it must be remembered that as England is now very nearly self-supporting as regards the production of food, there may not be as great a field for export there as was formerly the case. On the other hand, however, we may well anticipate a development of manufacturing in Canada, and the growth of the cities throughout the Dominion will furnish markets for agricultural produce. Canada covers an enormous area and the day is not far distant when manufactures will be found in the western provinces. It is a mistake to think that agriculture is national and manufacturing sectional.

It is essential, therefore, that we should have a better organization of industry as an example of what organization can accomplish. The work of the Imperial Munitions Board may be examined. Through this organization shell orders aggregating over $1,000,000,000 have been placed in Canada; 950 manufacturers, from Nova Scotia to British Columbia, have received contracts and seven great national plants have been constructed at a cost of $15,000,000. Under similar direction and organization, the industries of Canada should be as effective in the era of construction as they have been in the era of destruction.

Organization and Preparation.

In Great Britain itself, the sacred doctrine of individualism is being treated with violence, and in the United States industrial combination is no longer regarded as in itself injurious. The British trade corporation, with a capital of $500,000,000, will furnish the financial backing for British enterprises throughout the world. Other financial institutions to assist special industries have also been organized. The British government itself has established a commercial intelligence service, and the British Manufacturers' Association will have agents in all the world's markets. A new department of scientific research will spend $5,000,000 in the next five years in the direct interests of industry.

In the United States, also, there is equal activity in preparation for the era of reconstruction. The questions of the return of the army and navy to civil life, the readjustment of industry to after-war conditions and the revival of peace industries are being thoroughly considered. It is realized that the anti-combination laws handicapped American business abroad, and legislation is allowing and encouraging the formation of powerful organizations for this purpose.

It cannot be doubted that after the war Japan will be a more formidable competitor in world markets. The Japanese government is co-operating with industry and extending liberal financial support to the opening of foreign trade channels. Japan is in a position to manufacture many commodities which Germany exported and she has already seized a considerable portion of Germany's trade. The shipping that is necessary to carry on this trade is also being provided, as are also widely spread branch banks to extend the credit required by Japanese merchants operating abroad. This activity has spread over America, Asia and the islands of the Pacific. Our own imports from Japan have during the past five years increased 130 per cent., while our imports from other countries have increased 30 per cent.

A movement in Canada has already been inaugurated by the Hon. Frederick Nicolls, for a Canadian trade corporation, with liberal aid from the government. Groups of manufacturers should unite to investigate foreign markets and consider the adjustment of their factories to the needs of Europe, as they were adjusted to the manufacture of munitions and war supplies. An enormous number of houses alone will be required in the United Kingdom and Europe, and a committee of the New York Building Trades, has estimated that $5,000,000,000 of orders will come to the United States for this purpose. Russia also offers an excellent field for trade in agricultural implements, milling machinery, etc.

If, therefore, we would have an adequate share in the rebuilding of the ruined nations, Canadian industries must organize with vigorous foresight and courage; they must co-operate to secure the necessary knowledge of conditions abroad; they must establish joint selling agencies; they must have such assistance from the government as is freely afforded by the governments of Germany, Great Britain and the United States to the industries of those countries. These results can be best achieved through such a trade corporation as Senator Nicolls advocates. It is also necessary that we should have adequate post-graduate research facilities in Canadian universities along the lines of those provided in the great American universities of Harvard, Columbia, Wisconsin, the Mellon Institute and the Massachusettes School of Technology. These institutions in the United States have already rendered invaluable service to the United States industries.

Employers and Employees.

It is also vital that good relations should exist between employers and employees. The estrangement between labor and capital must be removed and since old personal relations between employer and employee cannot be revived, something else must be provided. The importance of labor in modern industrial life has been and will continue to be felt. Much of the progress realized by the workers during the past century has been the direct outcome of the activities of labor organizations. Labor interests have realized the essential part they played in the nation's life and with this realization, has also come the sense of responsibility which is attached to it. Labor leaders have come to the fore in political life throughout the English-speaking world.

In Great Britain those who were regarded as labor agitators have become sober and responsible Imperial statesmen, as probably they always were if we had understood. No one in the United States has revealed more of the spirit and stature of a statesman than Samuel Gompers. Those who reviled Lloyd George are his colleagues in the Government, and those whom he reviled are his friends and comrades. Wild theories and fantastic panaceas have been tested in Russia, with ruin and horror beyond imagination. Sober labor leaders like Mr. Gompers of the United States, and Premier Hughes of Australia, have, therefore, emphasized the fact that the best interests of labor lie in pursuing the path of continuous progress, rather than in seeking chimerical reforms. There is safety only in sympathetic co-operation between employers and employees, and wise recognition of the actual identity of interest between capital and labor.

As instance of the general feeling for closer co-operation in industry, Mr. Willison pointed to the Whitley report which has been widely accepted in England as a basis for future relations between employers and workmen, and has been approved by the British Association of Chambers of Commerce and other organizations. The report suggests industrial councils by which employees will obtain a voice in determining factory conditions and works committees to bring employers and employed regularly together in joint consultation. In the United States the Standard Oil Company of New Jersey, has formed an industrial council representing both the company and its employees. A system of sick benefits, life insurance and annuities has been established and a plan of medical supervision organized. It was explained that the cost of replacing employees runs from $10 to $300 for each replacement, and the number of replacements were known to run as high as 30 per cent. of the employees per month.

Economy, Confidence and Expansion.

Mr Willison concluded his address as follows: No one who thinks can doubt that Canada, like other countries, will face a difficult situation when the war is over. We must retain our population if we are to bear without excessive strain the great burden that the war will have laid upon us. But if we are wise and farsighted we may enter through reconstruction into an era of national expansion and prosperity. Through the long war with France Great Britain established her commercial supremacy. With the close of the Civil War in the United States began the era of American industrial expansion. The war of 1870 laid a load upon France which stimulated her people to thrift, industry and scientific utilization of her raw materials. Necessity drives nations, as it drives individuals, to greater economy and exertion. Few countries have such rich natural resources as we have in Canada, or such areas of fertile land. We may have trade preferences in British markets and probably priority of raw materials for the industries of the Empire. Doubtless, too, we shall have an Imperial organization of shipping which will give us advantageous connections with British and foreign markets. We have a great railway system built with cheap money which may prove to be a greater asset than we would now admit. It is legitimate that the natural resources of Canada should be developed in the national interest, and that processes of manufacture should be carried to completion in Canadian factories. Too often we confuse loyalty to Great Britain with loyalty to the Empire. An industry in Canada or settlement in Canada is as valuable to the Empire as an industry or settlement elsewhere under the flag. If we ever doubted this the war is a complete and final demonstration. During the first years of peace we may have little immigration from the old world owing to the congestion of shipping, but we shall have continuous immigration in greater or lesser degree from the United States. It will be necessary to adjust immigration to conditions and with greater regard to national cohesion and national character. But the land will bring people as raw materials of manufacture will bring industries, if we make the national welfare the supreme concern in legislation . We may not forget that when the war is over the United States will have a great commercial fleet and industries organized for export trade, not inferior to those of any other country. We, too, must continue to build ships and organize our industries for greater and cheaper production. We must also as never before resist public waste and extravagance. It is my judgment that in the last twenty years we have wasted $500,000,000 of public money in Canada. If waste was censurable before the war, it will be criminal after the war. But in a free country only a stern, active, energetic public opinion ensures economy in public expenditures. But primarily and chiefly, we must organize to re-establish the soldiers in civil pursuits, to improve our position in world markets, to ensure that factories will not be idle and labor unemployed when peace comes, to stimulate agriculture by generous public support and the creation or expansion of industries closely related to production, and to maintain satisfactory relations between employers and employed. It is idle to deny that we face tasks of tremendous magnitude, but with organization, courage and confidence, and undeviating devotion to the common national interest, we can repair the ravages of war, reconstruct our industrial system and build upon stable foundations a greater and happier Canada.

RUST IN WESTERN CANADA

Elimination of This Factor in Wheat Crop Would Greatly Increase Production

What rust in grain has cost the Canadian farmer in cold cash through startling reductions in yield, and what, in turn, the consequent cut in spending power has meant in hardship to the wage earners in eastern Canada who produce goods western Canadians buy, can probably not be calculated. But no two representative grain growers or manufacturers would hesitate to declare the cost to Canada as one expressed in terms of hundreds of millions of dollars. So anything tending to lessen the power of this curse to the grower of grain, is certain to work out to the general advantage of Canada. And it appears now that there is good reason for optimism among those who have been actively engaged in solving the problem and so increasing the effectiveness of Canada's food contribution to the Allied cause, and the base of prosperity of Canadians from the Atlantic to the Pacific.

Many people, indeed, foresee the utter extinction of the rust menace in Canada in the eradication of the barberry plant, and in the development by Seager Wheeler—the Luther Burbank of the Canadian wheat world—of a variety of the great essential cereal that matures some ten days earlier than that generally grown in the western provinces.

It seems to have been proved absolutely that the decorative barberry—except the Japanese sort—is the chief cause of the propagation of rust trouble, and already in the spring wheat belt in the United States and in Canada, an organized campaign is working for the eradication of the barberry in all sections likely to infect the growing grain. It was brought out in Congress in Washington by the Hon. George Young, of North Dakota, that the settlers in the colony of Massachusetts in 1755 were aware of the intimate relations between the barberry plant, and rust on wheat, and that a law was passed 30 years ago providing for the rooting out of the shrub in that jurisdiction. Denmark, however, has begun the modern crusade, and the Hon. Mr. Young says that rust has practically disappeared from the wheat fields of that progressive Scandinavian country since the carrying into effect of the campaign against the innocent-appearing barberry.

Apparently this plant is "host" for the rust, which is carried on the winds as far as two or three hundred miles. That is how rust in Canada may have come via air route from the United States, or how rust in the Dakotas or Montana or some other state in the republic may have been carried from plants in Canada. When the climatic conditions are suitable, it fastens to the wheat, and then, to complete the cycle, the parasite returns to the barberry which preserves it in health during the winter. Almost invariably, hitherto, there has followed a sharp reduction in yield wherever the ordinary spring wheat has been attacked.

Opinions on Rust Question.

While little has been said in public in Canada, the leaders in Canadian agriculture have been closely watching the rust evil in all its ramifications. Now, Dean Rutherford, of the University of Saskatchewan, Saskatoon, points out:

The people of Saskatchewan are fully aware of the fact that rust can come to us from Dakota or from any of the states to the south and gets started when our conditions are favorable for its propagation and spread. For instance, in 1916, the rust wave from the states to the south gradually pushed up in a north-westerly direction far past Saskatoon. The states to the south are waging war against the barberry. Manitoba, Saskatchewan, and, I think, Alberta, have included the barberry bush among their noxious weeds on account of it being a host plant for the rust. Steps are being taken to have it destroyed in all gardens and hedges.

And further: "Conferences have been held already in western Canada for the purpose of discussing ways and means of preventing rust. One of the matters that received consideration was that of the barberry and it was recommended that this plant be destroyed. The barberry has not been used extensively in western Canada yet, probably more of it can be found in parks and large public grounds than anywhere else. As these are under governing bodies, either municipal or government, it will be a very easy matter to have this plant eradicated. The Dominion Department of Agriculture is interesting itself in this important question and has under way carefully planned investigations with reference to it."

And Seager Wheeler says of his new "breed" of wheat:—

"Red Bobs comes up to all my expectations in practically every respect—more so than I could reasonably expect. I personally consider it a perfect wheat to suit our conditions in the west in point of earliness to reasonably escape damage from early fall frosts and rust. These two points alone make it a very promising sort, as frost in every season get some of the crops, and in 1916 the loss from rust alone in Canada amounted to $135,000,000.

"Red Bobs matures a week to ten days earlier than even Marquis. While it is not altogether rust resistant, it is practically immune owing to its stage of filling at the time rust begins to develop, so that rust cannot do any damage to the grains as it will be filled before rust makes any headway in the crop.

"Of other good qualities its great strength of straw enables it to be grown on land and stand up where other sorts would (except Kitchener) lay down owing to excessive soft growth in rich land. Another good quality, the heads fill completely, where in other sorts many heads have empty spikelets. Red Bobs is being grown this season in many districts in the three prairie provinces and will be put to a severe test, but I am confident that it will make a good showing."

In a broad sense Canada must regard Red Robs wheat as a good gift from Australia. Out there under the Southern Cross, in 1905 a farmer "crossed" a wheat without a name with a barley called Nepaul. A hard, beardless, good milling wheat was the result, but it was unmarketable because it was white. Some samples came to this country and experiments with it were made during a period of several years. But it remained white. Then Seager Wheeler in 1907 began his experiments with it and by dint of great care and patience he has gotten the "Red" Bobs. He gave it that name because he is a great admirer of "Bobs," the soldier, and because he thinks one day it will be a great factor in the prosperity of the Dominion, a development in which the beloved Field Marshal would have taken pride.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

July 24th, 1918.

MINING CONVENTION IN BRITISH COLUMBIA

At the international mining convention held recently in Revelstoke, B.C., many subjects of interest were discussed. In the absence of Thomas French, manager of the French Complex Reduction Company of Nelson, his paper on "Some Notes on the Smelter Situation in British Columbia," was read by the convention secretary, and was followed by a very practical address by Mr. Sidney Norman, of Spokane, editor of "The Northwest Mining Truth," and representative of the Spokane Chamber of Commerce, in which he made strong protestations against the evils of the smelting trust.

The attitude taken by Mr. Norman was strongly opposed by the next speaker, Mr. J. J. Warren, of Trail, president of the Consolidated Mining & Smelting Company, in his address on "Some Smelting Problems Under War Conditions," among the problems mentioned being labor conditions at Rossland and smelting rates, more particularly pertaining to lead ore. In refuting the arguments of the previous speaker as to the government regulation of smelters, he contended that the saw mill or flour mill should be just as equally regulated.

Chas. F. Caldwell, of Nelson, president and manager of the Utica mines and president of the Kootenay Mine Owners' Association, set forth the claims of the mine owners of the Kootenay district in an address in which he appealed for the sympathy of the convention and the sympathy of the boards of trade in the interests of the mine industry.

The convention closed with the passing of the usual resolutions, which were replied to by the honorable minister of mines and the local convention chairman.

An invitation to hold the next annual convention at Golden was read by the secretary.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Teeswater, Ont.—The by-law to purchase the electric light plant carried by a majority of 71 votes, though only a small percentage of the property owners exercised their franchise. The by-law was given its third reading by the council, and the town treasurer has issued debentures at 5½ per cent., the interest and capital to be all paid in 12 years.

Renfrew, Ont.—Messrs. G. A. Stimson and Company, debenture brokers, Toronto, have just purchased by tender a second lot of town of Renfrew debentures amounting to $8,797.61 issued for hydro purposes and maturing in 30 instalments. There were a number of tenders received and that of Messrs. G. A. Stimson and Company was the highest.

British Columbia.—The following certificates have been issued by the municipal department of the province of British Columbia: Trail—By-law No. 188, school $15,000, payable $1,000 annually for 15-years, interest 6 per cent., payable half-yearly and debentures No. 1 to 30, thereunder, July 4th, 1918. Trail—By-law No. 189, waterworks $6,400, payable in 20 years, interest 6 per cent., payable half-yearly, and debentures No. 1 to 16, thereunder, July 4th, 1918.

Alberta.—The following school district debentures of this province, on which tenders closed July 18th, were awarded to the Manufacturers' Life Insurance Company, of Toronto, Ont., at a price of 98.43. Block No. 1, Rurals, 10-years 7 per cent.—White Earth S.D., $1,800; Duffield S.D., $500; St. Julien S.D., $1,950; Bouchard S.D., $500; total, $4,750. Block No. 2, Rurals, 10-years 7 per cent.—Shoal Creek S.D., $1,000; Grey Eagle S.D., $2,000; Earlie S.D., $1,000; Riverford S.D., $1,000; total, $5,000.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from July 9th to July 16th, 1918:—

Rural Telephone Companies.—Manitou Lake, $1,200 15-years not ex. 8 per cent. annuity; Geo. W. Lawson, Artland. Snipe Lake, $3,200 15-years not ex. 8 per cent. annuity; C. Jorgensen, Eston. Montmartre, $1,900 15-years not ex. 8 per cent. annuity; A. J. Boyer, Montmartre.

The following is a list of debentures reported sold from July 9th to July 16th, 1918:—

School Districts.—Valley City, $2,000; Great-West Life Assurance Company, Winnipeg. Vimy, $2,500, Thorne, $2,500; Waterman-Waterbury Manufacturing Company, Regina. Allenby, $2,400; Nay and James, Regina.

Rural Telephone Companies.—South Ceylon, $400, Wiseton, $[illegible],500, Fern Glen, $10,600, Dunleath, $17,000; W. L. McKinnon and Company, Regina.

Village.—Abbey, $3,500; W. H. Kirkaldie, Swift Current.

DECLINE IN POPULATION IN BRITISH COLUMBIA

According to the 24th annual report of the Provincial Health Department of British Columbia, the population of the province for 1917 was 379,804, as compared with 385,-3[illegible] for 1916. The population of the cities is placed at 227,-675, that of the municipalities at 126,575, and that of unorganized territories at 2[illegible],000.

HAMILTON RADIAL MAY INCREASE RATES

A recent judgment of the Dominion Railway Board permits the Hamilton Electric Radial Company to increase its passenger rates to equal those of the London and Port Stanley Railway which were recently increased by permission of the Board. The permission, however, is subject to the limitations created by the municipal franchise by-laws, and this situation is likely to prevent any relief being granted the company. The application for an increase in rates was opposed by the city of Hamilton, the towns of Burlington, Oakville and other interested municipalities.

It is said that a new steel plant is to be erected at Trail, B.C.

DOMINION CROP CONDITIONS

Reports of Crop Prospects Throughout the Dominion are Much Below Earlier Estimates

The Dominion Bureau of Statistics issued on the 13th instant the usual revised estimate of the areas sown to spring grains, an estimate of the areas under later sown cereals and hoed crops and the condition of grain crops on June 30th, as compiled from the returns of crop correspondents.

Areas Under Principal Grain Crops and Hay.

For all crops, except peas, the estimate of areas sown to spring grains is less than it was a month ago, the decrease being caused by unfavorable weather conditions in the west. For wheat, the total acreage is now estimated at 15,838,000 acres, or 7 per cent. more than last year, spring wheat occupying 15,497,300 acres, or 10 per cent. more than last year, and fall wheat 340,700 acres, or 53 per cent. less than last year. For oats the area sown is now placed at 13,784,000 acres, or 4 per cent. more than last year; for barley the area is 2,403,750 acres, and for rye 228,900 acres. Peas occupy 205,730 acres, mixed grains 501,400 acres, hay and clover 8,015,250 acres, and alfalfa 102,900 acres. In the three prairie provinces the area sown to wheat is 14,964,000 acres, comprising 2,618,000 acres in Manitoba, 9,101,000 acres in Saskatchewan and 3,245,000 acres in Alberta.

Later Sown Cereals and Hoed Crops.

The estimated acreages of later-sown cereals and hoed crops, as compared with 1917 are for all Canada as follows: Buckwheat, 407,800 as against 395,977; flax, 927,300 as against 919,500; corn for husking, 213,400 as against 234,339; beans, 105,560 as against 92,457; potatoes, 686,300 as against 656,958; turnips, etc., 216,970 as against 218,233; sugar beets 13,200, as against 14,000 and corn for fodder 344,700 as against 366,518. The area under beans shows an increase of 14 per cent., and that under potatoes an increase of 4 per cent. The areas sown to both of these crops is the largest on record; the increase of beans is chiefly in Quebec, and of potatoes in Quebec and in Alberta.

Condition of Grain and Hay Crops.

In general, the condition of grain crops in the Atlantic provinces is not so good as it was this time last year, and there is also a slight falling off as compared with a month ago; but the prospects for good yields are fair. In Prince Edward Island the condition of wheat is 2 above, in Nova Scotia 1 below, and in New Brunswick 1 above the decennial average. Oats are 2 points below average in Prince Edward Island and Nova Scotia, but 1 above average in New Brunswick. In Quebec conditions have gone back during June, but are still much more favorable than they were a year ago. Spring wheat is 103, oats are 101, and barley is 100. In Ontario fall wheat remains poor, being 70, or 30 per cent. below average, but spring wheat is 101. Oats and barley are equal to the average. In the prairie provinces drought and continuous high winds during June have caused serious damage to wheat crops, and large areas have had to be resown to other crops. In the northern parts of these three provinces, however, the rainfall has been sufficient, and conditions are fairly promising. For spring wheat the condition is expressed numerically by 88 in Manitoba, 85 in Saskatchewan and 83 in Alberta, i.e., 17 to 12 per cent. below average. In British Columbia, hot, dry weather in May and the early part of June retarded growth, and the condition of wheat is 10 and of oats 14 per cent. below average.

Reports of Provincial Governments.

Telegraphing on July 9th, the Saskatchewan Department of Agriculture reports that more rain is greatly needed throughout the province. In many sections wheat has headed out, but is very short; and not more than half a crop is anticipated. Conditions are better in the north-western and north-eastern districts, where prospects are excellent. In the south-western and south-eastern districts crops are nearly ruined, a few points reporting better prospects than the majority. The Alberta Department of Agriculture telegraphed (July 6th), that while the grain crops of the whole province, except the Edmonton, Peace River and Grand Prairie districts, have been seriously affected by the lack of moisture, recent rains covering most of the province have helped the general situation.

ONTARIO GOVERNMENT TO ASSIST HOUSING

Appropriation of $2,000,000 Set Aside for Loans to Municipalities to Assist Housing

Government action looking to the alleviation of the shortage of workmen's houses in the province of Ontario, was announced by Sir William Hearst on July 19th. An appropriation of $2,000,000 has been set aside by the provincial government, which will be available to both rural and urban municipalities at the interest rate of 5 per cent. Municipalities can at once avail themselves of the loan. It is understood that they may undertake the erection of houses themselves or do so through private corporations.

Sir William's announcement is contained in a letter to Sir John Willison, chairman of the recently formed housing section of the Organization of Resources Committee. The plan has been considered by this committee and has been endorsed. The Prime Minister makes it clear that the plan now announced is only a temporary one to assist in meeting the pressing emergency which confronts the people of Ontario.

Government Lends Money.

Since the formation of the housing committee about a month ago, it has devoted its attention to securing necessary moneys with which to have houses built. The financial situation was recognized as the stumbling block which prevented private individuals building houses of any kind, and particularly the cheaper workmen's houses. "In order to help this situation the government is willing to supply municipalities with moneys for the construction of workmen's houses up to January 1, 1920. The announcement reads:—.

1. The total amount loaned by the province shall not exceed $2,000,000.

2. Any municipality receiving a loan from the government must add at least 25 per cent. to the amount received, so that for every $1,000 received by way of government loan, at least $1,250 shall be expended in house construction.

3. The money shall be loaned to the municipalities by the provincial government on the credit of the municipalities in a manner to be hereafter arranged.

4. The rate of interest payable by the municipalities shall be 5 per cent. per annum.

5. The types of houses to be constructed with the proceeds of the aforesaid loan shall: (a) Not exceed in cost for each house, $2,500; (b) the houses to be offered to working men and women on easy terms of payment; (c) where the house and land are rented, the monthly rental shall not exceed $25; (d) the building scheme of each municipality, including the plotting of the buildings on the land, the plans of the houses, the form of construction, the location of the land to be developed, shall be approved by the government of Ontario.

6. The period of the loans above mentioned shall be for a term of 20 years, or for such less period as may be decided upon by the municipalities and the government.

7. The municipalities shall not charge against houses erected under proposed scheme more than 5 per cent. either in respect of the money received by way of loan from the government or money contributed by the municipality.

Immediate Action Necessary.

The Prime Minister said that the more investigation he made of the housing problem and the more consideration he gave to the matter, the more important it appeared to him, and the more he realized the necessity for immediate action. Sir William promises that any legislation which may be necessary at the next session to legalize any proceedings of municipalities in connection with housing will be passed. Sir William, in his letter to Sir John Willison, said further:

"In so far as the present situation has been brought about by the war, it might well be considered a war problem, and that its solution, along with other war problems, rested with the federal government. It has also been argued with much force that so far as it is not a war problem, it is largely, if not entirely, an industrial and national one and that so far as public credit might be required to meet the situation, the responsibility rested with the Dominion government. The force of this contention is strengthened by the position the minister of finance has been called upon to take in controlling the bond flotations of provincial governments and municipalities.

"I pointed out when the committee, of which you are head, was formed, apart from whatever responsibility may rest upon the federal government, in my opinion the matter is largely a municipal one. The problem, however, is a most urgent one, and no time should be lost in a discussion as to where the primary responsibility rests. There should, in my opinion, be both co-operation and action by all parties concerned. I recognize that the task before your committee is a difficult one, and that you will no doubt require considerable time for thought and consideration before making your final report. I feel, however, that in the meantime the matter should be taken up energetically by every municipality where the situation is acute. To assist your committee in its deliberations, I think it well to point out that the government is prepared to introduce at the next session of the legislature, and urge the passage of, legislation authorizing municipalities to enter into the housing business in such manner and upon such conditions as may be deemed advisable.

"As far as I can learn, the great difficulty of the moment is the lack of money for building purposes, on terms that will permit of the construction of houses that could be sold or rented at rates that workmen can afford to pay. In order to help this situation the government is willing to supply municipalities with moneys for the construction of workmen's houses, up to January 1st, 1920.

"The government will introduce at the next session of the legislature whatever legislation may be necessary to carry the scheme herein suggested into effect, and to ratify any by-laws or proceedings properly taken by municipalities in the meantime, with a view to taking advantage of the proposed scheme.

"I want it clearly understood that the plan I have suggested is only intended as a temporary one, to assist in meeting the pressing emergency with which we are confronted, and must not be considered as an admission of responsibility on the part of the province, or in any way relieving the federal government, municipalities, employers of labor and citizens generally, from whatever obligations may rest upon them to provide a satisfactory solution of the whole question. The object of the government is to lend some assistance, regardless of where responsibility rests, with the hope of stimulating effort on the part of all parties concerned.

Houses for Farm Laborers.

"There is one phase of the housing situation that has not been specially brought to the attention of the public, that, nevertheless, is important and demands consideration—namely, houses for farm laborers. The offer suggested would extend to rural as well as urban municipalities, and the government will be glad to give consideration to any suggestion your committee may see fit to make for further other assistance of the government to stimulate the erection of proper homes for farm labor, either on the farms or in suitably located communities."

In answer to circulars sent out to municipalities, the committee had been informed that the housing problem is acute (in addition to Toronto) in Sault Ste. Marie, Guelph, Galt, Brantford, Welland, Sarnia, the border cities, Midland, Hawkesbury, Paris and Sudbury. The city clerk of Welland has advised that 500 houses are needed in that city to provide proper and adequate accommodation. In many other places the housing situation could be said to be serious, Sir John said.

From now on the committee will consider the housing problem from every side, but Sir John expects the report will be completed before the next session of the legislature so that the government can pass necessary legislation. Sir John believes that the municipalities will take readily to the scheme. Sir John believes that under the government plan, private firms may secure part of the loan, providing they are endorsed by the municipality.

The government announcement follows closely upon the formation of the special committee. About six weeks ago a deputation representing the Toronto branch of the Canadian Manufacturers' Association, the Board of Trade and the Trades and Labor Council approached the government and asked that some action be taken. The committee which is dealing with the whole problem is composed of Sir John Willison, G. Frank Beer, Rev. Peter Bryce, F. J. B. Duncan, Ald. Joseph Gibbons, M. J. Haney, H. V. F. Jones, Capt. S. H. Maram, J. H. McKnight, Thomas Roden, H. C. Scholfield, H. H. Williams and Prof. C. B. Sissons, secretary.

After a meeting of the committee Prof. Sissons wrote Sir William Hearst expressing "appreciation of the great service you have done to the people of the province, as well as the assistance you have given the committee in its work by your personal views expressed and the proposals of the government announced in your letter."

BRITISH COLUMBIA CROP ESTIMATES

Agriculture Has Made Some Real Progress—Comparison With Other Provinces

It is a fairly safe estimate that the field crops produced in British Columbia will this year exceed a value of $25,000,000. Based on the increases of 1916 over 1915, the field crop production for this year should show the following values:—

All wheat	$ 1,000,000
Oats	2,750,000
Barley	125,000
Peas	85,000
Mixed grains	175,000
Potatoes	2,600,000
Turnips, etc.	1,150,000
Hay and clover	10,000,000
Fodder corn	40,000
Alfalfa	600,000
Total	$18,525,000

Allowances for larger increases in some products, miscellaneous and private home production $7,000,000.

British Columbia is famous as a fruit producing country but its agricultural production is by no means confined to fruits. The per-capita farm production of field crops apart from fruits, will this year total around $60 per head.

When it is remembered that this production is a production for which the province is little advertised, and is apart from fruits, fish, timber and mineral production, it can be seen that British Columbia is fast becoming a very prosperous and productive country and is by no means a province to which only "retired farmers" hie themselves.

Private Production.

It is predicted that the private home production of field crops this year will be larger than was the entire field crop production in 1910. The big increase in field crop production this year is being made possible because of the volunteering of hundreds of boys and girls for farm work, as well as the large area of town lots, fields and private gardens planted with field crops throughout the province.

The average value of occupied farm lands in Canada is $40 per acre, while the average value of British Columbia farm lands is $118, which is the highest value in Canada, the second highest being in Prince Edward Island, where the approximate value is $40. Since 1914, when the war broke out the values of farm lands in British Columbia have increased about fifty per cent., while the increase in Canada has been about ten per cent.

Comparison.

The following table shows some of the increases in Canada and in some of the provinces and the comparison with British Columbia:—

Province.	1908.
Canada	$ 35.70
Quebec	41.90
Ontario	47.30
Alberta	18.20
British Columbia	76.10
Province.	1910.
Canada	$38.45
Quebec	42.50
Ontario	48.00
Alberta	24.00
British Columbia	74.00
Province.	1914.
Canada	$ 38.41
Quebec	47.00
Ontario	54.45
Alberta	21.03
British Columbia	150.00
Province	1917.
Canada	$ 40.95
Quebec	52.13
Ontario	52.50
Alberta	22.18
British Columbia	118.51

The British Columbia farm land values have increased proportionately larger than any other province in Canada. From 1915 to 1917, inclusive, a few of the provinces showed slight reductions in values, this being due to the large increase in the cultivated area. Agriculturists declare that increases will be shown in the 1918 statistics considerably larger than any previous increases.

The approximate value per acre of occupied farm lands in British Columbia at the present time is placed at $125, an increase of $7 per acre over 1916. Proportionate increases will be shown in the maritime provinces and the prairie provinces, but the figures of 1916 and 1917 will stand as a fair indication of the 1918 values of such lands in Ontario and Quebec.—Vancouver Sun.

BRITISH COLUMBIA FINANCES

The financial condition of the province of British Columbia, its districts and municipalities, is engaging considerable attention in that province. Several months ago a series of six letters was published in the Vancouver Sun by Mr. A. C. Flumerfelt, of Victoria. Mr. Flumerfelt pointed out that the municipal debt totals about $73,000,000, the district debt about $21,000,000, and the provincial debt $23,000,000, aside from indirect liabilities, such as guarantees, etc. The total charge for interest and sinking fund is over $10,000,000. In addition to this provincial debt there is also the province's share of the Dominion debt, which is now large and still increasing rapidly.

As a remedy for this condition, Mr. Flumerfelt proposed that the debt, municipal, district, provincial and provincial guarantees, be funded and a new issue made to cover the whole total of $138,600,000. He suggests that the new issue should bear a low rate of interest, the new issue being sufficiently large to cover the difference in the interest rates.

Some other recommendations have been made by Mr. A. N. Wolverton, who has issued a reply to Mr. Flumerfelt's letters. Mr. Wolverton deals at considerable length with the debt situation. He is doubtful of the estimate of population as being 400,000, and thinks that 350,000 would be nearer the correct figure. Mr. Wolverton calculates the total debt as $210,000,000, in which he included, in addition to the city, district and provincial debt, an estimate of securities of provincial corporations held outside. This is about $600 per individual in the province. The interest charges at, say, 6 per cent., are $12,600,000, and sinking fund at, say, 2½ per cent., $5,250,000, making a total fixed charge of about $18,000,000. This is $45 per head of population in the province and takes no consideration, moreover, of the province's share in the Dominion debt.

Discussing Mr. Flumerfelt's proposal, he expresses first doubt as to whether it is feasible, and even if it were, whether there would be any saving in this way. There might, he admits, be some slight reduction in annual sinking fund requirements through extending the average maturity date of the bonds, saving in the investments of the sinking fund, and a very small reduction in the annual interest requirements, owing to the superiority of the province's credit over that of the municipalities. None of the advantages, he says, would be of any substantial importance. In fact, the only way the debt can be reduced is by greater production, and this is possible only by increased population and the utilization of natural resources. As the natural industries of British Columbia, Mr. Wolverton especially mentions the lumber industry, mining, fishing and allied industries, agriculture, and finally foreign trade. For the development of the latter the port of Vancouver is in a very advantageous position, being the terminus of Canada's greatest railway and of the trans-Pacific trade. He deprecates the probability of establishing a shipbuilding industry in the province, as the wooden ship is merely a temporary expedient, and British Columbia is in no position whatever to compete with localities, such as the Clyde, in the construction of steel ships. Mr. Wolverton believes that greater freedom of Chinese labor would help to ease the burden, and that free trade would also promote the industries of the province.

Large deposits of chrome ore are reported as being discovered near Rossland, B.C., by two Americans from Laurier, Washington.

An Association of Life Insurance men has been formed in Newfoundland. It is known as the Life Underwriters' Association of St. Johns, and includes about a dozen members.

PUBLICATIONS RECEIVED

City of Toronto Municipal Hand Book for 1918.—This booklet contains the usual information, in attractive form, regarding the city of Toronto, its population, government, schools, parks, revenue and expenditure.

Secretary of State of Canada.—Report for year ended March 31st, 1917, contains complete statement of companies incorporated during the fiscal year, with names of directors and other particulars. Also number of persons naturalized, land patents, etc.

Toronto Board of Trade News for July, 1918.—This edition deals more especially with the work of the Honorary Council of Scientific and Industrial Research in Canada, and the report of the British Committee on commercial and industrial policy after the war.

Winnipeg Public School Board.—Annual report for 1917. Total expenditure on general account was $1,379,998, or slightly more than the estimates. On capital account $60,425 was expended. Assets are now $5,287,617, and liabilities $4,631,944, a surplus of $655,672.

Department of Railways and Canals—Canal Statistics for the Season of Navigation, 1917.—These statistics are compiled in the office of Mr. J. L. Payne, comptroller of statistics. The report shows the amount of traffic classified under canals, and also under commodities.

Horticultural Experiments Station, Vineland, Ontario.—Report for 1916 and 1917. This station is maintained by the Department of Agriculture of the Province of Ontario, for the purpose of experimenting in the growing of plants, etc. According to the report, valuable results have been obtained.

Department of Trade and Commerce Annual Report for Year Ended March 31st, 1918, contains an outline of the work of the department during the year, and also tables of the trade of Canada. Considerable changes have been made in the publications of the department, which are also described.

The War and Its Effect on World Trade.—By H. Voorhees, Vice-President National City Bank of New York. This pamphlet contains an address given before the 25th annual convention of the Virginia Bankers' Association on June 20th. The author describes some of the effects of the war on the trade of Canada, the United States and Great Britain.

Analysis of Financial Statements.—By Richard P. Wilson and Harry J. Carpenter of the Credit Department, National Bank of Commerce, N.Y. This booklet is issued by La Salle Extension University of Chicago. It describes various forms of financial statements and gives as examples the analysis of a wholesale grocery statement, packing statement, a jobbing statement and a cotton mill statement.

Civil Service Commission of Canada Annual Report for Year Ended August 31st, 1917.—In presenting the report the commissioners, Michel La Rochelle and Adam Shortt, state that during the last few years there has been a gradual decrease in the number of clerks assigned to the second division, which, according to section five of the act, should be limited to the junior administrative and technical officers of the department. They also refer to the inadequacy in the salaries in the third division, and suggest that an increase in the salaries of this division would be preferable to transferring employees of the third division to the second division for mere routine work.

Canadian Casualty Insurance Year Book, 1918.—Published at $1.50 by Stone and Cox, 6-10 Johnson Street, Toronto. The book consists of four sections. The various accidents and diseases are described by Mr. Arthur S. Morley, F.R.C.S., and a complete dictionary of medical terms is included. In the second section a number of explanatory articles are given on various departments of casualty insurance. The third section is a summary of Dominion and provincial laws relating to casualty insurance, and the fourth comprises a summary of the affairs of the companies doing business in Canada. The book is something new in the insurance business here, and should prove useful to all concerned.

Superintendent of Insurance, State of New York, Part One of the Fifty-ninth Annual Report.—This volume deals with fire and marine insurance. On account of the age and activity of the New York State Department of Insurance this volume is of special value. The superintendent, Mr. J. S. Phillips, expressed in the introduction a favor for group insurance. He also explains the status of United States branches of companies which are incorporated in enemy countries. The increase in the rates of fire insurance and of workmen's compensation are explained, and the causes for these increases. The bulk of the volume, which consists of 1,462 pages, contains the usual tables, giving a complete statement of the financial condition, business, investments, rates, etc., of all the companies doing fire and marine business in the State.

A B C Directory and Year Book of Lumber Trade of British Columbia.—Cloth, 136 pages. Published at $2 by the Progress Publishing Company, Limited, Vancouver. The 1918 edition of this directory is a valuable addition to the desk of the business man, as there are very few branches of commerce and industry which are not, directly or indirectly, interested in lumber. The book contains an alphabetical list of the lumber and shingle mills in British Columbia, with details of the management, capital, date of establishment, products and capacity of the plant. Similar lists are also given for other branches of the lumber business. A second section of the book states the customs tariffs of various countries in so far as it applies to lumber. This is for the use of the export trade. Another section gives in full the legislation dealing with the lumber industry in British Columbia, and considerable technical information is also given regarding the various woods in British Columbia. There is also a table showing the fees and royalties payable, and a buyer's guide.

In the Fourth Year.—By H. G. Wells. Published at $1.25 by Macmillan and Company, Toronto. Mr. Wells is not the only prolific writer of the twentieth century, but he is at least versatile. A league of free nations and kindred political questions is the subject of this volume. A league of this kind, he points out, is coming much nearer to realization than could have been anticipated a few years ago, but it is not coming in the way expected, namely, through the growth of the Hague convention or similar organizations. The genesis of a real peace league of nations exists in the allied congress, which represents the physical as well as the moral force of some of the greatest nations of the world, as compared with the more representative but more feeble assemblies at The Hague. As a peace congress, this group will include the representatives of the central powers, and, with or without the latter, it will very likely remain an active organization. By way of illustration, Mr. Wells refers to the development of the states of North America from a body with limited powers, delegated to it by sovereign states, to a nation with its authority established by the decision of the civil war. The peace of the world now lies with the four great powers, United States, British Empire, Germany and France. This is the result of purely material developments in the methods of warfare which have reduced the effectiveness of smaller nations. In this way the problem of peace is simplified. Mr. Wells also points out the importance of these facts to the average citizen, and how, in consequence, the authority of his voice should be assured by proportional representation. Three chapters are devoted to explaining this system of electing representatives. The book deals with theoretic subjects in a manner which is clear and convincing to the average reader.

NEW FOREST INDUSTRY FOR BRITISH COLUMBIA

British Columbia is looking forward to developing another important branch of industry from her forest resources. This is the process of obtaining pine oil from the stumps which the timber cutters leave in the various parts of the province. The process of distillation is, however, rather an expensive one, and it has not yet been determined if a business of this kind could be profitably carried on.

The Saskatoon Mutual Fire Insurance Company is inviting essays from school children in the province on the subject of Fire Prevention. Prizes amounting to $50 are offered, and up to the 10th instant, over 400 essays had already been received.

The Union Casualty Company, of Winnipeg, has purchased the business of the Canada National Insurance Company, whose head office is in Saskatoon. The latter company has been in business at Saskatoon for several years. The Union Casualty Company has re-insured all the business, taken over all the assets, and assumed all liabilities.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent. upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, payable on and after Tuesday, the Third Day of September next, to Shareholders of record of 31st July, 1918.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 19th July, 1918.

THE RIORDON PULP & PAPER COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 10.

Notice is hereby given that a quarterly dividend of 2½% has been declared on the Common Stock of the Company for the quarter ending June 30th, 1918, payable August 15th, 1918, to shareholders of record at the close of business on August 6th, 1918.

By Order of the Board.
F. B. WHITTET,
Secretary-Treasurer.

Montreal, July 18th, 1918.

CANADA CEMENT COMPANY, LIMITED

PREFERENCE DIVIDEND No. 34.

Notice is hereby given that a dividend of 1¾% for the three months ending June 20th, 1918, being at the rate of 7% per annum on the paid-up Preference Stock of this Company, has been declared, and that the same will be paid on the 16th day of August next, to Preference Shareholders of record at the close of business July 31st, 1918.

H. L. DOBLE,
Secretary.

Montreal, July 17th, 1918.

BRIQUETTING PLANT IN SASKATCHEWAN

An agreement between the federal and the provincial governments of Saskatchewan and Manitoba, providing for the establishment of a briquetting plant near Estevan, is being executed. The Dominion government has agreed to contribute $200,000 towards the project, and the Manitoba and Saskatchewan governments each $100,000, making a total of $400,000 of capital.

BRITISH TIMBER CORPORATION

The British Timber Corporation has been formed to take over the assets of the British Canadian Lumber Corporation, Limited; the transfers of property will be completed shortly, and the new company will then go ahead and operate on an extensive scale.

The assets of the British Canadian Lumber Corporation were recently sold for $2,250,000 to a committee of the bond and security holders, and include the mill and property of the old Pacific Coast Lumber Company on Georgia Street; a mill and property at Lulu Island; a mill and 9,000 acres of timber land at Crescent Valley; five Dominion timber berths at Port Moody; logging rialroad, camps and equipment at Port Renfrew; a sawmill in course of erection at Masset Inlet, and between 200 and 300 provincial licenses.

The new corporation will be managed exclusively in British Columbia, the personnel of the directorate being T. T. Paxton, president and managing director, and until recently receiver and manager of the properties; Perry D. Roe and Hugh Davidson. Portions of the limits held by the company comprise some 180 limits around the shores of Masset Inlet, with a water frontage of over a hundred miles, and it is here that the Masset Timber Company, Limited, under contract with the receiver and manager, are logging spruce on a huge scale.

FIRE UNDERWRITERS IN THE WEST

The meeting of the Western Canada Mutual Fire Insurance Association was held at the head office, Portage la Prairie Farmers Mutual Fire Insurance Company, on Thursday and Friday, July 4th and 5th.

Mr. Chas. Heath, superintendent of insurance for the province of Manitoba, was present and gave a very able address. In closing, the speaker stated he was quite sure the association would be of great benefit to the mutual fire insurance companies of the west, and promised his support whenever necessary.

Mr. Arthur E. Fisher, superintendent of insurance for the province of Saskatchewan, intended to be at the meeting, but was unavoidably detained at Regina.

Constitutions and by-laws were submitted and adopted by the association. Some of the important matters dealt with by the association were as follows: The subrogation clause in the mortgage clause; the licensing of all agents of mutual fire insurance companies; the acceptance of all mutual fire insurance policies by loan companies; the endorsation of lightning rods on farm buildings, but no reduction in rates; the Uniform Insurance Act for the three western provinces.

After the meeting the delegates were the guests of the Portage la Prairie Farmers Mutual Fire Insurance Company. The directors provided a dinner at the Hotel Portage, which was very much appreciated.

The next meeting of the assocition will be held in Saskatoon, Saskatchewan.

The following companies are members of the association: The Miniota Farmers Mutual Fire Insurance Company, the Portage la Prairie Farmers Mutual Fire Insurance Company, the Urban Mutual Fire Insurance Company, the Royal Victoria Mutual Fire Insurance Company, Manitoba; the Saskatoon Mutual Fire Insurance Company, the Arcola Mutual Fire Insurance Company, the Retail Merchants Mutual Fire Insurance Company, Saskatchewan; the Western Mutual Fire Insurance Company, the Lacombe Mutual Fire Insurance Company, Alberta.

The officers of the association are as follows: President, M. G. Doyle; vice-president, Stratton Whittaker; secretary-treasurer, J. J. Caught.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Bowmanville, Ont.—On Tuesday, the 16th inst., a fire did about $7,000 damage to the town municipal building. The fire is thought to have been caused from electric wiring. As $18,000 of insurance was carried, the damage is fully covered.

Midland, Ont.—The Crowland Hotel, at the corner of Seventh and Steel Streets, was damaged by fire recently. The loss is estimated at over $10,000.

New Westminster, B.C.—The Oakum shed at Poplar Island shipyard was damaged by fire recently. The loss will, it is thought, not exceed $1,000.

St. Catharines, Ont.—On July 21st the plant of the Peerless Pulp Company, of Thorold, was destroyed at a loss of nearly $200,000. The cause of the disaster is unknown. A considerable quantity of manufactured pulp ready for shipment was also destroyed as well as five freight cars which were in the yard. Only a small portion of the loss is covered by insurance. This is the mill which was built about 12 years ago by an American Company and was known as the Colonial Wood Products Company. It lay idle for some time before being used by the Pulp Company.

Tillsonburg, Ont.—On the 22nd inst., damage amounting to $3,000 was done by fire which destroyed the grand stand, judge's stand, and fences at the race track. The cause is supposed to have been carelessness in smoking.

Van Buren, N.B.—The burning of the Allendale Mill on Sunday, the 14th inst., entailed a loss of $150,000. Insurance amounts to $46,000.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Graham, Ont.—A fire which destroyed a considerable section of the town on the 8th inst., involved the property of the following owners: Mr. Brandon, Sam Wing, Hamilton Brothers, Geo. Craig, J. J. Jewell, Frank Cosco, Louis Foo, Hudson's Bay Company, C. H. Greer. The estimated damage on the stock is $100,000 and on the buildings $50,000.

Saskatoon, Sask.—Fire Chief Heath submits the following report for the month ended June 30th, 1918: The structures destroyed or damaged were: Carriage works, 1; public hotel, 1; moving picture machine, 1; Ford automobile, 1. Among the causes last month were: Breaking of film in operating machine, 1, and sparks from pipe, 1. The total damage resulting from fire for June was $620.31, and the total insurance carried was $46,100.

St. Catharines, Ont.—June 15—National Bakery Company, damage, $1,328.24, no insurance.

June 23—Reo Garage; damage, $2,125, insurance, $22,000. Cause, match gas tank.

June 29—McLaughlin Brothers. Cause, match gas tank.

July 6—Dr. Black's wagon shed; damage, $175, insurance, $450.

July 16—Dwelling on 25 Garnett Street; damage, $400, insurance, $800.

Vancouver, B.C.—The warehouse and merchandise destroyed on the 2nd inst., was occupied by William N. O'Neill and owned by the Western Warehouse Company, Limited. The estimated damage on the stock is over $20,000 and on the building about $25,000. There was $26,000 insurance on the stock and $45,000 insurance on the warehouse, distributed among 14 companies. In both cases the loss is being adjusted.

Fire Chief Carlisle submits the following report for the month of June to *The Monetary Times*: The total damage resulting from fire for that period, excluding figures in connection with the J. Hanbury Lumber Company's loss of June 25th and the Darton loss of June 27th, the adjustments of which have not as yet been completed, was $5,457. Of this amount $4,457 was covered by insurance, leaving the property loss above insurance at $1,000. The total value of the property involved by fire for the month (excluding lumber company and Darton's valuation) was $1,092,775. The following shows the causes of fires for the month: Bush fires, 9; carelessness with cigarettes, matches, etc., 3; children playing with matches, 2; chimney fires, 9; defective stove pipe, 1; electrical origin, defective wiring, 1; false alarms, 6; flying sparks, from chimneys, burners, smoke stacks, etc., 23; grease boiling over and catching fire on range, 1; overheated bearing, 2; overheated cure-oven, 1; rubbish fires, 9; smoke scares, 5; and unknown, 2.

Victoria, B.C.—Fire Chief Davis submits the following report for the month of June to *The Monetary Times*: Loss, buildings, $1,147.40; contents, $328.25; total, $1,575.65. Insurance, buildings, $15,100; contents, $3,000; total, $18,100. Total amount of property at risk, $168,500.

Winnipeg, Man.—On July 8th, the brick building, owned by Mr. A. Bright, was damaged by a fire. The damage to the stock of the Crescent Furniture Company which occupied part of the premises damaged, was $3,100, and to the buildings $5,000. The Crescent Furniture Company had $2,000 of insurance on its stock with the Alliance Insurance, and Mr. Bright, the owner, also had the building insured.

NEW INCORPORATIONS

National Molybdenite Company is Largest Incorporation of the Week

The following is a list of recent incorporations by Dominion or Provincial charter, the head office and principal directors being indicated:—

Essex, Ont.—Essex Farmers, Limited, $35,000; J. Lickman, R. F. Taylor, T. E. Batten.

Midland, Ont.—St. Andrew's Hospital; W. E. Preston, E. Letherby, P. J. Fasken.

Algoma, Ont.—Searchmont Lumber Company, Limited, $100,000; G. Grant, A. Dods, M. Macdonald.

Barrie, Ont.—Fisher Flour Mills Company, Limited, $60,000; S. J. Fisher, L. A. Fisher, F. N. Warren.

Belleville, Ont.—Quinte Transfer Company, Limited, $40,000; W. S. Morden, E. W. McNeill, C. D. Dyke.

Kitchener, Ont.—Seneca Lumber Company, Limited, $40,000; E. W. Clement, W. P. Clement, E. B. Clement.

Trout Creek, Ont.—The Trout Creek Store Company, Limited, $40,000; G. Trussler, J. Trussler, J. H. Pedder.

Montreal, Que.—Progressive Leather Goods, Limited, $50,000; M. Bercovitz, L. A. Joubert, E. J. Jodoin. Dominion Engineering and Specialty Company, Limited, $20,000; L. A. David, L. P. Crepeau, H. R. Bush. J. H. A. Acer and Company, Limited, $1,000,000; W. R. L. Chanks, F. G. Bush, G. R. Drennan.

Toronto, Ont.—Comfort's Forwarding Committee; A. W. Holmested, J. L. Ross, L. B. Campbell. International Munitions, Limited, $40,000; J. S. Lovell, W. Bain, C. D. Magee. The Viking Corporation of Canada, Limited, $50,000; T. H. Wilson, J. W. Broudy, W. R. Bird. Italian Canadian Soldiers' Aid; C. V. E. Gianeli, G. Glionna, F. Denton. Dominion Printing Ink and Color Company, Limited, $40,000; G. Grant, M. MacDonald, E. Smily.

CANADIAN BOND AND MORTGAGE CORPORATION

According to the balance sheet of the Canadian Bond and Mortgage Corporation as at April 30th, 1918, the total assets now amount to $528,279. Of this, $385,208 is invested in mortgages, on which there is also due $19,464 of interest. Mortgage investments are, therefore, in good condition. The second largest asset is an item of $71,869 of notes receivable from shareholders on stock subscriptions. The company owns property to the amount of $17,432, and the balance of the assets consists of bonds and debentures, agreements for sale, accrued interest, etc. The subscribed capital is $437,048, and there is in the profit and loss account a balance of $63,565.

The assets as at April 30th, 1917, were $491,791, so there has been a substantial increase during the year. There was, however, practically no property held directly then, and the amount of $17,432 has been acquired during the year. Mortgage investments, both of principal and interest, have increased slightly. The balance at the credit of profit and loss was $51,128 so this account has increased by over $12,000 during the year.

SIXTH ANNUAL REPORT

CANADIAN BOND AND MORTGAGE CORPORATION

Authorized Capital, $5,000,000.00 HEAD OFFICE, WINNIPEG, CANADA **Subscribed Capital, $890,800.00**

We have audited the Books and Accounts of the Canadian Bond and Mortgage Corporation for the year ended 30th April, 1918, and report to the Shareholders that we have received all the information and explanation that we have required.

We have examined the Mortgages constituting the security for the Corporation's investments and have found same in order, the Corporation's Solicitors certifying to the sufficiency of the title and conveyancing. In our opinion the above Balance Sheet is properly drawn so as to exhibit a true and correct view of the affairs of the Corporation, according to the best of our information, the explanations given us and as shown by the books, subject to the accompanying report,

WEBB, READ, HEGAN, CALLINGHAM & COMPANY,
Chartered Accountants.

WINNIPEG, 17th, MAY, 1918.

THE NORTHERN ASSURANCE COMPANY

ESTABLISHED 1836 LIMITED

THE EIGHTY-SECOND ANNUAL GENERAL MEETING of the Northern Assurance Company, Limited, was held in the Offices of the Company at Aberdeen on the 1st day of May, 1918, when the Directors' Report was presented.

FIRE DEPARTMENT

THE PREMIUMS received last year amounted to **$8,439,570**, showing an increase of **$1,261,970** in comparison with those of the previous year.

NIAGARA TO THE SEA

A FEATURE of a trip that is all interesting, all delightful, is the voyage through the Thousand Islands of the St. Lawrence.

The Thousand Islands! The glint of sunlight filtering through the tree tops—the shimmering shadows of the shore-line reflected in the blue river water—the castle cottages of millionaires, each set on its own little island—the "tang" of pine-laden north-country air. The St. Lawrence River—wide as a lake in places, elsewhere narrowing down to a mere channel between islands—provides one of the most satisfying fresh water trips in the whole wide world.

But do not stop with the St. Lawrence. Travel its broad expanse as far as Quebec. From there let us take you on up the famous River Saguenay. Up-to-date "Canada Steamship" hotels at Murray Bay and Tadousac. Magnificent accommodation all the way, on the boats of the Canada Steamship Lines, Limited.

This should be your war-time vacation. In planning your holiday remember that there is no congestion on the mighty rivers that flow from Niagara to the Sea. Extravagant pleasures are not to be encouraged—but there's real economy in taking the kind of vacation that keeps one's efficiency above par. So make it a water trip this year—the kind of holiday that promotes health and refreshes the mind. Complete standard service maintained.

CROP CONDITIONS IN SASKATCHEWAN

Best Prospects are in the North—Rain Required in Many Sections

A report issued by the Saskatchewan Department of Agriculture on the 9th inst., reads as follows:—

Crop reports received by the Saskatchewan Department of Agriculture during the week ending July 6th, do not show a very bright prospect on conditions, as they exist in many parts of the province at the present time. With the exception of isolated districts there is a general cry of more rain needed, and in very large areas the question is how much can be saved if weather conditions are ideal from now on.

In many sections wheat is headed out, but is very short and not more than half a crop is anticipated. Where rain has been recently received in hitherto dry districts, it is stated, it will be of some assistance in furnishing feed. In other districts the rain came too late to be of much use to the growing crops.

Conditions are better in the north-west and the north-east than in most other parts of the province and at some points, such as Birch Hills and between Prince Albert and Hubbard, prospects are excellent for good yields. At Lloydminster there is plenty of moisture, though in some townships heavy hail has set back the grain a couple of weeks.

In the south-western and south-central districts the crops are nearly ruined, a few points reporting better prospects than the majority. In the east central district rain has fallen in streaks and as a result crop conditions vary widely. At Dubuc they were never better and in the vicinity of Langenburg and Sheho they are good.

More Rain Required at Once.

A later report gave a statement of conditions in greater detail, as follows:—

Crop reports received during the week ending July 13th confirmed the earlier predictions that the crops in the north are splendid, while elsewhere in the province they are poor to fair. Rain has fallen in many districts since the last report was issued, but in some cases it is reported as having come too late to be of benefit, while other districts are badly in need of more moisture. The following are the reports in detail:—

Guernsey—Territory covered Elbow, Davidson, Saskatoon, Young. Recent rains in Last Mountain district make 65 per cent. crop probable. Territory Allan to Lanigan and Lockwood needs rain badly to make 60 per cent. crop. In northern part of district seven (Biggar-Wilkie) average wheat and oat crop probable.

Marcelin—Crops here are 25 per cent. better than last year. Wheat just headed. About 500 acres of new breaking in district. Eighty per cent. summer fallow completed.

Dinsmore—A few local showers last week, but too late to be of any use to crops. At Dinsmore, Eston, Kindersley and Kerrobert, some wheat is being plowed down and many farmers do not expect to get more than their seed back. Few of the very best fields may yield seven or eight bushels per acre.

Grayson—Tugaske, Moose Jaw, Saskatoon, Grayson and vicinity has good promise of good crops. All along the line to Moose Jaw shows effect of drought, also from Saskatoon to Grayson. Rye headed and colouring. Wheat and oats heading out but short in straw. Rains necessary for making crop and hay, else fodder will be very scarce.

Saskatoon—Wheat 75 per cent. headed. Past week very warm growing weather with local showers. Prospective wheat yields in 25 mile radius, range from 5 to 35 bushels per acre. North-east and north-west best yields. South-west poor. Coarse grains doing well.

Wolseley—Crops badly in need of rain. Wheat headed out and late grains will be very short unless rain comes soon.

Mervin—Crops in Mervin district are about the best there is in the province. Wheat is all pretty well headed out and very thick. We have had lots of rain which came at the right time. A lot of new ground being broken up.

Creelman—Slight shower Tuesday night, otherwise weather continues hot and dry. Oats heading out 8 to 15 inches high. Wheat heads very short and lean with tips turning white in some fields. Haying has commenced, but upland hay is very scarce and pastures also are bare and dry.

Increase in Acreage of Most Grains.

The following is a revised estimate of areas sown to field crops and estimate of areas of later sown cereals and hoed crops 1918, as compared with 1917:—

Revised area field crops:

	1917. Acres.	1918. Acres.
Spring wheat	8,273,250	9,101,000
Oats	4,521,600	4,612,000
Barley	669,900	663,000
Rye	53,250	65,000
Peas	2,605	2,500
Mixed grains	39,500	39,500
Hay and clover	260,275	245,000
Alfalfa	9,500	7,500

Late sown cereals and hoed crops:

Flax	753,700	724,000
Potatoes	67,700	68 400
Turnips, etc.	11,104	10,500
Corn for fodder	15,658	15,400

The new plant of the Whalen Pulp and Paper Company in British Columbia will commence sending out shipments shortly. The sawmill, operated in conjunction with the plant, is now running on spruce for aeroplane purposes. All the machinery is operated by electricity.

Mr. A. E. Wilson, Dominion Seed Purchasing Commissioner, of Regina, Sask., has gone to Ottawa to discuss the question of securing a sufficient supply of seed for next spring, with the Hon. T. A. Crerar, minister of agriculture, and Geo. C. Clarke, federal seed commissioner.

The Michigan Fire & Marine Insurance Company of Detroit, Michigan, has ceased to write business in British Columbia. The company will carry out its outstanding contracts to expiration, and any claims for loss arising therefrom may be presented to C. E. Schlinghevde, Winch Building, Vancouver.

ELECTRIC SERVICE AT COAST IS TIED UP

Employees Went on Strike Without Previous Notice, Tying Up Services Completely

The British Columbia Electric Railway has issued the following statement to *The Monetary Times*, regarding the strike of its employees:—

"The placing in jeopardy of so essential a public service as light, power and electric transportation by the action of a body of men who acknowledge no responsibility to the public, we believe, is a situation which should not be allowed to pass without a warning.

"During the last few weeks, an unprecedented state of affairs have arisen in Vancouver due to the action of the operators of this company's power plants and substations in wilfully attempting to close down all electrical supply as a means of enforcing their wage demands and other alleged grievances. The details of the actions which preceded the shutting off of power at midnight on Saturday, July 13 without notice being given to the company or the public, warrant full disclosure.

"The agreement between the British Columbia Electric Railway Company, the Western Power Company and the British Columbia Telephone Company, respectively, and the electrical workers expired on June 30. Previous to that the men laid a new agreement embodying many drastic increases and changes before these companies. The two first named offered the men increases of 10 per cent., but they were refused. Accordingly a conciliation board under the Lemieux Act of Canada was proposed, but the men refused, thereby necessitating the Dominion government to name an arbitrator for them. The conciliation board was formed but the electrical workers refused to recognize it.

"In the meantime, an arbitration with the street railway men employed by the British Columbia Electric Railway was going on, but its sessions did not close until June 28, and no time was left in which to bring down a decision before June 30. The men in both unions decided to go on strike at midnight, July 1, in contravention of the law of Canada.

"It is believed that the electrical workers fully intended that Vancouver and the surrounding country should have been left without light or power on their going on strike, but the electrical superintendent and some seven or eight of his assistants, maintained the service in a score of substations scattered over the mainland. No inconvenience was occasioned except by the absence of street car service, both because the street car men were on strike and because the handful of men could not keep the rotaries in operation.

"On Thursday morning, July 11 about 1.10 o'clock, the company came to a settlement with the two unions and agreements were signed. Service resumed the same day. It was believed that the matters had been finally settled with the exception of one or two minor details such as free transportation and a lighting rate concession which had by consent been left to be adjusted later.

Electric Railways at Standstill

"The astonishment of the whole district, the management of the company included, may be judged when a few minutes after midnight on July 14, suddenly and without warning all lights, power street cars and interurban cars fed by the British Columbia Electric system stopped. Thousands of persons were abroad at this hour. Street cars were loaded. Interurban cars were miles from their destinations. One car with [illegible] passengers and another with about 50 had set out from Vancouver for New Westminster. A train with 70 persons in it was stalled at New Westminster, unable to proceed along the Fraser Valley division. Other interurban cars were stalled on the Lulu Island and Burnaby Lake lines, each with passengers in them.

"The effect of the stoppage of light and power in hospitals and cold storage plants need not be emphasized. It is evident, however, that the men intended to make the tie-up complete because not a switch was left in place in the main receiving station.

"The electrical superintendent arrived there within a few minutes and found a large group of linemen and operators around the station. Luckily he had an electric torch in his automobile for without it, he would hardly have been able to make his way through the station. There was not a lantern left. The sub-station had been deserted.

"All that we were able to ascertain was that the operators had received orders from someone unknown, not the load despatcher, to close down the plant. The operators at the Lake Buntzen hydro-electric plant were telephoned to and they threw off the machines there. All switches throughout the country were pulled, thus entailing a tremendous mechanical task to reinstate them.

"Superintendent Newell immediately got in touch with Lake Buntzen and aroused the superintendent there, who had retired for the night. Other engineers arrived and in 40 minutes the most of the city load had been picked up and an hour and a half later most of the railway lines were operated and cars able to proceed to the barns. Many of them finished their runs.

Attempts at Conciliation not Successful.

An attempt was made to arrive at the cause of the trouble, but communication with Mr. E. H. Morrison, business agent for the electrical workers, could bring no coherent account. Mr. Morrison intimated finally that they would not meet the company in any way unless the electrical superintendent was discharged. On Sunday morning, Mr Morrison called up and asked if this had been done, and when he was told that it had not, he refused to have further communication with the company. He mentioned that other unnamed officials would have to be discharged also.

"The company understands, and it has been stated in the newspapers that the men's union have cabled to the directors of the company in London, England, demanding the dismissal of the electrical superintendent.

"On Sunday, July 14, members of the board of trade and Mayor Gale formed a committee to endeavor to bring about a settlement. Street cars were again tied up owing both to the scarcity of current and to the refusal of the men to work while the electrical workers were on strike. A joint committee was formed having on it several labor representatives and the company laid its case before them.

"The men demanded transportation and lighting concessions and although we pointed out that these had never come up, we granted them forthwith. They alleged that 25 men had been dismissed in discriminating fashion and strike breakers kept on.

"Mr. W. G. Murrin, assistant general manager, showed clearly that the men who had been laid off were linemen and groundmen and were extra staff that had been working on special work which the company expected to lay off several weeks since on the completion of the work. These men were laid off strictly according to the length of their service, and not a single non-union lineman or groundman was in the employ of the company.

"The men demanded the dismissal of Mr. Newell, but it was pointed out that these 25 men had not been laid off by him, but by the foreman in the regular course of work. The company, however, agreed to place the case of the electrical superintendent up to arbitration while the electrical workers should go back.

"This solution was accepted by the joint executives of electrical workers and street railway men who promised to recommend it to their members. The street railway men met on Monday and car service was resumed the same afternoon. The electrical workers met on Monday night but refused to carry out the recommendations of their executive and demanded the dismissal of the superintendent immediately.

"The arbitrary attitude of the electrical workers is without precedent in this part of the country. We believe that they will be censured without exception for their deliberate attempt to tie up the life of Vancouver and district, when they shut down all electrical supply without warning or notice on the morning of July 14.

"This has ceased to be a matter between the British Columbia Electric Railway and the employees. It is a matter for the public to settle, whether they will allow any person or body of persons to close down such essential services as electric light and power without a moment's notice and without responsibility for the consequences. The men may have the right to cease work but they have not the right to tamper with the company's property, thereby inconveniencing thousands of persons and causing possible destruction of property and perhaps death.

"It is hard to see what good could have resulted from such action which affected the public and not the company. The public is well aware who is to blame, and there is no disposition to saddle this disruption of public utility service on any but the men. Whatever grievances the men might have had, we consider that they were not warranted for a moment in pulling the switches and plunging the country into darkness without notice, but should have laid them before the company when they would have been given fair consideration."

Monthly Income Policies a Necessity

A legacy of life insurance amounting to $100,000 was completely dissipated in seven years by faulty investments and expensive living. In another case a beneficiary squandered the proceeds of a life insurance policy amounting to $50,000 in a single year. To protect the beneficiary against inexperience in making investments, and against extravagance, the monthly income policy has been introduced, providing an automatic, safe and profitable investment of life insurance funds. Supplement your existing insurance with a monthly income policy. It can be written on the life, limited life or endowment plan. Such a policy with our disability clause incorporated is without an equal in furnishing ideal household protection. We will gladly furnish full particulars and illustrations.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

TWO OBLIGATIONS

confront every man responsible for the welfare of others.

The one is to carry Life Insurance according to his means. The second is to arrange that Life Insurance in such a way that it will be of permanent benefit to his family.

This permanent benefit may best be secured under the Monthly Income Policy issued by The Great-West Life. The beneficiary receives a regular income for twenty years, or for life, as may be arranged—paid monthly, as she has been accustomed to receive her household funds. Thus the hazard of unwise investment or loss of the money left for her support is removed.

Full details on request.

CHARTERED ACCOUNTANTS OF ONTARIO

Bankruptcy Act and Income Tax Legislation Discussed at Annual Meeting

The 35th annual general meeting of the Institute of Chartered Accountants of Ontario was held in the Temple Building on Saturday, July 20th, and was largely attended. The work of the past year was fully reviewed by the president, Mr. T. Watson Sime, as follows:—

"A year ago, when I had the honor of being elected president of the institute, I entertained the fond hope that, at the close of my term of office, I would be in a position to congratulate the members, at their 35th annual meeting, upon the cessation of the great world conflict. In this I am disappointed. The war clouds are as dense as ever, and the most that one can say is that we are a year nearer that peace for which we all fervently long.

"The past year, so far as the affairs of the institute are concerned, has been one of quiet progress. Naturally, the activities of this and of all professional bodies continue to be shadowed by the devastation of war, and it would be idle to claim that we are doing much more than mark time. Nevertheless, there have been certain happenings which may have a strong influence upon the future of our profession, to which I will allude later on.

"I will now deal briefly with the work accomplished by by your council during the past year in regard to which detailed reports will later on be presented to you.

Membership.

"At 30th June, 1917, the number of members on the roll (including three life members) was 216, of whom 179 were associates, and 37 fellows. I regret to report the death on 27th October, 1917, of Mr. A. A. Booker, London, Ontario, an associate member since 26th May, 1910, and also the resignation, on account of ill-health, of Mr. A. K. Todd, New York. Our members on the other hand have been increased by the admission of 13 new members after examination, as well as of two former members who have been reinstated, and three affiliated from other institutes. The net result is that we show an increase of 16, the total on the roll being now 232. Happily, no case has arisen during the past year calling for discipline by the membership committee.

Examinations, Journal, and Students' Association.

"The following is a summary of the results of the examinations held in May, 1918.—

	Applications received.	Applications refused.	Did not write	Wrote.	Passed.
Primary	36	8	3	25	21
Intermediate	26	6	6	14	9
Final . . .	30	1	3	26	13
	—	—	—	—	—
	92	15	12	65	43

"The effect of the war upon the numbers of candidates presenting themselves for examination is seen upon a comparison of the above figures with those of the few years immediately preceding its outbreak, the number of primary candidates naturally showing a considerable falling off. Upon the other hand, the percentage of passed candidates in 1918 compares favorably with the average of the four previous years. The following are the names of the prize winners:—

"Past Presidents' Scholarship.—Final, Frank P. Gibbs (medallist); intermediate, T. B. Godfrey; primary, Jas. D. Cunningham.

"Institute Scholarships.—Final, Nelson B. Gerry; intermediate, E. C. Martin; primary, John S. Cowing.

"Our congratulations are due to Messrs. Gerry and Martin who were similarly successful at the examinations in 1917.

"It is comforting to report that, in spite of prevailing conditions, the patronage extended to the library shows an increase as compared with last year.

"'The Canadian Chartered Accountant' continues to maintain its high standard of usefulness, and the accounting profession of Canada are indebted to our esteemed registrar, Mr. W. J. Valleau, who, during the past year, has filled very ably the position of editor.

"The Chartered Accountants Students' Association has suffered severely from the effects of the war upon its membership, but the association is to be congratulated upon the efforts made by its members to keep the doors open, the majority of similar organizations in Great Britain having had to close down entirely.

Dominion Association.

"The 1917 annual meeting was held at Banff, Alberta, last August, and was attended by two of your representatives, Messrs. Neff and Pontifex, business engagements preventing Mr. Dilworth from being present. The report of the representatives will be submitted to you to-day. The annual meeting this year will be held in Montreal when it is hoped that the Ontario Institute will be well represented. I may add that it is proposed to change the order of annual meetings in order to secure eastern biennial and western biennial conventions rather than the present rotation of seniority in incorporation, and that your council has approved of this change.

Meetings of Council.

"The council held eight meetings during the past year, the average number in attendance being 10. It will be remembered that, at last annual meeting, the members decided to discontinue the practice of issuing a record of the attendances at council meetings.

Accounts.

"These will in due course speak for themselves. The surplus revenue for the year just closed was $550.08, a reduction of $133.24 as compared with the previous year. Contributions have been made during the year of $300 to the Canadian Red Cross and of $200 to the British Red Cross which the members will no doubt approve. The contributions of the institute for war purposes aggregate to date $2,200.

New Legislation Effected and Under Consideration.

"The passing on 20th September, 1917, of an act for the taxation of income was an event of considerable importance to the accountants of Canada adding as it has done to their work and responsibilities. Speaking personally, I consider it a matter of regret that, in framing legislation that affects the business community at large, the government has not invariably sought the advice and assistance of the various institutes and accountants whose members are eminently qualified from their experience to give guidance on many important points. In this connection, it ought to be recorded that Mr. R. Easton Burns, a member of your council, has done valuable service in preparing the digest of the Income Tax Act, of which copies have been supplied to the members.

"The extension of the Business Profits War Tax Act with amendments subjecting to taxation businesses having a capital of not less than $25,000 is another feature of the legislation of the past session.

"In regard to the proposed New Bankruptcy Act, it is pleasing to report that the institute was invited to send representatives to Ottawa to lay the views of the members before the special committee of the House of Commons. For this purpose, a committee composed of Messrs. G. T. Clarkson, Osler Wade, N. L. Martin and myself was appointed. The committee were able to suggest a number of amendments to the draft bill which were very favorably received by the house committee. Owing to the many points involved, it was ultimately found impossible to proceed with the bill during last session, but strong hopes are entertained that another session will see this important legislation an accomplished fact.

"The foregoing may be held to represent the report of the council of 1917-18 and, in concluding my address, I would like to make a few remarks upon the part played by the accountancy profession in the great war. Naturally, our thoughts first turn to those members and students who were able to offer themselves for service at the front, and we are proud to record that many of the accountants of Great Britain and the Dominions have earned distinction on the field, while, alas, too many have made the supreme sacrifice. At the outset of the war, the home and Dominion governments were slow to recognize that, in the accounting profession, they had a mine of wealth, the richness of which they had never imagined. To-day, there are not enough qualified account-

THE PRUDENTIAL has a large force of Canadian employees at work in every large city in the Dominion selling Gibraltar-like life insurance policies and industriously paying death claims in afflicted homes day after day. "First in the Northwest"

ants in the world available to meet the demands of the allied governments. I am told that, wherever you go in Great Britain, you will find accountants occupying most responsible positions in the Admiralty, at the war office, the ministry of munitions, and in the multitude of factories serving the war. Accountancy seems at last to have come into its own, and the future of the profession never looked more promising. Time and space forbid my enlargement of this topic and I would only add that it is gratifying for us to know that members of our own and other Canadian institutes have done yeoman service at Ottawa and elsewhere, but that these services have been much appreciated.

"I take this opportunity to invite the members to consider whether or not the time has arrived when the institute should have a home of its own, a project which for a number of years has impressed me as most desirable. The advantages of possessing a conveniently situated building which would hold our library, accommodate the students' society, and offer all facilities for meetings of the members of our own, and possibly other professional bodies are obvious, and, should the suggestion be favorably received, I will be glad to aid the working out of such a scheme to the best of my ability.

"It now remains only for me to express my appreciation of the loyal aid given to me by the members of the council and by the registrar during the past year."

Lieut.-Col. H. D. Lockhart Gordon, D.S.O., who is home on leave from France, also gave an address on war organization, and the part played by the Canadian forces, including many individual feats of bravery.

The election of officers for the ensuing year resulted as follows:—President, W. R. Morris, Peterboro'; first vice-president, R. J. Dilworth, Toronto; second vice-president, M. H. Robinson, Toronto; secretary-treasurer, Arnold Morphy, Toronto. Council: Arthur K. Bunnell, Brantford; R. Easton Burns, Kingston; R. J. Dilworth, Toronto; J. Wyndham Eddis, Toronto; George Edwards, Toronto; Edmond Gunn, Toronto; Fred. Page Higgins, Toronto; F. G. Jewell, London; Arnold Morphy, Toronto; Wilfrid R. Morris, Peterboro'; Arthur C. Neff, Toronto; Bryan Pontifex, Toronto; Malcolm H. Robinson, Toronto; T. Watson Sime, Toronto; Rutherford Williamson, Toronto. Representatives on council of the Dominion Association of Chartered Accountants, R. J. Dilworth, A. C. Neff, Bryan Pontifex; auditors, Nelson B. Gerry, Frank P. Gibbs; registrar, William J. Vallean.

VANCOUVER STOCK EXCHANGE

At the annual meeting of the members of the Vancouver stock exchange, held at the board room, 326 Homer Street, on the 9th inst., the following members were elected to office for the ensuing twelve months: President, H. J. Thorne; vice-president, C. G. Pennock; secretary, J. T. MacGregor; treasurer, C. M. Oliver. The committee of management was appointed as follows: C. J. Loewen, Newton T. Burdick and A. N. Wolverton.

Matters of general interest to the financial world in general, and to the local investor in stocks and bonds in particular, were dealt with. The consensus of opinion expressed satisfaction at the good conditions prevailing in the mining, industrial and financial circles in this province. Mining operations throughout British Columbia, it was stated, are on a sound and increasingly productive basis, and in this respect the province is rapidly taking its rightful place in the forefront of mineral producing countries.

Confidence was also expressed in the ultimate clearing up of disputes which now clouded the industrial horizon.

The annual meeting was the eleventh in the history of the Vancouver stock exchange, and, day in, day out, despite extreme conditions brought about by reason of the great war, the regular trading sessions have been duly held, and the exchange has endeavored to afford the public the services for which purpose it received its charter.

The St. Paul Fire and Marine Insurance Company has been authorized to write fire, automobile, tornado and inland transportation insurance under a Dominion license. The company has given up its hail insurance line.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Foundries and Steel, Limited.—At the head office of the company in Hamilton a meeting was held on the 23rd instant, and a bonus of 10 per cent. on the common stock was decided upon.

Brantford Railway.—The Brantford Street Railway and the Grand Valley Radial shows a decrease in net, but an increase in gross earnings during the first six months of the current year. The revenue was $54,088.14, and the disbursements $34,521.70, the gross gain being $19,566.44. After payment of capital and other charges the deficit was $1,315.56. The Street Railway gained $2,661.06 net, but the Grand Valley went back $1,075.32.

Canadian Fairbanks-Morse Company.—The reports that are received for the first six months of their year that closed on June 30th are very favorable. It is understood that the earnings run well over those of the corresponding period of last year. The company is very busy on machinery orders, and their Toronto plant, which is given up to munitions, is running to capacity on six-inch shell orders for the Imperial Munitions Board, and on the 75-mm. shells for the United States government. In addition, it is stated that orders have been received from the United States government for a large amount of machinery, for equipment purposes.

Western Homes, Limited.—A semi-annual dividend at the rate of seven per cent. has been declared by Western Homes, Limited. Practically all of the stock of the company is held by Manitobans, and its activities are confined to this province. The organization was formed since the outbreak of war, and despite unfavorable conditions, has made steady and substantial progress.

The company loans money out on first mortgages and also plans to give wage-earners service in the construction of houses, making it possible for them to erect homes and deal with only one company. It does not, however, engage in the building of homes with a view to selling them at a profit. No money is invested until satisfactory security has been arranged.

Western Homes, Limited, has an authorized capital of $500,000, of which about $400,000 has already been subscribed.

MUNICIPAL BOND SALES

Bonds to the amount of $17,000 of city of Brandon have been sold to C. H. Burgess and Company, of Toronto, at 79.09 and interest. The debentures are issued for waterworks and hospital purposes, bear interest at 5 per cent., and mature July 1st, 1948. Other tenders ranged from 78 upwards. The issue will be offered to the public at a 6½ per cent. basis.

The same firm has also purchased $7,550 of 6 per cent. bonds of Anderdon township, Ont., due in ten instalments; $1,000 of Kernel township, Ont., 7 per cent. bonds, due in ten instalments, and $3,250 6 per cent. bonds of Alsask, Sask., due in ten instalments.

Messrs. G. A. Stimson and Company, debenture brokers, Toronto, have purchased $6,505 town of Fort Frances 6 per cent. bonds. These are repayable in twenty equal annual instalments, with coupons attached for interest and were issued to pay the cost of installation of waterworks system. The town received six tenders in all for these bonds.

The Eastern Trust Company, of Halifax, is asking for offerings of Eastern Car Company 6 per cent. bonds, due 1944. The bonds are wanted for investment of the company's sinking funds as required by the terms of the issue.

At a special general meeting of the shareholders of the Canada Permanent Mortgage Corporation, held on Wednesday, July 24th, the agreement to purchase the Oxford Permanent Loan and Savings Corporation was unanimously approved.

TO DEVELOP CANADA AFTER THE WAR

The Canadian Industrial Reconstruction Association is planning a general Dominion-wide exchange of views next year. Arrangements have been discussed for delegations to travel throughout Canada as a means of bringing the east and west to a better understanding on questions affecting the general welfare of the Dominion. The delegations will consist of farmers, manufacturers, business men, financiers, etc.

The association, which was formed quite recently, has a comprehensive programme. Many of its purposes were outlined in a recent address given by the president, Sir John Willison, a report of which is given elsewhere in this issue. The association also aims to have established a number of university fellowships of a technical nature.

FORMER EDMONTON BROKER UNDER ARREST

On July 1st, Mr. Alfred F. Carrothers, of Edmonton, Alta., was arrested at the Waldorf Astoria in New York upon information supplied from the Edmonton police department. Mr. Carrothers was formerly a broker in Edmonton, where he dealt extensively in debentures of the western municipalities. For the past year, however, he had been living in New York.

Mr. Carrothers is charged with obtaining $7,300 by false pretence from a branch of the Union Bank. He explained that he had borrowed $350,000 from the bank in connection with transactions covering several years, and that he had borrowed $35,000 a year ago. He waived extradition and has been brought back to Edmonton.

CROP PROSPECTS GOOD

"After an extended tour through the west, both over the Canadian Pacific Railway and other lines, during which I looked carefully into crop prospects, I think it is safe to conclude that, with the increased acreage under cultivation, western Canada this year will produce at least as many bushels of grain as last year, provided, of course, that conditions continue as favorable as they are at present." This was the statement made on July 15th by Mr. C. E. McPherson, assistant passenger traffic manager of the Canadian Pacific Railway at Winnipeg, while in Montreal on a business trip.

Mr. McPherson said that in some parts of Alberta and Saskatchewan drought and winds had cut into the possibilities of the harvest very seriously, while in larger districts recent rains had helped the growing grain along wonderfully, so that where a few weeks ago there was little in sight it now seemed likely there would be at least fair crops. In Manitoba, which province had during recent years fallen behind in wheat production, Mr. McPherson said the prospects were particularly good, with a largely increased area of wheat acreage, and every prospect of abundant yields.

So far as passenger business was concerned, Mr. McPherson said that the roads in the west had never done better than during the present year. As to United States tourist business, particularly toward the far west, Mr. McPherson said it was too early to make any predictions, but the prospects pointed to at least as good a season as last year, while the number of visitors to the Rocky Mountain resorts was well up to the average.

Mr. McPherson will return to Winnipeg in a few days.

The Montreal Protestant Schools bond issue of $900,000 is reported as being entirely sold. The bonds were offered to the public at a 6.40 per cent. basis.

The United States treasury department has decided to hold the fourth Liberty Loan campaign in the three weeks between Saturday, September 28th, and Saturday, October 19th.

J. J. Carrick announced recently that construction on a large pulp and paper mill in Port Arthur would commence as soon as the Hydro Electric Power Commission developed the Nipigon River. Engineers for the latter project are at Nipigon now to arrange the construction of a power line to Port Arthur and Fort William. Mr. Carrick is associated with a New York company which controls many paper plants on this continent.

Bank Statement for June

Canadian Bank Deposits Now Total Billion and Half—Both Savings and Demand Deposits Have Increased—Gains in All Figures Except Call Loans—Loans to Municipalities Remain Large—Circulation Continues to Grow Steadily.

	June, 1917.	May, 1918	June, 1918.	Year's Inc. or dec.	Month's Inc. or dec.
Deposits on demand	$449,689,670	$535,655,731	$549,327,078	+ 22.3	+ 2.6
Deposits after notice	900,510,552	947,757,337	965,934,556	+ 7.2	+ 1.9
Current loans in Canada	839,355,782	894,817,113	897,226,012	+ 6.9	+ .33
Current loans elsewhere	93,150,083	99,300,926	103,033,289	+ 10.8	+ 4.1
Loans to municipalities	42,757,673	57,728,226	58,000,424	+ 38.1	+ 1.8
Call loans in Canada	76,085,220	78,466,582	76,970,920	+ .01	— 2.6
Call loans elsewhere	159,309,133	172,259,879	170,034,476	+ 6.9	— 1.1
Circulation	157,886,938	189,748,470	195,135,577	+ 24.2	+ 3.2

THE above are the principal changes in the banking business for June, as indicated by the statement issued by the department of finance. There are no outstanding changes, but rather a steady growth in all branches of the business. Since the beginning of the year, in fact, there have been no remarkable developments in Canadian banking. Compared with one year ago, all the principal accounts have increased in volume; the greatest increases being in the loans to municipalities, circulation and demand deposits.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1917—June	$449,689,670	$900,510,552
July	450,849,356	929,442,340
August	443,317,275	806,774,687
September	451,749,532	965,393,541
October	495,058,449	985,790,850
November	538,869,362	1,008,657,874
December	560,441,871	995,978,013
1918—January	559,777,237	900,314,256
February	565,266,642	908,822,988
March	561,042,236	921,080,803
April	558,509,221	933,644,668
May	535,655,731	947,757,337
June	549,327,078	965,934,556

The drop during the months of December and January is, of course, accounted for by the payments on account of Victory Loan subscriptions. Since the end of January they have grown at an average of about $12,000,000 per month. This growth is larger than during the corresponding period last year, and is the result of high wages and steady employment a fair amount of thrift, and to some extent preparation for the coming war loan.

The course of the deposits account during the past six years is shown in the following table:—

June.	On demand.	After notice.	Total.
1913	$362,769,928	$622,928,969	$ 985,698,897
1914	355,006,229	663,650,230	1,018,656,459
1915	349,057,351	683,761,432	1,032,818,783
1916	428,117,340	767,598,130	1,195,715,470
1917	449,689,670	900,510,552	1,350,200,222
1918	549,327,078	905,934,556	1,515,261,634

Considering the sums of money which have been raised in the country for war purposes, these figures are quite encouraging. The total of one billion and one-half was exceeded in the last two months of 1917, but there seem to be good prospects of a new high level being reached during the next few weeks. It will be noticed that the increase for the past year is about $165,000,000, or $22 per head of population.

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1917—June	$839,355,782	$76,085,220
July	829,560,700	71,376,788
August	836,429,670	71,204,351
September	855,306,953	72,421,187
October	883,986,860	71,653,719
November	868,973,714	72,178,345
December	858,533,298	71,779,020
1918—January	855,506,506	76,239,201
February	859,363,147	76,722,163
March	886,995,222	74,257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920

The loan accounts in Canada have, it would appear, been fairly stable during the year, the current loans show-

Of the deposit in Central Gold Reserves $13 210,000 is in gold coin the balance is in Dominion Notes

ing a considerable net increase. The demand for funds has been quite good but the rates have in many cases proved prohibitive and a policy of discrimination on the part of the banks between essential and non-essential loans has recently been urged.

The following table shows the call loans abroad in June as compared with previous returns:—

	1915	1916	1917	1918.
January	$[illegible]	$[illegible]	$155,[illegible]	$[illegible]
February	[illegible]	[illegible]	162,[illegible]	160,2[illegible]9,494
March	[illegible]	141,[illegible]	[illegible]	[illegible],701
April	121,522,071	147,14[illegible],441	15[illegible],15[illegible],[illegible]54	1[illegible],818,531
May	[illegible]	[illegible]	[illegible]	172,259,879

	1915.	1916.	1917.	1918.
June	$124,604,875	$182,757,015	$159,309,133	$170,034,476
July	117,821,174	177,121,733	151,875,676	.. ..
August	120,607,677	171,380,353	176,610,625	. .
September	135,108,412	173,877,586	166,480,004	. . ..
October	120,681,624	189,346,216	151,018,747	. . . .
November	135,530,562	183,250,389	139,832,552	.
December	137,157,869	173,878,134	134,483,482	....

The call loans abroad, on the other hand, have commenced to decline during the past two months. Some of the Canadian banks are retaining their activity in the foreign field, but the demand for funds here is so great, and the exchange situation so unfavorable, that a retraction seems to be under way.

Dominion Government---June, 1918

LIABILITIES

Loans from other banks in Canada secured, including bills re-discounted	Deposits made by and balances due to other banks in Canada	Due to banks and banking correspondents in the United Kingdom	Due to banks and banking correspondents elsewhere than in Canada or the U.K.	Bills payable	Acceptances under letters of credit	Liabilities not included under foregoing heads	Balances due to the Imperial Government	Total Liabilities	Aggregate amount of loans to directors, and firms of which they are partners	Average amount of current gold and subsidiary coin held during the month	Average amount of Dominion Notes held during the month	Greatest amount of notes in circulation at any time during the month

T. C. BOVILLE, *Deputy Minister of Finance.*

The following table shows the course of the principal loan accounts during recent years:—

June.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1913 ...	$899,260,009	$36,894,681	$68,642,377	$ 89,363,520
1914 ...	838,276,428	46,186,854	67,401,481	137,120,167
1915 ...	759,934,154	39,273,120	73,628,187	124,604,875
1916 ...	747,470,541	60,081,584	86,776,474	182,757,015
1917 ...	839,355,782	93,150,083	76,085,220	159,309,133
1918 ...	897,226,012	103,033,289	76,970,920	170,034,476

The loan accounts as a whole show a general increase over one year ago. Large war orders and other demands on industry have acted strongly on this department of banking.

UNION OF BRITISH COLUMBIA MUNICIPALITIES

A convention of the Union of British Columbia Municipalities is to be held on September 18th, 19th and 20th in Penticton, B.C. One of the principal subjects of discussion will be the Provincial Municipal Act, and it is probable that a new act in a draft form will be considered. One of the features of the new act may be the elimination of local improvement taxes.

Mr. W. W. Cory, Canadian deputy minister of the interior, has arranged with the United States employment service, to have a large number of harvesters brought from the United States to Western Canada to aid in harvesting the Canadian crops.

JOINT LIFE UNDERWRITERS' CONVENTION

Questions of Current Interest in Life Insurance to be Discussed in New York

As previously mentioned in *The Monetary Times*, the Life Underwriters' Association of Canada will meet in convention together with the National Association of the United States in New York, on September 4th, 5th and 6th. The headquarters of the convention will be the Hotel Astor, but the opening session will probably be held in the Metropolitan Opera House. This is done to enable as many persons as possible who are identified with the business of life insurance in New York City and vicinity to hear the opening addresses. On September 3rd, the day previous to the opening of the convention, an executive committee meeting and business session of the Life Underwriters Association of Canada will be held at the Hotel Astor. All delegates to the convention will be permitted to attend both of these meetings. The reports of all committees will be presented and it is hoped that all of the business of the convention will be transacted, leaving the entire three days free for addresses and discussions.

At ten o'clock, Wednesday morning, September 4th, the convention will be called to order, and the opening addresses will be made by President Woodrow Wilson and the Hon. Charles Fitzpatrick, Chief Justice of the Supreme Court of Canada. It is probable that on the evening of this day, a reception will be tendered to officers of local companies, all delegates and their families and to all life insurance people who have journeyed to the city for the purpose of attending the sessions of the International Association.

The entire programme has not been completed as yet, but it is intended that the sessions of the convention will be practical, and that each address will be followed by questions and answers, and that a number of topics of vital importance will be discussed on the floor of the convention. The main themes will be: "The contribution life insurance has made and will make towards winning the war," and "How to develop the business of life insurance in spite of the war."

This is to be an international convention, and the identification badges have been especially designed for this convention and will not only indicate that it is an international convention, but a space has been provided which will show the name and address of all delegates.

Addresses From Distinguished Persons.

The speakers for the annual banquet, which will be held on the night of September 5th in the grand-ball-room of the Hotel Astor, are Hon Newton Wesley Rowell, president, the Privy Council of Canada; Lord Reading, British ambassador to the United States, and the Hon. Charles E. Hughes.

It is likely that another of America's most distinguished citizens and a man now much in the public eye, will speak on this occasion His definite acceptance has not been received, but it is very probable that he will honor us on this occasion.

Other speakers who will appear on the programme are as follows. Prof Melville Cumming, of the Canadian Department of Agriculture. Subject "The Relation of Life Insurance to the Development of Agricultural Resources." Mr T. B. Macaulay, president, Sun Life Assurance Company of Canada Subject: "Canada's War Time Experience." Mr Herbert C. Cox, president, Canada Life Assurance Company Subject: "Life Insurance and Thrift." Sir Edmund Walker, one of Canada's most distinguished bankers. Subject: "Life Insurance and its Relation to Credit." Mr. George W Perkins Subject: "The Life Agent's Opportunity and Duty in View of War Conditions". Mr. Perkins, for many years vice president of the New York Life, later a member of the firm of J P Morgan & Company, now retired from active business but a man of large business interests and chairman of the finance committee of the international committee of the Young Men's Christian Association, has been invited to make an address, and although no definite acceptance has been received, it is hoped and believed that this address will be made by him Dr George E Vincent, formerly president of the University of Minnesota, now president of the Rockefeller Foundation Subject "Public Health and Life Insurance." Dr James Kellogg, president and director of the Battle Creek Sanitarium, Battle Creek, Mich. Subject: "The Influence of Personal Habits Upon Life Expectancy." Hon. Darwin P. Kingsley, president, New York Life Insurance Company Subject not yet announced. Mr Henry Moir, president, Actuarial Society of America. Subject not yet announced. Mr. J. H. McIntosh, president, Association of Life Insurance Council. Subject: "Insurable Interests: How to Properly Designate the Beneficiary of Life Policy." Harry B. Rosen. Subject: "How I Personally Sell Twelve Millions per Annum." Hary L. Snay, president, American Life Convention: Subject not yet announced. Dr. Edwin Welles Dwight, medical director, New England Mutual Life Insurance Company. Subject: "Medical Selection." Mr. Edward A. Woods, manager, the Equitable Life Assurance Society, Pittsburgh, Pa., formerly president of the National Association. Subject: "Wartime Arguments in the Sale of Life Insurance."

Brief addresses by several women prominently identified with the business. Subject: "Present-Day Opportunities for Women in Life Insurance."

"Arguments that I have used to sell large lines of insurance to provide funds for the payment of inheritance and succession taxes," by three or four prominent life agents whose personal sales far exceed one million dollars per annum for this purpose.

PUBLICATIONS RECEIVED

Reports and Orders-in-Council of the Legislative Assembly of Ontario for the Session, 1917.—This includes reports showing charters and licenses issued to racing associations in Ontario since 1912; damage done to farmers by the International Nickel Company; the number of patients cared for in Whitby prison farm; land designated by the government to the Canadian railways; total expenditure to Guelph prison farm; and order-in-council No. 79 regarding the re-education department.

High Income Bond Values.—Covering yields from 6 to 15 per cent. on securities bearing interest at from 4 per cent. to 7 per cent. By Goff and Scott. Published at $3.50 by the Financial Publishing Company, Boston. The rapid changes of the past two or three years in the income basis of securities has created a need for a convenient bond table showing yield rates much higher than was formerly the case. This book of tables fills the need exactly. Values are shown to the nearest cent on $10,000 in semi-annual periods from six months to ten years, inclusive. The book is printed in compact and clear type and is bound in imitation leather.

New York State Insurance Department.—Report on examination of the Security Mutual Life Insurance Company, of Binghampton, N.Y. The examiner, Mr. Thomas L. Lynch, found that, generally speaking, the assets and liabilities of the company were as represented in their statement. He recommends, however, that the company should take measures to curtail its expenses and keep them within the loadings. The dividends to policyholders are also too high, he said, and should be reduced, at least during the period of the war. The organization as a whole is criticized as lacking in co-ordination among the various departments.

The Button Industry.—This is Volume No. 4 of the tariff information series. Published by the United States Tariff Commission. The authors, John J. Ernsten and Robert E. Allen, have examined the button industry in the United States from every viewpoint. The volume includes six sections, dealing, respectively, with tariff legislation, the manufacture of buttons in the United States, a review of the button industry and trade in foreign countries, general statistics and abstract of treasury and court decisions, and a collection of statements of manufacturers, exporters and importers engaged in the industry. There is also a valuable bibiography.

Dominion Mortgage and Investments Associaton Year Book for 1918.—Contains an account of the proceedings of the annual meetings of the Dominion Mortgage and Investments Association, the Mortgage Loans Association of Manitoba, the Land Mortgage Companies' Association of Saskatchewan, the Mortgage Loans Association of Alberta and the Mortgage and Trust Companies' Association of British Columbia The latter four are all affiliated with the Dominion association. This is the first time that a year book has been issued, and, in view of the close relations among the different organizations, it was considered advisable to issue one volume, outlining the work of them all. Mr. John Appleton, Canada Life Building, Toronto, is secretary treasurer.

A NEGLECTED ASPECT OF GOVERNMENT OPERATION

The recent dispute between the Dominion post office department and its employees furnishes a valuable commentory upon government ownership and operation. The post office system is one branch of industry which is uniformly admitted to be within the proper sphere of government, on account of its extent, and intimacy with which it is connected with all branches, not only of industry, but of social and political life. At the same time, its operation is open to many of the dangers which are liable to government operation in any field, and experience in this department may well be carefully considered when government operation of other industries, such as railroads and telegraphs, steamship lines and mining which are not usually considered within the proper sphere of government, is being discussed.

Not very long ago some of the civic employees of the city of Toronto were involved in a dispute with the city and it was decided by both parties that a board of conciliation would be the best means of settlement. The employees of the Great North Western Telegraph Company threatened to strike within the past few weeks but found it unnecessary because they could resort to the assistance of a friendly government. The value of conciliation and arbitration in the settlement of labor disputes has been increasingly recognized, and of the numerous disputes which have taken place in Canada during the past few months, practically all have made use of these means of settlement. Sometimes a private agency may be mutually agreed upon, but lacking this, resort may be had to the Dominion government. It has not only the authority to conciliate and arbitrate but also the power to enforce its decision.

When, therefore, the mail carriers were considering a strike they found themselves pitted against a corporation which was more powerful than any other interest in the country, and in addition to this, resort to a capable and powerful arbitration would be lacking. In the previous cases mentioned above, the telegraphers and civic employees were engaged in a dispute where public opinion was certainly not with them, where their opposing corporations were large and powerful, and yet they succeeded in obtaining a fairly satisfactory settlement. The postal employees, on the other hand, were supported by popular sympathy to a degree such as strikers very seldom are, and yet they found that opposition on their part would probably be only harmful to their own interests. In a labor dispute where the government is involved as employer, there may be conciliation but there is no such thing as arbitration in the real sense because arbitration employs an agreement to abide by the decision of the arbitrator and this agreement can only be enforced through action of the state. When, therefore, the state is one of the parties, the system is meaningless. These conditions have been experienced in many places where government industry is common. Some years ago the employees of the state railways in Australia discovered it to their loss. It is a common thing for labor disputes to favor government operation of their industries on the ground that the government cannot be otherwise than a favorable employer, and in Canada we have not had sufficient experience in government ownership and operation to have this impression removed. Government operation does not ensure satisfaction to the employee, and no more does it ensure continuity in the operation of essential industries.

CREDIT OF CANADIAN PROVINCES

The scarcity of funds for borrowing, even on the excellent credit of the Canadian provinces, resulted recently in the province of British Columbia going to the Dominion government for a loan. Before doing this, however, negotiations were opened with bond dealers and a number of bids for a loan of $3,000,000 were received. The best offer, however, that the province seemed able to command was about a 7½ per cent. basis. Not being satisfied with these terms, they applied to the Dominion government and received the necessary sum at 6½ per cent. Incidentally, it may be mentioned that the province made an issue last year to the amount of $1,000,000 at 6.80 per cent.

The province of British Columbia has, it would appear, effected a satisfactory and economical transaction, and would obviously have been foolish to have paid an additional 1 per cent. per annum for the money. The responsibility for the transaction rests with the Dominion government and an important precedent has been issued which may result in more demands of a similar nature that are at present anticipated. In view of the present position of the Dominion finances, the money supplied to British Columbia must be provided out of the borrowings. As the Dominion borrows at less than 6 per cent. there will, therefore, be a gain of over one-half per cent. per annum upon the transaction. There is, however, an important principle involved and one which will not add anything to the credit of the province which secured the loan, nor of the provinces of Canada as a whole.

Although transactions of a financial nature between the province and the Dominion have been continuous since Confederation, yet when it has been necessary for the provinces to borrow funds they have almost invariably done so in the market on their own credit. The present action, therefore, might occasion either one or two criticisms, namely, that the province could not secure the funds in the open market, or else that its finances were in such a shape that it could not afford to pay the additional one per cent. per annum. The former criticism is disproved by the fact that a number of tenders were secured for the issue. Regarding the second criticism, there is no actual ground in fact. The province has been experiencing the same financial difficulties which have occurred to other Canadian provinces, and possibly in a more acute degree than is the case with the others. This is the result of an over-expansion and use of credit which was not based upon the development of producing industries. The actual values, however, of property and business in the province is still several times the debt, and the province has ample power to secure the revenue by various modes of taxation. The taxing machine has not been sufficiently developed to direct the necessary funds to the provincial treasury, and the result has been a frequent recurrence of deficits. Sooner or later this condition must be removed and sufficient revenue raised to place the province upon a financial basis which will enable it to meet such a stringency in the money market as that which at present exists.

The best interests of public finance will be served by each municipality and province standing upon its own feet financially. The province, having jurisdiction over municipal affairs, has an interest in the credit of its municipalities, which it must seek to maintain by proper legislation. But the provinces and the Dominion are independent and co-ordinate governments, both established by the same authority and with similar powers as to the creation and repayment of debt. The Dominion will not in the end advance its own interests, nor those of the provinces, by assuming any semblance of responsibility for provincial finances. Capital expenditures have been practically eliminated from the national programme, and when the time comes to go to the public for another loan, we should do so with the clear statement that the funds are solely for war purposes, and not to be turned over to any other body, however needful the purpose, which itself possesses the power of meeting its financial requirements.

EXPORT TRADE COMBINATIONS

Among the various proposals which are being brought forward for the encouragement and promotion of foreign trade, is that of an export trade corporation, or a number of such bodies. Nothing of this kind exists as yet in Canada, and our banking system does not include a bank of such size and strength that it is superior to all the rest.

The United States a short time ago legislated with a view to encouraging United States trade in the foreign field. One stumbling block had been removed when the Federal Reserve Bank was created several years ago. The main difficulty since then had been the Sherman and Clayton anti-trusts acts, which had been aimed to restrict combinations in restraint of trade, and which, it was maintained, handicapped the operation of American industry in the foreign field. Accordingly, on April 10th of the present year, the Webb law was approved, permitting associations and combinations in export trade. According to the text of the law it is not to be construed to permit of any combination affecting the domestic market in the way of raising or depressing prices or in any other manner. In the foreign field it is expected to make possible the formation of organizations which will be able to make greater credit extensions than individual manufacturers, who depend upon a quick turnover of capital, can provide. It will also facilitate the gathering of credit and the financing of foreign sales, arrangement of shipping, warehousing and customs brokerage. The combination might apply not only to competing industries but also to non-competing industries, as all might share in the advantages of an organization of this kind. It is pointed out that nearly every other country with which the United States competes, permits and encourages manufacturers and producers to organize in this way. In Britain, for instance, the usual means is the formation of an export company in which the various companies concerned hold shares.

While, therefore, combination is not to be permitted in the domestic market, it is to be permitted upon a national basis when industry desires to enter the foreign field. A national organization of an industry, however, while it is a monopoly in its own field, provided the protective tariff is sufficiently high, is not a monopoly when it enters a foreign territory in competition with smaller organizations from other nations. In this case it may be compelled to sell at prices below the price at which it sells in the domestic market. This has happened in numerous cases in England, which having no protective tariff, has aimed at securing goods from abroad at the lowest possible prices, and has frequently been able to purchase foreign products more cheaply than they can be secured in the countries which produce them.

PROSPECTS FOR IRON IN BRITISH COLUMBIA

Some time ago the provincial government of British Columbia appointed a central iron committee to consider promoting this industry in the province. On July 18th, this committee met to receive a report from Mr. J. F. Bledsoe, M.E. The principal feature of the report dealt with negotiations with the Vancouver representative of eastern mining interests. This representative was an engineer, Mr. John Fraser, who was of the opinion that the raw material was not present in sufficient quantity and convenience. The committee acting for the government will make an effort to point out the resources of the province in this and will endeavor to secure the erection of a blast furnace for producing pig iron.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Cape Breton Electric Company, Limited.—The gross earnings of the company for May, 1918, amounted to $38,916, compared with $36,029 in May, 1917. After allowing $27,740 for operating expenses, the net earnings stood at $11,176, an increase of $313 over May last year.

Twin City Rapid Transit Company.—The gross revenue of the company for June, 1918, amounted to $808,431, compared with $853,195 in June last year. Operating expenses totalled $542,768, leaving the net revenue at $265,662, a decrease of 14⅓ per cent., compared with June, 1917.

Southern Canada Power Company.—The gross earnings of the company for June, 1918, amounted to $39,949, compared with $33,740 in June last year. Operating expenses and purchased power totalled $22,750, leaving the net earnings at $17,199, an increase of $3,177 over last year.

Maple Leaf Milling Company.—The annual meeting of the company was held on July 29th at the company's head office in Toronto. The old board of directors was re-elected, consisting of: Sir D. C. Cameron, president; Mr. Hedley Shaw, vice-president; and Messrs. Charles W. Bank, John I. A Hunt, Robert Cooper, J. S. Barker, W. Steed.

A. Macdonald Company.—It has been recently said that a dividend on the preferred stock is contemplated by the directors. No dividend has been paid since the end of 1913. The issue of preferred stock amounts to $1,776,800, so that the dividend at 7 per cent. amounts to $124,376 per annum. The total deferred, therefore, is over half a million dollars. The company's name has recently been changed to "Western Grocers, Limited."

Canada Foundry and Forgings, Limited.—It is understood that offers have been received for the Delaney Iron and Forgings plant at Buffalo, which was purchased within the past year by the company. The price paid was $750,000, and it is said that one offer to the amount of $1,500,000 was received for the plant. This would represent a substantial profit, but latest reports state that the company has decided to retain the plant.

Demerara Electric Company, Limited.—The following is a statement of the earnings of the company for May, 1918:—

	Gross.	Net.
Railroad	$6,784.46	$ 453.86
Light and power	8,389.54	4,462.43
Miscellaneous		99.24
Total		$5,015.53

Ontario Steel Products Company, Limited.—The current assets of the company for the year ended June 30th, 1918, totalled $714,447, while the current liabilities were $83,852. The net profit for the year, after providing for depreciation, business profits tax, etc., was $208,108. The fixed assets of the company now amount to $1,848,558. During the year which just closed, the regular dividend of 7 per cent. on the preferred stock was declared, and 1¼ per cent. on the common deferred dividends was paid in August, 1917.

Dominion Bank.—A statement has been issued for the six months ended June, 1918, as follows:—

Balance of profit and loss account, December 31, 1917	$393,004
Profit for six months after deducting charges of management, etc., and making provision for bad and doubtful debts	576,051
Less Dominion government war tax and provincial government taxes	53,300
Making a total of	$915,756

Out of this total two quarterly dividends of 3 per cent. were paid and the sum of $25,000 was contributed to the Canadian Patriotic Fund. The balance remaining on the account is $5[illegible]756. The total assets of the bank are now $[illegible],761.

MANITOBA BOND AWARD IS PROTESTED

Tenders for $1,000,000 of 10-year 6 per cent. bonds of the province of Manitoba were opened at 12 o'clock noon on Saturday, July 27th. It was announced that four tenders had been received. The highest was that of Messrs. C. Meredith and Company, Limited, R. C. Matthews and Company, Hanson Brothers and Harris-Forbes and Company, of Montreal, in joint account, at 96.77. Æmilius Jarvis and Company bid 96.69, Wood, Gundy and Company 96.59 and the Merchants Bank, on behalf of an unknown client, 96.42.

On Monday, July 29th, however, the Oxford Securities Corporation, of Toronto, entered a protest. They stated that they had handed to the local manager of the Canadian Pacific Railway Telegraph Company at Toronto on Friday, at 5.45 p.m., a telegram containing their tender. Their bid was 96.85 and interest, which was higher than that of C. Meredith and Company. As soon, therefore, as they had learned that the award had been made to the syndicate, they consulted their solicitors, Messrs. Proudfoot, Duncan and Grant, of Toronto, and had the protest entered.

The bonds are being sold by the Meredith syndicate at a 6.20 basis, and, according to latest reports, they are practically all disposed of.

ST. JOHN DRYDOCK

The drydock to be erected at the city of St. John, N.B., will be one of the largest in the world. The contract has already been let to the St. John Drydock and Shipbuilding Company by the Department of Public Works, Ottawa. The length of the new dock will be 1,150 feet and its width at the bottom 125 feet. It will accommodate the largest vessel, naval or mercantile which is now afloat or contemplated.

The St. John Drydock and Shipbuilding Company is controlled by the Canada Dredging Company, Limited, of Midland, Ont. Among those connected with the organization are Mr. James Playfair, Midland, superintendent and general manager of the Great Lakes Transportation Company, Limited, and president of the Midland Iron and Steel Company, Limited; Hon. W. H. Robertson, Kingston; D. L. White, Jr., Midland; W. J. Sheppard, Waubaushene; W. E. Phin, Hamilton; D. S. Pratt, Midland; George Y. Chown, Kingston; R. Hobson, Hamilton; Col. Thomas A. Duff, Toronto; J. A. Paisley, Cleveland; and J. B. Craven, New York. The general manager of the company will probably be D. S. Pratt, of Midland, Ont., who occupies a similar position at present with the Canadian Dredging Company, Limited.

CANADA'S BANK CLEARINGS

The following are the bank clearings for the weeks of July 25th, 1918, and the corresponding week last year:—

	Week ended July 25, '18.	Week ended July 21, '17.		Changes.
Montreal	$ 87,973,944	$ 75,858,819	+	$12,115,125
Toronto	63,362,875	57,557,827	+	5,805,048
Ottawa	6,397,281	5,165,137	+	1,232,144
Hamilton	4,760,288	4,422,595	+	357,693
Quebec	5,578,569	4,537,255	+	1,041,314
Halifax	3,872,313	2,936,189	+	936,124
St. John . . .	2,377,677	1,786,552	+	591,125

FORM OF MUNICIPAL BORROWING

Comparison of Serial, Instalment and Sinking Fund Debentures from the Municipal Accountancy and Investment Point of View

BY H. L. CORBETT.

No doubt most brokers purchasing municipals for their clients prefer instalment debentures as issued in Canada, or serial debentures as issued in the United States. An issue of instalment debentures would have an odd debenture for each year of its term, while the serial debenture would be all even amounts of principal.

The borrowing by-law passed by the municipal council contains a clause which says that an annual sum shall be levied against the ratepayers to meet the interest and principal. Accounting for the instalment debentures entails more labor in the preparation than the sinking fund plan, but eliminates the trouble of looking up investments during the term of the issue. Take for example a debenture issued for $1,000,000 at 4 per cent. for 20 years. Under the instalment plan the interest paid during 20 years would be $471,635; under the serial plan $420,000; under the sinking fund plan $800,000. Under the instalment plan the investor if he purchased the whole issue would get an equal annual amount returned to him of so much interest and so much principal; the principal increasing annually and the interest decreasing annually, but both making up an equal annual payment levied and collected by the municipality during the term of the debenture; therefore, the amounts put on the roll are always the same each year. Under the serial plan, the annual amount returned to the purchaser is always unequal. The principal is an equal annual amount, but the interest is always decreasing. The municipal officer is required to make new calculations every year to put the levy on the roll. Owing to the payments of interest being larger at the beginning of the life of the asset for which the money was borrowed, this plan is recommended for assets which depreciate rapidly and require greater expenditures for repairs and renewals out of current funds during the later years of the life of the asset. Under the instalment plan the interest decreases annually (but not so rapidly as under the serial plan), and the principal is increasing at the same rate during the term. The interest paid under the sinking fund plan never varies during the term of the issue. Investors purchasing long-term sinking fund debentures in a market of high rates of interest, such as at present, would seem to have an ideal investment; but one cannot tell just how when interest rates will have reached their highest point so that instalment debentures or tax-free war loans are much more preferable in the market of to-day.

Investment Element in Sinking Fund Bonds.

The sinking fund plan is based on an equal annual payment levied annually against the ratepayers, and requires no change in the accounting from year to year, while the interest is always the same. The sinking fund is figured on a basis as near as possible to savings bank interest. If an investment for the sinking fund could be found during the term of the debentures to pay the same rate as is paid for the loan, and the levies on the ratepayers were exactly collected and paid over to the sinking fund on the anniversary dates, the plan would work out to the retepayers on the same basis as the instalment plan. But such is not the case. While it is true that the levies are not collected on the exact date of issue of all instalment debentures, there is an annual adjustment of interest and principal at the same rate, and if it were possible to have their issues mature just when tax collections were made, [illegible] accounting would be the result. The day may not be far distant when sinking funds will be figured on a semi-annual or quarterly basis. The investor will then have his interest returned to him quarterly instead of semi-annually. This would allow debenture issues to date nearer to tax collections. Many municipalities have debenture issues dating throughout the whole year, while the taxes are collected only twice a year. The consequence is that the general fund of the municipality is borrowed from to meet the sinking fund payments on anniversary dates until the taxes for same are collected. Under the sinking fund plan the earnings of the sinking fund over the estimated rate revert to the ratepayer either by getting the rate reduced on that particular by-law for which the money was borrowed, or by the municipality's officers using the surplus in a general tax reduction. This latter method is only commendable where proper care is taken in civic management, as under the sinking fund plan the ratepayer pays a higher annual amount than under either the instalment or serial plan, owing to the investment principal of the sinking fund. This can be seen more clearly from the figures above, which show that taking the interest paid under the serial plan is in the neighborhood of $50,000 less than under the instalment plan, while the interest paid under this latter plan is in the neighborhood of $330,000 less than the sinking fund plan.

The municipal amendment act of 1917 provides that instalment debentures can be varied in annual amounts to get rid of odd debentures, and also provides that the principal may be paid in annual instalments, with interest payable annually or semi-annually upon the balances from time to time remaining unpaid. This latter would be on the same principle as the serial plan. This would do away with many odd debentures; at the same time it would necessitate the municipal accountant making annual adjustments, which would not be needed if the annuity calculation was adhered to strictly.

MARKET MOVEMENTS

That the greatest news gathering system in the world is found in Wall Street, is pointed out in the "Bache Review" for July 20:—

"The level of prices is never motionless, but rises and falls endlessly as the underlying effect of great happenings makes for better or for worse future developments.

"The level of prices is an expression of the aggregated judgment from all sources on present security values; it is the concentrated, boiled-down result of the opinions, as to what securities are worth, of all thinking people who give such matters attention, including the most astute and far-seeing minds of the existing generation all over the world.

"Passing news, consequently, has only negligible effect on prices, unless, in it, is involved events deep and far-reaching in their bearing upon underlying conditions. Nevertheless, the minds that concentrate upon material conditions everywhere in the world, are alert and keen for news from every quarter, and analyse and digest it quickly—sometimes instantaneously.

"Probably in no other place in the world is important news more quickly and accurately gathered than in Wall Street. Was it foreknowledge, coincidence, or merely correct conclusion that started the market to selling down last week, three days before the German drive began? That the market, having deliberately retired a few points, is now conservatively, but apparently confidently, holding, or even advancing, indicates the general judgment of trained minds intensely interested in the outcome, to be that of assurance that the allied position is secure.

"Aside from the great international consideration, the pressure of the price level is evidently upwards, and were it not for certain conditions, we might expect an accelerated rise. One of these conditions is the money situation, and even here, except for control, the list might itself perforce work upward. Money, of course, is controlled as much, in its way, as steel or other commodities, and the very heavy adjustments of the week have made it advisable to withhold it from any unnecessary uses, in order to more smoothly deal with the enormous government operations which took place July 18th, involving hundreds of millions of dollars. Another obstacle to an impressive bull market is the impendency of heavier taxation, the details of which have not yet been worked out. In the meantime, really momentous war news, indicating that the vital organs of enemy power had been pierced, would undoubtedly release the upward pressure toward higher levels."

The fifty-second national encampment of the Grand Army of the United States Republic will be held during the week beginning August 18th, 1918, at Portland, Oregon. When re-adjusting the railway passenger rates a few weeks ago Mr. McAdoo stipulated that the rates for this encampment should be one cent per mile for the distance travelled. In view of the rapidly decreasing number of members of the organization, this will probably be the last convention at the Pacific coast

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Renfrew, Ont.—Messrs. A. Jarvis and Company, of Toronto, have purchased a block of $11,000 6½ per cent. 30-instalment bonds.

County of Carleton, Ont.—Sealed tenders for an issue of debentures due in 20 years are being called for by the county. The issue is for $20,000, and carries interest at 5½ per cent. Tenders close on August 7th.

York Township, Ont.—Oxford Securities Company, who recently purchased an issue of $200,000 York Township bonds, state that the offering has met with success, practically all of the bonds having been disposed of.

Galt, Ont.—Galt is the first municipality to take advantage of the government's offer in regard to a housing loan. The debentures for the 20 per cent. to be provided by the municipality will be taken up by local manufacturers.

Port Colborne, Ont.—The by-law to raise by loan upon the credit of the town the sum of $25,000 for the purpose of constructing and repairing concrete sidewalks, and of constructing and repairing certain roadways was passed on July 29th.

Edmonton, Alta.—Sealed tenders will be received by the debenture branch of the Department of Education until August 12th, 1918, on the debentures of the Forestburg Consolidated School District No. 45, amounting to $25,000, bearing interest at 7 per cent., and repayable in forty equal annual consecutive instalments. Tenders to include interest from the date of debentures until date of payment.

New Westminster, B.C.—The city council held a meeting recently for the purpose of completing the bond hypothecation by-law, authorizing the hypothecation of a $500,000 issue of five-year bonds to the Bank of Montreal as security for a loan of $469,000 advanced by the bank to retire the three-year treasury certificates which matured in June. This by-law was reconsidered and finally passed, as was also the annual temporary loan by-law.

Edmonton, Alta.—Sealed tenders will be received by the debenture branch of the Department of Education until August 12th, 1918, on four blocks of school district debentures, amounting to $21,200. Separate tenders are to be made on each block: Block No. 1, Consolidated S.D., 10-years, 7 per cent.—Orion Consolidated S.D., $3,500. Block No. 2, Rural, 5-years, 7 per cent.—Lathom S.D., $300. Block No. 3, Rurals, 10-years, 7 per cent.—Brunswick S.D., $2,500; Severn Creek S.D., $2,700; Gallion S.D., $1,600; Spirit River S.D., $1,100; total, $7,900. Block No. 4, Rurals, 10-years, 7 per cent.—Selkirk S.D., $1,500, Hudson Bay S.D., $1,600; Lansdell S.D., $2,500; Violetdale S.D., $900; Poplar Heights S.D., $1,500. Staplehurst S.D., $1,500; total, $9,500.

AMERICAN BANKERS' ASSOCIATION CONVENTION

The forty-fourth annual convention of the American Bankers' Association will be held in the city of Chicago the week beginning September 23rd. The list of speakers has not yet been announced, but it is understood that it will include cabinet officers, representatives of foreign governments, members of the United States Senate and heads of important departments of the government. The Congress Hotel and Annex will be the headquarters. The following tentative programme has been prepared:—

1. The federal reserve system from a general viewpoint.
2. Discussion of membership in the federal reserve system, from the viewpoint of a member, by a representative of a bank under state jurisdiction, that is, a member of the system.
3. Discussion of membership in the system from the viewpoint of an eligible non-member by a representative of a bank under state jurisdiction, that is, an eligible non-member of the system.
4. Discussion of membership in the system from the viewpoint of an ineligible non-member by a representative of a bank under state jurisdiction, that is, an ineligible non-member of the system.
5. General discussion—open forum—free for all.

PERSONAL NOTES

MR. R. J. KIMMEL, formerly city representative at Winnipeg for the New York Life, has been appointed Winnipeg city manager for the Northwestern Life.

MR. J. W. GLENWRIGHT has been appointed general manager of the Alberta Saskatchewan Life Insurance Company, of Edmonton, Alberta. He was formerly superintendent of Western Agencies for the Northern Life Assurance Company of Canada.

MR. S. R. PARSONS, of the British-American Oil Company, Toronto, and Mr. G. H. Duggan, of the Dominion Shipbuilding Company, Limited, Montreal, have been appointed to represent the Canadian Manufacturers' Association on the new Federal Labor Board.

MR. H. H. MORRIS, superintendent of Pacific Coast branches of the Canadian Bank of Commerce, has returned to Vancouver after a combined pleasure and business trip to the east. He spent considerable time at Toronto with head office officials of his institution.

MR. J. F. MACKAY, former business manager of "The Globe," Toronto, was presented on July 30th with a handsome grandfather's clock by the staff of the paper, on the occasion of his leaving "The Globe" to accept a position as treasurer of the Russell Motor Car Company, Limited.

MR. SELBY P. WOOD, managing director of the Australian Provincial Assurance Association has returned to Sydney, N.S.W. Mr. Wood had been visiting the United States with a view to entering the insurance field here, but found the legal technicalities too great to conveniently do so either directly or through a subsidiary company.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended July 26th, 1918:—

Nipissing, 65,725; O'Brien, 64,020; McKinley-Darragh, 65,519; Kerr Lake, 59,960; Coniagas, 242,000; Dominion Reduction Company, 173,000. Total, 670,224.

The total shipments since January 1st now amount to 17,196,746 pounds, or 8,598.4 tons.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks of July:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
July 7 ...	$3,101,000	$2,787,000	— $314,000
July 14	2,688,000	2,867,000	— 179,000
July 21	2,950,000	2,644,000	— 306,000

Grand Trunk Railway.

July 7 ...	$1,297,003	$1,500,596	+ $203,593
July 14	1,379,293	1,515,442	+ 136,149
July 21	1,358,019	1,496,180	+ 138,161

Canadian Northern Railway.

July 7 ...	$ 902,300	$ 821,700	— $ 80,600
July 14	845,100	935,600	— 81,500
July 21	872,100	846,300	— 25,800

The following is a statement of earnings and expenses of the Canadian Northern Railway for the month of June, 1918:—

	1918.	1917.	Inc. or dec.
Total gross earnings...	$ 4,031,100	$ 4,048,600	— $ 17,500
Operating expenses ...	3,516,900	2,961,000	+ 555,900
Net earnings ...	514,200	1,087,600	— 573,400
Aggregate gross earnings from July 1st	42,450,600	41,244,700	+ 1,205,900
Aggregate net earning from July 1st	3,926,500	10,404,400	— 6,477,900

PROPOSED DOMINION BANKRUPTCY ACT

Canadian Conditions are Peculiar and Require Uniform Legislation With Many Centres of Administration

BY THOMAS W. LEARIE

Many Canadian manufacturers, especially commercial manufacturers as differentiated from those engaged in industrial operations, interested in the passage of a bankruptcy act for Canada, and having some knowledge of the bill introduced at the last session of the Dominion parliament by Mr. S. W. Jacobs, K.C., of Montreal, were surprised to a considerable degree at the article which recently appeared in Industrial Canada from the pen of Mr. H. Macdonald under the caption of "Proposed Dominion Bankruptcy Act Defects."

To manufacturers, wholesalers and retailers not acquainted with the writer of the article in question it is desirable to state that Mr. Macdonald is the secretary of the Toronto branch of the Canadian Manufacturers' Association, and at present, during the absence of the general secretary of the association, Mr. G. M. Murray, at Ottawa in connection with war work, is acting in his stead. Mr. Macdonald is a Scotsman, and derived his knowledge of both business and bankruptcy proceedings very largely in the Old Country. Naturally, though having adapted himself to Canadian ways, he seems to us to have a point of view on bankruptcy not wholly true from the standpoint of Canadian business, and through his article is endeavoring to create a favorable aspect for it that is neither in the interests of nor in accord with Canadian business requirements.

Realizing Need, Take No Action.

As Mr. Macdonald says in opening his article, the Canadian Manufacturers' Association has in the past five years placed itself on record as favoring the general provision of a bankruptcy act without committing itself to any details. In that same period there has existed a reasonable need for such a measure as would bring uniformity in insolvency practice throughout Canada. The fact that the Canadian Manufacturers' Association (which, to our mind, represents the industrial manufacturers of Canada rather than those who are manufacturing and selling to the retail trade direct) has not felt it incumbent upon itself to go further than endorse a bankruptcy act in the abstract rather than develop it in the form of a definite bill, is an evidence that those whom the organization represents are not vitally interested, but only indifferently so, in such a measure. Consequently, any discussion of a bankruptcy act should aim at reaching those who will be most affected by its provisions. We believe these to be manufacturers who sell direct to the retail trade and wholesalers and retailers.

That the Canadian Manufacturers' Association does not represent the commercial manufacturers as it should, nor hold any brief for wholesalers or retailers, is obviously one reason why the writer of the article does not show a true understanding of Canadian commercial requirements in a bankruptcy act.

Great Britain and the United States are outstanding exponents of the operations of bankruptcy bills. That they are successful in the truest sense of the term is open to some considerable question, and it is absolutely true that there is a growing body of opposition to the Bankruptcy Act of the United States, and for the reasons which we hereinafter show.

Canadian Experience Unfortunate.

Canadian experience in bankruptcy legislation has been most unfortunate, and our commercial interests of the late 70's were so entirely dissatisfied with the Bankruptcy Act which was then in force that they secured its repeal in 1880, the main reasons for the repeal being that it was administered to the entire dissatisfaction of creditors, and with great cost and expense and consequent loss to them.

Since that time the liquidation of insolvent estates has been conducted through the medium of assignment acts passed by each of the different provinces. Without entering into any discussion as to the merits of these different enactments, we believe that it is within the truth to say that the Assignments Act of the province of Ontario stands to-day as a piece of insolvency legislation unexcelled anywhere for equity, promptness and cheapness in cost of operation and freedom from the annoyances of court procedure and red tape.

Mr. Macdonald's contention that British precedent is the natural and proper tendency to be followed in the preparation of a Canadian bankruptcy law is correct, but we conceive it to be a reasonable deduction that it should be followed as guiding in principle only and not as a hard-and-fast form for concrete adoption. The British bankruptcy law may be the best form of such legislation possible for the United Kingdom, but in a country of the length and breadth of Canada, with such a scattered population as we have, we doubt whether the act in force there or a general adoption of its features in toto would be for our benefit. We speak of the British Bankruptcy Act with temerity, having a very limited general knowledge of its terms, but, as the United States law is framed on the same basis, we are applying their experience to our needs in making this statement.

United States Bankruptcy Administration Criticized.

At the present time there is considerable agitation among business interests in the United States in opposition to their bankruptcy law. It is meeting with a great deal of criticism, and almost entirely for the reason that it involves too much court procedure and legal representation, with consequent heavy costs and unreasonable delays; and, in view of claims having been entrusted to a certain class of solicitors, there has cropped up many unfair practices which have raised the ire of creditors all over the country.

The National Association of Credit Men, while favorable to the United States Bankruptcy Act and strong for its retention, admit that its administration through its stipulated processes in the hands of official authority has very largely been an utter failure and a bitter disappointment from the standpoint of financial returns to creditors.

That there exists a basis for this attitude is apparent when one looks into the United States governmental reports on bankruptcy. We submit the following facts from the returns made to that government in 1911-12-13, and that they will prove interesting reading to Canadian manufacturers, wholesalers and retailers alike, we have not the slightest doubt.

Some Government Statistics.

In 1911 the total liabilities in all cases of voluntary and involuntary bankruptcy in the United States amounted to $165,014,725. The value of the accumulated assets coming into the hands of the courts is not given, but the amount realized thereon was $33,501,672. Our Canadian experience is that in most estates the original assets would be equivalent to at least 90 per cent. of the total liabilities, so that the realization by bankruptcy officials was not better than approximately 25 per cent. of inventory value. Of the amount realized, secured creditors got their claims in full $8,256,918, and unsecured creditors got $18,676,784 on their direct liability of $156,757,807. To administer the amount realized the officials received as commissions: attorneys fees, etc., the sum of $3,129,844, and in addition spent $3,086,022 on other costs, or a total expense of $6,215,866, about one-third the amount paid to unsecured creditors. In Canadian experience the cost of administering estates to-day hovers between 10 and 20 per cent., and the latter figure is rarely ever reached except in exceptional cases, while in this record the average is 20 per cent.

In 1912, the United States reports of bankruptcy show total liabilities of $170,153,406, and the amount realized from assets for distribution $38,554,000. Secured creditors got $8,683,868 in cash and $6,748,176 in property, which the courts did not handle, but allowed. The unsecured creditors got $16,248,647 on $154,721,512 worth of direct liability. Court officials got in commissions, attorneys' fees, etc., $3,503,888, or better than 20 per cent. of unsecured creditors' dividends, and in addition spent $3,369,575 in costs of handling, or a total of $6,873,463, to administer and distribute $38,554,000, better than 40 per cent. of the amount the unsecured creditors got, or approximately 21 per cent. of the actual cash handled.

In 1913 their governmental returns showed liabilities in bankruptcy of $227,083,214. From the assets the officials realized $52,571,396. The secured creditors got $13,728,612 in cash and $13,122,466 in property which officials did not administer, while the unsecured creditors got $15,964,336, leaving the tremendous sum of $184,277,860 to be written off to bad debts. The court officials and attorneys got commissions, fees, etc., aggregating $5,000,114, or almost one-third of the amount the general creditors got, and in addition spent another $4,756,913 in administrative costs, or a

total expense in handling assets which realized $52,571,396 of $9,766,027—over 60 per cent. of the amount paid the unsecured creditors, or approximately 25 per cent. of the actual cash handled.

Canadian readers interested in any system of bankruptcy will realize from these figures something of the burden they might have to bear were Mr. Macdonald's particular form of enactment made law in this country, but the Jacobs' bill is framed on the basis of the elimination of excessive court costs and obviates largely any such expense.

Brief History of the Jacobs' Bill.

The act which has been sponsored by Mr. Jacobs for Canada is substantially a bill drawn up by Mr. H. P. Grundy, of the law firm of Pitblado, Hoskins and Grundy Company, of Winnipeg. This bill, which was drafted at the request of the Canadian Credit Men's Association, was submitted to several revising solicitors, notably A. C. McMaster, K.C., of McMaster, Montgomery, Fleury and Company, Toronto; E. J. Jackson, of MacKenzie, Brown and Company, of Regina, and others. Its provisions and terms, as outlined by Mr. Grundy and others in a series of addresses before various trade and commercial bodies throughout Canada, secured for it strong endorsation and commendation, among such being the Manitoba branch of the Canadian Manufacturers' Association. Mr. Jacobs found it to embody what, in his opinion, were the essential things to a desirable act for Canada, and especially is this so when it is borne in mind that the government was intensely opposed to the introduction of any bill which necessitated the estabilshment of new courts or a new judiciary in Canada. Furthermore, the special committee appointed by the House of Commons to study the measure after its introduction have reported it with but comparatively few changes from the original, and these of a very minor character, and none along the line which Mr. Macdonald favors.

Proposed Amendments and Revisions.

Mr. Macdonald's contentions in respect to the proposed bill are that it should be amended and revised to embrace the following features:—

1 The act ought to provide for a central head responsible for the more important features of administration.

2. There should be a central office in which records should be filed and to which recourse would be had for information.

. Provision should be made whereby the central office could influence, if not control, the policy to be pursued throughout Canada in the matter of the discharge of bankrupts.

4 It should be one of the functions of the central office to give advice, more or less informally, to trustees in the administration of estates.

5 The auditing of accounts of all estates should be finally checked up by the central office and the discharge of trustees regulated.

6 The question of what extent judges or judicial officers should be subject to the central office could be left open. An analogy is to be found in the functions of the official guardian in Ontario.

7 If the judges of the present provincial courts are to be utilized they should be specifically designated and accredited by the Dominion as in the case of the admiralty judges.

8 The registrars and other officials should also be specially designated by, and responsible to, Dominion authority.

Substantially this means that Mr. Macdonald would place the handling of all bankruptcy proceedings in Canada under the jurisdiction of an individual, a commission, or a court to be established for the purpose of handling it. That all proceedings would be by "court or official order," and, therefore, under the complete control and direction of the official fraternity.

Canadian Business Opposed.

We do not believe that that is what the business men of Canada want. We believe that to this proposition the commercial interests of the country are unalterably opposed. Most Canadian manufacturers and wholesalers who have had their eye-teeth cut on the court procedure of the insolvency law of the province of Quebec or under the terms of the Dominion Winding-up Act know a good deal of the workings of court procedure and more of the costs and vexations attendant upon such control of liquidation proceedings than they care to remember.

We most heartily concur with Mr. Macdonald's argument that the important things in connection with any system of bankruptcy are (1) the administration of the estate, and (2) the discharge of the bankrupt. Of these, the first is very much the more vital, in that what the creditors get and what the bankrupt may have left are entirely dependent upon it.

Let Creditors Administer.

Following Mr. Macdonald's argument, he sets up the contention that in order to secure the best administration it is necessary to create a central controlling office or bankruptcy court or bankruptcy commission, with officials, for the purpose of handling bankruptcy proceedings. Our contention is that the parties best qualified to administer the estate are those most vitally interested in it; and right there we are confronted with the fact that the creditors are usually the most vitally interested. Why, then, take out of their hands the right of administration, which right they have under the bill introduced by Mr. Jacobs, and place it entirely in the hands of official authority officially controlled?

Simplicity of Procedure Essential to True Success.

Mr. Jacobs' bill provides for the utilization of existing courts in each province to deal with the original petition for bankruptcy proceedings. After the courts have adjudicated upon the question as to whether or not the debtor is a bankrupt, and have so determined him, the estate then passes into the control of the creditors and is administered under the direction of the inspectors chosen by them through the assignee or receiver (who is likewise the choice of the creditors) in a manner similar to the present procedure under the Ontario Assignments Act. After the estate has been realized upon the proposed bill provides that the costs and charges, which, for the benefit of creditor and debtor alike, have been scrutinized by interested inspectors, shall be submitted to the appointed judge of the local provincial court for his approval, and that he shall likewise decide upon the right of a bankrupt to the benefits of a discharge, basing his decision upon a report to be furnished by the trustee or receiver.

High Cost Would Fall on Creditor.

Under the proposals laid down in Mr. Macdonald's suggestions and observations it would mean the establishment of a national bankruptcy court or commission for Canada, with representatives or junior offices in each of the eight provinces and the Yukon territory. These would 'require to be established and maintained out of the proceeds of the various estimates which might go into liquidation, and the costs of inaugurating and maintaining such officialdom would unquestionably fall directly on creditors. It would mean that the power of administering insolvent estates would pass from the control of creditors, directly and vitally interested, into the hands of others, neither directly nor vitally interested. It would mean that increased costs would be charged against all estates. We do not infer that this would be done unfairly, but directly of necessity; that greater delay would result in the closing of them, and there would be the creation of official red tape that would be harmful and injurious to all classes of the commercial community. It might also mean the appointment of political partisans to positions of preferment and work, the nature of which they know nothing, and of which they have no knowledge, and it might mean, as it does mean in the United States, roguery and trickery of many and most unfortunate kinds. It would mean nothing but less in the way of dividends and more in the way of worry and vexations.

Want Equity, Promptness, Low Costs.

If our understanding of the desires of financial and commercial men are right, it is our opinion that in a bankruptcy act they want uniform legislation for all of Canada, a bill designed to meet the needs of this vast area of sparsely settled terirtory and sufficiently elastic to meet the greatly varied conditions that govern here, and one founded on a sound basis of equity rather than law. They want a bill free from the red tape and delay incident to official procedure, one that will leave the administration of the estate in the control of the creditors themselves rather than transfer it to the hands of courts or official appointees, and they want a system that can be operated at a minimum of expense.

After having gone over the Jacobs' bill carefully, we believe that it combines in a remarkable degree the remedy

for many evils attendant upon liquidation proceedings to-day; that it will produce uniformity, and that, with the control in the hands of creditors, there will be brought to the administration of its provisions that "morale" which Mr. Macdonald considers is the important factor in any measure of bankruptcy.

We believe that manufacturers, both industrial and commercial, as well as wholesalers and retailers, should put themselves strongly on record as favorable to the passage of the Bankruptcy Act as proposed by Mr. Jacobs at the last session of the House.

WINNIPEG BOARD OF TRADE

The campaign for members in the Winnipeg Board of Trade, is proceeding satisfactorily, it is stated. Vigorous efforts are being made to ensure the success of the new organization, which will be an amalgamation of many of the industrial organizations in the city. Committees in charge of securing members will be headed by Messrs. H. M. Agnew, N. J. Dinnen, C. C. Lindsay, A. R. Leonard W. J. Bland, D. W. Dingwell, F. F. Carruthers, W. McCurdy, J. H. Parkhill, Willis Argue, Fred. W. Pace, T. L. Waldon, W. P. Alsip and W. M. Desbrisay.

TO DEVELOP FINANCIAL ADVERTISING

The Financial Advertisers' Association, which is a branch of the Associated Advertisers of the World, is planning to extend its membership in Canada. At present the number of members here is comparatively small. A special Canadian section has been formed with Mr. D. McEachern, of London, Ontario, as director. Mr. McEachern intends calling the attention of financial institutions in Canada to the services offered by the association.

This association has been established for several years in the United States, and has proved of considerable value to financial institutions there. The membership fee is $12, and membership is open to banks, trust companies, mortgage loan companies and financial agents. The members receive the monthly bulletin of the association, and twice a year a portfolio consisting of samples of advertising of the various numbers. The aims include the exchange of ideas upon advertising and the maintenance of legitimate advertising.

A convention was held at San Francisco, Cal., on July 7th-11th, 1918. Many papers of interest were submitted, including the following:—Address of welcome, Hon. James K. Lynch, governor Federal Reserve Bank, Twelfth Federal Reserve District; president's address, Guy W. Cooke, Chicago, president Financial Advertisers' Association; "The F.A.A.'s Part in the Sale of the Future Issues of Liberty Bonds," John Ring, Jr., advertising manager, Mercantile Trust Company, St. Louis; "The Relation of Bank Advertising to War Finance," Edwin Bird Wilson, president, Edwin Bird Wilson, Incorporated, New York; "How You Can Increase the Sale of War Savings Stamps," Paul Pflueger, assistant cashier, Humboldt Savings Bank, San Francisco; "Business Building for Banks," Francis R. Morison, Financial Advertising Service, Cleveland, "The Making of a Trust Booklet," Claude M. Davenport, western representative, "The Financier," New York; "Building and Loan Associations," Lloyd H. Mattson, advertising manager, the Conservative Savings and Loan Association, Omaha. "The School Saving System," Philip J. Lawler, manager, School Savings Department, Bank of Italy, head office, San Francisco; "When the Banker Discovers America," Harvey A. Blodgett, president, Harvey Blodgett Company, St. Paul. McCallister, vice-president, Young & McCallister, Incorporated, Los Angeles; "Putting the 'Punch' in Newspaper Advertising," C. R. Stuart, advertising department, Bank of Italy; "A Survey of the F.A.A." (a message to take home with you), M. F. Holderness, assistant cashier, Third National Bank, St. Louis.

STOPPING PAYMENT OF CHEQUES

Advice to Stop Payment Does Not Free Drawer of Cheque From All Responsibility

BY M. L. HAYWARD, B.C.L.

If A gives B a cheque, and B presents the cheque at the bank on which it is drawn, and A has not sufficient funds to meet it, the bank, of course, has nothing more to do with the matter, but B may sue A on the cheque and enforce payment.

If A has sufficient funds in the bank, but before the cheque is presented he orders the bank to stop payment, the bank, of course, will refuse to make payment, and the parties will stand in the same position as if A had not had sufficient funds to meet the cheque. That is, the bank is under no liability, and B may collect the amount of the cheque from A.

These principles have been laid down by a leading Court in the following words:—

"The drawer of a cheque impliedly undertakes that when the cheque is duly presented the bank upon which it is drawn will pay it out of the drawer's funds in its hands, and under ordinary circumstances the drawer is not held until the cheque has been presented to the bank, and payment refused and notice of the dishonor has been given to the drawer. But this rule is not applicable where, by reason of the action of the drawer, such a presentment is useless, as in cases where there are no funds of the drawer in the bank with which to pay the cheque. And, *a fortiori*, where the bank is forbidden by the drawer to pay.

"It is true that the drawer may stop the payment of the cheque, and as between him and the bank the latter in such case pays at its peril, but such an order cannot discharge the liability of the drawer to the payee or one holding under him. Where the payment has been stopped, as above stated, the relations between the drawer and the payee become the same as if the cheque had been dishonored and notice thereof given to the drawer. And hence the effect so far as respects the drawer is to change his conditional liability to one free from this condition, and his situation is like that of a maker of a promissory note."

In this connection a case recently decided by the Massachusetts Supreme Judicial Court arose out of a rather interesting state of facts, and the case will repay a careful perusal.

Paying Teller Assumes Cheque Paid in Error.

In the case mentioned, one, Tucker, gave B a cheque on the C bank for good consideration under such circumstances as to constitute B a holder in due course for value. He endorsed the cheque and it reached the C bank through the clearing house, but, in the meantime, Tucker had given the C bank an order not to pay the cheque. Usher, the paying teller of the C bank, however, overlooked this notice, charged up the amount of the cheque to Tucker's account, and the mistake was not discovered until, by the rules of the clearing house, it was too late to return the cheque to the bank which had deposited it in the clearing house.

The amount of the cheque was then credited back to Tucker's account, and as the amount had been transferred to the bank which had deposited it in the clearing house to be paid to B, the C bank held Usher responsible for the amount. Then Usher took an assignment from the C bank of all its right, title or interest in and to the cheque, and started suit against Tucker, and the question for the decision of the Court was whether Usher could enforce against Tucker whatever right the holder of the cheque may have had, and the decision of the Court was that he could.

"The cheque never has been paid," said the Court, "either by Tucker or by anyone rightfully acting for him. Under the circumstances disclosed we think that as between Usher and Tucker the transaction by which the cheque came into Usher's possession cannot be regarded as the payment of it so as to extinguish the liability of Tucker, but as the transfer of the cheque for a valuable consideration from the then holder to Usher, the one ultimately liable for the error, conveying to him whatever right such holder at that time had."

According to a recent report from Mr. D. R. Ross, Canadian trade commissioner at Melbourne, Australia, the Australian embargo upon the import of apples from British Columbia will not be removed during the present year.

Interest Paid on the Date at Your Local Bank

No bother; no waiting for your interest. Simply call at your bank, present your coupon, and the interest is paid over the counter in cash.

No tales of woe from the mortgagor who can't pay. No foreclosure proceedings and loss of time; and no lawyers fees to eat up your earnings. Just call for your interest, it is cheerfully paid over every six months.

5½% MORTGAGE CORPORATION DEBENTURES

are issued in sums of $100 and upwards for a period of time to suit the purchaser. Nothing so simple or so safe. Thousands of people have invested their savings in these debentures without the loss of a dollar invested.

$100 invested at 5½% doubles itself in less than 13 years.

$100 saved at 3% takes 23½ years to do the same thing.

ELIMINATING LABOR WASTE

A Good Example of Increasing Labor Power Has Been Set by the State of Maryland

BY W. W. SWANSON.

The recent order-in-council imposing penalties upon able-bodied idlers, is a move in the right direction. The times are such that every man must work—or fight. There has been much recent discussion concerning the duty of the state to furnish jobs to men able to work and willing to work: and if that be accepted, even remotely in principle, it is the right of the community to force its will upon the individual who refuses to play his part in strengthening the economic life of the nation. Conscription is placing tens of thousands of Canadians upon the battle line in France. Compulsion, if all other means fail, must set the able-bodied idler at useful, productive work.

We are by no means advocating the conscription of labor. What we have in mind is the breaking up of groups of idlers who are at one and at the same time a menace to the peace and economic welfare of the community. Just over a year ago the state of Maryland placed upon its statute books an act which experience has shown to be most efficient and effective in destroying the danger to the community of the voluntarily idle.

Under this act all males beween the ages of 18 and 50, not regularly and continuously employed, were obliged to register themselves for work. Exemptions were granted to the physically unfit, to seasonal workers, to students, to apprentices and to men temporarily out of work because of disagreements with their employers. It is important to observe that neither income nor property, under the act, affords any ground for failing to register. All who can work, in the state of Maryland, must work.

Failure to register carries with it a fine of $50 and costs; and failure to take the job assigned, a penalty of $500, or six months in the common jail. It is plain that Maryland meant business when this legislation was enacted, the penalties being sufficiently stiff to impress upon the class of persons involved, the seriousness of failure to comply with the provisions of the law. After a man has registered he may be assigned to certain occupations, in a list proclaimed by the governor from time to time, for a period of six months. If no work with a private employer is available, or if the individuals concerned so elect, the men registered may be employed on state or county roads. At present the ordinary occupations include work in canneries, on farms, in hospitals, in shipyards, in box factories, or upon any essential war work. The hours and wages of labor must be identical with those in like occupations employing free labour. An important point, making for the success of the scheme, is the requiring of a bond from all private employers, covering the wages of the men assigned to them by the state.

No attempt is made to define what is involved in "regular and continuous employment," the interpretation of the clause being left to the judgment of the local magistrate. It is clear that this procedure leaves room for the exercise of sound judgment and common sense by local authorities. The motive underlying the legislation is the elimination of loafing and idling on the part of able-bodied men, and not the imposition of penalties. Employers are required to give detailed reports on the character of the work performed by the men assigned to them, including a general summary of their behavior and efficiency. It is no part of the plan to make work for lawyers or petty court cases, the underlying idea being to make the voluntarily idle work. For that reason five days are allowed, even after a summons has been issued, to permit the individual to find employment. If within that time he has secured a job, no penalty is imposed; as experience has shown that the ordinary employer will discharge any individual in his service who has been arrested and fined.

The act is enforced under a director of labor, who, it is clear, must be somewhat conversant with legal practice, with the psychology of the class of men concerned, and have the ability to arouse and direct intelligently public opinion. The state of Maryland evidently has had the good fortune to secure the services of a director of that type, supported by a staff of efficient workers; for husky idlers have practically disappeared. Most of the men formerly belonging to this class have gone to work, or have left the state. One farmer in Howard County personally informed 17 men, whom he knew to be habitual idlers, of the nature of the law. Only one failed to find work, and he was convicted and fined. Engineers engaged upon public works assert that it is now possible to get men to work by the week, who formerly thought that two or three days' work was as much as their constitutions could stand. It is reported authoritatively that the act has caused a considerable decrease in crimes of a petty type in Baltimore.

The government is to be heartily congratulated in making it possible in Canada to set the husky idler at some productive work. Let the law or its penalties be enforced.

UNITED STATES TRADE REGULATIONS

In their New England letter for the 15th July, the First National Bank of Boston give the following statement regarding trade regulations in the United States:—

"The slight irregularities growing out of the rigid regulation of the nation's foreign trade are readily being ameliorated. To facilitate the equitable distribution of all outgoing traffic, an export control committee has recently been created, consisting of members of the war department, navy department, railroad administration, shipping control committee, and traffic executives, having charge of the allied commerce. This committee will ascertain the amount of freight which must be exported for the prosecution of the war, and will decide how it can best be routed through the various ports. Greater co-operation is being developed between shippers and the war trade board since the contraband committee has begun to act upon the suggestions offered by the traders. License objections are being taken up to be remedied, and there are fewer disgruntled importers.

WORLD'S GREATEST BUFFALO HERD

Winnipeg, July 22nd.

Grand Trunk Pacific officials report that a round-up of the world's greatest buffalo herd has just been made at Wainwright Park, Alberta. The park is one of the travel features on the main line of the Grand Trunk Pacific between Winnipeg and Edmonton, and is under the administration of Mr. J. B. Harkin, commissioner of Dominion Parks.

The count of buffaloes was made by five riders, each taking a section of the reservation, which has an area of 160 square miles. The total of the herd is officially given as 3,500, but the riders had difficulty in counting all the calves, which were mixed up in the herd, and are of the opinion that the number of buffaloes in the park exceeds the figure given.

The herd has been increased since April 1st this year by not less than 615 calves. In the herd there are approximately 470 bulls and 486 cows, with the balance young stock. These figures show that the government is meeting with great success in its efforts to preserve the buffalo from the swift extinction which threatened it a few years ago. The nucleus of the present herd numbered only 402 when placed in Wainwright Park in 1909, and some 338 additional head were imported at different times, the main increase accruing from breeding.

The location chosen has proven an ideal one. There are many lakes in the park, which is securely enclosed with a high fence of wire and tamarack posts. Large quantities of excellent hay are grown in the reservation, providing ample feed for the buffaloes for the whole of the year.

In addition to the buffaloes there are in the park 100 elk, some hundreds of deer, a score or more of moose and a few antelope. A portion of the park is being fenced off for the experiment in breeding the cattalo, an animal produced by the crossing of the buffalo with domestic cattle. This experiment is being carried on under the direction of Mr. A. H. Grisdale, director of Dominion Experimental Farms, the object being to produce a strain of beef-producing animals particularly suitable to the northern regions of Canada. The buffalo differs from the domestic cattle in possessing an additional pair of ribs as well as a much larger spine, and the cattalo promises to carry an exceedingly high percentage of beef.

Salmon fishing in British Columbia is reported to be prosperous this year. The sockeye fishing season, which extends from June 20th to August 25th, promises to be one of the largest in many years.

JULY MUNICIPAL BOND SALES

Smallest Total on Record in July for the Past Ten Years—Bank Loans Increasing

The municipal bond sales in Canada during July totalled $1,415,946, compared with $10,108,696 in June and $3,814,489 in July a year ago. The July records of municipal bond sales at home for the past nine years are as follows:—

July.	Municipal bond sales in Canada.
1910	$1,536,424
1911	1,594,566
1912	1,967,376
1913	1,591,924
1914	2,180,758
1915	1,618,422
1916	1,521,525
1917	3,814,489
1918	1,415,946

Details of Sales.

The following are the details of the July sales:—

Municipality.	Rate %	Term (years).	Amount.
Saskatchewan.			
School districts	..	..	$ 52,100

QUEBEC WILL PROMOTE INDUSTRY AND TRADE

During the last few weeks the board of trade of the city of Quebec has been considering the appointment of a municipal trade commissioner with a view of attracting new industries to the city and promoting the business of industries already there. This matter is being taken up by the industrial committee of the board, of which Mr. E. Turcotte is president. Three sub-committees have also been appointed on commercial, publicity and finance matters, of which the chairmen are, respectively, Joseph Picard, E. Julien and W. H. Wiggs. The necessary money is to be raised by subscriptions from the members. The co-operation and support of other business institutions in the city, such as the Quebec Retail Association and the Builders' Association has also been secured.

The industrial committee consists of over one hundred of the leading business men of the city. *The Monetary Times* has been advised by its chairman, Mr. Turcotte, that the project is meeting with general approval, and that generous support is being granted by the business men of the city. As soon as sufficient funds have been assured to carry on a four-year campaign it is proposed to appoint an expert trade commissioner, who will make a careful study of the whole situation and endeavor to secure new industries or stimulate local enterprise. The local newspapers are also endorsing the movement.

The army and navy veterans of Calgary are considering forming a company to engage in gold mining in the vicinity of Revelstoke, B.C. A member from Revelstoke recently addressed a meeting in Calgary, pointing out some of the possibilities.

CONSCRIPTION OF INHERITANCE

A Solution is Offered in This Way to Many Financial and Social Questions

BY A. T. DRUMMOND, LL.D.

Not merely to the workers, but to everyone who gives the subject a thought, it does seem anomalous that wealth should come within the reach of only the relatively few, whilst the bulk of the people are just able to make a living, and great numbers are within a stone's throw of poverty; and that the amassing of money does not often accompany the possession of great intellect; but, apart from the added advantage which ready money or credit always will give to its possessor, is the result of the combination of opportunities with certain mental, and, occasionally, even physical, qualities, often difficult to define in the individual, but which enable the party favored with them to take advantage, in a greater or less degree, of the opportunities, and in his eagerness to accumulate wealth, sometimes to adopt methods and to take a ratio of profit which have not in them the element of fairness. Perhaps, however, few men in their race after wealth, have realized the fact that the personal initiative, energy and business methods of many corporations, firms and individuals have, as a rule, given rise to the opportunities for the accumulation of wealth afforded to every possessor of it, and that the state itself has provided the locality, the natural resources, the facilities for transportation and otherwise, and the protection which so very largely aided in attaining it. The wholesale merchant who sells cottons is dependent on the great mills in another part of the country for his piece goods, and the mills in turn on the ships and railways which bring the dyestuffs, originating at the collieries and coke ovens hundreds of miles away, and the bales of cotton grown on the plantations in semi-tropical countries where the raw product has been cultivated and ginned by black labor. And the various processes between the growing plant and the finished goods form the structure on which the merchant, by a further process of bargain and sale, proceeds to build up his fortune.

Possession of Wealth Implies a Trust.

The state and the people may therefore be said to have a direct interest in all wealth held by individuals and corporate bodies, and thus there is imposed on all these individuals and corporate bodies a trust to use this wealth not merely for their own purposes, but for the benefit of the state and the people as well. In practical experience, this trust has in the past been somewhat rarely recognized. Wealth, its possessor finds, brings freedom from the financial anxieties of the average man, and has its material enjoyments, even if it does tempt, and too generally lead to, ease, and away from the simple life, and not unseldom to a certain self appreciation. It however has its serious responsibilities, not so much like the talents which had to be increased as well as cared for, but rather as a heaven given trust, reposed in its possessor, to seek out opportunities offering themselves on every hand for the good of others, even more than advantages personal to himself. The great war is leading the people of English speaking nations to feel that humanity in its widest sense must hereafter find a deep place in their hearts, and that practical sympathy for the suffering and the oppressed, helpfulness to those less favored by birth and environment than themselves, and a fairness and kindliness to others, whatever their class or station, must now form a much larger part of their nature. This must apply with even more force to those who possess the means to carry these feelings into practical effect on even a modest scale. No man should envy another in the possession of wealth, if that wealth is in fair part devoted to the public good. The opportunities for this are numerous, whether it be in the enlargement of the universities; better educational facilities which will give to the masses greater openings for their advancement, and will broaden their point of view; improved housing for the working classes; hospitals for the sick and homes for the infirm and for the aged; practical aid for the soldiers wrecked on the battlefield, to enable them to recover their powers, and with renewed hope to take up life's work again; social reform in other lines; the prevention of disease; or in a smaller degree, the opportunities which everyone constantly meets of helping others in difficulty or distress.

There is, however, another trust attached to wealth. There are the many failures, and sometimes even wrecks in life in wealthy families, due to present luxury, and to the expectations to which inheritance gives rise. The country has a right to expect that every citizen shall be engaged in some useful calling, that will help in its development. The expectation of inheriting future wealth, however, generally takes away the incentive to definite, hard work, and lessens the energies, even when these energies are applied to useful activities. The country is always the poorer when the possessor of wealth fails to so direct his efforts, through training, that his own energy, which resulted in material success, should be reproduced, if possible in an equal, if not in a greater degree, in his sons. A precious trust is given to fathers and mothers when children are born to them, and this trust implies continuous effort to equip them mentally, morally and physically for the battle of life, until they are of an age to safely launch under their own care. It is here where the attractions of wealth so often lead to the dwarfing of initiative in the sons, and the lessening of their energies, and where the possessor of wealth can so seriously fail in his obligations to the community and to the country at large.

Conscription of Inheritance.

The building up of any successful business or enterprise implies a considerable amount of ability, which, under ordinary circumstances, would be expected to be transmitted from father to son. The son, in turn, endowed with that inherited capacity, should be able to follow in his father's footsteps, if not to even improve on the position he occupied. Frequently, however, the sons of wealthy parents do not develop that capacity which naturally they would be expected to possess. In time, they so often become men of leisure with generally but little desire to be in touch with the more aggressive efforts which would build up the nation. And the nation thus loses that active co-operation on which it could have counted from men of their implied ability, if they had not inherited wealth. From this point of view, wealth inherited, especially through successive generations, no matter in what way it is invested, has certain disadvantages to the nation, through the tendency to deterioration in ability in the families of its possessors. Associated with this is the fact that all inherited wealth in families has come to those who possess it, merely by the accident of birth, and not as a result of mental or physical toil, and thus there is a substantial reason why the country which has freely afforded the facilities for amassing it, should conscript a very much larger share of it than has hitherto been taken by the provinces in the form of what are known as death dues. The country can be regarded as a partner, as it were, in every individual business and in all corporate enterprises. Capital in any business represents much more than the capital and the brains of the individuals in it; it includes the natural resources of the country available for material, production and transportation—all active and necessary considerations in the business—and the facilities and opportunities the country furnishes for developing these, whilst the country through its operating arm, the government, would also represent the various corporations, firms and individuals who, as before pointed out, contribute by prior operations to the success of any business.

In practically carrying out conscription of inheritance, important questions would arise. The wealth may be in land, or in a business partnership, in either of which an immediate adjustment might be difficult, and yet, this would be simplified by the fact that the death of an individual necessarily results in the division of his estate, and the reorganization of his business. Again, what fair share should be taken on behalf of the country, and what should be the minimum estate values below which conscription would not be effective? These problems can be viewed from at least three standpoints: the actual needs of the government from time to time, reasonable consideration for legatees and heirs, and discouragement of a leisure class in Canada.

Certain general principles would, suggestively, underlie the working details of any government scheme for the conscription of inheritance. Whilst special bequests outside of the family would contribute to the share of the government in the same ratio as others, that share would be enlarged or diminished according to the number of heirs or legatees. Should the whole estate be left to one, or largely to one individual, the government should receive a much greater percentage of it, than if it is to be distributed among several heirs and legatees. Again, especially in the case of immediate relatives of any deceased person, the amount they receive from the estate should not be so large as to take away the incentive to definite work in some one or other of the country's varied activities. Further, as to the minimum estate value below which there would not be conscription, the

provincial governments have already established bases, experiences under which will readily afford suggestions.

Another question, however, arises. Should the government allow the income from the conscription of inheritance to be absorbed into the general revenue of the country, or should it not, with some appropriateness, devote the income, primarily, to special objects connected with the social uplift, as well as others, which, in consequence of the war and the changed conditions, it will be called on to aid. It would, for instance, lighten the grievances of labor against capital, if it knew that it was through conscription of wealth that more attractive homes, better education and larger opportunities for advancement were being made available for the working men. Certain special objects have already received the consideration of some of the governments. War pensions have been established, and aid to returned soldiers and other new settlers on the land has been resolved on. Other objects are among the possibilities, and it would be largely a question of the government being in a position to raise the needed revenue to meet them. The separation allowance made to the soldiers wives has already suggested the feasibility of widows' pensions. Old-age pensions may follow, and they have their parallel in the annual retiring allowances made to civil servants and to the army and navy; housing accommodation for the workers, following the precedents now established by the British and the United States governments, seems inevitable, if it were only for the purpose of fixing by law standards for internal and external construction which builders would be compelled to adopt; whilst guarantees against unemployment, coupled with a system of transfer from where there is a surplus of labor, to where there is a deficiency, would seem to be fair to the workers, if we would have a contented population

ADVERTISEMENTS OF OIL SECURITIES

The national vigilance committee of the Associated Advertising Clubs of the World has issued a bulletin regarding flotations of oil stocks. This bulletin reads in part as follows:—

"Oklahoma, as one of the oil fields well along in development, has been the drawing point for scores of promoters. Wyoming, Texas, Kansas and Kentucky are having much the same experience, for it is a cardinal characteristic of the stock promoter that he follows in the trail of successful ventures.

"There are few oil promotion companies that have used advertising to sell stock without abusing it. Some of them may be financed on a sound basis and have a reasonable possibility of striking oil, but in most cases ballyhoo methods are woven through their advertising in such a way that the bad condemns even the good from the standpoint of fairness to the investing public. The outstanding danger of oil stock advertising is that the promoter makes his scheme appear so plausible to the average reader.

"It is the business of stock promotion advertisers to build successes on paper and to explain away suggested possibilities of failure. They do it. To read many oil stock advertisements is to feel money trickling through your fingers toward the finish. Of course, it is known that there is no greater gamble on earth than oil, and that the failures far exceed the successes. But in reading through the advertising of a new oil stock promotion, one experiences a creeping sensation that this company—this particular company—is destined to be a winner. The reader feels it. The promoter's story about his million dollar lease and the 2 per cent. a month dividends to start immediately, is so plausible. Of course it is plausible. If the oil stock promoter did not make the reader see a million dollars through a 10 cent a share knot hole, he could not sell his prettily decorated green stock certificates. Even the certificates are plausible. The pictures of spouting oil wells and busy refineries add to the confidence first created by the advertising.

"If one could see the mental processes of an oil stock promoter as he writes his copy, a pretty definite idea as to whether the advertising is based on fact or fiction would be obtained. Now and then there is an indication that the promoter throws himself into some sort of a trance that brings an abnormal flow of words and figures."

On the [illegible]th ult., delegates from the Provincial Poultry Associations of Saskatchewan met at Regina to adopt a constitution to unite the two associations.

POSITION OF INSURANCE IN RUSSIA

Rumors have been current in Russia for some time to the effect that the Russian government intended to nationalize the insurance companies. The news has now arrived, however, that a policy of control has been decided upon, rather than a policy of actual operation. The control is to extend, we are advised, to all branches of insurance. The Council for Insurance Affairs has already sent out to all provincial councils of workers and soldiers' deputies, a circular prohibiting the requisition of property owned by the branch offices of the various insurance companies, the imposition of exorbitant taxation, etc. Among the questions which have come up is that of the state assuming the repudiated bonds held by insurance companies.

HOLDING OUR FOREIGN TRADE

Notwithstanding Canada's excess of exports of approximately a half billion for the past fiscal year, the exchange situation with the United States gives cause for some concern. The cutting down of imports, in the shape of luxuries from the United States, should aid materially in restoring normal exchange relations with that country. As long as the war continues the Dominion will be obliged to finance in large measure the purchases of the United Kingdom here, so that we cannot look for any relief in that direction. At the signing of peace, however, it will be imperatively important to maintain our favorable balance of trade with Europe to counterbalance, among other reasons, the excess of imports which will be taken from the United States.

Our first duty is to think in terms of victory, and not of peace; but nevertheless, it is necessary to prepare to meet the situation that will inevitably confront the nation at the end of the war. For the moment, Canadian industry is keyed up to the highest capacity, and is carrying a full burden. With the cessation of war orders there is grave danger of unemployment, unless preparations be made now to meet the changed conditions of post-bellum trade.

Canadian manufacturers have learned invaluable lessons in efficient production and distribution during the course of the present struggle. Labor and capital have been co-ordinated as never before in the nation's history; and our banking system has met superbly the test of war. Canadians have discovered latent powers of investment and of financial strength, which will stand them in good stead in the hard years to come. It remains to adjust the tariff along scientific lines to give Canadian industry and commerce full opportunity to hold its own with foreign competition after the signing of peace.

There is not only better discipline but abler management, than ever before, in the country's economic affairs. While it is hardly to be expected that the huge favorable balance of trade, at present enjoyed, will be maintained, nevertheless, Canadian industry will have larger opportunities for foreign expansion than ever before. Prices in Europe will be inflated for years to come, taxation heavy, and industrial equipment greatly impaired. The prolonged interruptions of European trade with South America, South Africa and the Far East should give our traders the opportunity, not only to hold their own but to increase their markets in these directions. There is no ground for believing that the national syndication of the economic activities of the great European powers will give them any advantage over the private enterprise of Canada and the United States, when normal trade relations are again restored.

Canada has won a name in war that will add to national prestige in days of peace. We have the goodwill not only of the United States and the Motherland, but of our continental allies as well. The effort being made by the United States, in co-operation with the United Kingdom, will restore shipping to its normal volume soon after the conclusion of war. The decade ending in 1914, was given over in this country to the building up of a great economic equipment, and to municipal development, especially in the west. With the tools and machinery at hand, a better disciplined and more efficient labor supply, a wider knowledge of industrial and financial enterprise, the Dominion will stand at the threshold of new opportunities.

The Public Utilities Building at London, Ont., was recently opened. This building was constructed by the workmen and staff of the Utilities Commission, and was, it is stated, entirely paid for out of earnings.

PROGRESS OF ONTARIO MUNICIPALITIES

Last Few Years Have Witnessed Slow But Steady Growth in Assessment and Population

The Bureau of Municipal Affairs for the province of Ontario has issued a municipal bulletin giving statistics of Ontario municipalities for the years 1914, 1915, 1916, and 1917. The report was prepared in May, 1918, but even at this date many of the figures for the year 1916 had not been received. In these cases the latest data available has been used. On account of the variety of methods of keeping municipal statistics, it is difficult to present them uniformly. The irregularities, however, are gradually disappearing.

The following is a summary for the whole province of the principal items of municipal statistics:—

Population:	Townships.	Villages and towns.	Cities.	Total.
1917	1,003,664	524,005	1,032,784	2,560,453
1916	1,027,220	526,162	1,026,870	2,580,252
1915	1,031,536	523,264	1,043,520	2,598,320
Assessment:	$	$	$	$
1916 ...	692,560,277	252,225,366	1,059,892,904	2,004,678,547
1915 ..	.687,372,853	248,994,738	1,038,257,494	1,974,625,085
1914	687,844,623	243,226,433	958,779,874	1,889,850,930
Municipal Taxes:				
1916	8,275,353	5,164,817	20,854,540	34,294,710
1915	7,341,456	4,619,186	20,517,584	32,478,226
1914 .	6,159,975	4,057,983	16,003,308	26,221,266
School Taxes:				
1916 ...	4,418,670	2,401,023	7,187,694	14,007,387
1915 ..	4,237,680	2,280,001	6,601,849	13,119,530
1914 ..	4,057,732	2,201,465	6,098,413	12,357,610

This total assessment above, includes the sum of $44,329,316, which is liable for school rates only, $7,651,054 being in townships, $8,669,392 in villages and towns, and $27,808,870 in the cities for 1916.

The total area valued by the assessor for purposes of taxation or exemption for 1917 was 25,405,018 acres. The area in townships was 25,056,525 acres, in villages and towns it totalled 257,248 acres, and 91,245 acres in the cities.

The above summary consists of 550 townships, 149 villages, 137 towns, 23 cities and 38 counties.

Debt and Sinking Fund.

The totals for debenture debt and sinking fund are as follows:—

Debenture Debt	Townships. $	Villages and towns $	Cities. $	Total. $
Municipal	6,290,753	28,219,974	161,577,270	196,087,997
School	2,663,173	3,822,686	23,124,156	29,610,015
Total.				
1916	8,953,926	32,042,660	184,701,426	225,698,012
1915	8,722,980	31,035,345	171,304,210	211,062,535
1914	[illegible]	[illegible]	[illegible]	191,235,214
Sinking Fund				
1916 ..	[illegible]	[illegible]	36,885,280	39,184,710
1915	[illegible]	[illegible]	[illegible]	31,866,176
1914	[illegible]	[illegible]	25,190,495	27,103,238

In some cases there is no record in municipal audits of moneys received from the sale of debentures or of the expenditure of the same for waterworks, electric light plant, schools, drainage, local improvements, etc. Probably the treasurer does not handle the moneys, and the bookkeeping is done by the local bank. The bureau has kept up a constant effort to get such missing information, without which the compilation of [illegible] cannot be completed. Notwithstanding the most diligent searches, it is just possible that some debentures [illegible] are not yet included in the tabulation [illegible] when the instalments become due.

In addition to the debt given above for local municipalities, the county municipalities have outstanding debenture debts and sinking funds as follows:—

	Municipal.	School.	Total.	Sinking fund.
1916	$5,282,821	$ 8,953	$5,291,774	$305,652
1915	4,352,534	9,670	4,362,204	336,186
1914	4,111,718	10,359	4,122,077	368,627

The main object of the assessor is to get a valuation as a basis of taxation. In some municipalities the subsidiary information to be taken as required by the Assessment Act is almost entirely neglected or filled in a perfunctory manner, and apparently nothing is revised by the council except these valuations for taxation.

In 1904 the act was amended requiring the assessor to value all exempted property, and to designate the value of the buildings apart from the land. There are yet some municipalities in which the assessor has not yet made any valuations of such properties. In many more, the assessor has failed to value the land and buildings separately, even for properties taxable. However, by persistent effort, aided by estimates by the municipal clerks, we are able to present a statement showing the value of the land and buildings taxable as well as for real property exempted by statute or by by-law for 1916, as follows:—

	Taxable Real Property,		Statutory and other Exemptions.	
	Land. $	Buildings. $	Land. $	Buildings. $
Townships ...	496,115,653	186,763,327	3,787,558	22,292,618
Villages and towns	77,571,960	147,269,786	5,348,209	32,887,079
Cities	503,054,723	426,362,601	78,476,558	106,831,652
Total	1,076,742,336	760,395,714	87,612,325	162,011,349

These totals given in the above tables are subject to revision in the annual report as soon as all returns have been received, and verified or corrected.

UNITED STATES WAR TRADE BOARD

The following regulations have been recently issued by the War Trade Board at Washington:—

No. 163—Cacao was placed upon the list of restricted imports and during the remainder of the present year an amount up to 30,000 tons might be imported. After an investigation into the stocks in the country, it was found that the existing supply, together with this 30,000 tons would be sufficient to last until June, 1919. Shipments from Mexico, however, may be brought in under license provided it is not by ocean transportation.

No. 164—Graphite crucibles were placed on the list of restricted imports. Imports of graphite had already been prohibited by a previous order, to which this order was complementary.

No. 165—Raw cotton may be exported from the United States to Portugal provided the freight rate does not exceed $9.25 per hundred pounds, gross weight, on standard bales, and $6.25 per hundred pounds, gross weight, on high density bales.

No. 166—All outstanding licenses for the importation of wool from Uruguay, Argentina and South Africa were revoked as to ocean transportation.

No. 171—The exportation of postage revenue and other stamps was permitted under license.

No. 174—Additional regulations were issued governing the sale and exportation of all caustic soda.

No. 176—Rattans and reeds were placed on the list of restricted imports. They may now be imported only from Canada or Mexico by other than ocean transportation, and also as return cargoes from convenient European or Mediterranean ports.

No. 177—Rice was added to the list of restricted imports. Licenses for the importation of rice were cancelled, except rice imported in bond for transhipment to the West Indies or Central America.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent. upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, payable on and after Tuesday, the Third Day of September next, to Shareholders of record of 31st July, 1918.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 19th July, 1918.

THE ROYAL BANK OF CANADA

DIVIDEND No. 124

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the third day of September next, to shareholders of record of 15th August.

By order of the Board,
C. E. NEILL,
General Manager.

Montreal, Que., July 16th, 1918.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 126

Notice is hereby given that a quarterly dividend of 2½ per cent., upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 3rd September, 1918, to shareholders of record at the close of business on the 17th day of August, 1918.

By order of the Board.
JOHN AIRD,
General Manager.

Toronto, 19th July, 1918.

CHANGE IN PRICE OF WHEAT

The question of increasing the maximum price of wheat has been under consideration by the Dominion Board of Grain Commissioners. It is stated that the maximum will be fixed at $2.24. This would be an increase just sufficient to absorb the increase in freight rates of 20 per cent.

Mr. Robert Magill, chairman of the board, recently consulted with representatives of the Winnipeg Grain Exchange, the Canadian millers, Toronto and Montreal boards of trade, and others interested regarding the distribution of grain among the companies navigating on the Great Lakes.

INCREASE IN CANADIAN FREIGHT RATES

Adoption of New Wage Schedule Has Made Necessary Increase in Railroad Revenue

Acting on a report prepared by the Board of Railway Commissioners, an order-in-council has been passed increasing freight rates to an amount sufficient to meet the increased operating cost imposed on the railways by the new wage schedule. The increase will average about 20 per cent.

The freight rate increases are the direct outcome of the acceptance in Canada of the McAdoo award, which applies to both government railways and railways owned by private companies.

Conformity with United States.

The railway companies, confronted with demands for increased wages, stated that they were willing to grant the increases allowed by Director-General McAdoo in dealing with the wages of railway employees in the United States. They recognized the general similarity of operating conditions in Canada and the United States, and they admitted that, in general, wage scales of railway employees in this country are similar to those in force on the other side. The railway employees are taken in their daily work from one side of the line to the other, and the brotherhoods are identical in their scope. Recognizing these facts and conditions, the government made effective in Canada the so-called McAdoo scale of wages. As a corollary, the Canadian railways insisted that the McAdoo scale of freight rates, which were deemed necessary in order to carry the increased cost of railway operation in the United States, should be adopted here.

Railways' Condition.

The condition of the Canadian railways made this result all the more certain. The earnings of the Grand Trunk in 1916 of £1,200,000 had dropped in 1917 to such an extent that there were practically **no net earnings, and no dividends on** any of the preferred stock could be or were declared. There was also a drop in the first six months of this year in the net earnings of the Canadian Pacific Railway of $6,500,000 as compared with the first six months of the last year. The deficit on the Canadian Northern was increasing, and there was no other way in which money for meeting the increased scale of wages which the men demanded could be raised.

McAdoo Increase Adopted.

By order-in-council passed under the War Measures Act, the government, after considering a report prepared by the Board of Railway Commissioners on the rate situation in Canada, has practically adopted the McAdoo increase. There are certain exceptions made in cases where it was found that the adoption of the scale would unduly limit or interfere with Canadian commerce. The export and import rates system in Canadian territory, where rates were not increased, continue to stand, and can only be increased subject to a maximum of the lowest rate or rates in American territory to or from the seaboard ports. In like manner the low value ore in the Kootenay district, which could not well stand the American increase, is held down to the stone and rubble commodity basis.

It is impossible to tell what the exact percentages of increase will be that the railroads will obtain under the McAdoo order. In all probability it will not exceed 20 per cent. The increase granted cannot add anything to the net revenues of the companies. It may fall short of meeting their increased expenses. The increased operating cost entailed by applying the McAdoo award is some $5,000,000, and in 1917, when the Canadian railways probably earned the highest rates in their history, the gross freight earnings amounted to but some $215,000,000. The government has ordered the Board of Railway Commissioners to check each month the operations of Canada's three main roads, the Canadian Pacific, the Grand Trunk and the Canadian Northern, so that if it is found that any increase is unnecessary, it may be promptly reduced to the proper figure. The board is also ordered to make a monthly report to the Cabinet covering the operation of the new tariff.

One important effect of the order will be to bring the western and eastern scale of rates more in line and remove the grounds for complaint of the westerner that he is more heavily taxed for the operation of Canadian railroads than is the easterner. In this connection it may be noted that one of the first judgments of the present chairman of the Railway Commission was to reduce the tariff of the express companies in western territory 20 per cent., leaving the rates in eastern territory as they were. This reduction was followed by a general reduction in freight rates in western territory, which was brought about by the commission's judgment in the western rate case, and the commission in 1916 increased the freight rates in eastern Canada, again bringing the scales nearer a parity.

STRENGTH OF BELLIGERENT NATIONS

The United States treasury department has made public the following:—

The entente allies—excluding Russia and including only those British dominions which are self-governing and only the United States proper—have 11,000,000 square miles of territory, 303,000,000 people, and $495,000,000,000 of national wealth.

The central powers have 1,250,000 square miles of territory, 147,000,000 people, and $134,000,000,000 of national wealth.

The entente owe an aggregate debt of $69,000,000,000, which is about 14 per cent. of their total assets. The central powers owe $37,000,000,000, or 28 per cent. of their national wealth.

MUCH DEPENDS ON CANADIAN CROPS

The Canada Food Board says: The reports as to the harvest in Canada this fall are conflicting, but it is clear that there will be need for harvest labor from the towns and cities in all the provinces. In view of the dependence of the Mother Country and allied Europe upon Canada and the United States for foodstuffs, it is to be hoped that every Canadian will consider what are the essential industries, and whether the work that each as an individual is now doing is of such supreme importance as to predominate over the vital national duty of producing foodstuffs. This duty now concentrates upon the necessity of saving the harvest of 1918. What is the reader himself, or herself, going to do about it?

Allied Europe at the beginning of this year was said to have been short 500,000,000 bushels of wheat and over 100,000,000 head of live stock. What figures like these mean may be seen by contrasting the figures of Canada's 1917 wheat crop, the total of which was 233,742,150 bushels. The total importations into allied countries of the crops of 1916-17 (ended March 31st) was 570,000,000 bushels. From last year's crop the United States had very little wheat for export, and her surplus, above normal consumption, was exhausted in December, 1917.

What about the crop of 1918? The Allies are still dependent upon North America for very large supplies of essential foodstuffs, and it is important that no part of this year's harvest be lost because of labor shortage. The new harvest is now the one supreme crisis at the door of every non-combatant in the Dominion of Canada. Substitutes for wheat have to be produced in the non-wheat-producing fields of the eastern provinces. Feed for live stock is one of the great concerns of the east. The dairy industry must be carried on to its full extent. We must ship our wheat and live as much as practicable on substitutes. With our scattered population we cannot possibly produce all the wheat that is required in spite of the vast wheat-producing possibilities of the west.

The labor supply in Canada has been depleted to the extent of nearly half a million men by the army, and further by the war industries. Farmers, themselves, have been obliged by military necessities to forsake the furrow for the trenches. Those that remain have partially to depend on assistance from the towns and cities to save this coming harvest. Those that promised to help in this work of national necessity by going upon the land, or taking the place of someone else who is better able to do so, should take their promises on the registration card literally, arrange their affairs and do what they said they were willing to do.

The International Nickel Company of Canada began to treat matte at the new refinery at Port Colborne recently. A large quantity of matte from the Copper Cliff smelter has been shipped to the refinery, and supplies of all kinds are now on hand, and one furnace is in operation.

FOOD COMMODITIES IN CANADA

Supplies of Produce in Cold Storage—Decrease in Stocks of Meat

According to the monthly report of the Cost of Living Branch of the Department of Labor, the stocks of meat in storage in July show a decrease compared with the preceding month. This is especially true in beef, and is doubtless due very largely to overseas shipment. A comparison here with last year, judging from the limited list of firms reporting then, indicate a somewhat larger supply on hand than a year ago. The quantities in each case, however, are small. In the case of pork products, all available data indicate smaller supplies than last July.

Quantities of butter, cheese and eggs, have naturally increased, since this is the time of year in which supplies of these articles are put by. Unfortunately, this increase above last month does not give as great a supply as the stocks of last summer. In the case of fish there is a substantial increase above last month, and at the same time more than last year.

The stock of the following firms is not in this month's statement:—Lockeport Cold Storage, Lockport, N.S.; Booth Fisheries Company, St. Andrews, N.B.; Gunns, Limited, Montreal, Que.; James Fish Company, Toronto, Ont.; Regina Storage & Forwarding Company, Regina, Sask.; Edmonton Cold Storage Company, Edmonton, Alta.; Calgary Storage & Cartage Company, Calgary, Alta.

Amount of Commodities in Storage.

The following is a statement of the amount of food commodities in storage July 1st, 1918:—Butter, 9,477,990 pounds; cheese, 9,283,319 pounds; eggs, 10,410,407 dozen; beef (fresh and pickled), 10,877,736 pounds; pork (fresh and pickled), 31,024,003 pounds; bacon, ham and smoked meats, 11,819,876 pounds; mutton and lamb, 826,401 pounds; fish all varieties, 22,471,496 pounds; fowl, all varieties, 417,082 pounds.

The preceding figures cover only goods reported as held in storage. To estimate the quantity of any such goods available from cold storage companies for consumption and export, ten per cent. can be added to represent goods in transit and other comparatively insignificant quantities unreported.

Goods Owned by Firms.

Goods owned by firms reporting July 1st, 1918, who also have reported July 1st, 1917, show the following comparisons:—

Commodity.	July 1st, 1917.	July 1st, 1918.	Inc. or dec.
Butter	6,122,004	5,855,720	+ 4.36
Cheese	5,974,773	5,740,092	+ 3.83
Eggs	8,539,977	7,382,350	+ 10.40
Beef (fresh and pickled)	7,050,224	9,427,053	— 33.61
Pork (fresh and pickled)	34,038,044	29,103,451	+ 15.98
Bacon, ham and smoked meats	18,583,615	10,204,604	+ 44.77
Mutton and lamb	828,402	651,618	+ 21.35
Fish, all varieties	9,157,295	11,916,348	— 30.12
Fowl, all varieties	2,500,252	297,418	+ 88.56

Comparisons of Holdings.

The following statement shows the comparisons of holdings of June 1st, 1918, with July 1st, 1918:—

Commodity.	June 1st, 1918.	July 1st, 1918.	Inc. or dec.
Butter	2,251,073	9,477,990	+320.93
Cheese	2,969,997	9,283,319	+212.88
Eggs	8,422,588	10,410,407	+ 23.60
Beef (fresh and pickled)	19,333,470	10,877,736	— 43.74
Pork (fresh and pickled)	31,218,944	31,024,003	— .63
Bacon, ham and smoked meats	14,721,221	11,819,876	— 19.71
Mutton and lamb	1,507,824	826,401	— 45.19
Fish, all varieties	16,154,305	22,471,496	+ 39.16
Fowl, all varieties	904,075	417,082	— 53.87

The British America Assurance Company has been licensed under the "Insurance Act" to transact in British Columbia the business of hail, ocean marine, inland marine, inland transportation and automobile insurance. This is in addition to fire insurance. The provincial attorney is P. R. Brown, 1112 Broad Street, Victoria.

BANK OF ENGLAND REMUNERATION

The British government has made a new agreement with the Bank of England regarding the remuneration of the latter for its services to the government. The work so far had been done on the basis of an agreement made in the year 1892. Previous to the war the remuneration of the bank amounted to £200,000 yearly, but, owing to the enormous change in the dimensions of the government business, the figure for the year 1916-17 was £1,500,000. It is understood that the reduction provided in the new agreement is less than £100,000.

GRESHAM LIFE ASSURANCE COMPANY

The business of the Gresham Life Assurance Company formerly extended over most of the civilized world, and has, therefore, suffered to some extent by free access to the central powers and their allies being cut off. In spite of this, however, the business at present being written is large and profitable. During the year 1918 the new business written amounted to £1,510,038 under 2,877 policies. This sum is an increase of £250,000 over the new business secured in 1917. The total revenue derived from premiums, interest and rents amounted to £1,223,070, which is slightly less than for the previous year, but the reports had not been fully received.

Death claims during the year amounted to £375,227 as compared with £451,307 in the previous year. Neither of these figures, of course, includes any claims which may have matured in Belgium, Austria, etc. The actual deaths are well within the actuarial expectation. The claims maturing by age amounted to £572,280, or slightly less than in 1917. The assets of the company are now £11,347,803, or about £200,000 more than at the end of 1917. Of this total, over £1,000,000 was invested in war loans, in addition to which the company has loaned to the British government securities totalling £319,000.

REVIVAL OF BUSINESS IN PRINCE RUPERT

The establishment of a branch of the shipbuilding industry in Prince Rupert, B.C., has encouraged business in that city. Up to the present time its only substantial industry has been fishing, and the extensive municipal works which had been constructed, were not based upon any substantial industrial progress.

The Dominion government has erected a large drydock and the McMullen Shipbuilding Company, of Philadelphia, has completed arrangements for the construction of steel ships. The construction of these ships will take place on land adjoining the government's drydock, and the shipbuilding equipment on the drydock will be utilized. It is expected that about 2,000 additional men will be employed at Prince Rupert upon the five steel ships of 8,000 tons each which are at present ordered there. These prospects have stimulated a demand for private residences and business quarters. About two weeks ago President Kelly, of the Grand Trunk Pacific, and a party visited the city, together with the directors, who were interested in the shipbuilding. They also visited Alaska.

Prince Rupert has a population of about 6,000, and an assessed value, excluding exemptions of about $8,000,000. The general debenture debt is large, being over $6,000,000, but most of it is represented by expenditure for municipal works. The city has, in fact, waterworks, telephones and light and power systems far in advance of its municipal development. The net debenture debt about the end of 1916 was $590,715, and the property owners' share of the local improvement debt totalled the large sum of $830,240. There is every reason to believe, therefore, that the increase in assessments and revenue which this new industry will bring to the city, will have a beneficial effect upon its finances.

The province of New Brunswick is offering for sale direct to the public $200,000 6 per cent. 20-year debentures, which are being issued for the purpose of building and repairing roads. The bonds are exempt from taxation in New Brunswick except succession duties. Principal and interest is payable at any branch of the Bank of Montreal in New Brunswick, and the Bank of Montreal at Montreal, Toronto and New York, on 15th of February and August in each year. They are dated 15th August, 1918, and are in denominations of $100, $500 and $1,000. The offering is being made at par.

A company may be formed in Victoria for the purpose of carrying on shipbuilding, in which the shipyard workers will be asked to take stock. The board of trade of the city recently considered the question and a company with a capital of, [illegible], $400,000, was proposed.

The United States now has upward of 120,000 soldiers in training in technical schools throughout the country. The courses include electrical construction, gas engine and automobile engineering, blacksmithing, plumbing and gas fitting, tool-making, cabinet work, carpentery, etc.

Monthly Income Policies a Necessity
A legacy of life insurance amounting to $100,000 was completely dissipated in seven years by faulty investments and expensive living. In another case a beneficiary squandered the proceeds of a life insurance policy amounting to $50,000 in a single year. To protect the beneficiary against inexperience in making investments, and against extravagance, the monthly income policy has been introduced, providing an automatic, safe and profitable investment of life insurance funds. Supplement your existing insurance with a monthly income policy. It can be written on the life, limited life or endowment plan. Such a policy with our disability clause incorporated is without an equal in furnishing ideal household protection. We will gladly furnish full particulars and illustrations.
The Mutual Life Assurance Co. of Canada
Waterloo Ontario

TWO OBLIGATIONS
confront every man responsible for the welfare of others.

The one is to carry Life Insurance according to his means. The second is to arrange that Life Insurance in such a way that it will be of permanent benefit to his family.

This permanent benefit may best be secured under the Monthly Income Policy issued by The Great-West Life. The beneficiary receives a regular income for twenty years, or for life, as may be arranged—paid monthly, as she has been accustomed to receive her household funds. Thus the hazard of unwise investment or loss of the money left for her support is removed.

Full details on request.

PORTLAND'S SHIPBUILDING RECORD

Pacific Port Has Become Centre for Large Wood and Steel Shipbuilding Industry

The history of shipbuilding in Portland for the past thirty months is one of remarkable achievement. Almost unknown as a shipbuilding centre in 1916, the city to-day occupies a pre-eminent position as a producer of both wood and steel vessels. Shortly after war was declared a few scattering contracts were placed with Portland constructors. So splendid was the Portland record that more and more contracts became available, with the result that to-day four immense plants are building steel vessels, while in the district seventeen yards are building ships of wood.

On July 11th, according to statistics compiled by the Chamber of Commerce, Oregon had produced twenty-six steel cargo vessels and ninety-six wood ships had been launched. Ships on the ways, under construction and awaiting launching, numbered ninety-four, of which eleven are steel ships. Unfulfilled contracts on hand in the Portland district totalled the immense sum of $200,000,000.

The development of the steel ship industry in Portland is worthy of special note. In Oregon, and directly tributary to Portland, the greatest lumber manufacturing city in the world, is a stand of commercial timber officially estimated in excess of 560,000,000,000 feet, and yet Portland has in less than three years become one of the great steel shipbuilding centres of America. This remarkable development partly is attributed to the climatic conditions which prevail. Workmen in Portland can work every day in the year. There are no extremes of heat or cold, and workers, not only in the steel and wood shipbuilding industries, but in all lines of industrial activity, produce more work in a given time than in climates not so favorable.

The statistical bureau of the Chamber of Commerce has compiled the following table, which tells in figures just what has been accomplished in the shipbuilding industry in Oregon.

Increase of Nine Hundred Per Cent. in Two Years.

Oregon Shipbuilding.

	December 10, 1916.	July 9, 1918.

The increase in rates on Canadian railways operating in New England, which was permitted by the railroad administration, has been postponed.

ONTARIO FARM CONDITIONS

Fair Hay Crop Has Been Harvested—Weather of Past Few Days Has Improved Prospects

The following is a summary of reports made by agricultural representatives to the Ontario Department of Agriculture:—

Hay is practically all cut and housed. The crop is barely an average one, but the quality is generally good, as the weather was favorable for curing. The second crop of clover has started well, but the fields now need rain. Alsike is reported to be yielding plenty of seed. Many farmers have already cut their second crop of alfalfa.

Fall wheat is turning out rather better than was expected, both as to yield and quality, although Essex reports that early threshing has found some rather soft grain. The intense heat of the past week or two has hastened the ripening of spring grains—perhaps too quickly in some instances. Considerable barley has been cut in a number of counties and is yielding heavily, although there are some complaints of loose smut. Spring wheat is coloring rapidly, and also gives good promise despite the great heat and drouth which has recently prevailed. Oats are also turning—perhaps too soon—and there is a danger of the heads being light. Buckwheat is growing very fast, and looks uncommonly well.

Peas are podding and filling. Early sown promise unusually well, but the later fields are being forced too rapidly for best results. Corn has come to its own weather, and is leaping into growth, although rain is needed for even this crop. Tomatoes also have made remarkable growth during the hot spell, and those raised for the canneries are expected to give satisfactory yields.

Late potatoes have so far been less affected by disease than was feared a few weeks ago, but the hot weather and drouth have resulted in much blight in early potatoes causing greatly decreased yields. On the whole, however, the prospects are still good for a fair yield of clean tubers.

Roots of all kinds are looking well. Beets are especially promising. A number of farmers in the county of Durham are experimenting with the production of mangel seed this year, some of which is proving to be exceedingly good.

Cherries have been a comparatively light yield. Raspberries have yielded well, but the very hot weather is shortening the season. The northern counties report a generous yield of huckleberries.

Between the hot weather, failing pastures, and the scarcity of mill feeds, live stock are hardly keeping up to condition. Cattle, generally speaking, are going on the market slowly, although Lambton reports a free movement of beef animals during the week. Between the flies and drying pastures the milk flow is decreasing. Milch cows continue in demand at from $100 to $140 each.

Many hogs are running on pasture, as feed is so scarce and dear. Prices for bacon animals range from $17.75 to $18.40 a cwt.

Requests from farmers for help have been fewer than was expected. The harvest season has been almost ideal so far and very little time has been lost. Some after-harvest plowing has been done already in Essex, although the ground was found to be rather dry and stiff for the work. A large number of threshing machines are reported to be in operation.

RAILROAD PROGRESS IN BRITISH COLUMBIA

Railroad construction is to be proceeded with immediately in two sections of British Columbia. Upon the representations of Premier Oliver to the Dominion government, the latter has decided to add 70 miles to the railroad on Vancouver Island. The British Columbia government is also proceeding with the construction of 42 miles on the main line of the Pacific Great Eastern near Clinton. This road was recently taken over by the province. It is expected that trains will be operating on the new addition before winter, as the government has the necessary material and does not anticipate any serious difficulty in securing the labor required.

On account of the shortage of orders, the Edmonton Coal Mines have been working on short time. The shortage of orders is attributed to the increasing supply of anthracite and bituminous coal arriving in Winnipeg from the United States.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Collingwood, Ont.—July 27—Shoe store of the Smith Brothers in the Carmichael block was damaged.

Edmonton, Alta.—July 23—Vacant frame building, comprising two stores at the corner of Alberta Avenue and 64th Street, was damaged. Estimated loss, $4,000.

Lindsay, Ont.—July 29—During thunderstorms lightning struck and destroyed the barns of Jas. Roach, Jr., Leslie Webster, Donovan and Neil McDonald. The house of Jos. Hill at Woodville was struck, but only slightly damaged.

Moncton, N.B.—July 26—The Humphrey's glass factory was destroyed. Estimated loss, $14,000. Insurance carried, $9,500.

Moose Jaw, Sask.—July 31—Home of N. R. Craig, on Oxford Street W., was damaged. Estimated loss, $300.

Pakenham, Ont.—July 25—Outbuildings on the farm of Wm. McNeill were damaged by lightning. Estimated loss, $3,000.

Peace River, Alta.—July 25—The Selkirk Hotel and several adjoining buildings were damaged. The losses are as follows: Selkirk rooming house and contents, owned by Mrs. Watkins, $2,500; Orr jewelry store, building owned by Fred. Underwood, loss $500, insurance $250, stock owned by E. E. Orr, loss $1,000, no insurance; Kent's harness shop, owned and occupied by Harvett Brothers as feed warehouse, loss on building $500, no insurance; Harvett's grocery, building owned by A. Steele, loss $2,500, insurance $500; stock by Harvett Brothers, loss $6,000, insurance $2,000.

Preston, Ont.—July 26—The Nispel block, King Street, was damaged. Caused by defective wiring. Estimated loss, $10,000.

St. George de Windsor, Que.—July 24—The Canadian Explosives Company's plant and three adjoining buildings were damaged.

St. Vital, Que.—July 28—Home of Mrs. J. Wilding was damaged. Estimated loss, $600.

Thurlow, Ont.—July 29—Barn of George Hall, containing season's hay crop and some farm implements, was destroyed by lightning.

Toronto, Ont.—July 22—A coal shed owned by the Connell Coal Co., at the foot of Bathurst Street, was totally destroyed. The loss is estimated at $12,000, which includes the structure and machinery.

July 28—Home of Wm. Lyons, 48 Beech Avenue, was damaged. Caused by mice nibbling matches. Estimated loss, $100. The Canadian Pacific Railway siding at the Old Fort, and 500 tons of hay were damaged. Estimated loss, $400. Gough's Pavilion on the Humber, near Bloor Street, was destroyed.

July 29—Two sheds in the rear of Adams Leather Company, King Street, were destroyed. Estimated loss, $300.

Waterloo, Ont.—July 24—The gas plant of the Light Commission was damaged.

SASKATCHEWAN'S FIRE LOSS

Property to the value of $1,252,34[illegible], was destroyed, 23 people met their death and ten more were severely injured as the result of fires in Saskatchewan during the first six months of 1918, according to the half-yearly report issued recently by A. E. Fisher, provincial fire commissioner.

The property loss is 5[illegible] per cent. greater than during the corresponding period of last year, when improvements and chattels to the value of $[illegible] were destroyed. Fire was responsible for a per capita loss in that province during the first half of the year of $2.[illegible] compared with a loss of $[illegible] per head of population for the entire Dominion for the whole of last year.

The republic of France has issued a writ in the Admiralty court at Halifax against the Belgian relief steamer "Imo," for $2,000,000. This is claimed to be the value of the cargo of the French munitions ship "Mont Blanc," which exploded in the harbor on November 6th, 1917. A counter-claim has been lodged by the owners of the "Imo," and it is not yet known when the case will be considered.

GUARANTY TRUST COMPANY OF NEW YORK

Among the great financial institutions of the United States must be included the Guaranty Trust Company of New York, which has resources totalling the enormous sum of $697,040,585. The amount held on deposit is $563,768,442, and the company's capital is $25,000,000. The reserve is also $25,000,000. This company maintains offices in the principal centres of the world and handles a large foreign exchange business. For instance, at the present time, it is practically the only medium through which funds may be transmitted direct from the American continent to or from Petrograd. Among its other activities the Guaranty Trust Company has published a large number of pamphlets dealing with the United States, its trade and finances. These are issued semi-monthly and contain interesting information.

CITY OF PRINCE ALBERT FINANCES

The city of Prince Albert, Sask., failed to provide funds in London, England, for the payment of interest on bonds, which was due on July 1st. The particular issues in question were sold in 1913 in London, and principal and interest are payable there. The first is for £102,700 at 4½ per cent., and the second is for £200,000 at 5 per cent. Coupons for payment when presented at the bank were returned marked "no funds."

For some months past the city's finances have been in serious condition and the council has been endeavoring to come to an arrangement with the bond holders. The latter, however, are confident that the municipality will be able to meet its obligations, and will exert every effort to see that this is done. The main cause of the difficulty is said to be the expenditure of over £200,000 on the scheme for developing hydro-electric power at La Colle Falls. This scheme has been abandoned and produces no revenue. The population has also declined somewhat of late. Among the suggestion made has been that the Saskatchewan government should lend £10,000 a year for a few years at a low rate of interest, and that debenture holders be asked to agree to the suspension of sinking fund payments for a similar period pending the reorganization of the finances.

TORONTO TAX BILLS ARE WELL MET

Out of tax bills totalling $20,267,727 of the city of Toronto, 59 per cent., or $11,031,828, have been paid in on the first instalment. The taxes are payable in three instalments, 47.92 per cent. being due on June 14th, 33.80 per cent. on August 14th, and 18.28 per cent. on October 14th. The payments are, therefore, in excess of the total required, which is, of course, accounted for by the fact that many taxpayers have paid their taxes in full. It is noteworthy, however, that the proportion paid is larger than last year. This is encouraging in view of the fact that the rate was considerably increased this year and points to a generally prosperous condition throughout the city, as well as an appreciation of the discount allowed, which amounts to about 7 per cent. per annum on the prepayment of the second and third instalments.

The overdue taxes of the city now amount to $2,213,000, in lieu of which the city has found it necessary to borrow. In making his report, the commissioner of finance, Mr. Thomas Bradshaw, comments on this point as follows:—

"Under the present assessment act, property cannot be brought to sale for arrears of taxes until between four and five years after default has taken place. By that time the arrears have accumulated with interest and costs to such a formidable sum that there is a tendency for the owner to lose heart, and not infrequently he is forced to part with his property. It is believed that it would be in the interests of delinquent taxpayers, and the city generally, if the act were so amended that it would be impossible for more than one year's taxes to be in arrears. As the growth of the city proceeds, prompt payment of its revenue from taxes becomes essential. Yet the amount in arrears is assuming greater proportions, the number of delinquent taxpayers is steadily increasing, and the volume of clerical work entailed is becoming very heavy, so that unless progressive methods are adopted, there is the possibility of a situation arising which may prove embarrassing. It is, therefore, suggested that representation be made to the provincial assessment commission, which, it is understood, is to deliberate this fall, that legislation be enacted which will permit the city to facilitate the collection of overdue taxes."

Should Gold-Mining Be Assisted?

Unchanging Price and Increase in Expenses Has Placed the Industry in a Peculiar Position—Government Assistance is Proposed—Encouragement Would Facilitate Production and Therefore Lower Price—Action Would Have to Be in Co-operation With Other Governments

GOLD-MINING has experienced, together with other industries, the very rapid increase in expenses of production since 1914. The price of the product in this industry, however, is fixed, and as expenses have been growing, the margin of profit has been continually decreasing, until in the case of some companies it has entirely disappeared. In such cases it has been found necessary to discontinue operations. There has arisen, therefore, an agitation for government assistance to gold-mining, either in the form of a bonus or by the removal of some of the burdens which the industry shares with other manufacturing and mining enterprises.

The peculiar position of gold-mining is generally recognized. On its technical side it does not differ from any other mining industry. The economic position of the product, however, is peculiar as regards the way in which it is exchanged for other commodities. Gold has a considerable use on account of its physical and chemical properties, but by far its greatest importance lies in its use as money. The reasons for this need not be entered into here, but it may be stated that gold has been adopted as a medium of exchange by an independent course of evolution in different countries in the world. As money, it is a measure of value of other commodities, the values of which are expressed in quantities of gold. Changes in the system of coinage do not effect this, as in every case the real value is primarily the quantity of gold contained in the coins. As a commodity increases in value, therefore, it requires an increased quantity of gold to purchase it, which is merely another way of saying that its price is raised. If gold increases in value, on the other hand, it will require less money to purchase the commodity, that is its price is lower. A change in the value of gold accordingly is of more significance than a change in the value of any other commodity, as it causes a change in the price of everything which may be exchanged for gold, whereas, in the case of an ordinary article, a change in its value is merely reflected in its own price. An increase in quantity of gold will bring about a general rise in prices, as an increase in supply means a fall in exchange value. This process has been going on more or less regularly since 1896. Since 1914, moreover, this natural rise in price has been assisted through a growing scarcity of labor, which has been equally effective in raising the cost of production of practically all articles. The same increase in cost has, of course, been felt in the gold industry itself. At present only the companies which were formerly making very large profits are able to continue successful operations at all, and those which were mining low-grade ores on a small margin of profit, are now making nothing at all.

A short time ago, Mr. McAdoo, secretary of the United States Treasury, said: "I fully appreciate that with rising cost of raw material and labor and with a fixed value for their output, the gold miners of the world are facing difficulties. I should be sorry, however, if for this reason there were any relaxation in the effort to produce gold. At no time has this country so much required the largest possible production of gold as at the present. Next to food and ammunition, gold is one of the most-needed war essentials. The man or the community that maintains or increases the production of gold in the face of difficulty and discouragement is performing a patriotic service, no less than the more obvious but not less useful services that are more in the public eye."

Expressions such as these have been regarded as the official stamp of approval upon the gold-mining industry, and this impression was recently confirmed by an announcement from Washington on July 20th that the War Industries Board had listed gold-mining as an essential industry. This action, which was taken at the request of the Treasury Department, gives to the industry all reasonable priority on materials and supplies used in the production of gold. This does not, however, mean positive assistance on the part of the government such as is being urged by the gold-mining interests and by brokers who specialize in securities of this kind. Early in July, a meeting was held in London, England, of the chief representatives of gold-mining in the British Empire, the purpose of which was to formulate and submit their case with regard to the value received for their product from the government. It is pointed out that the production of gold has fallen off enormously during the past few years. In Canada some encouragement was felt by the gold-mining interests as the result of a request from Sir Thomas White that the companies should make a definite recommendation as to what they considered the most feasible form in which the desired assistance should be given. While no announcement has been made of the result of these negotiations the general opinion is that the most practicable form of assistance would be the removal of the customs duty upon the machinery supplies used in the production of gold. It is also suggested that gold mines might be exempted from the war profits tax act and the income tax act and any other war taxation which is imposed upon them by governments or municipalities.

In support of the argument it is urged that gold is essential to the conduct of the war and the resumption of normal industry and trade after it, as it is the basis of our present and future credit. The output, it is said, must be maintained. In considering these arguments it must be remembered that the gold supply does not depend upon the production from year to year as is the case with commodities such as foodstuffs and textiles, and to a lesser degree with the other commodities. It is quite inconceivable that production of gold should cease as there are some of the more profitable mines which can continue to produce even under more adverse circumstances. The effect of the decrease in production will, therefore, be to lessen the supply of available gold in relation to the supply of other commodities with the result that prices will be kept down. In view of the fact that there is a shortage of the principal articles of food and clothing and of iron and steel and other commodities essential to industry, the shortage in the gold output will be a corresponding phenomena, the result of which will be greater steadiness in prices than would be the case if production of gold went on as usual. To bonus its production or to encourage it by some similar act, therefore, would enable it to be put on the market more cheaply. Greater quantities of it would be produced and its supply relatively to other commodities would be increased. Prices would soar still further and the reaction would be that costs of production would be artificially increased through the assistance to the gold-mining industry. There is, of course, no question that gold-mining itself would benefit as the entire bonus would accrue to it, but only a part of the cost would be sustained by it. There appears to be, therefore, no reason for giving special encouragement to gold-mining. In fact, it may be fully expected that after several years of decreased output, the available supply of gold will be too small to cope with the demand, and there will be a tendency, therefore, for prices to fall again. This may be still further accentuated at the close of the war through the existence of a large supply of labor, declining wages, and costs falling through other causes.

Dr. Adam Shortt has, as is well known, made a careful study of this question and about two years ago delivered an address regarding it at the annual meeting of the Canadian Mining Institute. This was about the period when the effects of rising costs were being first experienced, and the present movement towards government assistance was commencing. The conclusion of Dr. Shortt's address was that it would be unwise to grant assistance of this kind to the industry. The same conditions still exist only in a more critical form at the present time, and in a recent statement to *The Monetary Times* Dr. Shortt expresses his views as follows:—

"Canada has to meet her international obligations by exporting either ordinary goods, gold, or securities; the latter being simply deferred payment. As between goods and gold, which are the ultimate payment, we should require to export gold only if we could not sell other goods at equal or greater profit. Assuming that we could increase the output of either general products or gold, according as we turned our energies to one or the other, and this is our actual situation, the only question to be considered is, whether, for a given outlay of our time, labor and capital, we can produce more value in general exportable goods or in gold. If in the shape of general products, such as food, metals (other than gold) transportation service, and the munitions of war, raw or manufactured, then it would obviously pay us to supply these things directly, instead of purchasing many of them abroad, and devoting more of our energies to mining gold in order to send it abroad in exchange for the required goods. But if we can produce gold more cheaply than the goods required for the war, by all means let us concentrate our labor and capital on the mining of gold, and with it buy from others the articles required for the war and which they can produce more economically than ourselves.

"Now, whether gold or goods may be the more profitable product for Canada, can be settled very readily, because gold itself is the standard of value and all prices and exchanges are expressed in it. If, therefore, prices are falling, it means that we have to give more and more goods for the same unit of gold, say, a dollar, or a pound sterling. In such a case it will obviously pay us to produce gold rather than goods, because we can get more goods for less outlay of national energy in labor and capital. If, on the contrary, prices have risen during the war, it means that we have to give more and more units of gold for the same quantity of goods. In such a case it will be most unprofitable, and therefore unwise, to divert our labor and capital to the production of that which is going down in the scale of values, instead of producing directly the goods which we require and which are going up in value, such as food of all kinds, copper, iron and other metals, ships and equipment of transportation generally, and all the multifarious munitions of war. If we produce enough of these articles, which have such a ready sale at high prices both at home and abroad, our exchanges will take care of themselves and we shall not be called upon for gold; we may even have to take gold. But even if we are not producing enough of these high-priced articles to meet our exchanges, how much less shall we be able to meet them by withdrawing capital and labor from the more valuable lines and directing them to the mining of gold, which, as all the price lists show, has relatively declined in value, in many cases by over 50 per cent.

DECREASE IN CUSTOMS RECEIPTS

A decrease of $4,875,864 in the customs receipts of Canada for the first four months of the fiscal year, as compared with the same period in 1917, is shown by the monthly statement issued from the customs department at Ottawa on July 31st. For the four months ended July 31st, the total receipts were $50,072,983, while on July 31st, 1917, they were $54,948,847. The decrease for the month of July as compared with July, 1917, is $684,963. During July, 1917, the customs receipts totalled $14,261,643, while for July in the present year the total was $13,584,680.

CANADIAN CAR AND FOUNDRY COMPANY'S VERDICT

On August 5th, Judge J. M. Mayer awarded the Canadian Car and Foundry Company, Limited and the Recording and Computing Machines Company, a verdict of $1,500,000 with interest, against the American Can Company on contracts for munitions for the Imperial Russian Government. The latter admitted owing the money to someone, but maintained that it could not safely pay the plaintiffs because it might be subjected to a later judgment secured by some Russian government.

JULY FIRE LOSSES

Five Business Sections Destroyed Last Month—Many Large Fires Reported

The Monetary Times' estimate of Canada's fire loss during July, 1918, is $3,369,684, compared with the June loss of $3,080,982 and $1,101,734 for July 1917. The following is the estimate of the July losses:—

Fires exceeding $10,000	$2,859,500
Small fires reported	70,660
Estimate for unreported fires	439,524
Total	$3,369,684

The Monetary Times' record of the past three years and this year to date, shows the following monthly losses:—

	1915.	1916.	1917.	1918.
January	$ 1,249,886	$ 1,649,217	$ 1,918,660	$ 2,688,556
February	1,019,556	3,275,600	2,009,953	2,243,762
March	1,632,696	1,406,501	2,050,650	1,682,286
April	1,463,747	1,460,437	1,317,714	3,240,187
May	881,855	1,850,205	1,163,110	3,570,014

The fires reported in July at which the losses amounted to $10,000 and over were:—

Little Current, Ont., July 2, sawmill and box factory of the Collins Inlet Lumber Company, $20,000.

Vancouver, B.C., July 2, premises of W. H. O'Neill & Company, $40,000.

Campbell River, B.C., July 5, property of the International Lumber Company, $70,000.

Graham, Ont., July 8, business section of the town, $700,000.

Grimsby Beach, Ont., July 3, the Beach Inn, $25,000.

Montreal, Que., July 8, Ontario Skating Rink and adjoining buildings, $120,000.

Port Credit, Ont., July 4, plant of the St. Lawrence Starch Company, $100,000.

Vancouver, B.C., July 5, Eburne saw mills, $75,000.

Windsor Mills, Que., July 6, Windsor Mills powder factory, $60,000.

Winnipeg, Man., July 8, Macock & Toms Fruit and Produce Company's warehouse, $30,000.

Cardston, Alta., July 1, O.K. livery barns, $15,000.

Drummondville, Que., July 5, premises of the Robertson and Watkins Company, $25.000,

Ladner, B.C., July 6, horse shed and eighteen dogs on the Delta Agriculture Association Grounds, $10,000.

Montreal, Que., July 6, coal and wood yard of Joseph Juteau, $10,000.

Pembroke, Ont., July 15, large section of the town, $900,000.

Toronto, Ont., July 14, warehouse of Sanderson, Pearcy & Company, $150,000.

Midland, Ont., Crowland Hotel, $10,000.

Thorold, Ont., July 21, plant of the Peerless Pulp Company, $200,000.

Van Buren, N.B., July 14, Allendale mill, $150,000.

Moncton, N.B., July 26, Humphrey's glass factory, $14,000.

Peace River, Alta., July 25, small part of town, $13,500.

Preston, Ont., July 26, the Nispel Block, $30,000.

Toronto, Ont., July 22, coal shed of the Connell Coal Co., $12,000.

Tillsonburg, Ont., July 30, Waterworks tower, $50,000.

Among the structures damaged or destroyed last month were:—Logging camp, 1; barns, 4; business blocks, 5; rink, 1; hotels, 3; ice houses, 4; residences, 12; business buildings, 4; plants, 4; factories, 3; automobile, 1; sawmills, 2; mill, 1; warehouses, 2; stable, 1; livery barns, 2; horse shed, 1; coal yard, 1; coal shed, 1; stores, 6; vacant building, 1; theatre 1.

Among the causes last month were:—Defective wiring, 3; careless smoking, 2; incendiarism, 1; spark from chimney, 1; lighted cigarette, 1; fire from forest, 1; ignition of rubbish near oil tank, 1; back-firing of engine, 1; struck by lightning, 6.

The following is a list of fires at which fatalities occurred last month:—

St. Catharines, Ont., July 1.	Clothing caught fire from burning grass	1
Blenheim Ont., July 6	While using gasoline for cleaning	1
Peace River, Alta., July 25	Trapped in burning hotel.	4
Total		6

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during July, 1918, as compared with previous returns:—

	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.

CITY OF SHERBROOKE FINANCES

For the year ended December 31st, 1917, the total receipts as shown by the statements of the city treasurer, were $548,233, which total includes $38,410 of a balance on hand at the end of the previous year. The following is a summary of the receipts:—

Taxes	$207.562
Licenses	17,910
Sundries	154,742
Accounts receivable	87.320
Departments	35,286
Balance from 1916	38,410
Total	$531.230

The expenditure was as follows:—

Departments	$112,471
Grants	18,300
Sundries	21,173
Bonuses	967
Interest	30.522
Capital	49,514
Accounts receivable	101,067
Accounts payable	96,860
Sinking fund	56,170
Bonds	25,000
Profit and loss account	3,048
Due waterworks	10,599
Cash	6,536
Total	$541.233

The growth of the city as shown by totals included in the report has been sound and continuous. In 1916 the population was 20.475, and in 1917, 23,210, an increase of almost 3.000. The assessment during the year increased from $10,500,120 to $10,804,655. The city of Sherbrooke is one of the most substantial in the province, being surrounded by a good agricultural district and possessing many industries of a substantial nature.

Building permits for the month of July, this year, for Welland totalled $100,545, compared with $16,540 in July last year. The total for the year to July 31st now amounts to $373,984, compared with $172,265 for the corresponding period last year.

PERSONAL NOTES

Mr. G. H. Wood has been appointed chairman of the Ontario committee for the coming Victory Loan campaign.

Mr. J. K. McGuire, who has been in the head office of the Sterling Bank of Canada, has been appointed manager of their Palmerston branch.

Mr. G. Murgatroyd has been appointed assistant engineer of the Montreal division of the Grand Trunk Railway system, with headquarters at Montreal.

Mr. J. T. North has become secretary of the Great North Insurance Company of Calgary, Alta., in succession to the late Mr. A. H. Miller, who died on June 17th, 1918.

Mr. J. W. Mitchell, vice-president of the Dominion Securities Corporation, Toronto, has been appointed chairman of the committee in charge of the coming Victory Loan campaign in Toronto.

Mr. W. J. Whiteside, publicity agent of the Canadian Northern Railway Company, left on the 6th inst. for the west, in order to secure first-hand information regarding the crop prospects in the prairie provinces.

Mr. William McLeish, of 341 Sunnyside Avenue, Toronto, left recently for Victoria, B.C., where he will take over the management of the British Columbia branch of the Great West Permanent Loan Company.

Mr. S. J. Pipkin, the general manager of the Atlas Assurance Company, has resigned the position of chief executive officer of his company and accepted a seat on the board of directors. Mr. Pipkin has had 52 years of business life and has been at the head of his company for 34 years.

Mr. J. G. Feltus, who, for the past two years has been investigating deputy of the fire commissioner's office for the province of Saskatchewan, has resigned, to become claims adjuster for the western department of the United States Fidelity and Guaranty Company, with head office in Winnipeg.

Mr. C. J. Pierce, has been appointed general agent of the freight department of the Grand Trunk Railway system in charge of traffic to and from points in the New England States. Mr. Pierce will continue to act as manager of the National Despatch-Great Eastern line, in respect to the business that was handled prior to June 1st.

Mr. Clement Robertson, for some years assistant superintendent of the Dominion Life Assurance Company, has been appointed superintendent of agencies of that company. Mr. Robertson's early training was in the Scottish Life Assurance Company, in Glasgow, Scotland; thereafter he was for 12 years in the head office of the Canada Life and inspector for the Great West Life in British Columbia and Alberta.

Mr. James A. Gray, Jr., treasurer of the Wachovia Bank and Trust Company, has been elected president of the North Carolina Bankers' Association. Mr. Gray, in addition to being the youngest state president of the North Carolina Bankers' Association, is serving effectively in the State Senate as chairman of the finance committee, and lending the weight of his influence to the industrial development of North Carolina.

PROTEST ON MANITOBA AWARD WITHDRAWN

When the Oxford Securities Company of Toronto discovered [illegible] that the $[illegible] province of Manitoba bond issue had been awarded at a figure less than their tender, they immediately entered a protest. It developed that the wire containing their tender had been handed to the Telegraph Company in Toronto on Friday evening, the 26th ult., but had not reached the provincial treasurer by noon the next day, at which time the tenders were opened. Since the Manitoba government was, therefore, not at fault, the protest was withdrawn. The Oxford Securities Corporation, however, has its case still in the hands of its legal advisers, and states that further action may be taken against the Telegraph Company.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brantford, Ont.—August 7—The Waddell preserving plant was damaged. Cause believed to be of incendiary origin. Estimated loss, $10,000.

Brockville, Ont.—August 6—The house and barns belonging to Hiram Coville, Union Grove Street, near Algonquin, with all their contents, were destroyed. Caused by a defective chimney. The loss is partly covered by insurance.

Clifford, Ont.—August 1—The residences of A. McPhail and Mrs. Fraser, together with four frame stables and sheds, were destroyed. The estimated loss is $1,000, with some insurance.

Cobalt, Ont.—August 4—Four small stores were destroyed. The aerial tramway, over which a considerable quantity of Nipissing mine ore is transported to the mill, was put out of action by fire from the stores. Estimated loss, $40,000.

Earlscourt, Ont.—August 6—Building of the Harris Abattoir was damaged. Estimated loss, $100.

Edmonton, Alta.—July 26—Vacant frame building on the corner of 64th Street and Albert Avenue, owned by R. G. Montgomery, of Winnipeg, was damaged. Estimated loss, $500.

Elmira, Ont.—August 6—The O'Donnell Hotel and several adjacent buildings were damaged. Estimated loss, $35,000.

Elzevir, Ont.—August 5—Stable, containing four horses, three buggies and a quantity of hay, was destroyed.

Hamilton, Ont.—August 3—Four frame sheds and one automobile at the rear of 126 Cathcart Street were damaged. Estimated loss, $1,000.

August 6—Premises of D. A. Bredner, Limited, Burlington Street East, were damaged. Estimated loss, $1,500.

Jaffa, Ont.—July 31—Residence owned by D. Teeple and occupied by H. Teeple was damaged. Caused by defective stove. Estimated loss, $3,500.

London, Ont.—August 2—Store of the Cowan Hardware Company was damaged. Estimated loss, $10,000.

Montreal, Que.—August 5—Plant of the Montreal Biscuit Company, the public bath and thirty dwellings were destroyed. Estimated loss, $500,000.

Palmerston, Ont.—August 6—Aaron Walton's fine bank barn on the Burwell line, Arthur, was destroyed by lightning. His stock of hay and implements were also consumed.

Port Union, Ont.—August 4—Home and poultry houses of Pte. W. Hodson were destroyed.

Simcoe, Ont.—July 30—Residence of Lemon Sovereen was destroyed by lightning.

St. Mary's, Ont.—August 5—Grocery store of W. R. Butcher was damaged.

Tillsonburg, Ont.—July 30—The waterworks tower was destroyed. Estimated loss, $50,000.

Toronto, Ont.—August 7—Tent at the rear of 33 Cavell Avenue was damaged. Estimated loss, $25.

West Oxford, Ont.—August 6—Barn, containing 500 bushels of barley, on the farm of Charles Merrill was destroyed by lightning.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Marpole, B.C.—July 5—Sawmill and lumber of the Eburne Sawmills, Limited, was destroyed. Estimated damage on stock, $10,000; on building, $55,307. Insurance was carried in the Lumbermen's Indemnity Exchange to the amount of $9,013 on stock and $48,405 on buildings and machinery.

GREATER WINNIPEG WATER DEBENTURES

Another $1,000,000 in debentures will be issued by the Greater Winnipeg Water District, according to the decision reached by the board at a meeting on July 26th. This will be the second million of the $4,000,000 which the district has been authorized to raise.

CHEAP MONEY FOR MUNICIPALITIES

The proposal of the Ontario government to furnish funds up to a total of $2,000,000 to municipalities for the purpose of providing housing facilities will create a new relation between the provincial government and the municipalities within it. The province offers to lend money to municipalities at 5 per cent., which may be used to meet one-quarter of the expenditure, the municipality itself being required to furnish the other three-quarters. Money at 5 per cent. looks attractive to municipalities at the present time, as this is much below the current rate, even for provincial borrowings. The fact, however, that the larger portion of the expenditure would have to be provided by the municipalities themselves will no doubt deter most municipalities from taking very much action along this line.

This proposal recalls transactions of a similar nature in Ontario which took place over fifty years ago under the authority of the Municipal Loan Fund Acts of 1853 and 1859. The act of the former year authorized the government of the then province of Canada to loan money to municipalities for public works and other improvements at 5 per cent. The province could at that time borrow at less than a 5 per cent. basis, and the difference was intended to pay the cost of administration. The purpose of the act was to provide a greater supply of money and at cheaper rates than the municipalities could secure upon their individual credit. There was no limit placed to the total to be provided under the act. Accordingly, the act of 1859, which extended the privilege to Lower Canada, limited the total of £1,500,000 each, or over $14,000,000 altogether. In 1867, just fourteen years after the original act was passed, the municipalities of Upper Canada had borrowed from the province a total of $7,400,000, or almost their limit, while Lower Canada had secured $2,428,140. What is more significant, however, is the fact that the Upper Canada municipalities were in arrears of interest to the amount of $3,517,018, and those of Lower Canada to the amount of $782,735. With the utmost confidence in their investments, they had sunk large sums in railroads, both directly through bonuses to roads and through subscriptions to stock, and had also spent large sums in building highways. The counties of Lanark and Renfrew were debited with $800,000, the city of Brantford with the sum of $400,000, Cobalt $500,000, and Port Hope with the comparatively enormous sum of $680,000. The investments had not resulted as expected, and many of the municipalities were quite unable to pay the interest. The result was that in some cases the debts had to be wiped off the books of the province.

The present case, however, is different, as the total is smaller, not only absolutely, but also in relation to the wealth and assets of the municipalities of Ontario. Moreover, in order to take advantage of it, they would have to borrow three times as much at current rates of from 6 to 8 per cent., so that the average cost of the money would in most cases be largely in excess of 6 per cent. This side of the question is one which has held up practically all the municipalities who were considering taking steps in the direction of building operations. In addition, it is not likely that any municipality would engage in operations of this kind, even were large sums available at a low rate of interest. The conclusion, therefore, seems to be that the measure of the Ontario government provides no material assistance, and it is probably just as well that this is the case, as Ontario towns and cities have not yet demonstrated their ability to handle industrial operations with economy. The mayor of Toronto has made suggestions along sounder lines, namely, the removal of building restrictions imposed during years when a higher standard of living accommodation was conceived to be possible and desirable, and also that every encouragement of this kind be given to the provision of housing accommodations through private means.

ECONOMY IN WAR FINANCES

Of interest to all Canadians, and more especially to the Dominion Department of Finance, is the policy of the United States Treasury Department in having its Liberty Loan bonds engraved and printed before they are offered for sale. September 28th has been mentioned as the probable opening date of the fourth Liberty Loan campaign, and it is expected that it will extend over a period of three weeks. The amount of the fourth loan will be $6,000,000,000, and possibly more, and the interest rate will be 4¼ per cent. On July 17th the Treasury Department announced that the bonds for this loan were being turned out by the thousands every day, complete in every way except that space had been left on each bond for the insertion of the exact terms. It is intended that a sufficient number of the bonds will be ready to make possible the immediate delivery of all bonds of the fourth loan as soon as payment in full is made.

Great inconvenience was caused in Canada through the method of issuing the bonds of the Victory Loan. The subscriber received, first of all, the receipt of the bank to which he paid his money, which receipt was then exchanged for a temporary certificate of the Dominion Government, which had again to be exchanged for the definitive bond. Unexpected delay was met with on account of the unprecedented size of the issue, and the result was that on June 1st, when the first semi-annual payment was due, many exchanges had not yet been completed. The temporary certificates did not carry coupons for interest, and many holders had to present them and receive the interest payment direct. There were very few who raised any serious objection to these processes, but a certain amount of annoyance was nevertheless felt by all. A similar method would not, we hope, seriously hinder the success of our second Victory Loan, but it is certain that the announcement that bonds may be secured immediately upon payment in full will be welcome news to all prospective purchasers. The elimination of expense, moreover, is desirable, and any reduction in the cost of engraving and printing will reduce by so much the expenses of the war loan campaign.

LEGAL DECISION OF INTEREST TO CANADIAN COMPANIES

A short time ago an important decision was handed out by the Appellate Division of the New York State Supreme Court to the effect that a taxicab company operating in a city is a common carrier. The decision was given in the case of Anderson vs. the Fidelity and Casualty Company, of New York. It stated that the vehicles of a company of this kind are public conveyances, and that the holder of an accident insurance policy injured while riding in a taxicab is entitled to double indemnity under the terms of the instrument, because he was injured while on a public conveyance provided by a common carrier for passenger service.

This decision will unquestionably become unwritten law within the State of New York. It is, however, of interest to companies operating not only through the other States of the Union, but also in Canada. The question is merely one of definition, and, therefore, a decision given in any other state or province would undoubtedly be influenced by the decision of the New York Supreme Court. The point at issue is one which has given continual trouble to accident companies, and any authoritative decision which would clear up the point would be welcome. A double indemnity clause is included in practically all accident policies. In some cases, of course, the policy is extended to injury sustained while riding in a private conveyance, and here the decision will not have any effect. In the majority of cases, however, it would mean that injury sustained while riding in a taxicab would be entitled to indemnity, whereas it has not in the past been the practice of companies to grant indemnity for accidents of this kind. One prominent insurance man has pointed out to *The Monetary Times* that there are really two definitions involved: the one is the definition of the term "common carrier," and the other of the term "public conveyance." The New York decision, however, appears to apply to the clause as a whole, and, therefore, decides that a taxicab is not only a common carrier, but also a public conveyance.

INFORMATION FROM APPLICANTS FOR LIFE INSURANCE

With a view to securing more complete information to cover the unusual circumstances of the present time, the Canada Life Assurance Company has adopted a new supplementary form to be attached to each application. This new form is in substitution for a previous supplementary form, which did not provide sufficient information to meet the company's requirements. The new form contains seven questions:—

1. Are you now a member of any military or naval organization? If so, state branch of service and in what capacity.

2. Have you any intention of enlisting or accepting a commission in any such service? If so, state details.

3. Are you now engaged in aeronautic or submarine service, or have you any intention of becoming so engaged? If so, state details.

4. Do you now take part in any branch of aeronautics either for business or pleasure, other than that indicated above, or have you any intention of engaging therein? If so, state details.

5. Are you actively connected with or engaged in any form of hospital, Red Cross, ambulance, Y.M.C.A., or other similar service, or do you contemplate engaging therein? If so, state details.

6. Have you any intention of taking an ocean voyage within the next six months? If so, state details.

7. If you are of military age: (a) Have you been before any tribunal or any medical board for examination? (b) If so, in what category have you been placed? (c) Have you been exempted? (d) If born outside the British Empire have you become a naturalized British citizen? (e) If married, what was the date of your marriage? N.B.—If question 7 (c) is answered "Yes," certified copy of certificate of exemption must accompany application papers.

TO LOOK AFTER BRITISH COLUMBIA BONDS

Hon. John Hart, minister of finance for British Columbia, left recently for New York, where he will attend to the details involved in the taking up by the government of some $780,000 worth of bonds issued by the municipality of South Vancouver and the substitution of provincial bonds under the arrangement provided for by the legislation at the recent session of the provincial legislature. Through this the government stepped into the municipality and took over its affairs, appointing as commissioner Mr. Gillespie. The $780,000 bonds of the municipality were held by Messrs. Spitzer and Company, of New York, and the government is retiring the issue, substituting provincial bonds.

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Southern Alberta Oil Company.—A dividend of 12 per cent. to shareholders has been declared by the company. A net profit of $60,188.74 was carried to the surplus accounts after meeting all current and capital charges for the year. The company sold from its No. 1 well $76,730 worth of crude oil.

Montana Life Insurance Company.—At the close of the half-year ended June 30th, 1918, the company had assets totalling $2,083,719. The surplus to policyholders was $656,689. Since 1910 the assets have grown from $421,617 to $2,083,719, an increase of 400 per cent., and the insurance in force is now 20 times what it was at the former date.

Buffalo Mines, Limited.—The directors of the company contemplate a reduction in capital, and expect to shortly disburse some $250,000 to its shareholders, and thus reduce the capitalization of the company from $750,000 to $500,000.

Beginning with a capitalization of $1,000,000, the Buffalo Mines had paid $2,787,000 to its shareholders up to the end of 1916. During 1917 it was decided to reduce the capitalization of the company, and accordingly $250,000 was disbursed and the capital thus reduced to $750,000.

Porto Rico Railways Company, Limited.—The following is a comparative statement of earnings of the company for the month of June, 1918, and the six months ended June 30th, 1918:—

	1917	1918.	Increase.
For June:			
Gross	$ 74,577.07	$ 84,792.40	$10,215.33
Net	34,259.31	39,928.71	5,669.40
For Six Months:			
Gross	444,980.05	506,746.60	61,766.55
Net	197,056.75	230,129.92	33,073.17

Asbestos Corporation of Canada, Limited.—The directors of the company have declared a dividend of 1¼ per cent. for the quarter, advancing the rate from the 4 per cent. per annum inaugurated in the first quarter of 1917 to 5 per cent. per annum. In 1917 net profits available for distribution were at the rate of 6.3 per cent., not a large margin over the 4 per cent. paid to the preferred shareholders, but the working capital position of the company was strong, with net current assets of $1,548,851 at the end of the year, and no banking indebtedness. The preferred stockholders are entitled to receive 6 per cent. before anything is paid to the holders of the common, but the stock is not a cumulative issue, and consequently there are no arrears to enter into consideration.

Canadian Locomotive Company.—Much interest is centred in Kingston in the coming financial statement for the fiscal year ended June 30th. The auditors are working on the figures, and the report will be made public property before a great length of time.

The company's plants have been kept very busy throughout the accounting period, and orders on the books are said to be sufficient to keep them working to capacity for a considerable time ahead. Work is proceeding satisfactorily on government contracts calling for locomotives, and the outlook is considered to be bright for the coming fiscal year.

For the year ending June 30th, 1917, record earnings were shown, manufacturing profits amounting to $721,254 against $57 in 1916, and net profits of $616,254, after payment of bond interest and sinking fund allotments, was equivalent to more than 17.6 per cent. on the combined preferred and common capital, or over 25 per cent. on the common stock, after payment of preferred dividends.

The city tax rate of Winnipeg, on July 30th, was finally pared down to 20 mills, further reductions in the estimates having been found possible.

Supplementary reports from the Newfoundland first Victory Loan campaign for $2,000,000 showed a total of $3,500,000, an over-subscription of 75 per cent.

PUBLICATIONS RECEIVED

Forest Fires in Canada, 1914-15-16.—This is a review by Mr. T. F. Twight, M.F., describing the various fires during the past three years and discussing their causes.

Pan-American Record for July, 1918.—Published by the Pan-American Petroleum Transport Company. This contains interesting information and illustrations regarding the company's oil fields and tank steamers.

Saskatchewan Land Surveyors' Association.—Report of Eighth Annual Meeting held in Regina, March 4th and 5th.—This report reviews the work of the year, and includes the reports of various committees. There are also a number of articles on subjects of current interest. The association now has 36 active members.

The Mineralogy of Black Lake Area, Quebec.—By E. Poitevin and R. P. D. Graham. This is Museum Bulletin No. 27 of the Geological Survey. It is especially valuable, as it describes thoroughly the minerals of this important section of Quebec province.

Wood-using Industries of Quebec.—By R. G. Lewis and J. A. Doucet, of the Forestry Branch of the Department of the Interior. The various industries of the province are described in so far as they make use of wood products. Wood is required for furniture, boxes, boats, agricultural implements, vehicles and other machinery.

Temiskaming County, Quebec.—No. 86 of the Geological Series published by the Geological Survey of Ottawa. This volume is by Mr. M. E. Wilson, and describes thoroughly the geology of this section of Quebec province. A chapter is also included on the economic geology of the county, showing the resources in gold, silver and molybdenite.

Agricultural Societies of Ontario, Eighteenth Annual Report, containing also a report of the convention of the Ontario Association of Fairs and Exhibitions. This is issued by the Ontario Department of Agriculture, and describes the activities of the various societies throughout the province.

BRITISH EMPIRE TRUST COMPANY

That the British Empire Trust Company is maintaining its usual condition of prosperity is evident from the report of the 17th annual meeting held in London, England, on the 8th of July. Since the organization of the company in 1902 regular dividends of 5 per cent. have been paid on the preferred ordinary shares, and 7 per cent. upon the deferred ordinary shares. These dividends were again declared for the financial year ending 30th April, 1918, and the company is also able to carry forward £12,031, which is substantially more than last year. Provision was also made for depreciation.

The president, Mr. R. M. Horne-Payne, was not present at the meeting, but an address from him was read. He referred to the part which the company was playing in war finance, and also to the part it expected to play in the period of reconstruction after the close of the war. Coming to the companies with which the British Empire Trust is connected he referred to the purchase of the Canadian Northern Railway by the Canadian government, and the beneficial effect which this transaction had upon the securities of the road. The company is also interested in the British Columbia Electric Railway which is in an unsatisfactory position at the present time. The action of the city council in reducing competition from jitneys was, of course, encouraging to the railway, but it was more than counterbalanced by the labor difficulties which have appeared during the past few months. The earnings of the road showed some increase, but were not sufficient to provide for the increased wage scale proposed. The president expressed the opinion that some arrangement would be found which would provide a fair wage for the men and enable the company to continue good service. The chairman also referred to the position of the Canadian Western Lumber Company, the Canadian Western Natural Gas Company, the Monterey Railway, Light and Power Company, and the other concerns in which the British Empire Trust is interested.

The same directorate was again elected and general satisfaction expressed with the way in which the manager handled the company's affairs. A complete report of the meeting appears elsewhere in this issue.

Life Insurance Payments in 1917

Fewer Large Claims Than in the Previous Year—Montreal Continues to Head List—Small Payments Are Well Distributed

THE largest life insurance payment in Canada in the year 1917 was in the case of Thomas P. McCormick, of London, Ontario, the claim for whom amounted to $76,125. The only other payments in excess of $50,000 were in connection with the policies of James Ryan, of St. Johns, Newfoundland, to the amount of $54,664, and H. St. C. MacDougal, of Dorval, Ontario, to the amount of $50,314. The late Mr. McCormick was president and managing director of the well-known biscuit and candy manufacturing company in London, Ontario. The late Mr. James Ryan was senior partner of James Ryan and Company, fish merchants, and was also a member of the Legislative Council of Newfoundland. Mr. MacDougal was senior partner of MacDougal Brothers, stockbrokers of Montreal.

In 1916 there were more large payments, there being three as large as $100,000 and one over $90,000. The following is a list of the payments for 1917 in excess of $10,000:—

Belleville.

CANADA IS PAYING ITS OWN EXPENSES

Sir Thomas White Emphasizes Need of Economy, in Reviewing Financial Situation During Past Year

A statement of the Canadian finance minister, issued on Monday, August 6th, says:—

"I desire, for the information of the public, to briefly review the outstanding features of the finances of the Dominion since the beginning of the year.

"The unprecedented success of the Victory Loan of last November was followed by an anxious period as to the market price which would obtain for the new securities. It would have been a most serious matter if the price on our exchanges had declined several points, as seemed probable, if so large a volume of securities as four hundred million dollars had been listed on our various markets without provision for support of fresh distribution. Such a decline would especially have discouraged new and inexperienced investors, many of whom would, without full appreciation of technical market conditions, have drawn erroneous conclusions as to the cause of the decline, and become discouraged as to future investment in Dominion issues. The loss to those who from time to time would find it necessary to realize on their securities would have been heavy.

Stabilization Planned.

"To meet these contingencies, a plan of stabilization was arranged for in January, which has worked out most successfully. Over fifty million dollars of Victory Loan securities have been traded in since then. To-day, any investor is able, without delay, to realize for his Victory Loan bonds what he paid for them. The probability is that before the next issue is made securities of the last Victory Loan issue will stand well above original cost. In liquidity the Victory Loan issue is almost equal to the Dominion's currency.

"At the beginning of the year a most serious situation confronted certain of the provinces and municipalities of Canada. A great deal of short-term financing had been done in the first and second years of the war in the expectation that it would be over before the loans matured. There were several such loans maturing in New York, whose market was practically closed to all outside issues.

To Control Issues.

"The figures disclose that on January 1st of this year Canadian provincial governments and municipalities had financing in prospect for the first six months of the year aggregating nearly sixty million dollars. They were all naturally anxious to get upon the Canadian market as soon as possible with their issues. The result of an indiscriminate and uncontrolled offering of these securities upon a market overshadowed by the new four hundred million dollar Victory Loan issue would have been most serious, if not disastrous. It became imperatively necessary to take action to regulate and control these issues. The sheep were, so to speak, huddled at the gate, all eager to get out. They could be got out safely if allowed through one by one. Accordingly, an order-in-council was passed prohibiting all issues of securities in Canada without the consent of the minister of finance. To further ease the situation the government arranged to make loans to provincial governments to the extent that it might not be possible or advisable to market their issues and to prevent their being compelled to pay unduly high rates of interest. As for the municipalities, arrangements were made whereby the banks carried the securities of the larger cities and towns until conditions permitted their sale.

Helpful Measures.

"The result of these regulations and helpful measures has been that in the past seven months the Canadian market has gradually absorbed all these provincial and municipal issues without confusion or excessive penalty in the way of interest rates. The sheep have all been got through the gate. No better evidence exists of the essential soundness of our financial conditions to-day than the success which has attended the marketing of the congested mass of securities which at the beginning of the year threatened to almost swamp the Canadian investment market. By reason of the absorption of these securities, and the fact that capital expenditures of public bodies are now reduced to a minimum, the outlook for stable conditions in our securities markets appears to be most favorable. It is interesting to note that of fifty million dollars of our provincial and municipal securities sold in 1916, eighty-five and one-half per cent. were sold in the United States.

"Owing to many complex causes arising out of the war, and due partly to world-wide conditions, Canada's exchange with New York, which is the great exchange centre of America, has been for some time past unfavorable. The rate against us has at times exceeded 2 per cent. It is to be pointed out that in this, with war conditions, there is nothing exceptional. Great Britain's exchange with the United States has for two or more years been at as high a discount, and exchange rates with neutral countries have, in the case both of Great Britain and the United States, been at times unfavorable to the rate of even 30 per cent., and this upon an immense volume of purchases. Adverse exchange is not an unmixed evil to a country at war. Economically speaking, it is the natural corrective of national extravagance, and of unduly large outside investment of funds needed for war issues at home.

Keep Down Extravagance.

"If it costs 2 per cent. to obtain New York funds, there will be less importation of luxuries and other commodities we do not need, and less buying by our people of outside securities offering high interest yields, as against the rate of our war issues. An unduly high rate of exchange, however penalizes the importer of necessary raw material and commodities actually needed by the public, and consequently enhances the general high cost of living.

"Judicious interference is therefore justifiable to palliate or obviate its worse effects. To assist in adjusting the balance of our international accounts, arrangements have been made which will, I think, be materially helpful, and at least hold exchange within reasonable bounds. Orders placed in Canada for American war requirements, such Canadian issues as may be permitted in New York, prohibitions upon non-essential imports by order-in-council, together with special stabilizing financial expedients, will all contribute to this result.

Support for War.

"It cannot be too sharply emphasized, or too frequently drawn to the attention of the Canadian public, that our military effort at the front, and the prosperity at home which enables us to continue and sustain it, depend largely upon our finance—that is to say, upon the ability of the public to make and save money, and lend it to the government in return for war loan securities. It is the literal truth to say that, without the Victory Loan of last year, our farmers could have marketed only a portion of their products. The wheels of many of our factories would have become still, and our general trade and commerce would have suffered most serious depression.

"The proceeds of that loan enabled the Imperial government to buy in Canada grain, flour, meats, munitions and a multitude of other supplies for the armies and civilian populations of the allies. The distribution of the money has maintained the industry and furnished the wages of our basic manufacturing establishments. It has kept in employment thousands engaged in munitions and other war work. It has made business good for the wholesaler, retailer and all others who supply the day-to-day needs of the Canadian public.

Equip Forces at Home.

"Putting it another way, our war finance enables us to raise and equip our forces at home, send them overseas and maintain Canada's divisions at the front, with their reserves in training in England. The fact is that it is Canadian industry on the farms and in the factory, Canadian enterprise in control of our great industries and Canadian business organization in shop and warehouse which are directly earning the money through the rendering of services and the creation and distribution of commodities which supports and maintains our military effort. Canada is earning at home the money which we spend on the war. How different would be our condition, if, instead of earning the money at home, and taking the national profit on the business which yields the money, Canada had, in order to meet her military expenditure, to borrow abroad. The effect could only be a greatly reduced military effort or a crushing foreign indebtedness piled up against us, which would penalize us in exchange and enhance cost of living for years, if not for generations to come. Canada, owing to her agricultural and other natural resources, and to the possession of highly efficient manufacturing plants, served

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER

25 West Broadway New York, N.Y.

by a highly skilled [illegible] and directed by men of great enterprise and ability, has been able as a nation not only to earn the entire cost of the war to date, but to make a very large national increase in wealth as well.

"If from the increase in bank deposits, new securities, goods, commodities and other properties now owned by the people of Canada over and above what they possessed in 1914 there be deducted the whole national debt of Canada due to the war, the surplus would be found to be very great indeed. At so critical a time, when the hearts of so many of our people are filled with anxiety for those overseas, and after four years of the terrible sacrifice and suffering of the war and the loss of young Canadian manhood, incalculable in terms of earthly value, one hesitates to speak of national balance sheets, or of material gain or loss.

"But it is essential that the prosperity of the country be maintained, in order that we may continue to sustain the increasing burden of the war, and that prosperity depends absolutely upon our power to finance in greater part, at least, our export trade.

"That we can continue to successfully finance will depend, as in the past, upon the willingness of our people to save their money and lend it to the government, in exchange for its war loan issues, the proceeds of which are at this time the real working capital for Canada's export trade, and for a large proportion of her domestic business as well. The maintenance and, better still, the increase of that working capital is at this juncture one of the most supreme national duties of the Canadian people."

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended August 2nd, 1918:—

Buffalo, 87,860; La Rose, 65,820; Beaver, 64,000; McKinley-Darragh, 170,670; Nipissing Mining Company, 333,450. Total, 722,400.

The total shipments since January 1st now amount to 17,919,146 pounds, or 8,059.6 tons.

PEACE RIVER DISTRICT AND ITS RESOURCES

The Peace River district has been for many years the subject of much interest and speculation. Alluring tales from adventurous pioneers of its wonderful resources, charming climate and varying scenery have long since lent to the district that charm of romance which distance and uncertainty, blended with glowing promises. Now, however, the land so long famed by legend and mystery is being proved a reality, modern transportation having, so to speak, brought it to our very doors. A journey from Edmonton to the town of Peace River, for instance, which, five years ago, consumed nearly two weeks of toil and hardship, may now be made in less than twenty-four hours in comfort at all times of the year, trains to this latest settlers' Mecca, which is nearly 1,000 miles north of the international boundary line, carrying both sleeping and dining-car accommodation.

The Department of the Interior, through its Natural Resources Intelligence Branch, has prepared and is distributing a new illustrated report on the district, based on investigations made by an official of that branch during the season of 1917. The publication contains interesting information with regard to climate, soil, agriculture, minerals, game, water power, transportation and education. A map of the district, showing general topography, also accompanies the report.

The recent reservation in the interests of soldier settlement of available Dominion lands has also necessitated the preparation of a map which would show the area in northern Alberta that had been reserved for such purposes. This publication is now available for distribution and should prove of considerable value to the returned soldier who is considering the advisability of settlement in the Peace River country, likewise to the prospective homesteader, as it shows the area within which homesteads may be procured, also the exact number of quarter-sections that are still available in each township within reasonable distance of a railway. A copy of the report or map, or both, may be procured free of charge upon application to the Natural Resources Intelligence Branch of the Department of the Interior, Ottawa.

POINT GREY TAX RATE

The municipality of Point Grey, B.C., has set the tax rate for 1918 at 36 mills on wild land and 25½ mills on improved land. Although this new schedule is slightly higher than last year, it is stated that the assessment is 10 per cent. lower, which offsets the higher taxes to some extent. A special rate of 28 mills is imposed on property in Shaughnessy Heights on account of the over-expenditure on this section of the city last year. September 5th has been reserved as the termination of the rebate period, and 10 per cent. will be allowed off on taxes, except local improvements, until that date.

INSURANCE IN THE SCHOOL CURRICULUM

The Life Underwriters' Association of Canada is endeavoring to have the subject of life insurance included in the field of public education. The secretary of the association in Canada, Mr. J. H. C. Graham, recently travelled through the west to investigate the possibilities in this field. Mr. Graham discussed it with the authorities of the Universities of Manitoba, Alberta, Saskatchewan and British Columbia, and in every case considerable interest was shown. It is also thought that some knowledge of the subject might be given in public and high schools through the use of problems in arithmetic based upon life insurance, etc.

A recent report from British Columbia states that Mr. A. J. Meiklejohn, chairman of the educational committee, has forwarded to the president of the Vancouver Life Underwriters' Association a copy of the material which it is suggested should be included in the revised text books. The matter was taken up with the Hon. G. D. MacLean, minister of education, who is considering it. The matter deals with the three principal kinds of life policies, namely, ordinary life, limited life, and endowment, and includes a number of problems in the working out of each.

UNITED STATES CROP PROSPECTS

It is generally expected that the year's crops in the United States will, generally speaking, be greater than last year. The Continental and Commercial National Bank of Chicago estimates the yield as follows, compared with the 1917 crop:—

	1918. Bushels.	1917. Bushels.
Wheat	909,177,000	650,825,000
Corn	3,106,656,000	3,159,494,000
Oats	1,412,731,000	1,587,286,000
Barley	223,183,000	208,975,000
Rye	74,009,000	60,145,000
All cereals	5,690,756,000	5,666,725,000
Potatoes	399,320,000	442,536,000
Hay (tame), tons....	73,232,000	70,528,000
Hay (tame and wild), tons	103,000,000	....
Cotton, bales	14,033,000	10,949,000

The Saskatchewan Farm Loan Board has received applications for $7,000,000 in loans. Two millions have been allotted to farmers under the system. The federal government has taken $1,000,000 of these bonds with interest at the rate of 5½ per cent.

The thirty-fourth annual session of the Trades and Labor Congress of Canada will be held in the provincial parliament buildings in the city of Quebec, commencing September 1st. Among the matters to be considered will be after-the-war immigration. The principal officers of the Congress are: J. C. Waters, president; J. Simpson, vice-president, and P. M. Draper, secretary-treasurer.

The old Ross rifle plant at Quebec has been leased from the Dominion government by the North American Arms Company for $300,000 per year. The North American Arms Company is a new concern, of which Mr. T. A. Russell is president, which has secured large orders from the United States government for the manufacture of arms. It will be remembered that in March, 1917, the Canadian government expropriated the plant. It is understood that a considerable profit has been made out of it.

AN INSURANCE CODE OF ETHICS

Standard of Agents' Conduct is One of Subjects to be Discussed at Convention

Among the subjects to be discussed at the joint convention of Life Underwriters of the United States and Canada, to be held in New York on September 4th, 5th and 6th, is that of a code of ethics to be observed in writing life insurance. A chart of this kind was elucidated by Charles Scovell at the New Orleans convention, and by resolution adopted as a basis for discussion.

The committee on ethics was instructed to prepare the way for codification at the international convention in New York by planning and conducting throughout the year, a systematic general discussion of the whole subject in the local associations. The following outline has been prepared:—

Ideals.

The mother idea: Identity of interest among all. Insurers, insured. Includes: (1) Our motto, "Above the Companies, Life Insurance;" (2) all the professional ideals, in individual's heart and mind.

N. B.—Some of the ideals, as applied in daily practice, become the guiding principles. Some of the principles (rightly, very few) become the compelling laws.

Principles.

(a) In soliciting: Truly professional practice at all points. As to the prospect: (1) Real service; his interests ours. advisers, even more than salesmen; (2) all his affairs confidential, except by express permission; (3) fit his needs; make him want it, and want it now; (4) no confusing or chilling him, in competition; (5) no misrepresentation made, or misunderstanding allowed; (6) no rebating, or other discrimination; (7) no twisting, of own company's policy or another's.

As to competition: (1) All agents, good or bad, are "partners on the job" of insuring the people; (2) shun competition as "bad business" as the tap-root of evils; (3) if forced on you, use methods fair to all concerned; (4) know when you should cease; (5) always leave him a better booster and prospect for life insurance.

(b) Within the agency: Active mutual helpfulness. General agent (aided by home office). His it is, to—(1) Select fit, qualified men; (2) teach, train, inspire, make their success his own; (3) weed out promptly those found bad, or proven hopeless, (4) cut out all "rake-off" men—right now; (5) cut down "part-timers" (except apprentices) as fast as can replace.

Special agent: (1) Loyal—to agency, to company, to life insurance; (2) an active "lifter" in all agency doings; (3) never compete with fellow-agent of same company; (4) never bring prospect into any dispute. Never!

(c) Between agencies: Cordial co-operation for general uplift. (1) No seeking other's agent, except for promotion, on notice; (2) no accepting other's agent, without notice; (3) no commission to other's agent, without notice.

(d) All of us: Study, study, study! Work, work, work!

N. B.—This professional duty. On our skilled efforts depend the widows and orphans of to-morrow. Our dependents!

Laws.

(a) State: (Backed by full force of public opinion within our ranks).

Penal: (1) Rebating or other discrimination; (2) twisting under any guise; (3) all dishonesty or misrepresentation; (4) all unlicensed soliciting; (5) "rake-off-men," stool pigeons, one-case brokers, etc.

License: (1) On sworn application (perjury penalty), giving record, certified by general agent or company; (2) broker's license, if any, for life insurance only, (relying on C 3 above); (3) barring bad character always: forfeited for a period by breach of insurance law (4) requiring—(original) declared purpose of active, general soliciting (renewal) full statement of past year's activity, other business, etc., also declaration of no net's retained or other breach of law. N. B.—Not requiring residence; innocent debt; technical "examination." (5) Accessible list of all licenses in force, with data identifying each man. N.B.—Association to make every new license known in each agency.

(b) Association: (All its real usefulness dependent on harmony). (1) Omit the words "members shall," except as to 2 and 3 following, namely; (2) excluding agents of irregular companies, as per national constitution; (3) expulsion of law-breakers automatic on final conviction by commissioner or court; (4) no charges, trial, appeal or discussion on association floor, in any specific case of alleged breach of law or principle, unfair practice, etc.

N. B.—Two committees should be carefully chosen: Law and Comity (with full powers; also money): (1) To investigate all complaints and assemble the evidence; (2) to prosecute law-breakers before commissioner or court; to retain lawyers, etc.; (3) to mediate in matters of principle and practice; (4) to recommend to association any steps for general improvement.

Legislative: To study and report on (seldom to initiate) insurance bills.

A copy of this outline has been sent to a number of the local executives in Canada by Mr. J. H. Castle Graham, general secretary of the Life Underwriters' Association of Canada. The intention is that it will be thoroughly discussed and considered by insurance men, so that some decisive conclusion may be reached at the convention in New York.

LETTER TO THE EDITOR

LOCAL BANK MANAGERS AND HAIL INSURANCE

Editor, *The Monetary Times*:—

Sir,—I notice that the Canadian Bankers' Association are placing large advertisements in the local papers of Western Canada inviting the co-operation of the public on behalf of the banks and have given notice of a change of banking hours in order to allow the staff more time to do their work after the bank is closed.

If the local bank managers of Western Canada would confine their efforts strictly to banking and leave hail and fire insurance matters to the legitimate insurance agents, it would not be necessary for them to call on the public for so much co-operation. It is a well-known fact that about 90 per cent. of the bank managers of Western Canada write hail insurance during the hail insurance season, while 75 per cent. of them write both fire and hail in the smaller towns and villages.

The legitimate insurance agent is called upon to pay his corporation tax and his insurance license to the provincial government, he has to pay a business tax to the town or city in which he lives, together with office rent, stenographer's salary and other expenditures incidental to the successful carrying on of his insurance business, and its allied branches, from which he makes his living. The local bank managers have no fees to pay except a small insurance license, yet he walks in like a wolf and takes this business away from the legitimate insurance agent, who, in many cases, may be the bank's own customer. He has the advantage over the insurance agent owing to his position of being able to accommodate his clients by temporary loans from the bank's funds, and does not hesitate to use it. The writer was out for three days last week in various directions soliciting hail insurance, and 80 per cent. of the farmers he interviewed stated that placing hail insurance was not altogether a matter of choice with them, but they had to place it with their banker, as they might need some accommodation from him a little later on, and if they did not give him their hail insurance, that their banker would not hesitate to refuse them accommodation. I also found that the bankers had been soliciting in every district I had been in. You can readily see what chance an insurance agent would have of writing hail insurance against competition of this nature. There is a rumor that the head office of banks do not permit their local managers to do this business, but very little investigation on their part would disclose it. If they have any doubt on this matter, it would be only necessary for them to assume the role of an insurance agent and go among the farmers for a few days and any doubts they had would be completely obliterated.

I might also say that so far as the general agents and head offices of the hail insurance companies are concerned, that they should protect their legitimate insurance agents by confining their agencies to such agents.

Insurance Agent.

PROTECTION FOR MUNITION MAGAZINES

New Conditions Arising Out of War Have Necessitated Thorough Changes in System of Protection

The committee on fire prevention and engineering standards of the National Board of Fire Underwriters of United States has been investigating the question of protection for stores of munitions and other explosives. At a meeting held at the rooms of the society in New York on January 19th, there were present representatives of the war department, the navy department, the fire marshal's office of the state of Pennsylvania, the institute of makers of explosives and of several automatic sprinkler manufacturers. There were also present a number of engineers of the National Board of Fire Underwriters. After a discussion of the subject, conclusions were reached along the following lines:—

1. That storage and handling of smokeless power constitute a fire hazard, and that in isolating storage of smokeless powder, the exposure of one building to another must be considered. No combustible material should be exposed on the exterior of the building and no barricading is warranted.

2. That the principal danger lies in shell fragments being thrown to a distance and penetrating high explosive storage; therefore, where possible, these buildings should be separated by at least 2,000 feet, and barricades, moreover, would be of value

3. That the American table of distances should be recognized as the standard for the erection and location of magazines, and high explosive magazines should be bullet proof.

4. That the probability of malicious fires should be recognized, that there is a possibility of fire from lightning and that the danger of brush, grass or forest fires is probably the severest of all. The danger from artificial lighting should moreover be eliminated by using only portable electric flash lights. The value of lightning rods is also said to be questionable.

5. That the most favorable method of reducing the hazards is to establish an adequate patrol of sufficient force to insure that no unauthorized person shall have access to or near the magazines.

As regards interior protection, the principal questions considered were whether it was reasonable to expect that effective protection could be provided by automatic sprinklers. As no definite data was on hand on these points, it was decided to conduct a series of tests. These were carried out and on the basis of them it was recommended that high explosives storage be limited to 250,000 pounds to one magazine. Several should be constructed of brick, tile or wood, covered with sheet iron. If a water supply is necessary on account of other features and is available, a sprinkler system might be justified. It was also recommended that smokeless powder should be stored in buildings constructed in such a manner that no combustible material should be exposed on the exterior. Each building should be limited to 520,000 pounds.

FINANCING PUBLIC UTILITY COMPANIES

In view of the decision of the War Finance Corporation regarding the proposal of funds to utility companies, it has been seriously proposed in the United States to form a company for the exclusive purpose of financing utility enterprises. The War Finance Corporation declined to make loans directly to concerns of this kind, but suggested that if the utilities would make arrangement for borrowing at the banks, the Finance Corporation would then advance to the banks 75 per cent of the amount loaned to the utilities. But the banks felt unable to enter into such wholesale financing in view of government and commercial demands.

In the present year the utility corporations of the country have maturing obligations estimated at between $100,000,000 and $150,000,000. Considerable funds, will, therefore, be required, and it is pointed out that a company with a capital of $100,000,000 could, by rediscounting in accordance with the proposal of the War Finance Corporation, provide funds up to $400,000,000. The new corporation might be dominated by banking firms which have in the past taken an active part in financing utility enterprises.

The entire property and effects of the Ontario West Shore Railway were disposed of recently in Goderich. The sum of $2,200 was secured.

CROP CONDITIONS IN THE WEST

Outlook is Best in Northern Districts—Latest Reports are More Favorable

As the season advances the balance between an average or less, and an average or more, crop, seems, broadly speaking, to favor the central and northern sections of Manitoba, Saskatchewan and Alberta.

A report on conditions of the growing grain along its lines in the prairie provinces received by the executive of the Canadian Northern on July 25th from nearly 200 agents between Port Arthur and the Rocky Mountains, brings out this fact quite clearly. That the majority of agents in the territories on the Canadian Northern Railway continue to show conditions as favorable, is no doubt owing to the fact that the greater portion of that company's mileage west of the lakes, is in the central and northern districts, where farmers appear to enjoy advantages in the rolling, well-wooded, well-watered features characteristic of the country.

This report is for the week ending July the 20th. Of the 196 places reporting, 78 indicate a need of rain, 115 show conditions as favorable, 60 as unfavorable, and only 26 as bad. There are only three reports of damage by hail and one by frost.

From 21 places prospective wheat yields are given, two of which go 25 bushels to the acre, six to 20, and six to 15.

The company's reports on weather prevailing over the grain growing areas show for July 22nd, some rain in the central district, and rain also in the western district. For July 23rd, the central district, Winnipeg, Brandon, and the western district all report rain, which should benefit materially the growing grain.

No Recent Damage of Any Extent.

A later report dated August 1st says: The Canadian Northern approaches the crop handling season of 1918 with a prospect of greatly increased equipment. Work is now being rushed on a large number of locomotives and cars in excess of those in service last season, and it is expected deliveries in substantial quantities will be made in time for the grain rush.

The weekly crop report of conditions of the growing grain along the lines of the Canadian Northern Railway in Manitoba, Saskatchewan and Alberta, discloses a radically improved prospect in sections previously affected by drought and heat. The rain that has been fairly general over the southern areas in most cases has been sufficient to raise the estimates of yields considerably, and in localities where the wheat was almost despaired of, a healthy optimism for a fair crop now prevails. Some sections, notably along the Goose Lake line, still report a need of rain, and unfavorable prospects unless it comes. Frost is reported from several localities, damage to wheat being mentioned in some, but in most cases the estimates are confined to garden truck.

Summarized: Of the 215 points reporting from the three prairie provinces, 121 show conditions as favorable, 44 mention frost and five announce slight damage from hail.

CAN WE CHAIN THE FIRE FIEND?

There are some very interesting and instructive diagrams in a bulletin on forest fires just issued by the forestry branch of the Department of the Interior. These diagrams show that throughout Canada, whenever the rainfall becomes unusually light, the number of fires increases. Generally speaking, too, the higher the temperature the greater the danger of fire. The bulletin is entitled "Forest Fires in Canada, 1914-16," and the extent of the losses to the nation from this cause makes the publication of particular value. The statement of these losses will aid in arousing Canadians to the need of stopping forest fires and details of statistics will show that forest fires can be stopped, just as surely as losses are kept down by a good fire brigade in a city. With the exception of lightning, all forest fires are started by men, and if men were careful there would be no fires. The success of systematic fire protection measures is shown and the whole bulletin gives much valuable information on this important subject. Copies may be had free on application to the Director of Forestry, Ottawa.

NATIONAL FAIR IN HOLLAND

News has been received that from February 24th until March 8th, 1919, a third annual fair will be held at Utrecht, Holland. The object of this fair will be to increase the sale of goods manufactured in Holland through exhibiting them, and thereby advertising their use and qualities. It, therefore, is a strong effort to promote home industry. The economic difficulties, caused by the war, also shortage of raw materials, of coal, etc., are greatly hampering industry in Holland. On the other hand, the difficulty of obtaining the finished article from abroad encourages the demand for home consumption. The success of the Utrecht fairs has been very marked. At the first one, held in 1917, 690 factories were represented, while in 1918, 1,062 factories were registered. These numbers are very large indeed, considering that Holland is a country with something between six and seven million inhabitants, where agriculture, dairying and cattle-raising still is the first industry, while the business of another large part of the population, even from hundreds of years ago until the present day, has been that of shipping, trading and banking. The number of visitors of the first fair was 100,000, while that of its successor was 200,000. An investigation made has shown that the volume of business transacted at the first fair may be put at $4,000,000, while the value of the transactions at the second one is estimated to have been $12,000,000.

The above demonstrates the success of this national effort of Holland, one of the smaller, but very energetic nations of Europe, in times of stress and hardship, penned in on all sides between the countries at war, and the centre of which, the city of Utrecht, is less than 200 miles from the battlefields of France. The business men of Canada are reorganizing and preparing for business after the war. It must be of great interest to them to learn what other countries are doing and have been doing.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Oak Bay, B.C.—Two appropriation by-laws will, it is reported, be submitted shortly for the consideration of the Oak Bay ratepayers. The total sum is $15,000, consisting of $10,000 for additional school accommodation and $5,000 for the purchase of a site for school purposes.

Alberta.—Messrs. W. Ross, Alger and Company, of Edmonton, have recently purchased the following debenture issues of towns and school districts in Alberta: Town of Hanna, $5,000 7 per cent., payable in eight years, for the purpose of local improvements; Burdett consolidated school district, $20,000 7 per cent., payable in 20 years; Claresholm school district, $7,000 7 per cent., payable in 20 years; Czar school district, $8,000 7 per cent., payable in 20 years; Chipman school district, $3,000 7 per cent., payable in 10 years; Chipman school district, $2,000 7 per cent., payable in 10 years. The school district issues are all for the purpose of building and equipping new schools.

Edmonton, Alta.—Sealed tenders will be received by the debenture branch of the Department of Education until Monday, August 19th, 1918, on four blocks of school district debentures amounting to $22,550. Separate tenders are to be made on each block: Block No. 1, Village S.D., 10-years, 7 per cent.—Monitor S.D., $5,000. Block No. 2, Consolidated S.D., 10-years, 7 per cent.—Ready Made Consolidated S.D., $4,000. Block No. 3, Rurals, 10-years, 7 per cent.—Price S.D., $1,800; Atkinson S.D., $2,300; Rocky Hill S.D., $1,500; Fawcett S.D., $1,000; total, $6,600. Block No. 4, Rurals, 10-years, 7 per cent.—Hooper S.D., $2,250; Livona S.D., $1,500; Crow Hill S.D., $2,000; Oxville S.D., $1,200; total, $6,950.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from July 15th to July 18th, 1918:—

School Districts.—Boxmoor, $2,900 10-years not ex. 8 per cent annuity; Geo. Churchill, Rama. *Oxford, $1,200 10-years not ex. 8 per cent. annuity; Edward W. Sager, St. Louis. Painsville, $2,500 10-years not ex. 8 per cent. annuity; A. E. Wastell, Tompkins. *Kristnes, $600 6-years not ex. 8 per cent. annuity; P. A. Howe, Kristnes.

Rural Municipality.—Norris Lake, $3,000 20-years 7 per cent instalment; E. R. Ketcheson, Young.

Rural Telephones.—North Marengo, $3,500 15-years not ex. 8 per cent. annuity; M. E. Campbell, Marengo. Noremac, $6,200 15-years not ex. 8 per cent. annuity; F. E. Halpenny, Noremac. Mona, $6,200 15-years not ex. 8 per cent. annuity; J. E. Darkney, Griffin. Glenavon East, $700 15-years not ex. 8 per cent annuity; S. George, Glenavon. Argo, $15,400 15-years not ex. 8 per cent annuity; Henry Sharp, Biggar. Avonlea, $4,200 15-years not ex. 8 per cent. annuity; A. McLellan, Avonlea. Fillmore, $4,350 15-years not ex. 8 per cent annuity; Carl Wiebery, Fillmore. Forest Bank, $2,800 15-years not ex. 8 per cent. annuity; E. A. O. Pike, Forest Bank. Quinton, $1,800 14-years not ex. 8 per cent. annuity; J. F. Rose, Quinton.

The following is a list of debentures sold from July 15th to July 18th, 1918:—

School Districts.—Kellerville, $2,800, Orleton, $2,800, Coulee Creek, $2,500; Waterman Waterbury Manufacturing Company, Limited, Winnipeg. Beautiful, $5,650; Regina Public School Sinking Fund. Springwater, $2,300; Canada Landed and National Investment Company, Winnipeg. Currie, $2,000; Nay and James, Regina.

Rural Telephones.—Big Gully, $2,200, Stockholm, $8,600; W. L. McKinnon and Company, Regina. Speers, $2,000; Geo. Foley and Sons, Regina.

*Being sold by the Local Government Board.

Norwegian capitalists, attracted by the recent efforts to popularize the use of whale meat as food in the United States, have made arrangements to revive the whaling industry in Newfoundland waters. In addition to shipping the meat to the United States, and possibly elsewhere, they propose to convert the fat into margarine, as is now done extensively in Norway.

MANITOBA SECURES LOAN ON GOOD TERMS

On August 1st, Hon. Edward Brown, provincial treasurer of Manitoba, announced that he had concluded an arrangement whereby the provincial government obtains a short-term loan of $600,000 at 5 per cent. for general revenue purposes. Out of this fund the government proposes financing the live stock scheme recently floated for the purpose of encouraging stock breeding. The loan bears interest at 5 per cent. and has a maturity period of eight months.

NORTH VANCOUVER FINANCES

The expenditure of the city of North Vancouver, B.C., for the year 1917, as stated in the general revenue account, was $88,736. The revenue for general purposes, that is, after deducting interest charges, frontage tax and school accounts, was $84,256. Rebates are again deducted from this, leaving a balance of $77,689. Additional revenues included $16,765 from the waterworks account and other items, such as interest, licenses, funds, etc., making a total of $104,843. There is, therefore, a balance carried down amounting to $16,106. The present debenture debt is $1,989,899, and the sinking fund amounts to $110,446.

TOWN OF COBALT FINANCES

According to the annual statement for the year ended December 31st, 1917, the finances of the town of Cobalt are in very good condition. The total receipts were $195,503 and the expenditure $196,178. Included in the receipts, however, was an item of $49,500, loaned from the Canadian Bank of Commerce.

On account of an enlarged municipal programme for the present year, it was estimated that the expenditure would be in the neighborhood of $218,620, whereas the revenue at the current rate should only be about $155,000. The rate would, therefore, have to be raised to about 45 mills, and it was decided that the estimates of expenditure should be reduced considerably. The town has granted reductions in assessment to a number of the mining companies there.

CITY OF PRINCE RUPERT FINANCES

According to the annual report of the city of Prince Rupert, B.C., for the year ended December 31st, 1917, the total income was $162,618 and the expenditure $180,251. There was, therefore, a deficit of $17,633. The principal items of income were the taxes, including the $15,000 from the Grand Trunk Pacific Railway, licenses, government grant to schools, interest on arrears of taxes and police fines. Among the items of expenditure was $47,000 for interest and sinking fund. The deficit is partly accounted for by the treasurer as being due to unusual expenditure, such as a donation for Halifax relief, expenses in connection with a law suit and payment for detective services in connection with the Prohibition Act.

As mentioned in *The Monetary Times* last week, the prospects for Prince Rupert have improved greatly with the arrangements for shipbuilding there. Only a fraction of the total assessment consists of improvements, and any change, therefore, which will encourage the erection of business properties and houses will place the city upon a sounder basis. In fact, the building permits for 1917 are considerably in advance of those for the previous years, and assessments also more than held their own.

This report, in addition to giving the ordinary financial statistics, describes the city and the adjoining territory, separate articles being included relating to mining, fishing, agriculture and timber.

At the annual meeting of the Hudson's Bay Company held in London, England, a satisfactory condition of the fur trade was reported. Liquor prohibition meant, of course, a loss in profit, but land sales and other business were continuing as usual. In anticipation of taxation, however, the directors felt compelled to provide a sum of £140,000.

DOMINION CROP CONDITIONS

Prospects Indicate That Average Throughout Canada Should Be Good—Some Districts Have Suffered

A summary of telegraphic reports on the condition of field crops in Canada at the end of July was issued on August 2nd by the Dominion Bureau of Statistics as follows:—

Atlantic Provinces.—Prince Edward Island (Charlottetown). Frequent beneficial showers early in July greatly increased hay crops; heavy crops of cereals; rain has given all head crops, except corn, a sturdy vigorous growth. Small fruits below average; large fruits now promising. Nova Scotia (Amherst). July weather very unsettled. All vegetation made splendid growth, present prospects for grain and root crops good. Hay only fair, potatoes good, bugs very bad; seed roots good. (Kentville). Rain early in July furnished much needed moisture, and very materially increased the hay yield, which will average 75 per cent. of normal. Grains are exceptionally good; roots are good; corn making strong growth; potatoes promise to be a fair crop. New Brunswick (Fredericton). During first half of July every day was wet and precipitation totalled 5 inches. Much crop lost from flooding. An average crop of hay is partly harvested. All other crops on dry land, except wheat and apples, promise a fair yield.

Quebec.—Roberval (Chicoutimi and Saguenay). Everything favorable if weather continues fine. Hay less than last year; corn good; early sown grain fine; potatoes will give a very good yield. Wheat not successful. St. Anne de la Pocatiere (Kamouraska). Weather unsettled rather cold, with excessive rainfall; damage to all crops during last half of the month; haying backward; hay an average crop; poor prospect for grain of all kinds; potatoes fair; tree fruits very light. Lennoxville. Hay, which is being harvested late this season on account of the wet weather, is giving nearly an average crop. The extra warm weather the latter part of month followed with showers has done much to bring along the corn and other crops. Oka and Two Mountains (Vaudreuil, Soulanges). Crops in general abundant. Wheat exceptionally good. Oats and barley good. More smut and lodging than usual. Fodder corn improving since heat, but will not give more than 60 per cent. of good stand. Potatoes promising in spite of disease noticed on wet soils. Peas, beans and vegetables full crop. Apples, summer varieties, bear lightly, winter practically nothing. Makamik (Pontiac). Conditions materially improved by rain and warmth of the last 15 days, hay especially; it promises average yield; wheat very fine; other cereals good and yield probably above average; garden potatoes very fine; no damage by frost.

Ontario.—The Ontario Department of Agriculture telegraphs as follows: "Hay about average, cut well cured; fall wheat small yield of good quality; barley excellent yield, but some smut; spring wheat, oats and buckwheat promising; all grains rather short in straw; corn now growing rapidly; beans and peas look better than for years; potatoes and roots promise good yields; field crop averages as a rule are larger than last season." Ottawa (Central Experimental Farm). Hay a fair crop, oats a good crop; spring wheat good, but very little grown; roots promise very well; corn will be a poor crop, it is very late and uneven and the seed was bad; pasture grasses fairly good.

Manitoba.—Brandon. Rain last week came too late to save wheat, which will be less than half a normal crop. Hay crop a failure from drought; oats and barley very light, but late crops greatly helped by recent rains. Morden. Weather conditions have much improved; rainfall has been quite ample during the latter half of July. Temperatures are low for the most part, especially at night; no frost, no hail. Wheat promises fair crop, not greater than 15 bushels per acre. Perhaps 10 per cent. blown out in early season and reseeded in some instances; oats and barley promise fair crop. Barley promises well, no rust in sight. Hay prospects decidedly poor. Potatoes promise big crop; flax not generally grown, uneven.

Saskatchewan.—The Saskatchewan Department of Agriculture telegraphs as follows: South-Eastern, Regina, Western and South Central Districts. Heavy rains during past week have greatly improved crop outlook; in some places crops are reported as equal to last year. Southwestern District. Crop will average from fair in north to total failure in south. East Central, Northeastern and Northwestern Districts. Heavy frosts 24th and 25th; too early to estimate damage, but afraid it will be very serious as some wheat in blossom stage. Central and West Central Districts. Heavy rains have greatly improved conditions especially north of Regina and Moose Jaw. In western part of district crops are almost total failure. In all southern parts of province many farmers are selling stock as no feed is available. Indian Head. July warm with heavy showers from 18th to 29th, crop outlook greatly improved; from 1 to 8 degrees of frost reported on 24th; corn potatoes and garden crops slightly damaged in this district; no damage to grain yet apparent; fallow wheat promises good average crop, stubble wheat and early sown oats will be short; late sown oats and barley greatly improved; hoed crops coming along rapidly. No damage from hail reported during month.

Alberta.—The Alberta Department of Agriculture telegraphs as follows: "Considerable damage has been done by frost throughout the central and northern portions of the province during the past week the full extent of which cannot be ascertained at present, but the indications are that it is not general but more or less irregular. A large portion of the southern part of the province was visited by heavy rains during the past few days which will do much to revive late crops and pasture lands. Sufficient hay and pasture lands have been located in the northern districts to take care of all applications from the south." Lacombe. First ten days of July hot and dry; rains from 12th proved sufficient to carry crops and improve pastures; frost night of 23rd damaged crops in many points. From Wetaskiwin north and east and from Stettler east crop outlook poor to fair. Lethbridge. Drought in southern Alberta partly broken by rains which were general during week beginning 21st, but as less than an inch fell more must come at once to improve conditions much, though it will aid in filling of grain; everything failure except that sown on summer fallow; cutting commenced.

British Columbia.—Agassiz. Weather conditions during July hot and comparatively dry; crop prospects somewhat improved over June; harvesting of cereals just started; fall wheat promises good crop. Invermere. Crops under irrigation very good; dry farming a failure. Alfalfa first cutting particularly good, second crop promises well; clover, peas, potatoes very good; roots and wheat good; oats and barley fair. Sidney. Autumn cereals cut will thresh an average yield; spring cereals short and ripening fast; corn and root crops below average; stock seeds very short; livestock at present in good condition.

ANNEXATION OF MAISONNEUVE, MONTREAL

By an act of the legislature of the province of Quebec on February 9th, 1918, the city of Maisonneuve was annexed to the city of Montreal. The relative position of these two cities had long been a curiosity in municipal development. Fifty or sixty years ago the municipalities were quite separate, geographically as well as municipally, there being a considerable vacant space along the water front between them. Since then, however, Montreal has grown rapidly, and the city's boundary now extends for about four miles past Maisonneuve. The latter, however, has retained its separate existence, and has become, therefore, a city within a city. While it is surrounded by wards of the city of Montreal, it has retained its own municipal government. The same is the case with Westmount, situated just to the east of old Montreal, and is practically the case with Outremont, which is just to the north.

The consolidation will, therefore, result in many economies in the systems of schools, waterworks, etc. The debt of Maisonneuve has been entirely assumed by the city. The assessed value of Maisonneuve at the end of 1916 was $33,732,025, and the general debenture debt over $16,000,000. This figure is somewhat large, but most of it represented municipal works. The city is making provision to meet all the bonds at maturity, although, in the act of the legislature mentioned above, a delay has been granted until September 1st, and advantage is being taken of that privilege in order to straighten out the financial affairs of the annexed municipality.

The Prudential Assurance Company is exhibiting a motion picture film in London, England, with the object of assisting the government in certain obvious ways, stimulating interest in war bonds, and helping the companies' agents to increase their business.

GROWTH OF MUNICIPAL RESPONSIBILITY

Accounting Should be Systematic—Greater Supervision of Bond Issues is Desirable

That a uniform system of municipal accounting to show the ratepayers at a glance how the finances stand, would be greatly appreciated by ratepayers' associations, is one of the conclusions reached as a result of the recent municipalities' convention in Victoria, B.C. A premature adjournment of the conference prevented the report prepared by Mr. H. J. Ross, of Montreal, on this subject, reaching the floor for debate. Mr. Ross, who is an authority on accounting, dwelt in his report on the progress made in Canada towards securing uniformity.

Mr. E. T. Sampson, secretary-treasurer of the municipality of Outremont, adjoining Montreal, had brought to the conference a set of model balance sheets, which were illuminating. Mr. Sampson, who is a member of the British Society of Municipal Treasurers, argued that municipal accounts should present scientific principles rather than the overloading of too detailed, classified information. The object, he stated, was to avoid a mere collection of figures intelligible only to the book-keepers who prepared them. Steps should be taken to prevent the practice of municipalities withholding payments to the following year to avoid increasing taxation, and to secure closer control of all payments for stocks of material purchased. He explained the basis of a satisfactory system grounded on the exhibits filed, and said that capital account or expenditures out of loans should clearly present the historical record to avoid intentional obscuration. He made suggestions with regard to public utility corporations, and methods to secure an accurate knowledge of their earnings. He concluded by stating that there was no necessity to be content with makeshift methods, and councils should insist on maximum efficiency of their accounting officials.

Municipal Credit.

Better provincial supervision of municipalities as regards bond issues is suggested by Mayor Fisher, who has been looking into debentures with delegates to the Union of Canadian Municipalities. In a letter received from him he urges the importance of members of council and civic officials attending municipal conventions. He writes:—

Amongst subjects brought before the convention at Victoria was one suggested by the Bond Dealers' Association, which caused a lively discussion. It was what is to be done about the western municipalities which are likely to default in the payment of bonds when they become due.

The western representatives resented the suggestion that trouble of this sort was likely to be general. They did admit that some few towns were in difficulties. It seemed to be the view of the convention that the provinces must stand behind the municipalities. The ordinary purchaser of bonds in Europe or the United States is not in a position to judge of the financial condition of different Canadian cities or towns. To him Prince Albert and Hamilton are both Canadian cities and he knows very little else about them. The credit of each Canadian municipality depends to a large extent on the credit of all. If the foreign investor could be assured that Canadian municipalities always pay it would be worth millions to Canada.

Sufficient Supervision.

The community of credit of Canadian municipalities raises the question as to whether we have sufficient provincial supervision of municipalities. In England a local government board supervises municipal undertakings. Some of the western provinces have copied the English system. In Saskatchewan a department exists for the purpose of advising municipalities in all matters and controlling expenditures. Alberta has apparently done something of this kind. At any rate it has a minister of municipal affairs who was present at the convention.

In Ontario, except what the provincial board of health does, there is no supervision.

The answer, of course, is that a weak or incompetent control of municipalities would be worse than none, but an able and thorough supervision would prevent many mistakes and strengthen the credit of municipalities generally.

The Union of Canadian Municipalities is the national "trade union" of municipalities. The object of the organization is to protect and advance those interests which municipalities have in common.

John Smith has been able to get railway charters and similar concessions from parliament because he has asked for what he wanted and because he persevered until he got it. The Union of Municipalities exists for the purpose of seeing that everybody's business is somebody's business. To some extent at least it tries to look after John Smith so that he may not get things that he should not have. It also promotes legislation which in the interest of municipalities should be passed. Our townsman, Fred. Cook, has long been the parliamentary agent of the organization, charged with the duty of keeping track of what is going on.

A considerable part of the time of the convention was taken up with matters of legislation, with the fights that had taken place before parliament and with those that are to come.

In addition to legislation the subjects before the convention were many. They varied from town planning and housing to tax sales. As is always the case the talk was at times futile, but no one could attend the convention without picking up many ideas of real practical value.

Valuable Suggestions.

Apart from the formal proceedings much good results will be derived from conversations with municipal men from other places. At 12 o'clock one night a group of men were busy in the rotunda of the Empress Hotel discussing the merits of serial bonds. The group included the mayor of Halifax and the treasurer of Prince Rupert—the extremes in space and time. Curiously enough, Prince Rupert was able to give pointers to many of the older cities.

A useful suggestion for Ottawa was the fact that many places sent not only elected representatives such as mayors and aldermen, but also permanent officials such as city clerks, engineers, treasurers, or commissioners. Meetings such as these are almost the only schools municipal administrators can attend. It is to be hoped that next year Ottawa will be represented by as many members of council as can be induced to attend the convention and also by some of our officials. The money of the taxpayers cannot be better spent than in keeping up-to-date.

EDMONTON BOARD OF TRADE IS ACTIVE

The Edmonton board of trade recently addressed the following letter to editors of newspapers in the province:—

The Dominion and provincial governments have made arrangements facilitating the movement of cattle from the dried-out districts in the south to the country around Lesser Slave Lake and the Peace River, and the movement of hay in the opposite direction. Unless there is sufficient rain in the south to effect material improvement in present conditions there, it is doubtful if enough hay can be got in the far north to go around.

There is a vast amount of good pasture and a lot of rough feed for winter in the district around Edmonton which usually goes to waste, and which ought to be utilized for grazing and wintering some of the cattle from the less-favored districts in the south. There will be good grazing from now until freeze-up on all unoccupied land; and it is believed that practically every farmer in this part of the country will have more winter feed than he can use, and will have a surplus of either hay, straw or green feed, which he could sell or could take cattle to winter.

The Edmonton board of trade is anxious to place the man with the hungry cattle in touch with the man with surplus feed. The board would, therefore, like to hear from every farmer in the district who will have feed for sale on the farm or who would take cattle to winter, and such farmers are invited to immediately forward such information to the secretary, 209 Canadian Pacific Railway building, Edmonton. Prompt action is desirable, as it is understood that many of the southern cattle will have to be moved at once.

It should be stated if there is good pasturage on open land in the neighborhood which could be got without cost; whether the farmer could take cattle to winter, and, if so, how many head; whether he has surplus feed to sell on the farm; what kind of feed is available and at what price if it has to be purchased; whether any stable accommodation is available for the care of milking cows; and any other information likely to be of service. When this information is received, it will be made available by the board of trade to southern owners of cattle who might be interested.

GOOD OUTLOOK FOR GRAND TRUNK PACIFIC

Steady Progress is Being Made in Territory Served by Grand Trunk Pacific, Says Howard G. Kelley

Mr. Howard G. Kelley, president of the Grand Trunk and Grand Trunk Pacific Railways, returned to Montreal recently upon the conclusion of an inspection trip over the lines of the system in Western Canada, his journey extending as far north as Skagway, Alaska, the northern terminal of the Grand Trunk Pacific steamship line, while a trip was also made in the Yukon territory.

"I found the physical condition of the Grand Trunk Pacific excellent," said Mr. Kelley on his return. "Traffic is increasing in an eminently satisfactory manner. New land is being broken in the prairie section, particularly in the Touchwood Hills district of Saskatchewan, and many settlers are also going into the rich valleys served by the Grand Trunk Pacific in Central British Columbia."

Mr. Kelley stated that the development of the lumber industry on the mountain division of the railway west of Edmonton was particularly noticeable, new sawmills opening up each month. It had been found necessary to run a special fast freight train practically every day from Prince Rupert, B.C., to take care of the aeroplane lumber from the Queen Charlotte Islands and other coast points, and the frozen fish traffic from the packing plants on the Pacific Coast, which are now working to capacity.

Pacific Port is Thriving.

"At Prince Rupert," continued Mr. Kelley, "the business activity is most marked. It is confidently hoped that the shipbuilding plant there will be in operation in a very short time, which will give further impetus to that already busy little town. The resources of Prince Rupert are being taxed to the utmost to provide the necessary housing accommodation for all those who desire to make their headquarters there."

In regard to crop conditions, Mr. Kelley said: "We drove northward from Edmonton and saw remarkably fine crops, standing in wheat up to our vest pockets and timothy up to our shoulders. Crops in certain districts have, without doubt, suffered, but taking one district with another, it is safe to predict that there will be a fair yield for 1918 along the Grand Trunk Pacific line, while the live-stock production is much greater than ever before."

The president was particularly pleased with the outlook for the settlement of the large areas of agricultural land in Central British Columbia, along the main line of the Grand Trunk Pacific. Owing to the progressive policy of the British Columbia government, many thousands of acres of the best land in the province are now available for settlement, and the Grand Trunk Pacific is working in close co-operation with the provincial government in carrying out the details of this land policy. The development of the mineral resources in the mountain sections adjacent to the railway is also proceeding satisfactorily.

Mr. Kelley said that owing to the adverse financial situation, and the extreme shortage of labor, due chiefly to war conditions, the times were not propitious for the undertaking of any large works, such as extensions of the line, etc., but certain improvements calculated to increase the efficiency of the [illegible] were in progress at various points, such as the filling in of some of the large trestle bridges, construction of new buildings, etc.

PROVINCE MAY TAX HUDSON BAY COMPANY LANDS

The right of the provincial government to legislate in [illegible] a surtax on the Hudson's Bay Company was upheld in a recent judgment in the Supreme Court of Saskatchewan by Mr. Justice Lamont. The case in question was that of [illegible] Rural Municipality vs. the Hudson's Bay Company. It is understood that the company will appeal to the Privy Council. Large sums of money are evidently [illegible] the municipalities in the province of Saskatchewan [illegible] more or less land belonging to the Hudson's Bay Company.

The [illegible] United States treasury has announced that the issue of $[illegible] of treasury certificates of indebtedness, subscriptions for which closed on July 16th, has been oversubscribed.

UNITED STATES NAVAL ACTIVITIES

The immensity of the work being carried on by the United States Naval Department is indicated by a recent announcement by the committee of public information that over 500,000 are employed by that department. The actual number is, in fact, estimated at 594,000, when civil employees are included. In addition to the military branches of the service there are 80,000 mechanics and laborers employed at navy yards and stations, and there are also about 10,000 employees of the naval department in its various bureaus and stations. A large office building has recently been erected at Washington to accommodate the headquarters.

ASSESSMENT EXEMPTION IS DISCUSSED AT OUTREMONT

The city council of Outremont, Que., recently received a letter from a Montreal real estate firm, asking whether a property at the corner of Rockland Avenue and the Canadian Pacific Railway tracks was for sale. If so, and if the price was favorable, a factory might be erected thereon, and in this connection, they asked if the city would agree to exemption from taxation.

At a meeting of the city council, held on July 18th, this subject was discussed. Alderman Othier declared that it might be in the interests of the city to encourage the factory, which would give employment to many citizens, and it might also be in order to grant them exemption from taxation for several years. He pointed out that the land in question was ideal for manufacturing purposes, and the city would benefit materially if a large number of men were employed. The amount received in taxes from citizens would probably be larger than that which would be received from the firm if exemption were not granted. On the other hand, some of the members of the council thought it was a dangerous precedent, as other firms had erected factories and had not been exempted from taxation.

The land in question had been purchased by the city to be used as a playground. There are, however, other pieces of property which would do equally well for this purpose, but would not be as suitable as industrial sites. It was decided to write to the company and ask for further particulars, as they did not say what kind of a factory was contemplated, the number of men to be employed, nor for how long they desired exemption.

NEW ECONOMIES IN THE NORTH

The Cobalt Daily Nugget says: Prior to the war, most of us knew there was such a word as "economy" in the dictionary, but we had only a hazy idea of its actual meaning. We have always been a nation of spendthrifts, wasting the natural resources of the country with reckless abandon and not sufficient thought of the morrow.

Now, it seems, the stupendous requirements of the war, almost draining the land of all it produces, has brought home to us the fact that our past mode of living has been entirely unwarranted, and hereafter we should make wiser use of our assets. The wastage produced by the war itself has been at once shocking and deplorable, and is serving as a deeply impressive object lesson. There is reason to believe, therefore, that after the war is over, Canadians will practise thrift as they never did before, thereby adding to the financial strength and prosperity of the country.

As the early miners, insufficiently skilled in metallurgy, threw valuable ore on the dumps with no thought that it would have a future worth, so the Canadians have been throwing much away that has a recoverable value because they were not trained in saving.

The purchase of Victory bonds by so many people will prove to us the benefits of small savings, which, in time, mount to an impressive aggregate. A great deal more, too, the war will teach us that we should be taught.

We have had a rude awakening from our lotus dreams, and grim reality has supplanted visions. It is up to us to conduct our affairs hereafter in a practical fashion and make a maximum use of our opportunities.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent. upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, payable on and after Tuesday, the Third Day of September next, to Shareholders of record of 31st July, 1918.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 19th July, 1918.

UNION BANK OF CANADA

DIVIDEND No. 126

Notice is hereby given that a dividend at the rate of 9% per annum upon the paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the city of Winnipeg, and also at its branches, on and after Tuesday, the 3rd day of September, 1918, to shareholders of record at the close of business on the 16th day of August next.

The transfer books will be closed from the 17th to the 31st day of August, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.

Winnipeg, July 18th, 1918.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 126

Notice is hereby given that a quarterly dividend of 2½ per cent., upon the capital stock of this Bank has been declared for the three months ending the 31st of August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 3rd September, 1918, to shareholders of record at the close of business on the 17th day of August, 1918.

By order of the Board,
JOHN AIRD,
General Manager.

Toronto, 19th July, 1918.

LAKE OF THE WOODS MILLING COMPANY, LIMITED

DIVIDEND NOTICES

Notice is hereby given that a dividend of 1¾% on the Preferred Stock of Lake of the Woods Milling Company, Limited, for the three months ending August 31st, 1918, has been declared, payable on September 2nd, 1918, to Shareholders of record at the close of business on Saturday, August 24th, 1918.

By order of the Board,
R. NEILSON,
Assistant Secretary.

Notice is hereby given that a dividend of 2½% has been declared on the Common Stock of Lake of the Woods Milling Company, Limited, for the three months ending August 31st, 1918, being 2% from the earnings of Lake of the Woods Milling Company, Limited, and one-half of 1% from the earnings of the Sunset Manufacturing Company, Limited, payable on September 2nd, 1918, to Shareholders of record at the close of business on Saturday, August 24th, 1918.

By order of the Board,
R. NEILSON,
Assistant Secretary.

Montreal, August 1, 1918.

THE ROYAL BANK OF CANADA

DIVIDEND No. 124

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the third day of September next, to shareholders of record of 15th August.

By order of the Board,
C. E. NEILL,
General Manager.

Montreal, Que., July 16th, 1918.

BOND HOUSE wants capable man, one able to take charge in absence of Manager. Box 191, *The Monetary Times*, Toronto.

DOMINION REVENUE SHOWS INCREASE

The total revenue from all sources of the Dominion government from April 1st, the beginning of the fiscal year, to July 31st, was $91,954,000, an increase of nearly nine million dollars, over the same period last year. The detailed figures are given in the financial statement for the month of July given out by the Finance Department.

The report shows that the large increase in revenue has been achieved despite a drop of customs collections for the four months period from $56,005,043 to $53,928,376 due to restricted importations and lack of shipping facilities.

An increase from $4,650,912 to $13,096,768 in miscellaneous revenues, including certain forms of war taxation, more than wipes out the loss in customs revenues, and the balance to the good is increased by a jump of nearly two million dollars in public works revenues, including railways of over one million dollars in excise collections and other increases. The postal revenues are slightly lower than for the same period last year.

The total general expenditure for the four months was $32,894,902 as against $24,693,046 in the corresponding period in 1917, while war expenditure on July 31st stood at $44,008,552, an increase of less than half a million dollars. War expenditure for July alone was $24,620,824.

The total net debt of the Dominion now stands at $1,172,323,489 as against $860,377,227 on July 31st, 1917. The increase for July was $18,315,774.

UNION TRUST BUILDING - - WINNIPEG

BRITISH EMPIRE TRUST COMPANY (LIMITED)

A "STRONG POSITION" AND "SATISFACTORY PROFITS"

FINANCIAL ASSISTANCE FOR INDUSTRIAL ENTERPRISES.

The Dominion Government and the Canadian Northern Railway.

The 17TH ORDINARY GENERAL MEETING of the British Empire Trust Company (Limited), was held on Monday, July 8th, at the Liverpool-street Hotel, London, England, Mr. J. DAVIDSON (managing director) presiding.

The CHAIRMAN, in opening the proceedings, said: Gentlemen, I regret that, owing to ill-health, your chairman, Mr. R. M. Horne-Payne, is unable to preside to-day, and he has asked me, as managing director, to take the chair. I will now call on the secretary to read the notice convening the meeting and the auditors' report.

The SECRETARY (Mr. R. W. Bartlett, A.C.A.) read the notice accordingly, and also the report of the auditors.

The CHAIRMAN.—Copies of the report and accounts have been in your hands for some time. Is it your pleasure that they be taken as read? ("Agreed.") Although Mr. Horne-Payne is unable to be present, he has sent a very interesting speech, which I have pleasure in asking Mr. Blundell Brown to read to you.

Mr. T. BLUNDELL BROWN then read the speech prepared by Mr. Horne-Payne, as follows: Gentlemen,—We are very glad that the profits for the year under review enable us to recommend you to authorize the payment of the same dividends on the Preferred and Deferred shares as were paid last year, and at the same time to carry forward a slightly increased balance to next year. I may point out that the interest income for the year exceeds the amount which will be paid out in dividends. In principle, the directors' policy is to distribute dividends approximately equal to the interest income, leaving the expenses to be met by the fees received as trustees, registrars and secretaries. I think you will agree with me that the accounts for the year show a strong position and that the profits are satisfactory—more so, perhaps, than could have been expected, considering the necessary restriction placed on financial business in order to secure to the Government the use of the full financial strength of the country during the war. After payment of dividends of 5 per cent. on the Preferred Ordinary and 7 per cent. on the Deferred Ordinary shares, there will remain £12,031 to be carried forward, as against £9,589 last year, and, but for the necessity of providing a further small amount out of the profits for depreciation, the surplus to carry forward would have been correspondingly greater.

You will be pleased to know that your company has been able to take some share, both with money and with service, in the supreme effort by which our nation is assuring victory. We have been able to direct very large sums of money into War Loans, War Bonds and Treasury Bills, and through the untiring energy of your managing director some useful work has been done in your office in co-operating with the National War Savings Association in bringing these securities before the investing public. We are also providing the machinery for the organization and conduct of War Savings Associations in Government offices.

The Company's Business and Investments.

Your company is in a strong position, and is ready at any moment to do its share in the financing of the reconstitution of industries and trade of the British Empire after the war. We expect to develop a useful and profitable business in financing the extension of trade and rearrangement of plant of established industrial enterprises, particularly in this country. We shall be able to assist in providing their financial requirements temporarily and subsequently to enable them to secure any permanent capital they need. When the time comes we shall claim the active assistance of our shareholders in securing sound business of this character. We invite our shareholders to secure us the offer of any financial transactions within the scope of our business. I have compared the present position of each of the undertakings with which our business is closely connected, or in which we have money invested, with its position a year ago. I find that in almost every case it has become stronger, although there are still grave difficulties to be faced and overcome. The most threatening feature of the situation, the gravity of which one cannot exaggerate, is the danger of its becoming impossible to secure labor at a cost which will permit of continued existence. Manufacturing enterprises can probably for the most part cover the higher cost of labor by the higher prices they can secure for their goods, but with enterprises supplying public services whose charges are limited by law or agreement there is a point at which they must, unless permitted to increase their charges, either shut down their services or go into bankruptcy. Nevertheless, the position is, on the whole, stronger and sounder than it was a year ago, and we feel encouraged.

The Securities of the Canadian Northern Railway System.

During the year which has elapsed since the last meeting changes have taken place affecting the status of the Canadian Northern Railway system and its securities. I am glad to say they affect the securities very favorably, how favorably does not seem to be generally understood. The Government of the Dominion of Canada, who already owned $40,000,000 of the Ordinary share capital of the Canadian Northern Railway, have bought the remaining $60,000,000, thus becoming the owners of the entire capital stock of $100,000,000. The Government, in buying these shares, have thus obtained control of the various companies comprising the Canadian Northern system, subject to all outstanding securities, including the various unguaranteed Four per Cent. Debenture stocks and the Five per Cent. Income Charge Debenture stock, according to their respective charges and rights, and accordingly these stocks now not only rank in front of $45,000,000 of Four per Cent. Debenture stock, guaranteed unconditionally by the Dominion Government, and in front of the loan of $15,000,000 granted by the Government to the company in 1916, and of further large sums now being advanced or guaranteed by the Parliament of Canada, but also in front of $100,000,000 of Government-owned share capital. I believe that the effect of this is to place all the fixed interest-bearing securities of the Canadian Northern system practically on an equality with Canadian Government guaranteed securities, and this is the spirit in which the legislation authorizing the purchase of the shares was enacted by the Parliament of Canada.

Position of the Income Charge Debenture Stockholders.

The position of the Income Charge Debenture stockholders as far as their interest is concerned, is not so fortunate as that of the holders of the other Debenture stocks, inasmuch as whilst the repayment of their capital at par in 1930 can now be regarded as absolutely assured, their interest is dependent on the net earnings of each separate year. These earnings have for the last four years been insufficient to provide any part of the interest, and during the last six months they have been increasingly disappointing. How soon the payment of interest will be resumed is entirely a question of the rates that the company is permitted to charge. In spite of an increase in the volume of traffic, enormously increased cost of coal and other materials and of wages has enormously increased the cost of operation, and the company can only look to increased freight and passenger rates to improve its position and the position of the Income Charge Debenture stockholders as regards the payment of interest. The Income stockholders cannot consider the non-payment of interest during the years of war as an actual injustice, because they bought their stock with the fullest notice and knowledge that its conditions were specially designed to provide against an emergency in years of bad earnings, and certainly no greater emergency could arise than that of the war. At the same time, it does not seem right that during a period in which the farmers of Western Canada are securing unprecedented profits by means of railway service, the people who have provided them with railway facilities, without which their lands would be of much less value and their profits probably nil, should be called upon to forgo the interest on their money. I think these people have a very strong case for the consideration of the Canadian Government, from whom I feel confident that they will receive generous treatment. Personally, it is with feelings of the very deepest regret that I have witnessed the Canadian Northern Railway pass from the control of Sir William Mackenzie and Sir Donald Mann. These two strong men, whose foresight, enterprise, courage and determination gave to Canada in the very nick of time the means of saving this country and her Allies from starvation, will find a very honorable place in Canadian history.

British Columbia Electric Railway—The Outlook.

With regard to the British Columbia Electric Railway, following upon the encouraging action of the Legislature of the Province in conferring powers on the Vancouver City Council to eliminate the irresponsible jitney motor-car competition, which has so seriously injured the company for so long, we have the news that the council have used these powers and that this evil is definitely a thing of the past. Unfortunately, this news comes coupled with the announcement that the company have received demands of a very drastic character from the electrical workers and the Street and Interurban Railway employees, and that these men have gone out on strike to enforce their demands without even waiting for the award of the Board of Conciliation to whom the matter had been referred. Ten days ago it could have been said that the position of this company was better than it had been for several years past, but the immediate outlook is at present discouraging. There has been a great improvement in general business and trade in British Columbia, with the result that the gross revenue of the company for the first 11 months of the current financial year shows an increase over the same period of last year of £112,000. Unfortunately, the larger part of this increase has been absorbed by the increased cost of supplies and operating. There, however, remains an increase in net earnings for the same period of £44,000, but the earnings of the company are still small and insufficient to provide for higher wages. I cannot believe that some arrangement will not be found and adopted which will provide for a fair wage for the men and enable the company to continue to give good service to the public, but at the moment I cannot say more than that I hope that a solution may be found to a problem which constitutes an extremely grave menace. Meanwhile, the financial position of the company is strong and fully able to withstand any pressure which may be brought to bear upon it.

Canadian Western Lumber and Other Companies.

I am informed that the working results of the Canadian Western Lumber Company before deducting interest or timber licence fees, or making provision for depreciation, etc., show profits of $780,000 for 1917, as against $270,000 in the preceding year, and that the business done during the past five months and the outlook for the immediate future are also encouraging. The Canadian Western Natural Gas Company continues to do a profitable and increasing business. For the eight months ended May 31, 1918, the total earnings were $878,086 as against $825,497 for the same period of the preceding year. Another company in which we are interested—the Monterey Railway, Light and Power Company—has greatly improved its position during the past 12 months as a result of the re-establishment of stable government in Mexico, and the Canadian Northern Prairie Lands Company has made some sales of land at excellent prices, thereby further strengthening its already strong position.

Shareholders will notice that we have included on pages 12, 13 and 14 of our report particulars of British and French Government war stocks with due dates, yields, etc., and that we have also included on page 11 particulars of British Government securities now on sale, together with an application form. It would be a source of very great gratification to your directors to find that these application forms have been largely used for the reinvestment of your dividend and the investment of other money. Once again I have the great pleasure of placing on record our very grateful appreciation of the devoted and able work of your managing director, who, loyally supported by your secretary and the few remaining members of the staff, have been throughout the year untiring in their efforts to carry on the company's business. (Hear, hear.)

The CHAIRMAN.—Gentlemen, before moving the resolution, I shall be glad to answer any questions that shareholders may desire to put.

A Shareholder's Questions—Chairman's Reply.

Mr. DANIEL MOORE said he noticed from the balance-sheet that the company had a considerable advance from its bankers, while at the same time they had a very large sum in cash at bankers and at call. He presumed that they were paying interest on their loan from the bankers, and he would like to know therefore why they were not using their own money?

The CHAIRMAN, in reply, said he supposed that Mr. Moore referred to the cash at bankers and at call, £249,000 odd. That was an amount which it was necessary, or prudent, to hold on call in order to meet the company's liabilities. If shareholders referred to the other side of the balance-sheet, they would see that there were trust funds or funds of associated companies in hand aggregating £232,000, which they might be called on to pay at any time. It would not, therefore, be possible to use the cash in hand for reducing the bank loan without reducing the cash in hand below the company's requirements.

Mr. MOORE said no doubt the directors knew what was necessary better than he did, but he thought he would just call attention to the matter. With regard to the dividend being paid on the Preferred Ordinary shares of 5 per cent., he would like to know how it was that the Deferred Ordinary received the higher rate of 7 per cent. He supposed it was because there was a greater risk in connection with those shares. He wished also to ask whether the chairman considered that the Five per Cent. Preference shares were a good investment at the present time.

The CHAIRMAN, in answer to the question relating to the Five per Cent. Preference shares, said that at a public meeting one must, of course, be modest in expressing an opinion as to the value of their own shares, but he would point out that those shares had a prior charge as to capital as well as to the dividend of 5 per cent. Next to them came 400,000 Preferred Ordinary shares, and after them 400,000 Deferred Ordinary shares. The rates of dividend applicable to those shares were fixed by the articles of association, and the holders of the Deferred Ordinary shares, who stood to lose more in the event of anything going wrong, naturally received a higher rate of dividend than the other classes of shares. He then moved: "That the accounts for the year ended April 30, 1918, and the report of the directors and auditors thereon be received and adopted."

Mr. N. SCOTT-RUSSELL, M.Inst.C.E., M.I.E.E., seconded the resolution, which was unanimously carried.

The Dividends.

The CHAIRMAN then proposed: "That the payment of the dividends on the Five per Cent. Cumulative Perpetual Preference shares for the year be approved, and that dividends of 5 per cent. per annum on the Preferred Ordinary shares and of 7 per cent. per annum on the Deferred Ordinary shares be and are hereby declared for the year ended April 30, 1918, payable to all shareholders of record on July 8, 1918."

Mr. SCOTT-RUSSELL having seconded the resolution, it was unanimously passed.

On the motion of the CHAIRMAN, seconded by BRIGADIER-GENERAL E. F. O. GASCOIGNE, D.S.O., the directors retiring by rotation (Mr. T. Blundell Brown and Mr. D. Northall-Laurie, F.I.C.) were re-elected.

Mr. KENNEDY proposed the reappointment of the auditors (Messrs. Robertson, Hill and Co.) for the ensuing year at a remuneration of 150 guineas, and this having been seconded by Mr. DANIEL MOORE, was agreed to.

The proceedings then terminated.—(Advertisement.)

CREDIT COMPANY EXTENDS ACTIVITIES

During the past few months the British Canadian Credit Clearing House, Limited, with head office in Toronto, has established four branch offices, in New York, Montreal, Winnipeg and Vancouver, respectively. This company was organized about one year ago and will carry out credit investigations for commercial houses. The Toronto office is under the management of Mr. L. G. Rogers, who was overseas with the Canadian army for more than three years, prior to which he was in business here. The Montreal office is under the management of Mr. L. Belanger, who has had long experience in business in Montreal, and the Winnipeg branch, which will cover the business in Manitoba, Saskatchewan and Northern Ontario, is in charge of Mr. G. C. Lawson, who has had nine years' experience in the west. The directorate of the company includes: President, William J. Cluff; vice-president, Walter A. Sadler; A. J. Young, M. L. Roessel and J. A. Willis.

The Dominion government has established a loan board for the province of British Columbia in Victoria, in connection with the carrying out of the loan operations under the Federal Soldier Settlement Act, 1917.

NIAGARA TO THE SEA

COME for a water trip—the kind of holiday that promotes health and refreshes the mind. The boats of the Canada Steamship Lines will take you through the most delightful scenery of Canada.

After viewing the 1000-Island scenery—after you have "shot" the rapids of the St. Lawrence River and visited Montreal—then linger awhile in Quebec, the city of traditions and of enchantment. Climb its steep and narrow streets. Walk, in the evening, on Dufferin Terrace. Look down from the parapet of that splendid promenade into the vast amphitheatre of the Lower St. Lawrence—a view that takes in twenty miles of the tranquil river.

Quebec casts its spell of old-world charm on all who come within its old stone walls. From the fort that surmounts its rocky height to the Lower town—with its twisting streets and quaint architecture—there is not a foot of pavement but has its story to tell of the days when this Rock City was a prize that kings gambled for and armies fought to win and hold.

From Quebec the route continues east and north, touching Murray Bay and Tadousac (where fine hotels are operated by the Canada Steamship Lines)—and then up the River Saguenay. In all, a trip of a thousand miles—at a cost so low that all can go. Complete service maintained.

DOUBLE INCOME TAX A BURDEN

American Citizens Resident in Canada are Required to Pay Both Canadian and United States Income Tax

The income tax of the United States is collected not only from citizens resident there, but also from United States citizens resident abroad. This means that those living in Canada have to pay the tax and also have to pay the Canadian income tax which is collected not only from Canadian citizens, but also from aliens residing here. With the tax increasing rapidly, the burden has become too great, and the matter is being brought to the attention of the ways and means committee of the House of Representatives. Meetings have recently been held in different cities of the Dominion and organizations formed to co-operate in securing a remedy. A deputation will, it is expected, leave for Washington next week, and a representative may also be sent to Ottawa as some arrangement should, no doubt, be made between the two governments to provide against cases of double tax. Mr. L. A. Dowling, 167 Yonge Street, Toronto, has been appointed chairman of the local association, and it is probable that Toronto will be the headquarters of the movement.

The attitude taken is that a tax should only be paid in the country in which it is earned, which means that the United States government will be asked to refrain from collecting the income tax from its citizens residing in Canada. The following petition is being circulated among Americans living here with a view to securing a wide expression of opinion:

We, the undersigned citizens of the United States, domiciled in the Dominion of Canada, respectfully and earnestly petition the Congress of the United States and the ways and means committee of the House of Representatives for relief from the heavy and increasing burden of double taxation placed upon us by the present income tax laws of the United States and the Dominion of Canada.

In support of our plea we would ask your serious consideration of the conditions that have brought upon us these inequalities of taxation, and which we believe justify our prayer for relief, to wit:

Americans residing in the Dominion of Canada are taxed on their incomes by the act of parliament, Dominion of Canada, in the same manner and to the same extent as Canadians resident in Canada. These Americans are also taxed on their incomes by the act of congress in the same manner and to the same extent as Americans residing within the United States.

These Americans in Canada have no relief from such double taxation except by action of congress. There are no grounds for an appeal to the parliament of the Dominion of Canada, as Americans must clearly recognize the right of the parliament to impose taxes on residents of the Dominion, whether subjects or aliens, and their position is therefore most unhappy and difficult unless they are granted the relief sought in this petition.

The American residing in the United States pays one tax: the Canadian residing in the United States pays one tax (the American); the Canadian residing in Canada pays one tax (the Canadian); but the American residing in Canada pays two taxes, namely, the American and the Canadian.

We, therefore, appeal to the congress of the United States and the ways and means committee of the House of Representatives to adjust, by action of congress, these inequalities and to relieve us of the severe and all but intolerable burden of double income taxation, so that only such income as is directly earned in the United States by American citizens domiciled in Canada shall pay or be subject to any income tax now imposed or that may be hereinafter imposed by the act of congress, and all income earned in the Dominion of Canada by citizens of the United States domiciled in the said Dominion shall be free of all income taxes now imposed or that may hereinafter be imposed by the act of congress.

And we make this appeal in the firm conviction of the sense of justice that actuates congress in the imposition of all taxes, and believing that our patriotism will not be questioned or our motives misunderstood.

The city council of Halifax, N.S., has adopted the report of City Engineer Doane on the Halifax company's proposal for lighting the city.

CARLETON COUNTY DEBENTURE ISSUE

The Carleton County Council sold $20,000 worth of good road debentures to C. H. Burgess & Company, of Toronto, for $18,906, or 94.53 per cent. There were four other tenders received. These debentures were of the twenty-year instalment class bearing 5½ per cent. interest. They will be marketed at a figure to yield about 6 per cent.

HEAVY WORK IN FINANCE DEPARTMENT

Some interesting figures have been obtained from the Department of Finance in dealing with the amounts of work entailed in handling the first Victory Loan. In giving these out, Sir Thomas White, minister of finance, stated that he felt he should pay a tribute to the employees of the department, who, from November to June, gave themselves unsparingly to the work. "During the period mentioned," said the minister, "the staff was employed day and night, holidays, and to some extent, owing to imperative necessity, Sunday as well. The large increase in the number of subscribers and the fact that the loan was issued in three different maturities made the work a hundredfold more difficult than the previous loan. Too great praise cannot be given to the staff for their loyalty and devotion to their task."

The figures obtained from the department are as follows: 1,800,000 bonds and the same number of script certificates were issued. Each bond was countersigned.

There were altogether over seventy different types of securities, there being three different maturities, and the bonds and interim certificates being printed in both English and French as required by the subscribers.

Of the $50 bond, which was issued for the first time, 600,000 were taken. In the $100 denomination 465,000 bonds were issued.

Almost half of the bonds were registered as to principal, or both principal and interest. The figures are: Bearer bonds, 915,000; registered bonds, 381,000; fully registered bonds, 464,000.

On June 1st, the date of the first interest payment, 300,000 interest cheques were sent out. The department dealt with 820,000 subscribers and 3,200 banks. The staff employed numbered 850.

Monthly Income Policies a Necessity

A legacy of life insurance amounting to $100,000 was completely dissipated in seven years by faulty investments and expensive living. In another case a beneficiary squandered the proceeds of a life insurance policy amounting to $50,000 in a single year. To protect the beneficiary against inexperience in making investments, and against extravagance, the monthly income policy has been introduced, providing an automatic, safe and profitable investment of life insurance funds. Supplement your existing insurance with a monthly income policy. It can be written on the life, limited life or endowment plan. Such a policy with our disability clause incorporated is without an equal in furnishing ideal household protection. We will gladly furnish full particulars and illustrations.

RAILWAYS TO REPORT ALL ACCIDENTS

New Order of Commissioners' Board Provides for Uniform System

General Order Number 244 of the Board of Railway Commissioners for Canada, issued on July 20, requires the reporting of accidents on railways, not only by the officials, but also by employees. The order reads:—

Upon the report of the chief operating officer of the board to the effect that railway companies are not fully complying with the requirements of the act in reporting accidents to the board, and pointing out the desirability of a uniform practice on the part of railway companies in making returns of accidents, and upon his recommendation—

It is ordered that every railway company subject to the legislative authority of the parliament of Canada be, and it is hereby, required and directed within six days after the head officers of the company have received information of the occurrence upon the railway belonging to it of any accident, attended with personal injury to any person using the railway, or to any employee of the company, or whereby any bridge, culvert, viaduct, or tunnel on or of the railway has been broken or so damaged as to be impassable or unfit for immediate use, give notice thereof to the board, such notice to be addressed to the chief operating officer of the board, and to be made on hard paper in the forms "A" (Relating to Highway Crossing Accidents Only), and "B" (Relating to Accidents Other Than Those Occurring at Highway Crossings), schedules to this order; such reports to be limited to accidents caused by transportation, that is to say where train movements are involved and not to apply to accidents occurring in railway shops or other manufacturing establishments, the property of railway companies.

Conductor in Charge Must Make Report.

2. That in the case of derailments, collisions, and highway crossing accidents attended by personal injury, and in the case of any damage to any bridge, culvert, viaduct, or tunnel so as to render the same impassable or unfit for immediate use, the conductors or other employees of every such company shall, at the expense of the company, and at the same time they report to the company, send to the board addressed to its chief operating officer a telegram containing the following information —

(a) Date and place.
(b) Name of railway.
(c) Number and description of train or trains, engine or engines concerned.
(d) Number of passengers, employees or others killed and injured.
(e) A short and concise statement of the apparent cause of the accident.
(f) Name and title of person sending report.

3 That where any such company grants or has granted running rights or the joint use of its line or any portion thereof to another company, and the last-named company is concerned in an accident occurring on said joint section required under this order to be reported both companies shall report to the board as herein provided.

4 That every such railway company place before their conductors or other employees affected by the order a copy of paragraph (2) of this order directing said conductors or other employees to comply directly with the requirements of the provision

5 That the said General Order No 30, Circular 110 with Supplements Nos 1 and 2, Circular No 131, and Circular No 161 be, and they are hereby, rescinded

CANADIAN NOTE AT PREMIUM IN NEW YORK

A $5 Canadian bank note recently exchanged for $5.82 in New York, at a Red Cross auction sale Mr R G Long, of Toronto, stopped on Broadway to watch a man who was auctioneering off whatever passersby gave him for the benefit of the Red Cross Mr Long handed him a $5 note, which brought $5.82

INTERNATIONAL BANKING AND CURRENCY

Joint Reserve Board for Allied Nations Would Have Same Value as Federal Reserve Board in United States

The first proposal for the establishment of an international body to control money, banking and credit, comes from Italy. David Lubin, delegate of the United States at the International Institute of Agriculture, makes the suggestion as follows:—

The banking and currency law, known as the Federal Reserve Act, was intended to serve the purpose of conserving in the United States that financial stability which should prevent the perturbance of commerce with its consequent panics and crises. And up to the present it is but just to say that it has served the purpose intended. But how about the future? Let us see.

At the close of the war, international commerce, freed from artificial barriers, will begin once more to flow in its usual channels; there will be a resumption of the ordinary import trade. These imports and the duty on them will have to be paid for in gold, perhaps at a high premium, hence a corresponding depreciation of paper money.

Such a state of affairs, unless effectively controlled, will be sure to perturb the stability of the financial and commercial world, for not only will the paper money be depreciated but it will be subject to constant fluctuations, hence it will be sure to bring on widespread panics and crises.

And the question remains: would the Federal Reserve Board be able to cope successfully with such a situation?

I do not think so. The modern international sweep of the dollar, its interlocked status, and the magnitude of the interests involved would render the Federal Reserve Board inadequate to cope with the new conditions. These new conditions demand an institution on wider and broader lines; they demand an international reserve board.

Such an international reserve board, formed by the allied nations, could, first of all, act as an international clearing-house; it could regulate the ebb and flow of gold; it could supervise the factors that go to determine the rates of interest and exchange rates; it could perform along international lines the essential functions now performed on national lines by the Federal Reserve Board; and it could render such other services toward the end in view as might be assigned to it.

More than that, the exigencies of the new conditions may warrant the issuance of international gold-notes; said notes to be issued under the auspices of the proposed international reserve board, and to be guaranteed by the joint security of the allied countries. They should be legal tender at their face-value for all gold-payments in the allied countries.

The need for this international reserve board is obvious when we consider the peculiar characteristics of the credit system.

The credit system has been graphically compared to a "house of cards." A sudden sharp impact, and the card-house tumbles. And so with the credit; leave it intact and it is a wonderful structure; strike it an effective blow and the structure is in ruins. And some times even a series of minor blows, impinging upon a vulnerable point, will bring the credit structure to the ground.

The purpose of the proposed international reserve board is to guard the credit system from such blows, and thus conserve that financial stability which will prevent the perturbance of commerce with its consequent panics and crises.

Not least among the advantages to be derived from the adoption of the proposal would be that it would afford a means for the rational handling of the war-bond problems of the allies, problems so distinctly and closely interlinked and interlocked, and of such far-reaching significance.

Moreover, one of the principal advantages to be derived from the proposed international reserve board would be that its international character would tend to concentrate the best financial minds in the allied countries on the solution of any financial difficulty in any one of these countries. In this way it would more surely tend to remove the cause of such difficulty, thus safeguarding the entire credit structure.

In other words, the international reserve board would serve as an international policeman, preserving the financial peace within the borders of the allied countries.

She's Daddy's Girl-

The very sunshine of his life. He's planning great things for her---if he lives.

And if he dies---well, he's proud of the fact that she will then receive---regularly---each month---as long as she lives---a cheque from The Imperial Life to provide for her every need.

You can provide in this way for *your* little girl. Our free booklet tells all about it. Write for a copy. Address—

PROUD OF FOREST FIRES

There was a time in the memory of living men when the inhabitants of some of our Canadian cities took pride in having their city wrapped in a pall of smoke at certain seasons of the year, because they said it indicated activity in lumbering. To-day cities and provinces are just beginning to take pride in the absence of forest fires. The trees may be cut down and marketed and a new crop started without any fires developing. This is shown in a bulletin just issued by the forestry branch of the Department of the Interior entitled "Forest Fires in Canada, 1914-15-16." This is the first successful attempt to get systematic statistics as to the losses suffered by Canada through forest fires. It shows the danger seasons and the causes of fires, and shows also how fires may be so combatted that the loss in the area equipped and patrolled will be almost negligible. Diagrams illustrate the causes of fire, the extent of our losses, and the character of the timber burned. The publication of these statistics will tend to arouse Canadians to the evil of helping our national enemies by allowing fires to destroy wealth which is required to prosecute the war. The bulletin may be had free on application to the Director of Forestry, Ottawa.

An extension of the high grade oil field near Thamesville, Ont., was discovered recently on the completion of a well at the Canadian Pacific Railway station. This well is situated about 1¼ miles north of the town and in an hitherto undrilled territory.

The United States treasury department announced on July 30th that loans totalling $112,000,000 had been recently made to the Allies. Of this sum, France received $100,000,000, Belgium $9,000,000 and Serbia $3,000,000. This brings the total of loans to the Allies to $6,492,040,000.

NEW INCORPORATIONS

The Northern British Columbia Fisheries Company, Limited, with Capital Stock of $2,000,000, Received Charter

The largest company incorporated during the past week was the Northern British Columbia Fisheries Company, Limited, with a capital stock of $2,000,000, and head office in Vancouver, B.C.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are the provisional directors:—

Ashcroft, B.C.—Peter Hem & Company, Limited, $5,000.

La Sarre, Que.—Letourneau & Lambert, Limiteé, $45,000. A. Letourneau, E. Lambert.

Quebec, Que.—Eastern Machinery, Limited, $300,000. G. A. Laprise, A. Laprise, J. C. Herbert.

Maberly, Ont.—Maberly Telephone Company, Limited, $1,500. J. A. Perkins, J. R. Munro, T. Duffy.

Sherbrooke, Que.—Campbell Howard Machine Company, Limited, $650,000. J. T. Hackett, F. W. Hackett.

La Prairie, Que.—Giard & Caswell Lumber Company, Limited, $10,000. J. E. Halle, S. Gobeil, E. Giard.

Westmeath, Ont.—Beachburg Rural Telephone Company, Limited, $2,500. A. F. Cameron, C. W. Griese, J. White.

North Bay, Ont.—Bay Manufacturing Company, Limited, $40,000. W. F. Morgan, W. H. Bowlby, W. H. Symons.

Winnipeg, Man.—Manufacturers' Surplus Sales Company, Limited, $40,000. S. Rackow, W. Genser, M. L. White; Winnipeg Loan Company, Limited, $50,000. G. A. Axford, H. J. Palmason, P. M. Astle; Best Auto Tire Re-Tread, Limited, $5,000. J. H. Beat, H. E. Best, P. Wise; Knight & Pumpelly, Limited, $20,000. E. T. Leech, F. J. Sutton; Security Seal Company, Limited, $100,000. B. C. Parker, F. J. Wood, A. H. Bevan.

Toronto, Ont.—Sherman Service, Limited, $1,000. J. F. Sherman, F. J. Beck, T. P. Maguire; Pears Realty Company, Limited, $20,000. G. Grant, M. Macdonald, E. Smily; Lake Shore Country Club, Limited, $300,000. H. H. Hall, F. H. McCallum, N. Lown; Electric Oil and Gas Heating Company, Limited. J. L. Scott, F. W. Trickey, D. Archer; Dover Oil Company, Limited, $1,000,000. H. C. May, O. Harland, S. F. Hayes; Hooton Chocolate Company, Limited, $1,000,000. J. L. Thorne, G. M. Mulholland.

Vancouver, B.C.—Hamilton Carhartt Cotton Mills, Vancouver Unit, Limited, $100,000; Sigmore Motor Company, Limited, $100,000; R. Gardom & Company, Limited, $24,000; Tale Products, Limited, $10,000; Kelly, Van & Company, Limited, $10,000; Remedial Provident Loan Society of British Columbia, Limited, $200,000; Rex Millinery Company, Limited, $10,000; British Columbia Dock Company, Limited, $50,000, Co-operative Union Bakery, Limited, $10,000; A. Linton & Company, Limited, $12,000; Northern British Columbia Fisheries, Limited, $2,000,000.

Montreal, Que.—Le Foyer, Limiteé, $45,000. H. Gauthier, S. Sulpice, S. F. Gauthier; Cavers Auto Garage & Supply Company, Limited, $20,000. G. I. Alexander, A. Burnett, H. J. Murphy; Compagnie Medicale Moro, $10,000. L. Boyor, A. Boyor, G. Audet, Globe Amusement Enterprise, Incorporated, $20,000. G. Tritt, S. Tritt, N. Swan; Main Automobile Garage, Limited, $20,000. I. Popliger, W. Astrof, H. Shapiro; Ingersoll Machine Company, Limited, $500,000. L. A. David, L. P. Crepeau; Le Cheptel Canadien, Limiteé, $500,000. J. Jean, J. A. Desjardins, J. Prevost.

Returns issued by the department of finance of Japan show that foreign bonds issued on the Japanese market since August 1, 1914, and up to the end of May, 1918, totalled 676,445,600 yen ($336,600,000). Of the aggregate, British bonds amounted to 185,174,306 yen, French bonds 77,708,033 yen, Russian bonds 388,563,257 yen and Chinese bonds 25,000,000 yen.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended August 2nd, 1917, and August 1st, 1918, respectively, with changes:—

	Week ended Aug. 1, '18.	Week ended Aug. 2, '17.		Changes.
Montreal	$ 93,320,499	$ 77,576,225	+	$15,744,274
Toronto	71,836,003	55,612,535	+	16,223,468
Winnipeg	22,678,266	43,728,823	—	21,050,557
Vancouver	8,015,892	8,190,934	—	175,042

The Outlook in the West

Crop Prospects in Saskatchewan are Disappointing—Only a Few Sections Will Have Fair or Good Yield—Agriculture in West Is a Hazardous Industry, and Profits Must Provide for Losses—Economic Future of Western Canada Is Assured.

By W. W. SWANSON

AFTER an extensive tour of the province from Prince Albert in the north to Yellow Grass and Saltcoats in the south and east, one is forced to conclude that the crop prospects of Saskatchewan are decidedly disappointing. In the Prince Albert and Battleford districts there was the likelihood of splendid crops, as also in the Yellow Grass territory and especially in the Yorkton district; but recent frosts have wrought serious damage. It is probable that the average yield will not exceed ten bushels per acre, while it may be as low as seven. The situation is undoubtedly serious when, in addition to the relative crop failure, one finds that there is a great probability of a scarcity of fodder. Already in many localities the farmers are breaking up the land for next year's crop, and in some instances they have begun to cut the wheat; although, hoping against hope, the majority are holding their crops expecting to realize seed, if not something more.

The situation demonstrates that farming as now carried on in the West, in most instances, is a hazardous enterprise. Mixed farming has as yet not made much headway in Saskatchewan; and the element of risk from lack of moisture, hail, high winds and early frosts, makes agriculture doubly precarious. This ought to be borne in mind by those who have glibly charged Western farmers with profiteering under the $2.21 fixed price. True, that price yields a fair profit even under present conditions, providing that a crop be realized; but this is so uncertain that the high price does not even cover the insurance item. Just as a manufacturer must make provision in selling costs for bad and doubtful debts, so the farmer should receive in the price of his product a certain return covering the element of risk in grain farming. It is certain that this harvest will see many farmers in the prairie provinces with a crop that will not even return seed, not to mention the high cost of capital and labor involved in the productive effort. On the other hand, one must point out that in certain districts, despite frost and hail, the returns will be good, even exceptionally good. In the vicinity of Yorkton, Melfort and Prince Albert, the farmers are expected to do well. The Yorkton territory is a splendid stock country, and therefore does not rely to the same extent as other localities upon the grain harvest alone. Even there, however, in conversation with several prominent farmers, it was found that considerable apprehension existed over the possibility of a deficiency of fodder for the winter months.

As has been often said, the real solution of the agricultural problem on the prairies is to be found in the abandonment of purely grain farming in behalf of mixed farming. This is desirable, and shortly will be imperatively necessary, if the soil is not to be depleted. Nevertheless, Western farmers have made much greater headway in this direction than is generally supposed, Saskatchewan now standing second among the provinces of the Dominion in number of stock held. This is a good record in view of the fact that before the war the holdings of cattle and hogs in the leading agricultural countries of the world were on the decline, not only relatively to population, but absolutely as well. Notwithstanding the heavy burden placed upon Canadian and American farmers as a result of the war, the production of hogs has been very greatly stimulated as well as holdings of cattle and sheep. While the contraction of range lands cut into the sheep industry, the high price of wool as well as the favor with which mutton is now received by the American people as a food, have brought sheep back into their own. Indeed, it may be predicted that farmers west of the Mississippi and in the Canadian prairie provinces will rapidly expand their holdings of sheep, for meat as well as wool. At Western agricultural fairs it is encouraging to observe that far more attention than in the past is now being devoted to sheep, and that farmers realize how valuable sheep may be in the farm economy.

It should not be forgotten that the farmers on Canadian prairies labor under serious and severe handicaps in producing food products. For one thing, the efficiency of labor is away below normal, since many new and inexperienced men have necessarily been employed. This has thrown new responsibilities upon the farmer and his family. These, however, have been met resolutely and with goodwill. Near Craik, on the Canadian Northern Railway line south of Saskatoon, the writer met a very intelligent farmer who introduced him to his two daughters, just returned from attending school at Regina. These were cultured young women, yet they proudly explained that they were spending their holidays by helping on the farm, actually undertaking work usually performed by men,—cultivating, plowing, and so forth. That is the spirit of the West, and that is the spirit that wins.

Notwithstanding the crop outlook, the general commercial and economic situation in Saskatchewan is good. Employment for all is available at good wages; retailers have had a splendid season's trade, and collections up to the present have been well maintained. Indeed, it may be said that the farmers and townspeople have indulged in much heavy spending during the past year, and there are those who believe that the check that is bound to come to such spending during the ensuing months will be all to the good. There has been overmuch speculation in farm lands at values based upon war prices. High prices for agricultural land undoubtedly benefit present holders and those who have no real intention of permanently staying with farming, but they benefit no one else. One does not need to labor the point that interest on the capital invested must count for all the years to come as an item in the cost of production; and high costs of production will handicap Western farmers who, in the future, must compete with the low-priced labor of Europe and the Argentine. Undoubtedly, the majority of Saskatchewan farmers have settled on the land for the purpose of establishing homes; but in some districts the land has changed hands many times over, and this is bad for scientific and effective agriculture. It has been demonstrated sufficiently in the history of the United States that speculation in farm lands is fatal to sound agriculture, and to community enterprise.

Western farmers know perfectly well that readjustment will follow upon the close of the war, during which prices and values will reach new levels. Notwithstanding that risk, they have thrown themselves with energy and resolution into the production of food for the Allies. No one who has met audiences of Saskatchewan farmers can fail to be impressed with the fact that their main object in extending acreage under cultivation, which was so largely done this year, was actuated by patriotic motives. This was made abundantly clear to the writer, if additional proof were needed, at the meeting of farmers held at Landis on Sunday, August 5th, to commemorate the fifth anniversary of the outbreak of war. Though many of these farmers had the prospect of securing nothing more than seed from this year's harvest, they, as well as their more fortunate neighbors of the Tramping Lake district, showed the firmest resolution to continue the struggle until victory is achieved—and that although many of them will be hard pressed to make ends meet during the coming winter. The simple fact is, no finer patriots are to be found in the Dominion than among these dwellers of the plains.

Productive Power of West is Maintained.

Nevertheless, the post-bellum readjustment will come slowly as far as the prices of Western farm products, and wheat in particular, are concerned. There will be no sudden fall, or sharp fall, in the price of wheat and other basic food products. The great wheat-producing areas of Europe are disorganized or devastated. Siberia, the granary of Russia, is the scene of civil strife; Roumania will take years to recover from its loss of farm buildings and agricultural implements; and Hungary, one of the greatest wheat-producing districts of Europe, has been practically depleted of its man power. The farm lands of France, and particularly of Germany, have been denuded of their fertility, owing to the destruction of stock, and poor cultivation by women and child labor. Up to the end of December, 1917, it is estimated that the belligerent countries of continental Europe alone had lost some 140,000,000 head of livestock, and the destructive process has gone forward at an accelerating pace. True, Australia has a surplus stock of wheat on hand which may remain as a reserve to meet post-bellum conditions; but it will not go far to fill the gap in the world deficiency. Therefore, although prices of farm products will inevitably decline at the signing of peace, it is scarcely probable that there will be any sharp fall in values.

The writer found a general disposition, in coming in intimate contact on many occasions during the present summer with Saskatchewan farmers, to take a large view of national problems. In truth, there is more general discussion among the people of the prairies of vital problems of politics and economics than is usually found in the East. Nor, as has been said, are the farmers extreme in their views. At the last election, they sank all party differences and returned a solid delegation to Ottawa in support of Union Government. Many of them believe that the Union Government have been guilty of sins of omission and commission; but nevertheless, all this is impatiently flung aside in the eagerness to win the war. At the same time, Western farmers have quite definite opinions as to what should be accomplished in the fiscal sphere at the conclusion of hostilities.

It is impossible, of course, to say how widely some opinions are held, but there is a fair concensus of opinion as to the advisability of increasing provincial inheritance taxes and levying a heavy federal inheritance tax as well. The farmers would shift the burden of taxation from the tariff to the inheritance tax, the excess profits tax, and the income tax; believing that these latter most adequately meet the fiscal ideal in taxation—ability to pay. They are open-minded, however, on these and other issues, and are willing to meet those who hold opposite views more than half-way in an attempt to arrive at a programme that will appeal to the sound sense and good judgment of all elements in the Dominion.

Advanced Ideas on Property Ownership.

It is absurd to say that westerners, and western farmers in particular, are irreconcilable extremists, or that there is any tinge of Bolshevist doctrine among them. They are capitalists themselves, and in the main are land holders and not tenants. They respect the rights of private property and have no patience with the dogma that property should be held in general, irrespective of individual effort, capacity or enterprise. At the same time, it must be admitted that they believe that natural resources and great public enterprises should be controlled and owned by the nation, rather than exploited by private capital.

It is encouraging to be assured that the farmers of the West are not striving through their great associations to promote mere class interests. Again and again during the course of the past summer, the writer has heard leaders in the agricultural movement state that that movement menaces, in their judgment, no other legitimate interest and no other class in Canada; that what is required is not class-conscious groups of conflicting and hostile interests, but a genuine community of interests in which democratic and liberal ideals will be paramount. To that end, it is worthy of more than passing interest to realize that, through these great agricultural associations, the mind of western farmers can be interpreted to eastern manufacturers and other economic and social groups. Through these associations, East and West, a point of contact can be established, and neutral ground entered upon, whereby it will be possible to work out a tentative programme that will do substantial justice to all the economic groups in Canada. Only through intelligent and restrained discussion, through a live-and-let-live policy, will it be possible to effect that harmony in our life without which solidarity in citizenship cannot be attained. Extremists must give way on both sides; and it must be realized that only in process of time can anything approximating to economic justice be worked out. To that end it would be well if certain interests in the East should cease patronizing Western Canada and particularly western farmers. Surely, what the West has accomplished during the course of this struggle entitles it to better treatment.

It is impossible, within present limits of space, to deal with these questions in their entirety, and further consideration must be left for later treatment. In conclusion, however, we may say that the West is at one with the East in many vital questions affecting the prosperity of the Dominion. Especially are western farmers anxious that the government, as well as all the great associations of the country, should take immediate steps to prevent the dislocation of the economic life of the nation at the close of the war, whether through unemployment or otherwise. To that end it would favor the expansion of our shipping programme; the development of our great national ports and harbors; the construction of branch railway lines; the building of roads, and so forth. The West, in a word, is not parochial or sectional in its interests. It demands a united and free Canada.

CITY OF LONDON FINANCES

For the year 1917 the total receipts of the city of London, Ontario, amounted to $1,314,360 on account of the year 1917, and $122,528 on account of the year 1916. There is still to be received for 1917 a sum of $375,482, making a total revenue for 1917 of $1,727,320. This is almost $100,000 above the estimates for the year, there being only a few items which did not exceed the amount estimated. The expenditure was $1,374,886 for the year 1917, and $136,106 for the year 1916. Amounts totalling $290,367 are further to be paid for the past year. The total expenses are, therefore, $1,709,757, which is substantially more than the estimates, but less than the total revenue. The revenue for the year includes an item of $30,896, which was a surplus from the year 1917, whereas the surplus of the year 1917 is only $21,228.

The assets of the city amount to $4,407,893, of which $647,088 consists of sinking funds, which are all in good condition. The total of outstanding debentures is $4,187,797. Debenture issues made during the year totalled approximately $250,000, the largest item being $100,000 for the London Railway Commission.

The population for the year is 57,301, which is slightly less than the population of 58,055 reported for 1916. Assessment on the other hand has increased slightly. The tax rate for the year 1917 is 34 mills. The general debenture debt was at its maximum in 1915 since when it has declined by $300,000. The total debt charges for the year amounted to $505,126, of which 38 per cent. was for sinking fund purposes. Considerable sums of the city's bonds mature in 1921 and subsequent years, and the sinking fund charges and the general debenture debt should then decrease rapidly.

Statements of the affairs of some of the institutions in which the city is interested are given separately. One of these is the Western Fair Association which is reported to be in an excellent position. The receipts for the year were about $68,000, and the expenses about $55,000, leaving a balance of $13,000 to be carried forward. This, together with the previous assets, makes a total of assets of $122,373 against which there are no capital liabilities. From the waterworks a surplus of $5,361 was realized after paying all charges and expending $15,385 on capital account.

AN ABUSE OF PRIVILEGE

One of Principal Fire Causes Has Not as Yet Been Subjected to Any Regulations

By Henry Lye.

Vancouver, B.C., August 2, 1918.

We are accustomed to news of fires which have "wiped out" villages and towns, or have greatly damaged or destroyed factories and mills or granaries, whose existence was of great importance to the welfare, not only of their several localities, but to the province, the Dominion, the empire and to the civilization and the freedom of the world at large, and yet we neither take heed, nor measures to prevent the continuance of such events as make Canada infamous by contrast with other countries. We had the right to expect action on the part of the Commission of Conservation in this direction, but we get nothing but precept and reiteration of statements of which everybody has been made aware almost continuously during the past fifty years. Had the fires branch of this commission been composed of members experienced in the investigation of causes of fires and the adjustment of fire claims we would have had sensible measures for the prevention of fires long ago.

It is my intention to deal with some features of the manifesto recently issued by this commission, but, for the present, to confine myself to an opportunity neglected or ignored.

We all know that many, if not most, of the serious fires have their origin in criminal carelessness, and that the most prevalent practice in this carelessness arises from the habit of smoking. Smokers are now the only people who have liberty of action and exclusive freedom from control. We are exhorted to be self-denying in the use of foods and, when we are not legally restricted in quantity, we are obliged to submit to adulteration by substitutes. We may not have any of the "wine which maketh glad the heart of man," but we have that which may make him melancholy mad. We must forego the glass of beer necessary to the refreshment of the laboring man. The glass of whisky which warded off colds in the wet and cold wintry nights, or the malaria which produced fever, can now only be procured on the production of a doctor's prescription. The housekeeper is bewildered by the restriction in the use of sugar and other commodities which she has always found necessary. The very children are deprived of cakes and candies with which their little hearts were formerly gladdened. But amidst all these deprivations and restrictions and self-denials and dangers of fires the smoker is allowed to revel in the consumption of that which is, comparatively, if not altogether, unnecessary to health or sustenance.

Leaving out the soldiers in the wet and foul trenches, or whose nerves have been racked by dirt, shell fires, gas or want of food during the long days of toil and exposure and the nights of unrest and disturbance, we are face to face with the ordinary smoker, male and female, very few of whom can truly aver that tobacco, in any form, is really necessary to their health or life. To most of these people the use of tobacco is merely a matter of habit, which they selfishly indulge in without caring for one moment as to the necessities and comfort of their families, or of that loyalty which urges self-denial in every direction. It is needless to point out the annoyance caused to non-smokers through the abuse of this habit. Our causeways are littered with matches and the stubs of cigars and cigarettes which have been thrown down whilst yet burning. When we further reflect on the fact that to produce the various forms of smoke, the labor of cultivation, manufacture and marketing would, if rightly used, produce and dispense an immense amount of that food, from which all are debarred, we cannot but conclude that the question of the habit of smoking and its course of menace should have had some consideration and action on the part of the Commission of so-called Conservation.

The Union Insurance Society of Canton has been granted a license in the province of Saskatchewan.

The chairman of the administration commission of the city of Montreal, Mr. E. R. Decary, has given instructions to heads of departments to keep an accurate check upon the hours which each employee at the city hall works.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canada Steamships Company.—The net earnings of the company for the half-year amounted to over $2,000,000, or at the rate of $4,000,000 for the fiscal year.

Demerara Electric Company, Limited.—The following is a statement of the earnings of the company for June, 1918:—

	Gross.	Net.
Railroad	$6,917.46	$ 305.27
Light and power	8,135.63	4,068.12
Miscellaneous	......	163.81
		$4,537.20

Trinidad Electric Company, Limited.—The following is a statement of the earnings of the company for June, 1918:—

	Gross.	Net.
Railroad	$10,563.82	$3,148.92
Light and power	10,076.56	3,894.54
Ice and refrigeration	3,440.67	757.56
		$7,801.02

Canadian Pacific Railway Company.—At a meeting of the directors of the company on August 12th, the following dividends were declared: On preference stock, 2 per cent. for half-year ended June 30th last.; on common stock 2½ per cent. for the quarter ended June 30th, being at the rate of 7 per cent. per annum from revenue and 3 per cent. per annum from special income account. Both dividends payable October 1st next to shareholders of record 1 p.m., August 31st.

Brompton Pulp and Paper Company, Limited.—Net profits of the company, after payment of all administration charges and bond interest, amounted to $511,734 in the half-year ended April 30th last. From the net profit $70,000 is charged off for two quarterly dividend payments on the preferred stock. That would leave a net surplus of $441,734 available for the common stock, or earnings at the rate of 12.6 per cent. on the common. This estimate, however, is necessarily subject to downward revision because of the unknown deduction for war taxes and also for depreciation. What the return shows, with tax and depreciation allowances left out, is that after paying 2½ per cent. in dividends on the common, or $175,000, the balance of profit carried forward into the second half of the year was $226,734.

International Nickel Company.—The consolidated general balance sheet of the company for June 30th, 1918, shows assets as follows:—

Property	$48,457,891.16
Investments	2,468,451.80
Inventories	7,384,507.27
Accounts receivable	2,991,636.22
Loans	15,000.00
Certificates of deposit	2,030,000.00
Cash	3,999,754.80
Total	$67,347,241.25

The following items make up the statement of liabilities:—

Preferred stock	$ 8,912,600.00
Common stock	41,834,600.00
Accounts payable and tax reserves (as provided)	6,573,451.20
Preferred dividend No. 51 payable Aug. 1, 1918	133,689.00
Accident and insurance funds	256,462.78
Surplus April 1st, 1918	7,923,762.60
Profit and loss	1,712,675.67
Total	$67,347,241.25

The total income as shown in the profit and loss statement for the three months ended June 30th, 1918, amounted to [illegible]. After allowing $248,487 for general expense and [illegible] (estimated) for taxes, the net income totalled [illegible]. When depreciation and mineral exhaustion, amounting to $472,052, and dividends totalling $133,689 were deducted, the profit and loss balance stood at $1,712,675.

Riordon Pulp and Paper Company.—The directors of the company are informing the shareholders that it is their intention to make a new issue of bonds to the extent of $3,000,000. Subject to the approval of the shareholders, they have made tentative arrangement with the minister of finance for the sale of these bonds, particulars of which will be announced later. Permission has also been obtained from the capital issues committee at Washington for the sale of the securities in the United States. The funds obtained from the sale of these bonds are for investment in the Kipawa Fibre Company, Limited, which is to be managed jointly with the Riordon concern. The Kipawa Company will manufacture bleached sulphite pulp at a mill which is being erected at Timiskaming, Que. The meeting of the shareholders of the Riordon Company called for September 10 is probably in connection with this undertaking.

Nipissing Mining Company.—During the month of July the company produced silver of estimated value of $304,694, mined ore of an estimated value of $333,947 and shipped bullion and residue of an estimated value of $877,231. Underground operations continued to be of the usual nature and extent. Several new small veins, of low assay, were encountered at shaft 73. The high-grade mill treated 172 tons and shipped 842,870 fine ounces of bullion. The low-grade mill treated 7,059 tons. The following is an estimate of production for the month of July:—

Washing plant	$118,243
Low-grade mill	186,451
Total	$304,694

The production is less by $36,000 than in June and smaller than any month since February. This decrease was due to the break in the aerial tram. The output value for the seven months ended July 31st, was $2,223,928.

Brazilian Traction, Light and Power Company.—The increase in the gross earnings of the company compared with the corresponding month in 1917 was 1,445,000 milreis, and while the operating expenses increased by 684,000, the net earnings made a gain of 761,000 milreis. The aggregate gross earnings from January 1 to June 30 increased by 5,047,000 milreis, and the net by 300,000. The following is a detailed statement of earnings:—

June.	1918. Milreis.	1917. Milreis.	Increase. Milreis.
Total gross earnings	9,087,000	7,642,000	1,445,000
Operating expenses	4,304,000	3,620,000	684,000
Net earnings	4,783,000	4,022,000	761,000
Aggregate gross earnings from January 1	49,693,000	44,646,000	5,047,000
Aggregate net earnings from January 1	24,702,000	24,402,000	300,000

VICTORY LOAN POSTER PRIZES

On the 15th instant the Victory Loan publicity committee announced the award of prizes for posters selected. About 600 entries were made. The first prize of a $1,000 Victory bond was awarded to Mr. Frank Nicolet, London, Ontario; the second prize of a $500 Victory bond to Mr. Lorne K. Smith, of Toronto, and the third prize of a $250 Victory bond to Mr. C. Fulleylove, Ottawa. A number of awards of $100 Victory bonds were made. All of the designs become the property of the committee.

MONEY MARKETS

ENGLAND'S OLDEST COLONY

In these days of financial feats of magnitude we are apt to overlook accomplishments which do not loom so large in point of quantity, but the quality of which is equal to the best. Newfoundland, a country which was hitherto deemed incapable of financing even a small project, has subscribed $3,500,000 to a Victory Loan. The amount asked was $2,000,000, so the issue was oversubscribed by 75 per cent. This is the first time that an internal loan was ever floated by the Newfoundland government, and the event is of great importance, not only in revealing to the colony itself its own capacities, but also in setting a fair example for other countries to follow.

Newfoundland has a population of about 250,000 and a net debt of over $38,000,000. At first glance the latter figure seems large, but it must be remembered that there is very little municipal debt and no provincial or state debt, as the case with Canada and the United States. Primary industries only are carried on, fishing, mining and lumbering being the principal ones. There is some agriculture, but very few persons are engaged exclusively at it. Revenue is derived almost entirely from a high tariff, and under its influence some manufactures have grown up. For the year 1916-17 imports were $21,318,310 and exports $22,381,762. With the exception of a few years, imports have exceeded exports, the difference being required to pay the interest on Newfoundland securities held abroad.

In spite of smallness of wealth and population as compared with other British colonies, Newfoundland's credit has always stood at about the level of that of Canada and Australia in the London market. This is probably due to the fact that its development has been almost purely British, that it is the oldest of British colonies, and that it is closely connected to the United Kingdom as regards situation, industry and trade.

Another indication of growth is found in the statement of life insurance payments during 1917, compiled by the Insurance Press of New York, and given in *The Monetary Times* last week. According to this statement, $192,500 was paid out in Newfoundland last year. The largest payment made was exceeded by only one payment in Canada, and there were two others in excess of $10,000.

THE TARIFF AS A TRADE WEAPON

Much discussion has been evoked recently over the question of maintaining a trade war with Germany after the conclusion of the present military struggle. Announcements pointing in this direction have been made from official sources, and great variety of opinion has been expressed in private quarters.

On the 31st July, in addressing a deputation of two hundred members of the National Union of Manufacturers, Mr. Lloyd George said:—

"The longer the war lasts, the sterner must be the economic terms we must impose on the foe. I think the sooner he realizes that the better. He is fighting in order to impose his own economic terms on the Allies. He will never succeed in doing so.

"So far as that is concerned, we must be in a position to determine the conditions which we regard as fair without having them imposed upon us by the will of the enemy."

The Premier also stated that in determining a trade policy the British government should act in concordance with the Dominions and with the Allies.

A somewhat different view seems to be prevalent in the United States. This is realized in England, and the London Chronicle, in commenting upon Lloyd George's speech, said:—

"We doubt very much whether that is how President Wilson views the question. It is certainly not the view of American opinion generally. Americans attach great importance to the economic weapon which the Allies, acting together, could wield, but the Americans do not wish it wielded with a vindictive purpose for any fixed period after the war. It will not be possible to carry out both the American policy and Lloyd George's policy. They are alternative, not supplementary.

"The American suggestion is full of hope and help in the pursuit of ultimate permanent world peace. That of Lloyd George has quite the opposite tendency.

The opinion prevalent in the United States at the present time seems to be in favor of concluding the war by military means, leaving the economic development of the future free from any restrictions. It is fairly easy now for the allied nations to make mutually satisfactory arrangements, but how long will such arrangements last when the stress of war is over?

THE CANADIAN EXCHANGE SITUATION

A recent announcement of the Canadian finance minister, Sir Thomas White, given elsewhere in this issue, contains a statement regarding the exchange relations between Canada and the United States which should satisfy those who had been arguing in favor of some measure to adjust the situation. For some time past New York funds have been at a premium of about 2 per cent., and quotations have occasionally exceeded this amount. To remedy this situation it has been suggested that a Canadian loan should be floated there, which would set up a flow of money in this direction, or that some similar arrangement should be made which would bring the cost of United States money more nearly to par.

The finance minister points out that this premium on United States exchange acts as a very efficient influence towards restricting Canadian imports from that source. This is, he points out, a very desirable condition in view of the necessity for economy here. There is, of course, the objection that in addition to restricting the importation of luxuries, it also handicaps the importation of such necessities as are required. However, if the latter are really necessities, they will continue to be imported regardless of the premium which it is required to pay, the only difference being that they will cost more. This again reduces the amount of income available for expenditure upon less essential commodities, so that the ultimate reduction in imports must take effect upon articles which are unessential.

These effects not only are felt in the case of trade in mercantile commodities, but also in dealings in securities across the border. The premium restricts the purchase by Canadians of securities in New York and at the same time encourages the sale of securities which may be readily sold there. That the net effect is considerable is illustrated by the comparative prices of Dominion of Canada bonds in Canada and New York. Dominion of Canada 5 per cent. bonds, due in 1931, were quoted in New York on Monday, the 5th instant, at nearly a 6 per cent. basis. Bonds maturing in 1926 and in 1921 were quoted at still more favorable prices. In Canada war bonds have been selling for several weeks past at about a 5⅝ basis, and, while the issues are not the same, there is practically no difference between them. Obviously, if New York exchange were restored to par by some financial measure, there would be practically no sale for the bonds being offered here so long as the external issues quoted in New York could be secured at their present quotations. The effect would be, therefore, an immediate drop in the values of domestic issues and the exportation of considerable money for purchases in New York, which funds we desire to retain here to assure the success of the next war loan. The same thing would be the case as regards merchandize and securities other than our war bonds. The premium on United States funds, therefore, is quite desirable in view of the present campaign for economy here; it would, in fact, be very inconsistent for the Canadian government to adopt a measure to restore the situation to par and at the same time to be endeavoring to restrict imports through the War Trade Board, and to encourage the production and export of food through the Canada Food Board.

CROP PROSPECTS IN THE WEST

"The Manitoba Free Press" in its seventh crop report for 1918 says:—

"A heavy July frost was so remote a contingency that no one gave it a thought. Yet the contingency has overtaken a very material portion of the west. Reports of frost came first on the morning of July 24th, and were mainly from Northern Alberta; the full reports now received show that frosts occurred in some portion of the west practically every night from the 23rd of July to the 2nd of August. There is absolutely no record of any such occurrence in the past history of the west. The only approach to it was the crop of [illegible], which was frosted on the 4th and 5th of August of that year, and was almost a total loss. "The Free Press" was besieged with enquiries as soon as frost was reported, but decided not to attempt to secure a general report until sufficient time had elapsed to give some chance of estimating the damage. It is fourteen days since the first and heaviest frost occurred, and there is now no doubt that the damage is very serious, although it is not possible even yet to state it definitely. Some points may even yet recover to some extent and others, which have been thought to be lightly damaged, may prove to be seriously affected. The crop which had not reached the blossom stage suffered the least, as practically no crop was sufficiently advanced to resist frost damage. It is generally conceded that even one degree of frost adversely affects wheat in blossom, while wheat in the stiff dough stage will stand 3 or 4 degrees of frost without dropping more than a grade."

Reports are received from the principal centres throughout the province of Manitoba, Saskatchewan and Alberta. The best prospects seem to be in Manitoba, where very little frost is reported. Rain has been adequate and no damage has been done by hail. With practically no exceptions the grain crop, the live stock and the potato crop are reported to be in good condition. Saskatchewan, on the other hand, appears to have suffered considerably. Frost to the extent of ten degrees was experienced in some places, including Watrous and Kerrobert. Conditions of the coarse grains appear to be fair and the live stock about the same. The potato crop is good in sections, but in many cases has been largely destroyed by frost. In Alberta some frost was experienced, notably at Castor and Camrose, and rain is needed in many parts of the province. In most cases the grain crop is reported to be no better than fair. The live stock is being retarded and part of the potato crop has been destroyed.

VICTORY LOAN BONDS ADVANCE IN PRICE

On Monday, the 12th instant, announcement was made that the selling price of Victory Loan bonds would be raised to par and that the committee in charge would pay 99 and interest for them. The announcement was made by Mr. R. A. Daly, secretary of the Victory Loan special committee, and the change took effect from the close of business on the 12th instant.

TAX EXEMPTION EXPLAINED

Freedom from Taxation is Counterbalanced by Lower Interest Rate, Says Minister

In reply to criticisms of the tax free feature of Victory Loan bonds, Sir Thomas White issued the following statement on the 13th inst.:—

"Those who contend that our war loan issues in Canada should have been made subject to Dominion taxation overlook several important considerations bearing vitally upon the question.

"During the first two years of the war Canada could not have financed her military effort by domestic loans only. We had been a borrowing country, and it was necessary that for a considerable period after the outbreak of war we should continue to borrow externally. The London market having been closed to outside issues, we turned to New York. In connection with our loans there, it was an imperative condition that the securities should be tax-free, no matter in whose hands they might be held. We have now listed in New York tax-free securities aggregating $140,000,000, from which Canadians have bought and can still buy. We have issued $750,000,000 of tax-free securities in Canada. In fixing the price of issue we had to take into consideration market conditions prevailing both in Canada and New York. This was especially so during the first three years of the war, when we had to depend for the success of our loans principally upon the investing public. The Anglo-French loan and the several issues of the Imperial government in New York, all giving a high interest yield, were, during this period, real competitors with our war issues, and large sums went from Canada for their purchase. While it is true that patriotism plays a great part in the successful flotation of war loans, it should be kept in mind that prices must reasonably conform to market conditions. Especially is this true where financing on a large scale extends, as ours has extended, over a period of years. Prices continually tend to reach true market equilibrium.

If the $750,000,000 of securities which we have issued in Canada had been issued subject to taxation we should have had to offer a better interest yield rate than we offered to the public. This is clearly illustrated by the positions of the tax-free and the taxable Liberty Loan issues on the New York market. The 3½ per cent. tax-free issue stands at or above par. The taxable 4¼ per cent. issue stands at 95. There is a difference in interest yield rate of nearly a point and a half. If upon the $750,000,000 of war loan securities which we have issued in Canada we had to pay only ½ per cent. additional interest rate, our annual interest charge would be increased by $3,750,000, and we should now be facing a 6 per cent rate upon our next loan, instead of floating it at 5½ per cent., as we shall.

Revenue from Income Tax.

"On the other hand, suppose the whole seven hundred and fifty million of our domestic issues were subject to taxation, what revenue should we derive under our income tax? The annual interest is, say, forty million dollars. Allowing for the exemptions provided by the act in the case of all incomes, it is extremely improbable that we should derive more than a million, or at most a million and a half additional revenue from the taxation of income derived from this body of securities. In other words, our annual balance sheet is decidedly the better by reason of our securities having been issued free of taxation and upon the favorable interest yield basis which we were thus able to obtain. The comparison with government issues of Great Britain or the United States is quite fallacious unless all the facts are taken into account. Before the war United States bonds were on a 2 per cent basis. British consols yielded investors about 3 per cent. Both were highly favored premier securities in the respective great financial markets of the two countries. Canada was, before the war, an external borrower, issuing her Dominion debenture stock as a trustee security in London on about a 4¼ per cent basis. The rate in the New York market would have been considerably dearer.

"Considering that we have been four years at war, it is remarkable and most creditable to Canada that our securities stand so firmly on a 5½ per cent basis. With regard to the Liberty Loan rate of interest, we must bear in mind that the United States has been in the war a little over a year after three previous years of unexampled prosperity. There does not appear to me to be any weight in the contention that other securities should be put upon a parity with those of the Dominion as regards taxation. The burden of financing the war and finding capital for the purchase of our products rests upon the Dominion government, and its securities should have priority of market and any special additional advantage which can be given to them. High interest rates for other borrowers will tend to keep down expenditures in many undertakings which can well wait until the end of the war.

"The argument that tax-free securities will mean that capital will not so readily flow into other enterprises is not borne out by experience. Before the war in the United States, federal, state, municipal and county issues were free of federal taxation. The result was that all those securities sold on a very low interest basis. Enterprise was not restrained or adversely affected. Rates of interest on other securities were normal.

"It is urged that some wealthy people may reduce their taxation by buying tax-free bonds of the forthcoming issue. But they can buy on the open market what they require from our tax-free issues now outstanding in Canada or in the United States. Will the average investor buy and continue to hold taxable bonds when he can obtain tax-free bonds at the same or a slightly increased price on the open market? Would not a taxable issue patriotically subscribed gravitate to a discount through subsequent selling by such investors? Making the forthcoming Victory Loan taxable would, having regard to the foregoing, be, in my view, an experiment at a time when supreme success is vital to the support of our military effort, now at its very height, and to the general prosperity of Canada as well. There will be room for experiments at a less crucial time. Personally, I look forward to the period of our refunding operations after the war with the hope and expectation that if our Dominion securities are given the special privilege of tax exemption we shall, with the cheaper money conditions, be able to greatly reduce our annual interest charges. This would mean much to our budgets in the period succeeding the war. I do not for a moment believe that enterprising citizens in a country with such possibilities as ours will be deterred from engaging in business or industrial activities because they can invest in tax-free Dominion securities yielding a comparatively low rate of interest. The experience of the United States abundantly proves the contrary.

"As for the new Victory Loan, I feel that no risk should be run by making its terms less favorable than those of our last issue. The difference between a moderate success and the notable success such as I feel Canada will accomplish would be a most serious difference to our agricultural, trade and industrial prosperity, upon which depends the financial support of our war effort. I do not believe this is a good time to make any change in our war loan policy."

GOVERNMENT TO MAKE BIG DISPLAY

The Canadian National Exhibition has joined in the war on non-essentials, has reconstructed its classifications on war-time basis and has striven in every way to reflect the spirit and interest of the times. It has offered every facility to the governments, federal and provincial, for displays to illustrate the achievements of the various national departments engaged in war work and has freely given space for this purpose. The governments apparently have come to realize the importance of the Exhibition as a point of contact with a million people each year and have responded generously with displays of a most interesting and educational character. In fact, in no other year did the governments cooperate so readily and completely and the result will be an array of exhibits demonstrating how the experts at Ottawa, Guelph, Toronto, and the West are striving to give the people the very best scientific service along production, conservation and kindred lines. These demonstrations will cover every branch of the food problem, both from the standpoint of the city man and the country resident.

The finance department has given notice that the transfer books of the third war loan (due March, 1937), will be closed from the 15th to the 31st of August, as interest is payable on the first day of September.

HOUSING PROBLEM AND THE GOVERNMENTS

Provision of Accommodation Under Uniform System Offers Many Economies in Expense

By A. T. Drummond, LL.D.

The United States Congress has recently appropriated one hundred million dollars for the erection of working men's houses, not merely at the points where great, new shipbuilding and other industries are being established by the government in the interests of the war and of commerce, but at the large existing centres of industry, in order that provision may be made for men being more readily moved from places where there is a surplus of labor to others where there is a deficiency. The British government, in addition to what it has already accomplished on an extensive scale at such new munition and naval centres as Gretna, Rosyth and elsewhere, has also determined to, at the close of the war, erect or finance for the municipalities, three hundred thousand houses for the working classes, although, it has been estimated, that one million such houses will more nearly meet the needs of the British Isles. A definite step has thus been taken identifying governments with the practical carrying into effect of the problem of the proper housing of the workers. The Ontario government has now followed with an appropriation of two million dollars for a similar purpose. Hitherto, providing such accommodation has been in the hands of private individuals, with building for profit chiefly in view, or by industrial corporations to supply the needs of their own employees. There are Canadian cities where the plans for all buildings are required to be approved by the cities' own architects, although it is a question whether inspection during construction is always carried out, but, as a general rule, the builder, in the case of working men's houses, is his own architect, and gauges the expense on the building and the conveniences he supplies, by the return he expects to receive in rentals or from sale. This leads, too often, to poor location, defective planning, faulty material and construction, and cheap sanitary conveniences. The advantage of having governments to undertake a share in solving the problem, is that public opinion can force the governments to adopt minimum standards in construction that will directly conduce to the health, comfort and happiness of the occupants, and that the opportunity will be afforded, by legislation, of compelling builders to construct to at least these minimum standards. The whole subject will also be brought more into the public view, and new ideas in housing problems will be fostered. These standard arrangements should not prevent some development even on the aesthetic side, and should not mean long streets of closely built, cheap houses of uniform size, material and construction, which so often offend the sense of the beautiful in many cities.

What the Housing Problem Involves.

The Ontario government has wisely provided that the benefit from its loans shall extend to agricultural laborers, as well as to the city and town workers. This arrangement will draw the attention of the owner of the average sized farm in Ontario to the fact that if high cultivation and the most profitable results are to be attained, he must have the permanent assistance of the farm laborer and his family, who must be provided on the farm with a suitable, well built, dwelling, and its accompanying small garden plot. For this purpose, a minimum standard in construction should be established by the government. In the cities, the problems are more complex, and on a larger scale. Apart from the structure itself, they involve healthy location for the great numbers who will be thrown together in one neighborhood, land reasonable in price, proximity to sewage, water supply and electric light systems, and rapid transport facilities to the manufacturing districts where the workers are employed, whilst small garden plots, which the workers should be encouraged to cultivate, should be attached to each dwelling. The dwellings themselves should, in material and general arrangements, in both the exterior and the interior, be planned with a view to permanency and the avoidance, as far as possible, of frequent repairs. It is, however, suggestive that, at the present time when materials and labor are so expensive, instead of placing a limit on the cost of each dwelling, afterwards to find that so many important details in quality of material, and in kinds of equipment, have to be omitted, because, with them, the limits of cost would be exceeded, it would be advisable to determine upon a suitable standard in construction, including in this the absolutely minimum needs which health, comfort and convenience in both winter and summer require, and which every self-respecting workman ought to find in his dwelling. By giving the force of law to such a minimum standard in construction and in exterior and interior arrangements, and following this up with compulsory regulations as to the uses to which the house is to be put, the maximum number of occupants to be allowed, and the right of regular government inspection, slums can be prevented, overcrowding made impracticable, and the general health and physique of the workers can be improved.

What Should Minimum Standard in Construction Require?

Speaking generally, for details are unnecessary here, the minimum standard should include good foundations with perfectly dry cellar accommodation suitable for summer as well as winter storage of supplies; the use of standard brick and stone, and of well-seasoned wood in all the details throughout; rooms of reasonable size; ample provision for sanitary arrangements, for warmth in winter and for ventilation at all seasons, and, it is suggestive, the dwellings should be in pairs, with proper party walls, and the chimneys in the centre between the two houses to increase the warmth in winter. It should never be said of the worker, or of any tenant, that because he is poor he must take what accommodation he can get, and what a rapacious landlord will allow.

When, through government and municipal assistance, building on a considerable scale can be adopted, and large areas in a given neighborhood are to be apportioned to working men's dwellings, what general plan will best commend itself in grouping these structures in order to secure economy of construction with all the conveniences which a minimum standard would necessitate? The most suggestive is the community system, which is now well established, and could, with some improvements, be adapted to meet not only the standard requirements in construction, but also some important social and economic needs of the workers. With the buildings in pairs, on the sides of a square or rectangle, there would be the central heating plant, which, connected with every dwelling, would be a great boon to the worker with his early rising habits, and a saving of time in keeping the house comfortable throughout the day; connected with the heating plant would be the community kitchen, where, following the new English experience, the workers' wives could obtain at hours suited to their requirements, hot, well-cooked food, in some variety, for their home tables at remarkably cheap rates, better than most of them could provide it themselves; in the central area, close to the kitchen, would be a club room where the men could meet one another in the evenings, and even bring their wives, for social intercourse; to each house would be apportioned sufficient ground for a small garden, cultivating of which should be encouraged; whilst arrangements could be made in the central area for a playground for the children. The dwellings would contain six to seven rooms, but there would be cases—for instance, the younger worker, early in his domestic life—where a whole dwelling would not be required, and therefore some of the houses would be divided into two apartments to meet such cases. The advantages aimed at by the system would be—more economical construction, better sanitation, reasonable rents, lower cost of, and well-cooked, food, uniform heating and lighting, more time for the mother in attending to her children, and more attractive homes, environment and social conditions for the men. The idea, so far from being Utopian, is quite practicable, and the cost, on the average, for each building, depends on the minimum standards to be adopted, and on construction on a large scale to these standards. The land for the purpose must be acquired quietly in advance of transportation facilities, if a reasonable price is to be secured. These facilities will quickly follow, once a large building plan is inaugurated.

Among the arrangements made at the Imperial War Conference in London is that Canada will have the privilege of excluding immigration from India. It was conceded in return by the Canadian representatives that those natives of India already resident in Canada to the number of about [illegible],000 should be allowed to bring in their wives and minor children.

PERSONAL NOTES

MR. E. C. PRATT, general manager of the Molsons Bank of Canada, has become a trustee of the North American Pulp and Paper Company.

MR. A. C. LAWRENCE, of the North American Life Assurance Company, has been promoted to the position of district manager at Nelson, B.C.

MR. A. F. SMITH, of the head office of the North American Life Assurance Company, has been appointed cashier for that company at Regina.

MR. JAMES S. WALLACE, one of the best-known life insurance men in Western Canada, has joined the staff of the Monarch Life Assurance Company.

MR. L. H. SENIOR, British manager of the Confederation Life Assurance Company, has resigned, and Mr. G. T. Varney, formerly secretary, succeeds him.

MR. F. E. CRAWFORD, formerly mayor of Sault Ste. Marie, Ontario, resigned that position on the 12th instant. He has been appointed assessment commissioner for the city.

MR. CHARLES R. BISSELL, of the Monarch Life Assurance Company, of Winnipeg, has been advised that he was successful in passing the examination for admission as associate of the Actuarial Society of America.

MR. W. S. FALLIS, who has for a number of years, with headquarters in Winnipeg, been western manager of the Sherwin-Williams Company of Canada, Limited, has just been appointed managing director of the company.

MR. JAMES CARRUTHERS has resigned from the presidency of the Halifax Shipyards Company. He objects to the formation of a subsidiary concern, which he contends may deprive the shareholders of the parent company of profits it might make.

SIR GEORGE C. GIBBONS, K.C., a prominent lawyer of London, Ontario, died in Montreal on the 8th instant. He was especially well known through his work in the establishment of the International Joint Commission which has jurisdiction over the boundary waters between United States and Canada.

MR. D. H. MCDOUGALL, retiring general manager of the Dominion Steel Corporation, now president of the Nova Scotia Steel and Coal Company, was tendered a reception on behalf of the city of Sydney, N.S., by the mayor and aldermen on the eve of his departure for New Glasgow, his new headquarters.

MR W. T. CHAMBERS, stock broker, has severed his connection with Kemerer, Matthes and Company, also Hays, Markham and Company, and has opened an office of his own at 5[illegible] King Street West, under the name of W. T. Chambers and Company. The company will handle mining and industrial stocks and unlisted securities.

DECLINE IN CANADIAN TRADE

For the first four months of the present fiscal year Canadian trade has decreased to the amount of almost $200,000,000. The figures are as follows:

	1917	1918.
April to July inclusive...	$961,560,144	$702,748,665
July	270,398,115	187,893,000

The decline is principally in exports, which were $507,854,[illegible] in 1917, as compared with $361,692,026 during the present year.

ST. THOMAS SELLS BONDS LOCALLY

According to information received from City Treasurer Perry there will be little difficulty experienced in disposing of the debentures of the city of St Thomas at the six per cent. rate of interest offered. Following the opening of the sale of $55,000 worth of bonds on Tuesday, August [illegible]th, Mr Perry reports that already $[illegible] worth have been distributed among investors, the majority of them being local railroaders who are quite anxious to purchase the securities.

NEW INCORPORATIONS

The Bellevue Mining Company, Limited, With Capital Stock of $2,000,000, Received Charter

The largest company incorporated during the past week was the Bellevue Mining Company, Limited, with capital stock of $2,000,000, and head office in Winnipeg.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are the provisional directors:—

Kelowna, B.C.—Kelowna Packers, Limited, $100,000.

Kimberley, B.C.—The Gamble Mining Company, Limited, $25,000.

New Westminster, B.C.—Vanstone Logging Company, Limited, $20,000.

Dundas, Ont.—S. Lennard and Sons, Limited, $300,000; S. J. Lennard, H. Lennard, F. E. Lennard.

Medora, Man.—The Medora Trading Company, Limited, $10,000; J. Gardiner, G. Wood, C. J. Barnes.

Wellington, Ont.—Andrich and Hyndman, Limited, $50,000; A. F. Bicknell, J. S. Duggan, B. H. L. Symes.

Otterburne, Man.—Otterburne Farmers' Elevator Company, Limited, $10,000; A. McVicar, J. Davis, T. G. Scott.

Vancouver, B.C.—Dempsey-Ewart, Limited, $75,000. Joseph Gawley, Limited, $10,000. Standard Motors, Limited, $15,000.

Montreal, Que.—La Compagnie Edgar Beeman, Incorporée, $5,000; G. Davis, P. Lacoste, J. E. Cote. Delorimier Hotel, Limited, $10,000; J. T. Trepanier, V. Lemay, C. Caron. Eastern Machinery, Limited, $300,000; G. A. Laprise, Z. Cloutier, A. Laprise. B. Ram, Limited, $20,000; L. Millman, P. E. Bourret, A. Millman. Eastern Pulp Company of Canada, Limited, $500,000; F. G. Bush, G. A. Coughlin, G. R. Drennan. W. Forbes Alloway, Limited, $25,000; J. T. Hackett, F. W. Hackett, J. Bruneau.

Toronto, Ont.—Wm. Murray Company, Limited, $40,000; Joseph M. Bullen, W. Levy, P. Murphy. Research and Development Company, $100,000; P. White, M. Lockhart Gordon, M. H. MacGregor. Frank Hillock, Limited, $100,000; W. H. Hillock, F. S. Hillock, G. S. Hillock. Emendy's, Limited, $40,000; H. Middleman, T. Middleman, J. Singer. Maple Leaf Shipping Company, Limited, $5,000; A. C. McMaster, A. McIntosh, H. C. Perkins. The Nova Scotia Transportation Company, Limited, $5,000; A. C. McMaster, A. McIntosh, H. C. Perkins.

Winnipeg, Man.—Miller Tire Company, Limited, $40,000; H. G. Middleton, H. A. Middleton, C. E. Middleton. McDonald Clark Exploration Company, Limited, $30,000; H. W. Hollis, J. H. Brett, S. Lawler. Fowler Optical Company, Limited, $10,000; W. R. Fowler, M. E. Ranger, W. J. Major. Falcon Lake Mining and Milling Company, Limited, $1,000,000; H. E. Silverthorne, N. A. McMillan, T. D. Jackson. The Winnipeg Amateur Billiards Association, Limited, $5,000; F. W. Russell, E. V. E. Raikes, H. B. Carter. The Bellevue Mining Company, Limited, $2,000,000; H. W. Hollis, J. H. Brett, S. Lawler. Dominion Ticket and Financial Corporation, Limited, $300,000; A. F. Schimnowski, A. Banninger, M. Gordon.

DEATH OF TORONTO BROKER

Mr Henry O'Hara, a well-known stock-broker of Toronto, died on Thursday, the 15th instant. He was born in Newry, Ireland, in 1833, and came to Canada when a boy. He first lived in Bowmanville, Ont., where he organized the Dominion Piano and Organ Company. In 1880 he came to Toronto as branch manager of the Sun Life Assurance Company, and later organized the Temperance and General Life Assurance Company. Afterwards in company with his son he commenced business as a stock broker under the name of H. O'Hara and Company. The late Mr. O'Hara was also vice-president of the Colonial Loan and Investment Company, and was active in church and temperance work.

WORKMEN'S COMPENSATION IN NOVA SCOTIA

Report of First Year's Operations States That Act Has Been Successful

According to the annual report of the Nova Scotia Workmen's Compensation Board, for the year 1917, the act has been found to be successful. By a proclamation of the governor-in-council, the Workmen's Compensation Act came into force for preliminary purposes on October 1st, 1916, and for all purposes on January 1st, 1917. The report reads, in part, as follows:—

On October 19th, 1916, the members of the board were appointed, and the period from that date to the end of the year was occupied with the work of organization and the preliminary work necessary to enable the act to become effective for the payment of compensation after January 1st, 1917. Apart from the organization problems the first work of the board consisted in making an industrial census of the province for the purpose of obtaining the names of employers carrying on operations within the scope of Part 1.

The act is divided into two parts. Parts 1 provides for the creation of an accident fund by means of assessments made upon the employers carrying on the industries mentioned in section 3, and makes provision for the payment of compensation out of the accident fund with respect to accidents to workmen in those industries.

All industries not mentioned in section 3 come within the provisions of part 2 of the act and the employers are personally liable for such damages as a workman may recover in an action at law.

In making the industrial census the names of over 4,000 industries were secured. It was found that many of these were not comprised within part 1, and many others were of such a temporary character or employed such a small number of workmen, that the board deemed it advisable to pass regulations for their exclusion The only object in excluding any was to protect the accident fund against the payment of compensation in those cases where the employer had not contributed to the accident fund and but for the happening of an accident the board might never hear of the employer of his operations. It was not necessary to exclude every small industry, as some by their very nature could not escape notice for any considerable length of time. The exclusion number, as a rule, ranged from one to five, according to the nature of the industry.

Such exclusion, however, could work no hardship to the employer as the act provides that any employer so excluded, as well as any employer not within the provisions of part 1, may voluntarily apply for the protection of the act.

Every workman has it within his own power and owes it to himself and his family to ascertain whether his employer has reported to the board and thereby brought his workmen within the protection of the act. If the employer has not done so, all that the workman need do is to write the board giving the employer's name and address, the nature of the operations, and the number employed. We recommend that workmen should take the precaution of ascertaining whether their employer has reported. In this way only can a workman be sure of being entitled to compensation. These remarks, of course, only apply to very small or temporary operations, and especially where the work is commenced after the first of the year.

Assessments.

After obtaining sufficient information concerning each industry appearing in the industrial census to enable the board to cull out those not under part 1, and to exclude those that should be excluded, it was found that 1,704 industries remained to be classified, rated and assessed. The assessments were based upon an estimate of the employer's pay roll for the year 1917, and the rate of assessment was determined by the nature of the business carried on. Owing to the absence of sufficient data with respect to the accidental hazard of the industries of Nova Scotia, the board was obliged to be guided by the experience obtained from other jurisdictions where workmen's compensation acts had been in force.

The preliminary work was advanced to such a stage that on December 22nd, 1916, the board was able to send out notices of its first assessment.

The act made it discretionary with the board to adopt what is known as the current cost plan of only collecting each year such amount as would be considered sufficient to cover the disbursements for that year, or to adopt the system of collecting each year an amount sufficient to cover not only the disbursements for the year, but also an amount to be set aside as a reserve to take care during future years of all compensation payments with respect to accidents happening in that year. The board decided at the outset to adopt the latter or capitalized reserves plan.

The rates adopted by the board for the year 1917 were calculated to provide an amount sufficient to cover: (a) All compensation payable during the year 1917; (b) the reserves necessary to meet the periodical payments accruing in future years on account of 1917 accidents; (c) an amount to be set aside for the purpose of establishing disaster reserves; and (d) the cost of administration.

Before the board established its assessment rates, there was some nervousness upon the part of employers as to what the rates would be. Many employers anticipated much higher rates. We believe that much of the opposition on the part of the employers to the passing of the Workmen's Compensation Act in Nova Scotia was due to the fear on their part as to what the rates would be. The rates established by the board were received by the employers generally as a relief from the uncertainty and fear which previously existed.

Board Refuses Contracting Out Certificates.

After the act came into force applications were made under section 4 by the Dominion Coal Company, Limited and by the Dominion Iron and Steel Company, Limited, for certificates permitting them to make contracts with their workmen in the industries carried on by them within the island of Cape Breton, whereby a scheme of compensation proposed by each company should be substituted for the provisions of the act. The act permitted the Nova Scotia Steel and Coal Company, Limited, to make a similar application for leave to contract out, but no application was made by the latter company. The board deemed it inadvisable to grant the certificates applied for and a decision to that effect was given.

Handling of Claims.

In the handling of claims the object aimed at is to enable a workman to obtain compensation with the least possible trouble and delay, and without being obliged to go to any legal expense. Wherever it is possible the claim is adjusted upon information obtained from the workman, his physician, if any, and from the employer. Forms containing questions to elicit the desired information are sent out whenever an accident occurs, and anyone who can read and write is able to easily complete the workman's and employer's forms. Upon the return of these statements, if it appear that the accident arose out of and in the course of the employment, and the employer and workman agree as to amount of wages the workman was receiving, an adjustment is at once made. Instead of the litigation that was often necessary under the old act to enable a workman to obtain compensation, there is no reason for any workman within the scope of part 1 of the present act to pay out one cent for legal expenses.

Various precautions have been taken to prevent malingering and fraud, and all cases of suspicion are thoroughly investigated, but there are and always will be cases where a doubt will arise as to whether a man is or is not able to return to work. As against attempts on the part of workmen to malinger, we find that many workmen return to work before they have fully recovered. The fear that imposition on a large scale could not be prevented was also a cause why some employers at first were skeptical as to the successful administration or operation of such a compensation act as ours. The experience of one of the largest concerns in the province is worth referring to. The manager stated to members of the board that he was at first opposed to the passing of this act, but after nine months of careful observation on his part of the working of the act his doubts had been entirely removed. He had carefully watched the methods adopted for the handling of claims, especially as to the prevention of malingering and fraud, and he had not been able to discover a single case among his company's workmen where it could be said that compensation had been paid beyond the period when the workman was able to return to work.

New Waterford Disaster.

On July 25th, 1917, a disaster occurred in the coal mining class, by an explosion occurring in the Dominion Coal Company's coal mine at New Waterford, which resulted in the death of 65 workmen. The rate of assessment charged in the coal mining class was sufficient to enable the total compensation loss arising from that disaster amounting approximately to $120,000 to be taken care of out of that class fund. The New Waterford disaster was the greatest disaster that

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER

25 West Broadway New York, N.Y.

has occurred in a coal mine in the island of Cape Breton, and only in one other coal mining disaster in the province of Nova Scotia had the loss of life been greater up to that time, but owing to many of the victims being natives of Newfoundland where their dependants reside, the total loss was much below what it would have been had they been residents of this province. The limit of compensation recoverable in any one case under the Newfoundland act is $1,500, and our act provides that the compensation payable in such a case shall not exceed the amount that would be payable under the Newfoundland Compensation Act to the dependants living here of a Nova Scotia workman killed in Newfoundland.

Stellarton Disaster.

The disaster in the coal mine at Stellarton on January 23rd, 1918, does not properly come within the scope of this report. In that case the number of fatalities was 88. It is remarkable that these two disasters should occur practically during the first year's operation of the compensation act, but it is most fortunate for widows and orphans of the men who lost their lives that the act was in force.

Halifax Catastrophe.

On December 6th, 1917, the greatest disaster of its kind occurred in Halifax, when an explosion took place on the munition ship "Mont Blanc," resulting from a collision with the steamship "Imo." Many claims have been received and adjusted and others are still coming in, but it is impossible at present to state exactly the number of claims that will eventually be made. The best estimate the board is able to make of the total compensation payable is $850,000. Up to the date of this report the compensation paid and the reserves required in connection with fatal claims already adjusted amount to $640,552.17.

Although the workmen's compensation act applied to workmen killed or injured while at work as a result of the explosion, it was generally recognized that the disaster was and should be considered a war loss and be assumed by the Dominion government or by the relief commission appointed by the Dominion government. It has just been announced by the relief commission that the compensation payable under the workmen's compensation act will be taken care of by that commission, and that the industries of Nova Scotia will be relieved of assessments, which otherwise would have to be imposed under the act.

Accident Prevention.

A valuable feature of the act is the provision made for the formation of associations for the prevention of accidents. The board had several conferences with the executive of the Manufacturers' Association with regard to accident prevention, but no associations were formed during the year 1917. The board has reason to believe that in the near future some associations will be formed.

In the administration of the act the board took advantage of opportunities as they arose to impress upon certain employers the necessity of adopting safety measures. Some of the larger industries in the province are now employing safety experts who devote all their time to safety work. The experts are proceeding with the work of accident prevention in a systematic manner and sooner or later its effects should become noticeable.

The board is convinced that of the fatal and non-fatal accidents that occurred during the year, a very large number could have been prevented. After the act has been in operation some time longer and the accident experience of each industry can be ascertained, the board will be able to assist materially in inducing, and, if need be, forcing by surcharges, those employers whose accident experience is unnecessarily great, to adopt measures to bring their accident hazard within normal limits.

Collection of Assessments.

The board is of opinion that an amendment should be made to the act whereby an assessment will become a first lien upon all the assets and property of the employer and rank pari passu with taxes. The need for such an amendment may be illustrated by one case. A large concern operating throughout the year 1917 and employing on an average upwards of [illegible] employees, did not pay an assessment made upon it amounting to over [illegible]. Judgment was entered and execution issued but nothing could be realized because of the fact that there was a large bond issue secured by a first mortgage covering all the property of the company. When steps were taken to realize upon the property, the bondholders commenced a foreclosure action and had a receiver appointed. Notwithstanding that the board was unable to obtain payment of the assessment, it nevertheless was obliged to pay out compensation to workmen of that concern who met with accidents. Such a condition is not fair or just to the other employers who contribute to the accident fund.

Attitude of Employers.

In the administration of the act the board has found that the employers generally are now favorably disposed to the act and with few exceptions the employers readily co-operate with and assist the board, especially in furnishing the information required for the adjustment of claims. The board is pleased to avail itself of this opportunity to acknowledge the valuable assistance and co-operation given by the employers.

The board was of opinion that its reserves and other funds available for investment should be placed in Dominion government war loans and consequently it did not invest any funds in any other security.

The government of Nova Scotia paid for the entire office equipment and the administration expenses up to January 1st, 1917, and also paid a portion of the expenses after that date, in addition to paying the salaries of the members of the board. The other administration expenses for 1917 were paid out of the accident fund.

CROP PROSPECTS IN ONTARIO

Ontario Department of Agriculture—Report on Farm Conditions

The following is a summary of recent reports made by agricultural representatives to the Ontario Department of Agriculture:—

Some of this season's cut of fall wheat has been offered on the market in Essex, and most of it is of good quality. Much of the fall wheat, however, will be kept for seed, as, with the harvest earlier than usual, there is likely to be more time given farmers for preparing the land and getting in a larger acreage of this crop than was put in a year ago. Many are now nicely into the barley harvest, which is yielding generously; and spring wheat and oats are hurrying so rapidly toward the ripening stage that there is a danger of crowding at cutting-time. All spring grains are likely to give good yields, although rather short in the straw.

Peas are a surprisingly good crop. Fields of forty bushels per acre are reported from Prince Edward, where the crop is being raised for the canneries. Beans are also a most promising crop, but just now are badly needing rain. Second growth of clover is looking well, despite the drouth, although good rains would be most welcome. The Norfolk representative reports twenty acres of alsike as yielding one hundred bushels of seed. Potatos have suffered in some localities from late blight and other diseases, but, on the whole, the crop has done fairly. Roots have been checked in their growth by the drouth, but, generally speaking, they have done well, especially sugar beets. Corn has picked up wonderfully of late, and looks very promising. Essex reports that tobacco plants, like beans, are suffering from lack of rain. Tomatoes are being marketed in large quantities.

Conditions for Stock not so Good.

Hot weather and flies have been very trying to live stock. Pastures have turned very dry, and farmers who have a midsummer supply of ensilage are being envied. The milk production has fallen off about 25 per cent. during the last two or three weeks, owing to the failing grass. Good milch cows are bringing from $125 to $150.

Hogs are selling at from $18.25 to $19 a hundredweight. Little pigs a few weeks old are worth $9 apiece. Hog feed is scarce and dear.

A noticeable movement toward co-operative buying and selling is referred to by the Wentworth representative.

Farmers, so far, have got along with less help than was expected, owing largely to the unusually open weather, but the rapid ripening of spring grains may cause a field rush before harvesting is through.

Blyth, Witter and Company, of San Francisco and Los Angeles, Cal., are offering China Mail Steamship Corporation first mortgage 7 per cent. bonds at a price to yield 7½ per cent.

When to Make a Will

The time to make a Will is when one is of sound mind and body, with unimpaired faculties. If made under other conditions, exception may be taken to its validity. Once made, it may be changed from time to time if the Testator so desires, but make the Will, and add the changes as circumstances demand. When making your Will assure your estate of efficient administration by naming this Corporation as Executor.

A WORK OF ECONOMIC RECONSTRUCTION

Halifax Relief Commission Has Done Much in Rebuilding City of Halifax

Since the explosion and fire in Halifax Harbor on the 6th of December, 1917, the destroyed section of the city has been, to a large extent, reconstructed. An excellent example is here furnished of what can be done through good organization with the necessary financial backing, not only in the way of engineering work, but also in reviving the whole economic life of a city, and placing it upon new and improved civic basis.

The first assistance was rendered by such miscellaneous bodies as existing for the purpose or were immediately created to deal with the difficulty. A relief commission was very shortly organized, and this was later incorporated as the Halifax Relief of the Provincial House of Assembly. Extensive powers were given to the commission as occasion demanded. The three original members were: T. S. Rogers, of Halifax; W. B. Wallace, of Halifax; and F. L. Fowke, of Oshawa, Ontario, with Mr. Ralph P. Bell as secretary. Should any of the members die or retire, the governor-general of Canada in council was authorized to appoint a successor. All the moneys and property subscribed, contributed or voted for the purpose of assisting the citizens of Halifax was to go into the hands of the commission, with the exception of money and property forwarded to any individual to be distributed as he thought fit, and money or property already expended for such purposes. The commission was given the power to expend, dispense, distribute and appropriate the money in such manner as it thought fit. As regards the devastated area of the city, the commission was to prepare a town-planning scheme and a set of town-planning by-laws subject to the consent and approval of the commissioner of public works and mines, and upon such consent being given, might proceed with and carry out such a scheme.

The necessary powers of expropriation, etc., were also conferred upon it, and in case the commission was unable to come to an agreement with the owner of the property, the matter was to be referred to a board of arbitration, consisting of one member appointed by the owner, one by the commission, and a third appointed by these two. It is unnecessary for the commission to notify the owner direct regarding the expropriation of his property, but public notice must be given at least one month before action is taken, and if the owner does not within this period give notice that the award is unsatisfactory, he is deemed to have accepted the amount of compensation named. Section 32 of the Act of Incorporation confers powers upon the commission which are not ordinarily possessed by a municipality. This section provides that no action, suit or other proceedings should be brought by any person for the possession of any lands, tenements or hereditaments or any interest therein, nor by any landlord for the recovery of any greater rate of rent than the rate payable by the tenant immediately preceding the 6th day of December, 1917, nor by any person for the foreclosure of any mortgage or by the sale of any lands described in any mortgage, without the consent of the commission in writing and under the seal of the commission. This section, it is readily seen, might be construed to the disadvantage of landlords or mortgagees, and considerable objection has been put forward by these classes. It is understood that the act will be amended at the next session of the provincial legislature, as it seems no longer necessary that these unusual regulations should remain in force.

The effect of such powers, it is readily seen, depends entirely upon the way in which they are used. That no abuse has been made of them is evident from a statement made to *The Monetary Times* by Mr. Ralph P. Bell, secretary of the commission, that one section expropriated by the commission, consisting of ten city blocks in the thickly populated district of the north end, has been adjusted without the commission having found it necessary to pay one dollar into the court. The whole transaction represents negotiations with probably 150 different people, and while it may be necessary in the case of one or two properties where the ownership is not clear, or where the title is not stated, to settle by arbitration, the transactions have evidently been entirely satisfactory.

The work of the commission is divided into two distinct divisions, namely, rehabilitation and reconstructon, the former department dealing with the physical and financial welfare of the victims of the disaster while the latter department attends to matters involving buildings or property. Immediately after the disaster, Colonel Low, who was appointed manager of the reconstruction department, opened offices at the Halifax Hotel. Soon afterwards two temporary office buildings were built for the commission by the firm of Bate, MacMahon & Company. The one building was occupied by the reconstruction department, including purchasing agent, general superintendents, district superintendents, manager of reconstruction, acting city engineer and clerical assistants. The other was occupied by the rehabilitation section.

Plenty of Financial Support.

The cash contributions to the Halifax Relief Commission totalled about $20,000,000, of which £1,000,000 sterling was voted by the British Government, $12,000,000 by the Dominion government and about $3,000,000 by individuals, corporations, associations, municipalities, provincial governments and others. The private and public donations of $50,000 or over were as follows:—

British Red Cross	$125,000
Bank of Nova Scotia	100,000
Chicago Committee	130,000
Mayor's Fund, London, Eng.	600,000
Province of Ontario	100,000
Australia	250,000
Province of British Columbia	50,000
Dominion Iron & Steel Company	50,000
Hero Land Bazaar, New York City	75,000
St. John's, Newfoundland	50,000
Royal Bank of Canada	50,000
Greater Vancouver	56,180
Winnipeg Free Press Fund	85,011

There were some special funds not administered by the Relief Commission, but none of these were of very large amounts excepting the $500,000 fund contributed by the people of Massachusetts for the specific purpose of furnishing homes, the contents of which were destroyed. This fund is governed by a Massachusetts committee working in co-operation with the Halifax sub-committee.

The relief commission appraises the property damaged as follows:—

Dwellings	$ 6,476,000
Contents	3,330,000
Schools	342,000
Public institutions	222,000
Business properties and merchandise	1,041,000
Municipal and public buildings	105,000
Churches, manufacturing plants and specials	3,484,000
Total	$15,000,000

These figures do not take into account the destruction of public property belonging to the Canadian Government Railways and the Naval Service Department of the Dominion government, nor do they include the loss to shipping in the harbor of Halifax. The commissioners have been unable to obtain an accurate account of these losses, but they are of opinion that they may be safely estimated as not exceeding $10,000,000. The shipping losses will be substantially met by marine and war risk insurance, and the restoration of public property has been taken care of by the Dominion government. The extent of the whole loss (excluding any sums to provide for indemnification for loss of life or personal injury, or for trust funds for the education of victims or their dependents, or for loss of taxes to the city of Halifax) is placed at the sum of $25,000,000.

The above-mentioned damage to the property of the Canadian Government Railways is estimated as follows by the railway staff—

Piers, buildings, tracks, machinery, power and telegraph lines, and signals in Halifax	$ 751,600
Similar structures in Dartmouth	52,700
Rolling stock	178,000
Commissary stores	17,700
Steamer	70,000
Miscellaneous expenses in cleaning up and relief work	155,000
Total	$1,225,000

The amount expended for rehabilitation and temporary relief, plus the amounts so required for the remainder of this

The Hamilton Provident and Loan Society

Capital Subscribed	$2,000,000.00

year, total about $4,000,000, but this does not include permanent repairs to damaged property nor the restoration of buildings nor compensation for their destruction. An amount of $732,106 was expended by the various voluntary committees before the Relief Commission assumed control. This included transportation to or from Halifax given to 2,308 persons.

The most rapid progress was made with the opening of the main line of the Canadian Government Railway, which was accomplished in two days. Special railway construction organization was formed to handle the work of repairing and rebuilding the railway. Structures of these were essential to bringing in relief for the other parts of the city. As regards the reconstruction of houses it was decided that the best plan would be to erect temporary apartment houses. These dwellings were standardized in the form of two-story houses, each house containing eight four-room and bath apartments. One hundred and two of these apartments were erected by contractors. The contract price was $6,600 per house, exclusive of water and sewerage works. The devastated areas are being rebuilt under the direction of the commission. In this work a definite town plan will be followed. The scheme was prepared by the town-planning board of the city and county under the advice of Thomas Adams, of the Commission of Conservation. One scheme was prepared for the city of Halifax for an area of 3,285 acres, and four schemes were drafted for adjacent parts of the county of Halifax, comprising an aggregate area of about 20,000 acres.

ST. LAWRENCE COMPANY SEEKS FURTHER POWER

The St. Lawrence River Power Company is making application this week before a sitting of the International Joint Commission at Atlantic City for further power rights on the St. Lawrence River at the Long Sault Rapids near Cornwall, Ont. The company has a power plant at Messina Springs, N.Y., and now seeks permission to erect a new dam, claiming that further power development is needed.

A somewhat similar application was made by the company several years ago and was strenuously opposed by both the Canadian and United States interests. It is expected that the commission will report the facts of the situation to the governments at Ottawa and Washington, without making any definite recommendation for the present at least.

CANNERIES AMALGAMATION IN BRITISH COLUMBIA

A new concern known as the Northern British Columbia Fisheries, Limited, has been formed with an authorized capital of $2,000,000. This is an amalgamation of seven canneries and a box factory in the northern district of British Columbia. The companies making up the amalgamation are:—Draney Fisheries, Limited, with cannery at Namu; the Kimsquit Fisheries, Limited, with cannery at Kimsquit; the Tallheo Fisheries, Limited, with cannery at Bella Coola; Skeena River Commercial Company, Limited, with cannery at Port Essington; Port Edward Fisheries, Limited, with cannery at Port Edward; the Kincolith Fisheries, Limited, with cannery at Mill Bay, Naas River; the Portland Fisheries, Limited, with cannery at Kumeon, Steamer Passage; and the Namu Box Company, Limited, with sawmill and box factory at Namu.

The officers and directors are: R. V. Winch, president; Henry Doyle, vice-president; R. F. Winch, F. A. Futcher, and F. J. Coulthard. Mr. R. E. Walker, of R. V. Winch & Company, is the secretary. The head office of the company is at the offices of R. V. Winch & Company, Winch Building, Vancouver.

The purpose of this amalgamation is primarily to stabilize the earnings of the various companies involved. It frequently happens that a cannery at one spot has a very lean season, and a cannery at another spot equally strategically situated has a very profitable season. By those interested in the constituent companies pooling their interests they are reasonably assured of constant dividends, provided a poor season does not obtain throughout the entire northern district. The amalgamation will further have the advantage to the constituent companies of one set of books, one office, one purchasing department, one selling agency, thus cutting down overhead charges which have proved a considerable item in cannery operation.

ONTARIO REGULATION OF LOAN COMPANIES

Information Regarding Investments is Now Required in Much Greater Detail Than Formerly

Some time ago, as the result of the failure of the Dominion Permanent Loan Company, the Ontario Government issued a new form to be filled in by companies operating in the province, which required much more detailed information than was previously the case. The form, we are advised, is a temporary one, and will not be permanently adopted until its results become apparent.

The new report is divided into two sections, the first dealing with assets of which the corporation is the beneficial owner, and the second with assets not owned beneficially by the corporation, but for which the corporation is accountable.

The first section comprises the following questions:—

1. A statement regarding the office premises, original purchase price, additional improvements and charges, total amount at which carried, amount still to be paid in purchase price and improvements amount of any charge or mortgage against property, and net annual revenue.

2. Freehold land (including buildings) other than the foregoing, embracing properties vested in the company by foreclosure under Quit Claim Deed or otherwise. In addition to being required to state the total amount of such holdings, the companies are also required to state the number and total amount of holdings in excess of $25,000, and in these cases a statement is required of the price at which they were purchased or acquired, added charges or interest, total amount at which carried, amount of original loan, if any, and prior charges or mortgages, if any.

3. Leasehold land, including buildings other than the foregoing. In the case of leasehold holdings in excess of $10,000 each, a statement is required showing the price at which they were purchased or acquired, the added charges or interest, the cost of improvements, the total amount at which carried, the amount of original loan, if any, prior charges or mortgages, if any, ground rent payable, terms of lease, and particulars of method used to write off value of lease.

4. Debts secured by mortgages on land. This is divided into a number of classes, namely, first mortgages, second mortgages, third and subsequent mortgages, mortgages under which legal proceedings have been taken, and amount secured by agreements for sale or purchase, and in each case the statement must show the principal and interest due and unpaid and the interest accrued. In the case of mortgages or agreements in excess of $50,000 each, statements in more detail are required.

5. Aggregate amount of loans secured by mortgages, lands, properties, or other assets owned by any other corporation of which the shares or securities or any part thereof are owned directly or indirectly by the company. Instalments of principal and interest payments which are in arrears must also be shown.

6. Debts not above enumerated for which the corporation holds securities. These are classed according to whether they are repayable on demand after thirty days' notice, or on fixed dates, and thorough details are required as to the amount of the original loan and the state of the payments of interest and principal, the nature of security and its market value.

7. Full particulars are required of all unsecured debts.

8. Full particulars of all securities or other assets not hereinbefore mentioned, with the usual figures.

Section two is divided into two sub-divisions. The first requires a statement regarding the assets for which the corporation is accountable as guarantor. The information required is similar to that in the case of the first section, excepting, of course, that office premises are omitted. The next sub-section concerns those assets which the company holds as trustee, and full particulars are required of all real estate mortgages, agreements for sale or purchase, shares, securities or any other assets which are or were the property of the company directly or indirectly as owners or guarantors.

In the four years of war that the National Patriotic Fund has now been in existence, the total contributions have totalled a little over $41,500,000. Total receipts acknowledged by the finance minister to date aggregate $40,551,311.

NEW BRUNSWICK TO SECURE RETURN OF MONEY

The provincial government of New Brunswick has commenced action against three of the parties, who, it is claimed, have improperly received moneys belonging to the province of New Brunswick. We are advised by Mr. Robert Murray, the provincial treasurer, that writs have been served and the causes will be tried in due course, probably in the month of September.

AMERICAN MORTALITY TABLE

The Monetary Times is advised by Mr. Arthur Hunter, chairman of the Actuarial Society of America, that the new mortality table, which is being prepared by the society in co-operation with the American Institute of Actuaries and Convention of Insurance Commissioners, is progressing satisfactorily, and that the first volume will probably be published before the end of the present year.

TO SEEK FOR GASOLINE IN ALBERTA

The Geological Survey of Canada has commenced testing natural gas in Alberta for the purpose of determining its value as a source of gasoline. Experimental apparatus is now being constructed and it is expected that actual operations will be under way within a few weeks. Tests will be given at the principal producing points in southern and northern Alberta. A local supply of gasoline in the west would be of great value and more especially in the future should the United States be forced to restrict the export of the product to Canada.

The city of Victoria is taking vigorous steps to collect the arrears of taxes. According to the Victoria City Relief Act, 1918, arrears may be made by reduced payments extending over a period of ten years. Relief under this act is available up to September 15th. A tax sale has also been ordered by the legislature this year.

MUNICIPAL BOND MARKET

The Monetary Times Weekly Register of Municipal Activities and Financing

Prescott and Russell Counties, Ont.—Messrs. C. H. Burgess and Company, of Toronto, have purchased a block of $50,000 6 per cent. 20-instalment bonds of the united counties of Prescott and Russell. The proceeds will be used for bridge and road purposes.

Windsor, Ont.—Sealed tenders will be received up till August 16th, 1918, by M. A. Dickinson, acting clerk, for the purchase of a block of debentures of the city of Windsor, Ont., as follows: $75,000 Windsor hydro-electric 6 per cent. 20-years annual instalments, semi-interest coupons. Debentures and coupons payable at Windsor, delivery of debentures to be made purchaser at Windsor. Debentures may as far as practicable be made of the denomination of $1,000 each.

New Westminster, B.C.—The city has received two offers for its $400,000 of 5-year 6 per cent. bonds. These are, however, under option to Wood, Gundy and Company, of Toronto, at 93.68 and interest. It is expected that the option will be exercised. This block of $400,000 of bonds is in addition to the $100,000 which Wood, Gundy and Company have agreed to purchase, the whole half-million having been made to retire the three-year treasury certificates which matured last month.

HIGH INCOME BOND VALUES

A bond table showing yield rates from 6 per cent. to 15 per cent. has been issued by the Financial Publishing Company, of Boston. The tables cover nominal rates advancing by one-half per cent., from four to seven per cent., and the table shows the yield of bonds due in periods ranging from six months to ten years. The price is $3.50.

ANOTHER PROVINCIAL ISSUE TO BE MADE

The Ontario government has announced that the balance of the $6,000,000 loan provided for in the last session of parliament will be issued presently. This means that bonds to the amount of $1,750,000 will be placed upon the market. The issue will be handled by the same syndicate which purchased the previous loan and the price paid will be the same—namely, [illegible] and accrued interest. The syndicate is composed of Messrs. R. C. Matthews and Company, C. Meredith and Company, Limited, and Hanson Brothers, and the bonds will be offered to the public immediately. They are ten-year 6 per cent. bonds.

It is understood that these borrowings, which are for hydro-electric purposes principally, will be sufficient to finance the province of Ontario until the end of the present fiscal year. Provincial financing for the year 1918 has been as follows:—

1918.	Government	Amount.	Rate %.	Term years.	Offered to yield investors %.
January	Saskatchewan	$ 630,000	5	15	6½
January	Manitoba	1,000,000	5	2	6¼
January	Manitoba	1,000,000	6	10	6¼
February	New Brunswick	1,000,000	6	10	6⅛
February	Ontario	3,000,000	6	10	6
March	Brit. Columbia	1,000,000	5	10	6½
March	Nova Scotia	1,500,000	6	10	6
May	Ontario	3,000,000	6	10	6
June	Saskatchewan	1,500,000	6	20	6.30
June	Alberta	825,000	6	10	6.40
July	Manitoba	1,000,000	6	10	6.20
August	Ontario	1,750,000	6	10	...

The Imperial Life Assurance Company of Canada has issued the August number of the Imperial Lifeguard. This is an attractive booklet giving information concerning the company's activities and other questions concerning life insurance.

FINANCES OF BURNABY MUNICIPALITY

Debt Reduced and Short-Term Obligations Largely Liquidated

Mr. George Webb, chairman of the finance committee of the municipality of Burnaby, B.C., recently issued the following statement:—

Burnaby's finances are in good shape, their financial standing at this time being stronger than at June 30th, 1917. The year was commenced with a balance in hand of $4,544.04. The first six months of the year was financed by a loan of $160,000, borrowed against anticipated revenue, and at this time has been liquidated, all but $15,876. The collections of taxes are better, as shown by the appended statement:—

To 24th July, 1918:	
1911-1912	$ 320.60
1913	5,387.00
1914	7,735.54
1915	12,524.48
1916	13,788.76
1917	23,879.44
1918	144,124.85
Interest	4,598.06
Total	$212,358.78

To 31st July, 1917:	
1911-1912	$ 43.82
1913	6,033.90
1914	8,609.28
1915	13,756.66
1916	18,901.11
1917	121,615.40
Interest	5,111.67
Total	$174,071.84

The bank overdraft at January 1st was $281,049. This has been reduced by $59,875, leaving a balance of the overdraft of January 1st, $221,174. The bonded debt has been reduced by a further $32,000, being the second instalment of principal on serial bond issue, which leaves a net bonded indebtedness of $2,224,150. The expenditures to June 30th, under the various heads, are as follows:—

Fixed charges, including second instalment on serial bond principal	$105,008.45
School board	26,358.39
Civic government	15,005.65
Board of works	18,095.06
Waterworks	7,321.54
Police department	5,597.95
Health, hall and grounds	3,031.90
Total	$180,418.94

The receipts to June 30th are as follows:—

Taxes	$212,358.78
Waterworks	11,170.11
General receipts	2,958.76
Total	$226,487.65

The requirements for the second half-year will be:—

Fixed charges including sinking fund levy	$107,269.18
School board	36,986.12
Civic government	14,425.00
Board of works	35,670.00
Waterworks	17,021.00
Police department	6,135.00
Health, hall and grounds	5,585.00
Sundries	6,350.00
Total	$220,441.30

The assessment for the year 1918 is $16,332,005, and the total levy for the year 1918 is $384,797.30.

A tax sale will be held on September 17th for taxes delinquent for 1914 and subsequent taxes in arrears.

Great interest is now being shown in the matter of Burnaby leasing scheme. Various parcels have recently been leased

PRODUCTION OF BREAD IN CANADA

Slight Decrease Shown in Average Cost for May—Increase in Flour Consumed

In the monthly report of the Minister of Labor, the average cost of bread per pound for Canada, in cents, comparing April and May, is shown as follows:—

	April.	May.
Flour and flour ingredients	4.145	4.112
Ingredients	.476	.499
Baking	.038	.611
Delivery	1.093	1.071
Management and overhead	.578	.549
Total	6.903	6.842

Flour Consumed.

The flour consumed shows an increase, April using 67,723 barrels, and May 73,457 barrels, or an increase of 5,734 barrels, equivalent to nearly twenty car loads.

An increase of 3,318 barrels in the chief cities is shown as follows:—

	April, barrels.	May, barrels.
Montreal	18,221	19,403
Ottawa	3,997	4,398
Toronto	17,936	18,461
Winnipeg	6,825	8,035
	46,979	50,297

The cost of flour and flour substitutes shows a decrease of an average of four cents per barrel; the yield of bread from a barrel of flour stands at 261 pounds, the same as last month.

Cost of Production.

The following statement shows the cost of producing one pound of bread, (in cents), in the principal cities of Canada:—

Locality.	Cost of one pound of bread.
Amherst, Halifax, New Glasgow and Sydney Mines	6.812
St John, N.B.	7.656
Montreal and Westmount	7.294
Ottawa	6.437
Toronto	6.611
Kingston, Belleville and Peterboro	6.521
Hamilton	6.273
Brantford	6.698
St Catharines and Niagara Falls	6.561
London	6.414
Guelph, Stratford and Kitchener	6.972
St Thomas	6.378
Chatham	6.393
Cobalt	6.259
Winnipeg	6.593
Saskatoon	6.658
Medicine Hat	6.688
Edmonton	6.395
Calgary	6.753
New Westminster, Vancouver and Victoria	7.385
Dominion Average	6.842

The total bread produced for May amounted to 19,286,011 pounds and the total flour manufactured was 73,457 barrels.

Cost of Flour Purchased.

The following statement shows the average cost of flour per barrel in the principal cities of Canada:—

Locality.	April.	May.
Halifax, Amherst, New Glasgow and Sydney Mines	$11.02	$10.84
St John, N.B.	11.20	11.02
Montreal and Westmount	11.10	11.02
Ottawa	10.97	11.04
Toronto	11.00	10.89
Kingston, Belleville and Peterboro'	11.10	10.98
Hamilton	11.02	10.97
Brantford	11.00	10.95
St Catharines and Niagara Falls	11.00	10.83
London	$10.99	$10.95
Guelph, Stratford and Kitchener	10.74	10.62
St. Thomas	10.96	10.82
Chatham	10.94	10.80
Cobalt	11.53	11.50
Winnipeg	10.49	10.40
Moose Jaw	10.33	10.20
Saskatoon	10.10	10.11
Medicine Hat	10.13	10.05
Edmonton	10.11	10.02
Calgary	10.03	9.96
New Westminster, Victoria and Vancouver	10.54	10.46

The total flour purchased during May amounted to 57,067 barrels.

UNIFORMITY IN ASSESSMENT WANTED

Opening Sitting of Manitoba Taxation Commission Opens Questions of Municipal Government

The first regular meeting of the commission appointed by the Manitoba provincial legislature to enquire into the matter of provincial and municipal legislation was held at the parliament buildings in Winnipeg, on August 7th, with Deputy Municipal Commissioner E. M. Wood in the chair. The obtaining system of taxation was considered in its general aspect and various objectionable features discussed.

Mr. W. J. Christie, who, with Mr. J. H Parkhill, represents the board of trade on the commission, considered the root of the trouble lay in the method of assessment. He suggested classifying the assessments so that a uniform system might be arrived at. Assessments at the present time are too crude, he said, often the same amount is retained on the rolls year after year, although the value of the property may have been materially altered. The courts of revision were frequently forced to change the assessor's valuation. The trouble was that these assessors were not educated to their position and did not make a thorough survey of the property. Valuations were often put on without the assessor having seen the property at all.

Mr. Wood agreed that these were difficulties to be remedied and some discussion took place further on the subject, Mr. Brown citing instances of work found necessary by the courts of revision. It was shown that in various parts of the United States assessors were furnished with complete maps of the municipalities, for their guidance.

The commission next dealt with the subject of over assessments and it was generally agreed that property holders were now bearing a burden that left them less than 3 per cent. on their investment. Mr. MacDonald, who is the representative of the Union of Municipalities on the commission, gave his opinion that unless matters were soon remedied, the province would face a serious housing problem after the war. Mr. Breakey advocated a shorter method of collecting arrears. At the present time, he said, most municipalities and towns found themselves carrying large amounts of arrears of taxes. This was due, Mr. Parkhill stated, to property having no commercial value. He suggested that property automatically revert. "I think the whole difficulty is due to high assessments," said Mr. Christie.

It was decided to hold sittings of the commission at the various judicial centres throughout the province in order that the people may have an opportunity to express their views and offer suggestions.

On the recommendation of Mr. Parkhill it was decided to appoint a committee of five members and the chairman to consider the best way to remedy the existing evils and to ascertain what system would constitute the most permanent and equitable tax. L. W. Donley, W. R. Wood, D. D. McDonald, Prof. A. B. Clark and W. J. Christie were the committee chosen. Finally, the commission took up the matter of their own remuneration and it was decided that $10 a meeting was a reasonable fee, travelling expenses to be included to members from out of town.

During the month of July, the Canada Life Assurance Company secured applications totalling $16,079,513, of which $15,442,267 had already been issued on the last day of the month.

GOVERNMENT TO ACT AS LABOR BUREAU

Recent Action of United States Government is Most Drastic Since National Army Draft

Recent measures of the United States government will make the latter practically the sole employment agency in the country. In the great majority of industries, advertisements for labor are to be forbidden.

On August 1st, the supplying of war industries with common labour will be centralized in the United States Employment Service of the Department of Labor, and all independent recruiting of common labor by manufacturers having a payroll of more than 100 men will be diverted to the United States Employment Service. This is in accordance with the decision of the war labor policies board and approved by the President on June 17th. (The war labor policies board is composed of representatives of the war, navy, and agricultural departments, the shipping board and the emergency fleet corporation, the war industries board, and the food, fuel, and railroad administrations. Its chairman is Felix Frankfurter, assistant to the secretary of labor).

The above action was found necessary to overcome a perilous shortage of unskilled labor in war industries. This shortage was aggravated by an almost universal practice of labor stealing and poaching. While the restrictions against the private employment of labor apply only to common labor at the present time, these restrictions will, as soon as possible, be extended to include skilled labor. In the meantime, recruiting of skilled labor for war production will be subject to federal regulations now being prepared.

This drastic change in the nation's labor programme has been found necessary in order to protect the employer and the employed, to conserve the labor supply of the communities, and to cut down unnecessary and expensive labor turnover, (which, in some cases, is as high as 100 per cent. a week), and to increase the production of essentials. While non-essential industries will be drawn upon to supply the necessary labor for war work, the withdrawal will be conducted on an equitable basis in order to protect the individual employer as much as possible.

Under the operating methods adopted, the country has been divided into thirteen federal districts, each district in charge of a superintendent of the United States Employment Service. The states within each district are in turn in charge of a state director, who has full control of the service within his state.

In each community there is being formed a local community labor board, consisting of a representative of the United States Employment Service, a representative of employers and a representative of the employed. This board will have jurisdiction over recruiting and distributing labor in its locality. A survey of the labor requirements is being made, and in order that each community may be fully protected, rulings have been issued that no labor shall be transported out of any community by the United States Employment Service without the approval of the state director; nor shall any labor be removed by the service from one state to another without the approval of the United States Employment Service at Washington. Every effort will be made to discourage any movements from community to community or state to state by any other service.

This labor programme has the approval of all producing departments of the government, through the war labor policies board. It must be understood that farm labor will be protected, for the industrial programme distinctly includes special efforts to keep the farmer supplied with labor.

Some Exceptions are Allowed.

The requirement that unskilled labor must be recruited through the sole agency of the United States Employment Service does not at present apply in the following five cases:—

1. Labor which is not directly or indirectly solicited.
2. Labor for the railroads.
3. Farm labor to be recruited in accordance with existing arrangement with department of agriculture.
4. Labor for non-war work.
5. Labor for establishments whose maximum force does not exceed one hundred.

When the survey of labor requirements has been made and the aggregate demand for unskilled labor in war work is found, each state will be assigned a quota, representing the common labor to be drawn from among men engaged in non-essential industries in that state.

These state quotas will in turn be distributed among localities. Within each locality, employers in non-war work, including those who are only partially in war work, will be asked to distribute the local quotas from time to time amongst themselves. Quotas by localities and individuals are to be accepted as readily as they are for Liberty Loan and Red Cross campaigns. This plan of labor quotas is a protection for all communities.

The object is to keep any community from being drained of labor, and to use local supply, as far as possible, for local demand. The situation, however, is such that in certain cases some men may have to be transported over long distances.

The absolute necessity for this programme can be seen when it is realized that in Pittsburgh, for instance, there are advertisements calling for men to go to Detroit; while in Detroit street cars there are posters asking men to go to Pittsburgh. This same condition is apparent all over the United States, and in the consequent shifting of labor a great part of our war effort is dissipated.

TAXATION TENDENCY IN THE UNITED STATES

Evidence Before Ways and Means Committee Reveals Views Upon Subject of Additional Revenue

After the announcement that the United States government intended to double the amount of taxation this year, that is, to raise it from $4,000,000,000 to $8,000,000,000, the Senate and the House of Representatives were presented with an enormous problem in finance. During the months of June and July, the finance committee of the former and the ways and means committee of the latter secured evidence from as many sources as possible regarding the possibilities for raising revenue and the best methods of securing it. Among the evidence which was received, two or three opinions seem to be generally held. One is that, as much as possible of the cost of the war should be raised by taxation so long as productive power is not interfered with. The difficulty always arises as to just what sort of taxation does interfere with production. Another generally accepted statement was that no matter how the funds are raised, the cost of the war must be paid out of production.

Some of the evidence given by William Kent, who is a member of the United States Tariff Commission, is particularly valuable on account of his familiarity with many phases of revenue questions. Mr. Kent commenced his statement as follows:—

"I want to speak to some rather general principles which you gentlemen have heard over and over, and realize thoroughly, I am sure. Of course, the taxes that we are talking about raising are now primarily for the purpose of raising revenue. We want to get all the revenue we can.

"Taxes have another function, and that is as a corrective or a remedy. The protective-tariff tax is upheld on the basis of a corrective or a remedy. Other taxes are upheld for the same reason. Just now we are trying to get all the revenue we can. Now, revenue can come from only one source, if it is to be permanent revenue, and that is out of production; and therefore in framing any tax legislation the primary thing to render that source permanent, is to see that production is not crippled or destroyed; that enough is left to continue that production, and enough is left to furnish funds for the increase of that production. And when in a time like this we come to applying what we might call the corrective remedial idea of taxation, it should be along the same line, of driving people into production, of driving land into production, and of increasing the fund thereby out of which permanent revenues can be obtained.

"Now, for the purposes of revenue for this war, I believe, without having definite figures—and I suppose I should have to confess to entire ignorance if cross-examined, rather than to stultify myself by definite answers, when I do not know the answer—it is my belief that one-third of the revenue to pay for this war can be raised. If more could be raised, I should be in favor of raising it, provided always it can be raised without destroying production, and I should hope to see every means taken that would drive people and resources into production.

"You take the case of men of large incomes. They have around them something they are not to blame for—it is a matter of custom that has grown up—a large fringe that is

unproductive, men working for them that are ministering to their own comfort and luxury, unnecessarily. They may have private yachts with whole crews doing no good. They may have landed estates that are unproductive. I should like to see an income tax placed high enough to drive these unproductive people into industry. There ought to be no such thing as a butler or a footman. The class of chauffers should be pretty severely cut into. And it seems to me that these things can be automatically arrived at, to a certain extent, by a large income tax."

A little later, regarding the taxation of land, Mr. Kent said:

"Now, the question of taxing unused land into use is one of the corrective phases. It is necessary socially and will, eventually, be valuable economically. Our population in this country, from various reasons prior to the war, was badly distributed, and even if we had had no war we should have been obliged to face this question of badly distributed and, therefore comparatively unproductive, population, with laws that would drive into use, with appropriations and laws that would encourage and make possible the use of the vacant land in this country, to the end of reaching greater production.

"This would have been necessary even without the war. But in view of the war, and in view of the tremendous dislocation of population, I conceive that one of the greatest problems we have to face and one of the greatest possibilities that will arise out of the war, will be a great Federal land policy, and I believe that Federal taxation of land beyond certain limits will have a tendency in this direction. One of the correctives that we must apply by taxation will be found to be applied to privilege in natural resources, the holding of natural resources for speculation, or, as it has been stated, in forestalling industry. Those natural resources have been heedlessly scattered and there has been a constant tendency among the competent and the farsighted to gather them up and get them in large holdings. In some cases this, as in the case of accumulating enough lumber for an operation, is an economical matter, and justifiable. In many other cases it represents an oppressive privilege that cuts the average of our people off from what a few of our people, owing to their financial condition and their foresight, and other things less creditable, have been able to secure for themselves.

"In general terms, while you are going into this taxing business these things should be considered along the line of remedial taxation.

"Now, I do not know if there are any questions you gentlemen want to ask me. If so, I shall be very glad to answer them. I just came here to make a general statement. First, that I hope the maximum possible without destroying production will be raised by taxation; that taxation will be applied to drive men and resources into production, and that those principles will be followed through as vigorously as they may be in the course of the formulation of your policy. Certain it is that this easy borrowing of money for posterity to pay is piling up principal and interest in discouragement for those coming after.

"I have known people to leave a church because the church was so badly in debt, and I hope that we will maintain, through these troublous times a country that will not be so burdened that those after us will have a harder time than is necessary in living under its conditions, and I further hope that as has been well stated, our finances will be so conducted that we will be solvent at the end of the war, and there will be no repudiation."

PUBLICATIONS RECEIVED

Judicial Statistics for the Year 1917.—Contains a summary of the judicial proceedings for the year in the various courts of the province of Quebec.

Topographical Surveys Branch of the Department of the Interior.—Annual report for the year 1916-17. This report describes the work carried on in connection with the Dominion Surveys.

The Technology Review.—Published by the Alumnae Association of the Massachusetts Institute of Technology. This is the issue of July, 1918, and gives a very thorough record of the institute and its graduates. The volume is also well illustrated.

The Liberty Book.—This is an attractive booklet issued by the International Harvester Company of Chicago, to assist in bringing about increased efficiency in agricultural production. It contains many interesting articles on how to eliminate waste and save labor.

Modern Business Problem, No. 30, of the Alexander Hamilton Institute, New York, describes importance of ocean shipping and also the necessity for understanding the customs systems of foreign countries for those who desire to extend their export business.

Bureau of Labor—Second Annual Report of the Bureau of Labor of the Manitoba Department of Public Works.—This is for the fiscal year ended November 30th, 1917, and gives a review of the work of the bureau and a summary of the labor legislation of the province during the year.

Insurance Institute of Toronto.—Proceedings for the year 1917-18. This report gives a list of members of the institute, the annual report, the presidential address, and some of the more important papers read before various meetings of the institute throughout the year. It also gives the examination papers set by the institute.

Quebec Public Utilities Commission.—Eighth annual report for the year ended June 30th, 1917. This book is excellent for reference purposes, as it contains annual reports of the various companies operating in the province, and also gives a summary of the important events in the year affecting public utilities in Quebec.

Opening up Export Trade.—Modern Business Problem No. 15 of the Alexander Hamilton Institute, N.Y., takes up the question of a rubber goods manufacturing company's entry into foreign trade. It supposes that advertisements had been placed in South American papers to secure local representatives and deals with certain types of replies that might be secured.

Analysis of Canada's Fuel.—Part Five.—This is Bulletin No. 26 of the Mines Branch of the Department of Mines. The fuels of British Columbia and Yukon territory are analyzed by Edgar Stansfield, M.Sc., and J. H. Nicolls, M.Sc. The samples include coal from the different sections of British Columbia and the Yukon, and also sawdust briquettes manufactured in Vancouver and crude oil from the vicinity of Barnaby Lake.

Analysis of Canadian Fuels.—Compiled by Edgar Stansfield, M.Sc., and J. H. Nicolls, M.Sc., and issued by the Mines Branch of the Dominion Department of Mines. The work is published in five separate booklets dealing with the Maritime Provinces, Ontario and Quebec, Manitoba and Saskatchewan, Alberta and the North West, and British Columbia and the Yukon, respectively. Samples of various fuels have been secured from different sources and companies, and the results according to the analyses are shown in detail.

The Bridge of Ships.—Reprinted by the American International Corporation from the "Outlook," of August 7th. Describes the growth of the shipbuilding industry at Hog Island, N.Y. In September, 1916, this island was practically a barren waste. Within a year enormous shipbuilding plants had been established there. In twenty-two and one-half months from the time the contract was signed, it is said that Hog Island will deliver 1,385,000 tons carrying capacity of ships. The present weekly pay-roll is nearly $1,000,000, and the total estimated cost of the yard and ships is $315,000,000.

Auditing Procedure.—By William B. Castenholtz, A.M., C.P.A. Published by La Salle Extension University of Chicago as a part of the instructive material in its course in higher accountancy. The book is planned to give the accountant the broad and accurate knowledge which enables him to do constructive work. It not only deals with the theory of auditing, but is rather a manual of procedure which tells the auditor, not only what accounts must be audited, but also how to proceed. The accountant is given a practical help into the innumerable problems which always arise. He will find discussions of such topics as the valuation of plant and assets, reserve for doubtful accounts, how to show notes receivable, discounted securities, depreciation as an operating cost, the valuation of goodwill, short cuts for verificaton of cash, etc. Mr. Castenholtz is a member of the American Institute of Accountants and is now director of the Department of Higher Accountancy in the La Salle Extension University of Chicago.

The latest issue of the "Sunshine Magazine," published by the Sun Life Assurance Company of Canada, contains an interesting article on the mineral resources of Canada by Mr. C. L. Sibley.

By Order of the Board.
G. A. MORRIS,
Secretary.

Montreal, August 12th, 1918.

EAST-BOUND FREIGHT RATES ARE INCREASED

On August 12th the Board of Railway Commissioners for Canada issued the following general order:—

Whereas, the east-bound transcontinental freight rates on specific commodities from points in British Columbia recognized as Pacific Coast terminals to destinations in eastern Canada have been in the past and are now lower than the regular scale of rates under the Canadian Freight Classification, and are related to the rates on like commodities when shipped from the corresponding terminals in the contiguous State of Washington to eastern destinations;

And whereas, by order of the director general of the United States Railroad Administration the United States carriers increased their freight rates, including their said transcontinental rates, from June 25th, 1918, by twenty-five per cent., subject to certain modifications with respect to specific commodities, and because of the competitive character of the traffic it is expedient to continue at least the said relationship.

It is ordered that the railway companies in Canada engaged in east-bound transcontinental traffic be, and they are hereby, permitted to increase their present commodity rates from the said Pacific Coast terminals in British Columbia to destinations in eastern Canada, subject, however, as a maximum to the lowest rates now in effect from the corresponding terminals in the State of Washington on like commodities to corresponding eastern destinations, and that the rates so increased be permitted to become effective not earlier than the ninth day of September, 1918, upon not less than five days' notice to the board and to the shipping public by filing and posting in the manner prescribed in the Railway Act.

Province of Ontario six per cent. ten-year bonds are being offered at par and interest by the syndicate composed of R. C. Matthews and Company, C. Meredith and Company, Limited, and Hanson Brothers. They purchased the issue a few days ago from the provincial government.

Fire Insurance Agency Wanted

A Real Estate and Insurance Company operating in Saskatchewan has an active agency covering 300 points throughout the Province. A General Agency for a strong reliable Insurance Company is wished to take up the business controlled from these points. This is a first-class opportunity for an Insurance Company writing fire business to make use of a large organization well established.

MORE OPTIMISTIC REPORT FROM ALBERTA

Railway Agent States that Recovery Has Been Excellent —Better Prospects for Livestock

Mr. W. J. Whiteside, of the Canadian Northern Railway, who is at present in western Canada, reports as follows:—

The pessimism that was rampant in Alberta following the freak frost which swept the central and northern district of the grain-growing areas the last week in July is rapidly disappearing under the prevailing pleasant weather conditions. Likewise the estimates of damage to wheat, which in many cases was set down as total, are being revised. The natural optimism of the country is reasserting itself, and the department of agriculture officials are accordingly able to revamp the estimates of yield into something resembling harmony with the altered conditions. The preliminary estimate of the acreage sown to wheat in this province was approximately three and a half million acres. Government officers to-day were of the opinion that, roughly speaking, 20 per cent. of that would not be harvested. For the 80 per cent. it is expected that yield will not average less than ten bushels to the acre.

The 20 per cent., of course, will in no wise be a total loss. From the point of view of the ability of the province to produce foodstuffs for the Allies there will hardly be any appreciable loss. That acreage which is out of consideration as a harvesting proposition will be diverted to the feeding of stock. So where the Allies will lose in the quantity of flour shipped they will gain in weight of beef. It would appear to be only a deficit in the character of ship space used. The grain, all of it, can be utilized one way or other.

Reports from the southern section of Alberta, which were rather hopeless a week or ten days ago, are taking on a healthier tone. Pasturage has improved as a result of rains, and even the returns from actual harvesting operations are considerably better than was anticipated. From the great areas in the central and northern districts served by the Canadian Northern Railway an astonishing recovery is in evidence. From the Peace River district, served by the Edmonton-Dunvegan line, the estimate to-day is that from 50 to 60 per cent. of the wheat is safe and 95 per cent. of the oats.

Already the movement of stock from the south to the central and northern districts for feeding purposes and of hay-cutting outfits to cut and ship the feed from the hay lands and damaged wheat lands to the cattle in the south is gathering momentum. Railway men are confident the next few days will find the movement in full swing. No government estimate is available to-day as to the cattle moved, but twenty five thousand sheep are stated to have been shipped. The labor situation appears to be in fairly good shape. Bureaus which have been running since early spring under the auspices of the provincial department of agriculture have been doing splendid service. Some dislocation is apparent now from the need of the expenditure of labor under the moving of stock north and of hay and feed-cutting outfits. Because of that it is likely the farmers of Alberta will have to depend upon the outside for some help. The extent of that need will develop within the next few days.

CANADA'S WEALTH INCREASING

The August letter of the Alexander Hamilton Institute contains the following paragraphs:—

In respect of money values the volume of business has greatly increased during war time, and 1918 is slightly ahead of last year. During the first half of the present year the gross receipts of the three largest railroads aggregated $123,000,000, against $120,000,000 last year, and $75,000,000 during the first half of 1915. Bank clearings during the first half of 1918 were over $[illegible], about two per cent. ahead of last year.

Manufacturing activity is being well maintained, despite labor shortage, although this adverse factor has caused the closing down of most of the Canadian gold mines.

During the past twelve months Canadian imports have been about the same as in the year preceding, but exports have increased from $1,250,000,000 to $1,500,000,000. This gain in foreign trade will tend to make Canada financially strong after the war. Temporarily, however, the Canadian financial situation is somewhat strained, owing to the heavy loans to Great Britain.

PROMINENT NEW YORK LAWYER FORMER CANADIAN

Elsewhere in this issue there appears a statement on the heavy fire losses in Canada, by Mr. William B. Ellison, of New York. Mr. Ellison was born in St. Thomas, Ont., in 1857, studied law with the then firm of Ross, Macdonald, Merritt and Coatsworth, of Toronto, and was called to the Ontario Bar in 1880. Immediately afterwards he went to New York where he has since been actively engaged in the practice of his profession. He is acknowledged on all hands as one of the ablest insurance lawyers in the United States. In 1892 he was elected to the New York legislature and served his constituency for one year, declining to be a candidate for re-election. He also served for some months as water commissioner of the city of New York, and in 1913 was appointed a commissioner to examine the city laws governing fire insurance.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in August:—

	1917.	1918.	Inc. or dec.

NALACO CLUB COMPETITION

The Nalaco Club competition of the North American Life Association Company closed July 31st. This is the $100,000 Club of the North American Life and 19 men qualified for membership for the year 1918-19, the largest number in any single year. The successful men are: Messrs. J. A. Collins, Edmonton; J. W. Hudson, British Columbia; B. Friedman, Edmonton; R. T. Williamson, Edmonton; A. C. Lawrence, Nelson; H. W. Shpchenko, Saskatoon; A. R. Piper, Moose Jaw; F. C. Walls, Edmonton; E. W. Keenleyside, British Columbia; J. E. Matthews, Brandon; N. A. Kilburn, Edmonton; J. I. Stein, Winnipeg; C. Leikert, Detroit; T. E. Bourke, Montreal; A. W. Pennock, Ottawa; H. E. Crosby, Halifax; W. J. Edgar, Newfoundland; W. J. Fair, Kingston; T. H. Giffin, Halifax

MUNICIPAL FINANCING IN THE UNITED STATES

As the year progresses a comparison of the volume of municipal financing in 1918 with previous years becomes more and more striking. The total borrowings of state and municipalities in July amounted to $17,113,633 according to the "Daily Bond Buyer," of New York. This brings the aggregate for the seven months of 1918 up to $152,693,866. Compare these figures with the corresponding totals in 1917 and earlier years, as shown in the tabulation below, and the effect of the war, the regulation of capital issues by Federal authority, the scarcity of labor and building materials is clearly reflected. During the last two months municipal bonds have had a remarkable rise in market values, which are now about at the level of last December. This improvement is credited to the falling supply of new bonds and the increasing value of the Federal income tax-exemption privilege which state and municipal bonds enjoy.

The following table, compiled by the "Daily Bond Buyer," of New York, shows the sales of state and municipal bonds for July and for the seven months' period ending July 31st for the last ten years:—

	July.	Seven months.
1918	$17,113,633	$152,693,866
1917	88,046,502	304,098,265
1916	36,316,924	325,413,044
1915	27,160,893	344,316,949
1914	30,737,387	349,082,007
1913	26,239,242	248,026,887
1912	[illegible],221,824	209,602,684
1911	44,891,81[illegible]	320,560,763
1910	45,326,011	195,190,565
1909	19,829,268	230,382,286

THE EVER-INCREASING FIRE LOSS

Is There No Remedy for a Condition That Has Become a National Menace?

William B. Ellison, of New York, when asked his views on the subject of the excessive fire losses of Canada, said:—

"Fire insurance offers about the only medium that I know of through which a man may benefit by his own negligence or by the negligence of his employees, for whose acts he is otherwise responsible.

"In every other sphere of human activity that I now can think of a man is barred from profiting by his own want of reasonable care, and I know of no other condition under which a man is not held responsible for the negligence of his representatives.

"If this anomolous situation can be remedied, I have not the least doubt that our fire losses would immediately decrease to an astounding degree.

"There should be legislation under which the standard form of policy should be amended so as to bar a recovery of a loss sustained by fire under circumstances clearly showing that the fire in question was the result of negligence on the part of the assured or his employees. Such a provision would immediately result in the exercise of greater diligence on the part of property owners, real and personal, to avoid a fire, and such diligence is nothing more than can be fairly expected of a person who seeks indemnity.

"Fire prevention is now universally recognized as beneficial and tending largely to abate fire losses, and I can think of no means whereby such prevention would be more stimulated than by relieving the insurer from all loss caused by the negligence or want of reasonable care on the part of the insured.

"In my opinion, it is not sufficient that the insured should be unable to recover a loss growing out of his own want of care or negligence on the part of his employees, but he should, in addition thereto, be held for such damages as innocent third parties may suffer from the same cause.

"There is nothing unfair in holding that a property owner who neglects his duty, and thereby causes damage to his neighbor, should be held liable therefor. On the contrary, in every other line of activity such consequential damage is clearly recognized and approved.

"The economy that would necessarily grow out of such a situation would warrant and permit the insurer to extend its system of inspection to such a degree that over-insurance —that great tempter to negligence, if not incendiarism— would be substantially eliminated.

"Everything that tends to conserve the financial strength of the insurer tends equally to serve the welfare of the insured; and it should be a matter of public interest that our great indemnitors against loss by fire should be protected against a compulsory distribution of their funds among unworthy loss claimants.

"Under the conditions that now exist the honest, careful and painstaking property owner is unjustly called upon to pay the loss of his less careful and less scrupulous neighbor. This offers no inducement to property owners to take any extraordinary precautions against fire, because the careful and the careless seem to be equally protected under the law.

"There should also be some change in the law enabling the assignment of a cause of action for negligence under which subrogation would be rendered easier and more effective.

"The question is a large one, and should be made the subject of more mature consideration; but the principle involved is a simple one, and that is, that no man should be permitted to recover the fruits of his own sins, whether of omission or commission."

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended August 9th, 1918:—

McKinley-Darragh, 144,350; Tretheway, 77,170; Kerr Lake, 58,320; Dominion Reduction, 78,000; Nipissing, 81,250; total, 439,000.

The total shipments since January 1st, now amount to 18,358,236 pounds, or 9,179.6 tons.

ANNUAL MEETING OF CHARTERED ACCOUNTANTS

At the 13th annual meeting of the Institute of Chartered Accountants of British Columbia, the statement was made that 22 of the members and 36 articled clerks were serving in the empire's forces abroad. The report of the treasurer showed the institute to be in good financial position after making the usual grants to patriotic funds. Reports were submitted by the delegates who attended the last annual meeting of the association of Chartered Accountants which met in Banff in August, 1917, and Messrs. Gordon Tansley and A. H. Christie were nominated to represent the institute at the Dominion Association meeting in Montreal in September, 1918. Mr. A. H. Edwards acted as chairman.

The following will constitute the council of the institute during the present year: W. S. Buttar, H. D. Christie, A. H. Edwards, A. F. Griffiths, W. A. Tolmie, G. F. Gyles, J. B. Woodthorpe, G. E. Winter and J. H. Young.

BRITISH EMPIRE'S HYDRAULIC RESOURCES

The conjoint board of British scientific societies appointed to report on the utilization of the water power of the Empire point out in their report that Great Britain utilized only 8.3 per cent. of its available water power, whereas Germany utilizes 43 per cent. From this they draw the following conclusions:—

Firstly, that the potential water power of the empire amounts in the aggregate to at least 50 to 70 million horsepower. Secondly, that much of this is capable of immediate economic development. Thirdly, that with the exception of Canada, New Zealand and to a less extent New South Wales and Tasmania, no systematic attempt has yet been made by any government department to ascertain the true possibilities of hydraulic resources in its territory or to collect relevant data. Fourthly, that the development of the empire's natural resources is inseparably connected with that of its water powers. Fifthly, that a development carrying such enormous possibilities should not be left to chance, but should be carried out under the guidance of some competent authority.

The committee recommend that the government should take steps to form an imperial board of commission to include representatives of all the Dominions and dependencies, to investigate and advise the state as to developments which it might assist or initiate.

AN OPPORTUNITY TO REDUCE MUNICIPAL EXPENDITURE

Important developments have recently taken place in turning municipal garbage, the disposal of which was formerly an expensive item, into a revenue producing department of city work. In any city exceeding 100,000 inhabitants the garbage usually amounts to several hundred thousand pounds per day, and the collection and disposal is frequently a difficult problem and invariably an expensive one.

Among the products which may be obtained from garbage may be counted fuel, grease and soap. A considerable expenditure of capital is, of course, required in the erection of the plant, but an expert chemist in the United States, Mr. Charles A. Newhall, has said that a first-class system for a small city can be installed for about $100,000. Work of this kind has now passed the experimental stage. The city of Louisville has a revenue of $200,000 a year from garbage reduction, and Chicago $603,000 per year from one reduction plant. The city of Worcester, Mass., derives $40,000 from a garbage-fed piggery.

In Canada no work of any importance has been commenced along this line by municipalities. In Toronto, however, a private company by the name of the Oakoal Company, Royal Bank Building, has erected a plant for turning garbage into fuel briquettes. At present 14 men are employed and about 40 tons per day of fuel are being turned out. The company states that the heat value of the fuel is at least equivalent to that of anthracite coal, that it is clean and odorless, and that it can be sold at $10 per ton. The company anticipates receiving contracts from municipalities for garbage disposal, thus reducing the cost of garbage systems to the expense of collection, and also providing a local supply of fuel in every city served.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Belleville, Ont.—August 14—Barns of James Boyd were damaged by lightning. Estimated loss, $4,500. Insurance carried, $3,800.

Brantford, Ont.—August 12—Barn of Mr. A. Quinlan, on Alfred Street, was damaged by lightning. Estimated loss, $2,000.

Codrington, Ont.—August 9—House of A. Van Blaricom was destroyed. Caused by defective oil stove.

Colborne, Ont.—August 9—The Phelps block was destroyed.

Galt, Ont.—August 6—Barn of the Waterloo Golf and Country Club was damaged. Estimated loss, $2,000.

Keppel, Ont.—August 6—Barn of Mr. McMillan was destroyed.

Maidstone Crossing, Ont.—August 9—Barn and two thousand bushels of wheat of J. Collins were destroyed. Caused by spark from a thrashing engine. Estimated loss, $10,000.

Mitchell, Ont.—August 14—The Grand Trunk Railway station was destroyed.

Montreal, Que.—August 12—Two hay sheds, containing several hundred tons of hay, owned by the City Ice Company and the W. H. Dwyer Company, Limited, were destroyed. Estimated loss, $20,000.

Plattsville, Ont.—August 8—Barns and large part of season's crop of R. Hewitt were destroyed. Caused by spark from thrashing machine outfit. Estimated loss, $11,000.

St. Catharines, Ont.—August 11—Barn of Robert Boles, on Vine Street, was destroyed by lightning. Estimated loss, $2,200. Insurance carried, $1,000.

August 12—Plant of the Canadian Warren Axe and Tool Company was damaged. Caused by explosion of an oil feeder. Estimated loss, $25,000. Insurance carried, $50,000.

Toronto, Ont.—August 14—Factory of the Canadian Tumbler Company at 83 King Street East was damaged. Caused by blowing out of electric fuse. Estimated loss, $1,500.

Truro, N.S.—August 5—The Tipperary Skating Rink on King Street was destroyed.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of July, 1918, to *The Monetary Times*:—

The fire department responded to 79 alarms during the month of July as follows: Fires where damage occurred 24, fires where no loss resulted 14, chimney fires (no loss) 6, bush fires (no loss) 16, false alarms 4, out of city limits 1, rubbish fires 3, smoke scares 3, and services of the department not required 8.

The estimated total damage resulting from fire for this period was $88,906, of which amount $74,124 was covered by insurance, leaving the property loss above insurance at $14,782. The total value of the property involved was $1,720,084.

The following shows the cause of fires for the month: Backfire (carburetter) 1, carelessness with cigarettes, matches, etc., 8, children playing with matches 1, defective chimney 1, defective flue 1, electrical origin 5, electric iron left on switch over night 1, fire breaking out again 2, flying sparks (chimneys, smokestacks, forges, etc.) 13, friction in gasoline feed-pipe . hot box on air-pump (street car) 1, lightning 2, oil dropping in firebox (furnace) 1, overheated stoves and ranges 2.

Victoria, B.C.—Fire Chief Davis submits the following report for the month of July, 1918, to *The Monetary Times*:—

The loss by fire on buildings was $477 and the loss on contents amounted to $300.

Insurance was carried to the amount of $154,000 on buildings and $1,000 on contents. The total amount of property at risk was $219,000.

WEEKLY BANK CLEARINGS

The British Columbia Electric Railway Company has succeeded in getting a by-law passed by the city council, authorizing it to increase its fares to six cents. On the 12th instant, however, Mayor Gale refused to sign the by-law and the consequence was that the railway lacked authority to collect the increased fare. It is stated that he objected to assenting to the by-law until the company had reduced the power and light rates charged to local consumers.

THE ECONOMICS OF AIR TRANSPORTATION

Operations of United States Post Office Department is First Attempt to Put Work Upon Business Basis

For some weeks past the United States government has been operating, through the post office department, an air mail service from New York to Philadelphia, and from Philadelphia to Washington. The mail so carried is charged with postage at the rate of 16 cents for the first ounce or fraction thereof and six cents for each additional ounce or fraction thereof, of which ten cents is for special delivery service. Such mail consists of matter of the first-class including parcels not exceeding 30 inches in length and width combined. The postage on aeroplane mail must be fully prepaid in special aeroplane stamps or ordinary postage stamps.

The costs of operating the system have been definitely calculated. Nine machines are run and the expenses for the fortnight, May 15th to 31st, were as follows:—

	Total.	Average.
Gas	$ 405.20	$ 45.03
Grease and oil	97.87	10.87
Office force	105.56	11.73
Motor cycles and trucks	111.55	12.39
Rent, light, fuel, power, telephone and water	198.57	22.06
Miscellaneous	23.95	2.66
Pilots:		
Actual time	309.40	40.38
Dead time	195.60	21.73
Hangar men:		
On plane	46.21	5.13
Miscellaneous	87.50	9.72
Mechanics:		
On plane	1,130.15	125.57
Shop time	87.50	9.72
Repairs and accessories	394.87	43.87
Interest on investment	248.05	27.56
Departmental overhead charge	150.00	16.66
Total	$3,682.07	$400.08

Depreciation is not estimated in this statement of cost, but is reflected in the items under repairs, parts and labor. During the period under consideration, 1,377 gallons of gasoline were used and 7,234 miles covered, the total time run being 113 hours 8 minutes. The machines ran accordingly 5¼ miles to the gallon, and the expense of the service including all overhead charges, excepting depreciation mentioned above, was $32.54 per hour or a little less than 51 cents per mile covered.

In calculating the cost of the service it is found possible to apportion many of the expenses to the individual machines. There are, however, items such as rent, light and power, shop time of mechanics, interest on investments, etc., which cannot be so apportioned and must be merely averaged among the different units.

The National Convention of the Farm Mortgage Bankers' Association of America will be held at Kansas City, Missouri, on Tuesday, Wednesday and Thursday, September 17-18 19.

NEW UNITED STATES REVENUE BILL BEING PREPARED

For some weeks past the ways and means committee has been preparing the new war revenue taxation bill in accordance with the policy of the United States government. "The Wall Street Journal," in a recent issue, points out that the bill will probably be a blanket measure to take the place of the scattered laws now on the statute books, and also give a summary of the probable features. Income from new issues of state, county and municipal bonds is removed from the exemption for income tax, as are also salaries of state, county and municipal officers and employees, the salaries of president of the United States, and of federal judges. According to this modification, the president will pay an income tax of $24,000 on his $75,000 salary, and each member of the Supreme Court of the United States, whose salaries are $12,500, will pay an annual tax of $1,000. Individual income taxes are much higher than at present, ranging from 5 per cent. to over 80 per cent., and the corporation income tax is more than doubled. The inheritance tax is increased by 50 per cent., and the capital stock tax is doubled without exemption. Only a few taxes will remain unchanged. Dual machinery is provided to raise special war levies from business by means of an excess tax based on amount of return on invested capital or by a war profits tax based on excess over principal.

PROPOSE CHANGES IN ASSESSMENT LOANS

At a recent meeting of the Assessment Reform Committee in Toronto, the following amendments were suggested:—

That the Registry Act and Land Titles Act be amended so as to provide that no conveyance or transfer of land shall be accepted by the registrar or master of titles unless all arrears of taxes have been paid.

That the Registry Act and Land Titles Act be so amended as to provide that no conveyance or transfer of land shall be acceptable to the registrar or master of titles unless an affidavit is attached thereto setting forth the true consideration or the actual value of the land.

That the Assessment Act be amended so as to tax rent or other income derived from real estate.

That the act be so amended as to allow municipalities the right to tax improvements or assess improvements at a lower rate than lands.

That the municipalities be empowered to tax the net profits of the vendor of lands on sales. That no exempted property shall be sold without the consent of the city, which may appropriate a portion of the sale price.

Provincial war tax should be levied on population rather than on the assessed value of the real estate.

That municipalities be granted local option in the exempting of churches, private schools, burial grounds, and private hospitals.

That no lands should be annexed to the city of Toronto unless local improvements had been made to the satisfaction of the municipality.

It was also suggested that there should be compulsory listing of incomes and that municipalities should have the power to sell lands for two years' arrears in taxes.

TAX SALES ARE EFFECTIVE IN EDMONTON

Vancouver Report for First Six Months of 1918 Shows Improvement Over Previous Year

According to a report of the city of Edmonton for the six months ending 30th June, 1918, the finances of the city have improved remarkably. Stringent measures have been adopted for the recovery of tax arrears, and the result has been the collection of a substantial percentage. Controllable expenditures continue to be maintained on an economical basis.

The report is issued by Mr. David Mitchell, city comptroller. It gives a comparison of the figures with those of the previous year, and reads as follows:—

There is a considerable improvement in the revenue for the first six months of 1918, being $1,113,286.35 as against $435,996, or $677,290.35 greater than for the corresponding period of the previous year. This condition is, of course, chiefly due as the result of the tax sale proceedings for recovery of arrears. The outstanding arrears of taxes which at 31st December last amounted to $6,157,075 have been reduced as at 30th June to $5,127,641.28.

Departmental fees show an increase of over 95 per cent. as compared with last year for the same period.

Revenue.

30 June, 1917.		30 June, 1918.	
$ 165.00	Assessor and tax collector	$ 89.85	
257.00	Building inspector	250.25	
502.00	Fire	356.40	
612.00	Health and cemeteries....	700.65	
......	Income tax	328.93	
10,211.00	License	31,747.90	
1,924.00	Markets	2,503.77	
1,321.00	Parks	1,811.55

40,952.00	Interest and exchange		27,185.04
363,168.00	Tax arrears collected		1,029,433.72
$435,996.00			$1,113,286.35

Expenditures.

In cost of general administration, departmental expenditures compare favorably with those of 1917 being $273,778.09 for 1918 against $279,785 for the previous year.

Total controllable expenditures of general administration for the six months under review reflect a slight increase of $2,3[illegible].05 over last year, but departmental expenditures are actually less than those of 1917 by approximately $6,000,

According to the provisional estimates adopted by council for the current year providing for general administration, (otherwise controllable expenditures), the appropriation on a proportionate basis for six months, would be $345,279, while the expenditures are $[illegible]19,869.05.

NEW BRITISH CROWN ASSURANCE COMPANY

Announcement has been made of the plans of the Eagle, Star and British Dominions Assurance Company, in taking over the British Crown Assurance Corporation.

The arrangement for amalgamation was approved and sanctioned by the High Court of Justice in England on the 12th day of July, 1918, and a special resolution for the merger was passed by the British Crown shareholders on the 22nd of July, and formally confirmed by them on the 9th of August, 1918.

Automatically with the voluntary liquidation of the "British Crown" Assurance Corporation, Limited, as at present constituted, a new company with the same name, will be registered at Glasgow, Scotland, with a capital fully paid of $125,000. This new "British Crown" company will carry the guarantee of the Eagle Star and British Dominions Company, and will in addition have transferred to its credit the deposits, amounting approximately to $216,000, now held by the Dominion government of Canada for the present "British Crown," and will operate under a Dominion license in Canada.

The head office for Canada of both the Eagle Star and British Dominions office (better known as the "British Dominions"), and the "British Crown," will be in Toronto under the management of Mr. J. H. Riddel, assisted by Mr. E. C. Johnson. The home office board is one of the strongest in London. Sir Edward M. Mountain is the managing director, and Mr. D. W. MacLennan, general manager of the British Crown, joins the board of the "British Dominions."

The "British Dominions" Company's accounts for 1917 show assets in excess of sixty-five million dollars, and an income in excess of fifteen million dollars. The last declared dividend (15 per cent. free of income tax), was paid entirely out of interest on accumulated funds. The present market quotations are 3⅛ times the nominal value of the shares, which are difficult to obtain. The managers for United States of America are Messrs. Fred. S. James and Company, New York.

The British Crown Hail Underwriters' Company, Limited, is licensed under the provincial government of Saskatchewan to carry on hail insurance, and the license will be extended to other classes. It is a subsidiary company of the British Crown Assurance Corporation, Limited, of Glasgow, Scotland, and transacts hail business in that province and in the province of Alberta, and likewise now carries the guarantee of the Eagle Star and British Dominions Company. In addition, it maintains the necessary deposits required by the provincial government. The "British Crown" has had a very successful career in hail business in the past, and with prompt and liberal claim settlements to its credit, amounting to $879,668, holds an excellent record in the field of hail insurance. Mr. W. A. Smart is manager, with office at Regina, Sask.

Monthly Income Policies a Necessity

A legacy of life insurance amounting to $100,000 was completely dissipated in seven years by faulty investments and expensive living. In another case a beneficiary squandered the proceeds of a life insurance policy amounting to $50,000 in a single year. To protect the beneficiary against inexperience in making investments, and against extravagance, the monthly income policy has been introduced, providing an automatic, safe and profitable investment of life insurance funds. Supplement your existing insurance with a monthly income policy. It can be written on the life, limited life or endowment plan. Such a policy with our disability clause incorporated is without an equal in furnishing ideal household protection. We will gladly furnish full particulars and illustrations.

THE GROWING FIRE TAX

Greater Care Would Result in Substantial Reductions in the Heavy Burden Now Resting on Canadians

The Citizens' Research League of Winnipeg, Man., has issued its Bulletin No. 12, under the title, "Your Growing Fire Tax." The following figures are given showing the cost of fires to Winnipeg during the year:—

Insurance premiums paid in 1917 (approximately)	$1,600,000
Expenses of city fire department (over)	500,000
Total	$2,100,000

These figures do not take into account the expense of private fire protection by occupants and owners.

The league points to the experience of the city during the fortnight in May, 1918, when the civic fire brigade was on strike. During these two weeks there were only 56 calls as compared with 127 during the corresponding two weeks of 1917. Of these 56 calls only 17 were actual fires. Knowing that the fire department was on strike, owners and householders were for once impressed with the absolute necessity for carefulness and the results indicated how large a proportion of fire losses is the result of negligence.

Canada has the greatest fire loss per capita of any country in the world from which statistics are available. During the quarter century preceding the war, our annual fire losses had increased by 290 per cent., while the Dominion's population had increased by only about 67 per cent. The per capita fire loss is nearly $2.75.

Winnipeg's annual fire losses as given by the chief of the city fire department show a considerably higher average than that of over 300 leading North American cities. In 1916 the city's losses amounted to practically $3.75 per capita and in 1917 to almost as much. The five-year average approximates $3 annually, as against $2.25 for 300 United States cities, 74 cents for the whole of France, 64 cents for England, and 13 cents for Switzerland.

In explanation of the excessive loss in the city of Winnipeg, it is pointed out that the climate is comparatively dry and high winds are frequent. Many of the houses are built of timber with shingle roofs and must be artificially heated during many months of the year. The fire area covered is 29.0 square miles and the city fire department is kept in an efficient state.

The expenditure on fire protection during the past two years has been as follows:—

	Expenditure 1916-7.	Per capita.	Expenditure 1917-8.	Per capita
Fire department .	$359,079	$1.78	$399,038	$2.18
Fire alarm system	22,585	. . .	20,771	. . .
Fire hydrants	69,660	. .	70,650	.
Fire service water-works operating .	66,029	. .	63,960	.
	$517,354	$2.56	$554,420	$3.03

Remedies Suggested.

The Winnipeg Fire Commission in its report on a large fire in 1916 made the following four principal recommendations:—

1. That the fire department should make closer and more detailed inspection.

2. That owners of buildings should instruct employees as to promptly calling the fire department.

3. That display cards should be placed in every building giving the location of nearest alarm boxes.

4. That in the interest of public safety it may be advisable for the city to get legislation requiring old as well as new buildings of hazardous occupancy to be safeguarded against fire by the installation of automatic sprinklers.

The following suggestions are put forward by the league in its bulletin:—

1. A more exacting test of general intelligence would seem feasible. Candidates for the position of firemen are in several cities (after newspaper notice of vacancies has been given) chosen by open competitive examination of the civil service sort, aimed at discovering general intelligence and special aptitude.

2. In its report of a year ago the league urged the instituting within the fire department of a regular school of instruction. On this point the chief's report for 1917 says: "The school of instruction is maintained during the year for five days in the week, weather permitting, and members from each station are drilled two hours each day and instructed in the use of scaling ladders, extension ladders, laying of hose and the use of all tools used in fire fighting, so that all unnecessary delay, excitement and confusion are eliminated at fires; and by this constant training the men are kept in such a physical condition that they are at all times able to cope with the most strenuous work that is expected of a fireman."

3. It was further recommended by the league that the instructor or instructors in the department's "school," should have available a library of up-to-date fire-fighting and fire-prevention literature, which should also be accessible to the men and which they should be encouraged to read. Evidence of familiarity with this should be counted to a man's credit and entered on his record as contributing to promotion.

LOST—FIVE BILLION DOLLARS

The "Liberty Book," issued by the International Harvester Company, of Chicago, comments as follows on the need for efficiency in farming:—

The principles of good business observed in manufacturing or commercial pursuits, apply also to the business of farming. This is especially true at this time when efficiency in every line of endeavor is imperative.

On the farms of the United States there is an average annual loss of about 30 per cent. of the gross income, and all this waste can be prevented.

The principal sources of this loss are as follows: Failure to test seed corn, more than $100,000,000; improper harvesting and storing of seed corn, millions of dollars in yield and quality; planting of imported seed corn, cannot be estimated; ravages of corn root worm, more than $100,000,000; waste of cornstalks left in field instead of being put in silo, at least $500,000,000; failure to treat small grains for smut, $35,000,000; waste of manure through careless handling, $100,000,000; weeds, $300,000,000; hog cholera, over $65,000,000; Texas fever cattle tick, nearly $500,000,000; "scrub" dairy cows, $745,000,000; for depreciation of farm machinery and tools from failure to house or care for them; soil erosion resulting from one-crop system of agriculture; and for carelessness, neglect, shiftlessness—because we are in the rut—we will charge $2,500,000,000 more.

TO RESTORE AMERICAN CULTURE

A recent article in the "Gateway Magazine," of Detroit, contains a eulogy of the work of Mr. John Stuart Thomson, who has been a frequent contributor to *The Monetary Times*. For many years he has been leader of a number of international movements, especially official recognition of the Chinese Republic by Britain and America; retention of the Philippines; medical missions for China whereby American-trained Chinese physicians mainly are used (the Rockefeller Foundation has adopted this plan in its work in China); preservation of Chinese territorial integrity; use of Japanese army in the war; Anglo-American defensive naval alliance; American-Japanese partnership in China's and Siberia's railways (the Knox-Harriman scheme of 1910); private ownership of railways in peace times. An article upon the latter subject appeared in *The Monetary Times* of January 4th, 1918.

In a recent article, Mr. Thomson wrote: "In the last two decades, Pan-German imperialists had a hundred books praising their culture, nation, etc., issued in the United States, compared with one book praising Anglo-American culture. When in 1913-4, supported by the written approval of leading magazines, statesmen, churchmen, etc., of the United States, France, Britain, the colonies, etc., I urged publishers to bring out one special book proposing definitely a defensive Anglo-American-French naval alliance as insurance against this war a number of publishers replied: 'No feeling for it; wouldn't pay; no entangling alliances.'"

THE TARIFF AND CANADA'S FUTURE TRADE

Protection Has Become an Essential Part of the Economic Policy of Modern States, Excepting United Kingdom

The revision of the American tariff downward, during President Wilson's regimé, gave rise to the opinion in certain quarters that protectionism, attacked in one of its chief strongholds, would gradually be discarded as a commercial policy. Whatever might have occurred during a period of prolonged peace has become plainly impossible as a result of the war. Whether or not there is to be an economic war after the war, it is evident that protectionism has secured a stronger grip than ever before upon the industrial life of the nations.

Keener competition than has ever yet been experienced will characterize economic activity at the close of the present struggle. A league of nations may enforce political peace in the international arena, but the struggle for industrial and commercial supremacy is bound to be bitter. Germany has already announced that exports of potash, of which commodity she has a virtual monopoly, will be strictly curtailed and regulated; and that supplies of essential raw materials will be imported under a national purchasing commission. It is not to be expected that the machinery for the control of the economic life of the nation, set up in the United Kingdom and perfected during the course of the war, will be thrown on the scrap-heap at the close of hostilities. Purchasing commissions, export boards, the control of supplies of bunker coal, the strict regulation of shipping and of inland traffic, will not be discarded by Great Britain at the signing of peace. Everything points, indeed, to a careful and minute regulation of the economic life of the great powers after the war.

Those who demand a lowering of the Canadian tariff, or its abolition save for revenue purposes, ignore the fundamental factors in the new world situation. The United States tariff commission is already working in a serious way upon post-bellum trade conditions, and the most effective manner of dealing with these through the tariff. Generally speaking, the United States has had only one set of customs duties during the course of its tariff history. Canada, as is well known, has a multiple system-tariff rates applying to Imperial British trade, intermediate rates applying since 1910 to France, and to several other nations enjoying most-favoured-nation treatment under British commercial treaties, and a third schedule of rates applying to all countries other than those making reciprocal concessions to the Dominion. In addition, there is the surtax, the chief use of which is found in effecting reprisals.

Every Tariff is not Protectionist.

For several generations the United Kingdom has carried on its fiscal affairs under the Cobdenite theory of free trade. The motherland has imposed a single and limited set of customs duties upon all commodities, subject to the tariff, regardless of the country of origin. It is evident that there is nothing of a protectionist nature in this tariff system, it being used for revenue purposes only. France, on the other hand, has levied tariff rates both for revenue and protection. Its tariff is composed of two parts, maximum and minimum scales—the latter being available to those nations offering reciprocal advantages. Germany, since 1871, has carried on its commerce under a "general and conventional" tariff; the general tariff being the standard from which concessions are computed. The conventional is built up on specific agreements with various nations, offering concessions to German industry. Such tariff arrangements have been entered into with many European countries, including Austria-Hungary, Bulgaria, Greece, Italy, Portugal, Roumania, Russia, Serbia and Sweden. The German system is superior to the French as an instrument for securing commercial concessions. Since the treaty of Frankfort, France has been compelled to give Germany equal concessions with those granted to other nations with which specific agreements, effecting reciprocal advantages, have been made. On the other hand, France found it growingly difficult, before the war, to find an entry to the German market.

It may be expected that the most-favored-nation clause in commercial treaties will not hold a place of such relative significance, after the war, as it has up to the present time. The war automatically rendered obsolete all commercial agreements between belligerents; and a new series of treaties must be negotiated at the signing of peace. As is well known, Canada and the other British Dominions, for years before the outbreak of hostilities, held in disfavor the most-favored-nation clause in British commercial treaties, in so far as such a clause pertained to their commercial life. It will be recalled that the United Kingdom denounced its commercial treaty with Germany in order to avoid offending, in this particular, Canada's susceptibilities; which in turn led to a trade war between the Dominion and Germany. It goes without saying that Canada will insist, for the future, upon complete autonomy in its own fiscal and commercial affairs—a position which, indeed, has already met with full acceptance on the part of the United Kingdom.

Tendency is not Towards Free Trade.

In the abstract, and in the realm of pure theory, free trade may be the wisest commercial policy for the nations; but it is idle to suppose that Canada can materially lower its tariff in the face of hostile trade restrictions on the part of other countries. The logic of events will probably compel the United Kingdom to adopt, in some degree at least, a protectionist programme—as a weapon of offence and defence, and as a method of securing fair commercial treatment in the markets of the world. For, we must look forward, obviously, to a recrudescence of high protectionist feeling and legislation everywhere throughout the world. Nationalism has been deepened as a result of the war; and, rightly or wrongly, during the past hundred years, the leading nations have regarded a protective tariff as a means of stimulating and safeguarding national economic life. Moreover, war debts and the urgent necessity of increasing national incomes, will demand the retention of the tariff. Revenues must be raised for the preservation of national credit, and no one seriously looks to the income, and other forms of direct, taxes, to bear the entire brunt of the burden. And as long as Canada aspires to diversify its national industrial life, to emerge out of the pioneer stage, it will be essential to protect the economic activities of the nation by the use of an equitable and scientific tariff system.

PRODUCTION SUPPLEMENTED BY ECONOMY

Work of Canada's Food Board Reviewed — Has Completed One-half Year of Work

The weekly editorial of the Canada Food Board, dated the 3rd inst., says:—

The following cable has been transmitted to Canada from the Food Controllers' Conference in London:—

"Resolved that while the increased production of the United States and Canada rendered it possible to relax some of the restrictions which have borne with peculiar hardships upon all our people, yet it is absolutely necessary that rigid economy and elimination of waste in the consumption and handling of all foodstuffs, as well as increased production, should be maintained throughout the European allied countries and in North Amercia; that it is only by such economy and elimination of waste that the transportation of the necessary men and supplies from North America to the European front can be accomplished, and stocks of foodstuffs can be built up in North America as an insurance against the ever-present danger of harvest failure and the possible necessity for large emergency drafts to Europe; and further, that we cannot administer the food problem on the basis of one year's war and that we must prepare for its long continuance if we are to assure absolute victory."

The conference was held on July 22nd and the food controllers of Great Britain, United States, France and Italy were present. Most encouraging was the report as to the success that has been achieved by the efforts of Canada and the United States to tide over the extremely critical period which set in at the beginning of the present year. Mr. Hoover's speech has heartened allied Europe and has shown Germany the hopeless prospect she has of starving Great Britain and her allies by her submarine frightfulness. Owing to the success of the hog production campaign on this continent, and economy of the consuming public in the use of bacon and all pork products, Canada may now relax, for the time being, the regulations affecting public eating places by which pork was conserved for export. The Canada Food Board have announced that as a result of the two efforts—production and conservation—the net exports from the Dominion for the year passed, have been increased by 125,000,000 pounds, or 571 per cent. over a five-year pre-war average.

That these encouraging results of past efforts do not mean that all danger is removed and that every necessity for further effort has been passed, is, however, not to be, for one moment, forgotten. Rigid economy and elimination of waste in all foodstuffs must be continued throughout allied countries to guard against harvest failure and the possibility of having to feed larger military drafts from America to Europe. Increased food production and conservation are still vital to the successful prosecution of the war as the above resolution, passed at the Food Controllers' Conference and cabled to the Canada Food Board at Ottawa, emphatically states.

A later announcement, dated the 10th August, outlines the work of the board during its six months of existence, as follows:—

The first half-year of the Canada Food Board's activities came to an end on August 11th It is fitting and timely to note something of what has been accomplished in that period. The board has inaugurated many measures looking to the conservation of food, and economical distribution. It has also co-operated with the agricultural departments, federal and provincial, in encouraging greater production.

The effect of these measures may be noted by the increased exports to Great Britain and her allies. In the case of beef, these exports have increased over the average exports for 1910-1914 by 75,000,000 pounds per annum, or 6,705 per cent; in the case of pork (including bacon and lard), the net exports have increased by 125,000,000 pounds per annum, or 571 per cent. It is estimated that Canada has exported at least 25 to 30 per cent. more wheat during the last 12 months than could have been exported had it not been for conservation and organization of this country's food resources.

Among the measures which have been effective in accomplishing these results are the following:—

Flour has been standardized and the milling extraction of wheat has been increased twice Canada is now using 76 per cent of the wheat-berry in its standard flour

Bakery products have been standardized, and the amount of certain ingredients has been limited to prevent extravagant use, while the manufacture of other products involving an excessive use of sugar and fats has been prohibited.

A great saving of wheat has been effected by the licensing and regulating of the trade in package cereals, manufacturers being required to substitute a considerable portion of other cereals than wheat in their preparations.

Public eating places have been regulated, and the saving of meat, wheat and dairy products for export to Great Britain and the allies has been very large.

The use of grain for distillation of potable liquors has been prohibited, and the use of malt has also been limited.

The feeding of grain to livestock in stock yards has been regulated, and the feeding to poultry of wheat fit for milling purposes has been prohibited.

Waste of food has been made an offence subject to heavy penalties, and municipalities have been given wide powers in checking such waste.

Arrangements have been made for an abundant supply of fish, at reasonable prices, as a substitute for meat and other foods.

Close control over importation and exportation of foodstuffs is maintained by the Canada Food Board.

ASSESSMENTS AND TAX SALES IN EDMONTON

Extensive reductions have been made in many of the assessments in Edmonton, Alberta. The largest cut made up to the end of July, were in assessments of three lots belonging to the Bellamy Investment Company, reduced from $18,000 to $10,000. On the appeal of the Credit Foncier Company, twenty acres of land in the Lauderdale subdivision was reduced in assessment from $13,895 to $10,000, or $500 per acre. So wide a variety of opinions is often expressed in the court that resort is necessarily had to the price which the owner is willing to accept for it. In a number of cases the owner was asked to place a figure upon it, and the assessment fixed accordingly. The appeal of the Canadian Pacific Railway Company against the assessment of their property, has been withdrawn as a reduction was made from $300,000 to $250,000.

The evidence given in the court illustrates clearly the decline in value of urban lands which has taken place during the past few years. One piece of property which had been valued in 1913 at $43,000, had its assessment fixed in 1916 at $20,000 and is now assessed at only $10,000.

On Tuesday, July 30th, the city tax sale was adjourned until Monday, August 12th. All of the lots in the list had been offered, and at subsequent sessions there will be no general offering. The tax sale up to the present time has been the most satisfactory on record. One tendency this year is to purchase more valuable property than in previous years. Last year there were 712 lots sold, netting the city $80,000. This year there have been 751 lots sold so far with receipts totalling $250,000.

There has been much agitation in the city for a general increase in the civic salary schedule, and owing to the financial position of the city, the movement has met with considerable opposition. According to latest advice no settlement has as yet been reached.

Land Settlement Board in British Columbia

Board Has Taken Over Work of Agricultural Credits Commission—Loaning Rate Increased by One Per Cent.—Operations Have Been Held Up through Lack of Funds—Considerable Sums Received in Deposits—Expenses of Operation Are High.

FROM April, 1916, to July, 1917, the provincial government of British Columbia rendered assistance to agriculture through the Agricultural Credits Commission. In July, 1917, the work of this commission was merged with that of the Land Settlement Board, in accordance with legislation passed in 1917. During the year 1916 bonds to the value of $1,000,000 were sold, according to a statement recently made to *The Monetary Times*. The amount realized from these sales was $847,200. In addition, there has been placed at the disposal of the board approximately $375,000. The rate of interest being paid by the government on this money is 5 per cent.

Up to about September, 1917, the Land Settlement Board was loaning money to farmers at 6½ per cent. At that time the minister of finance pointed out that as the money was costing the government more than 5 per cent., the interest rate to farmers should be made 7½ per cent., and this rate has been charged on loans since that date. The total money handled by the board has, it will be seen, amounted to a little over $1,200,000.

The Land Settlement Board was created in July, 1917, for the purpose of administering the Land Settlement and Development Act which was passed on the 17th day of May, 1917, and was brought into operation on the 16th day of July of the same year. "The primary objects of the board are," it is stated, "to promote increased agricultural production by creating conditions that will facilitate the profitable occupation of the agricultural lands of the province." According to the terms of the act, the board was given the power, with the sanction of the Lieutenant-Governor in Council, from time to time:—

(*a*) To take over from the Crown, and to purchase from or obtain by exchange with private owners, lands within the province for agricultural purposes.

(*b*) To survey, resurvey, subdivide, clear, fence, dyke, drain, irrigate, plant, cultivate, and otherwise improve, develop and use any lands so acquired.

(*c*) To erect suitable buildings on such lands.

(*d*) To farm such lands when necessary or desirable, and generally to do all things necessary or incidental to such farming.

(*e*) To build and maintain roads and bridges for the improvement of such lands.

(*f*) To sell, lease, or exchange the said lands upon such terms as may be agreed upon.

(*g*) To buy, sell or exchange all kinds of livestock and every kind of merchandise which may be of use or benefit to the board in any of its undertakings.

(*h*) To enter into an agreement with any person obtaining a loan under the provisions of this act, whereby the board may undertake to make and execute the improvements on the land for which such loan was made.

(*i*) To manufacture explosives for use in any of the undertakings of the board, or for sale for the purposes of clearing land for agricultural purposes, or for the construction of public works.

The board is possessed of all the powers of, and is entitled to act as a board of commissioners appointed under the provisions of the Drainage, Dyking and Irrigation Act, 1913, and also has the power of, and is entitled to act as, a public irrigation corporation under the Water Act, 1914.

Returned soldiers purchasing land from the board shall each be entitled to receive a rebate of $500 on the purchase price of any lands coming into the possession of the board and subsequently opened for settlement.

The Agricultural Credit Commission which was then in existence had been constituted under the Agricultural Act, 1915. As its work was assumed by the new board, however, the commission was entirely superseded.

The board stated that loans would be made for any of the following purposes:—

The acquiring of land for agricultural purposes and the satisfaction of encumbrances on land used for such purposes.

The clearing of land, draining, dyking, water storage, and irrigation works.

The erection of farm buildings.

The purchase of livestock, merchandise, machinery and fertilizers.

Discharging liabilities incurred for the improvement and development of land used for agricultural purposes.

Carrying out the objects of any association, subject to approval by Order-in-Council as provided in the Land Settlement and Development Act.

Taking over in whole or in part, with the approval of the Lieutenant-Governor in Council, of any existing loan by the Crown, in right of the province of British Columbia, of any association, or any debentures issued by any association.

And any purpose which, in the opinion of the board, will increase the productiveness of the land in respect of which the loan is proposed.

The board was authorized to accept first mortgages as securities for loans. No loan was to be made for any amount exceeding 60 per cent. of the appraised value of the property offered as security calculated at the basis of value at the time of appraisal. No loan was to be for a sum less than $250 or greater than $10,000 to any one borrower. The appraisal fee was to accompany the application for the loan and a tax receipt showing all taxes paid up to the preceding 31st December was to be presented before the loan was completed. The buildings of the mortgager were to be insured to their full insurable value with the loss, if any, payable to the Land Settlement Board. The schedule of appraisal fees extended from $3 to $11, and other fees, to be paid only if loan was granted, ranged from $10 to $35.

The repayment was in the form of equal annual instalments including principal and interest. The loans might be for periods of from three to ten years with annuities accordingly. Loans for longer periods of 15, 20 or 25 years might also be obtained.

Amount of Business Done.

Up to and including December 31st, 1917, the operations of the Agricultural Credit Commission were as follow:—

490 loans granted for	$941,950
106 loans cancelled or withdrawn	153,400
384 loans granted	788,550
Less amount paid on same	675,486
Balance owing on loans	$113,063

The expenses for the year were $76,072 and a deficit of $22,200 incurred. Included in the expenses is $45,000 of interest on debentures.

The following is a summary of the operations of the Land Settlement Board up to the 31st December, 1917:—

163 loans granted for	$332,650
Less 6 loans withdrawn or cancelled	113,500
157 loans granted	$319,150
Amount paid on loans	60,576
Amount owing to complete loans	$268,573

Of the total granted, namely, $319,150, $123,850 bears interest at 6½ per cent. and the balance, $195,300, at 7½ per cent.

The expenses incurred by the board amounted to $13,093 and the deficit was $1,534.

While some money has been obtained on deposit by the Land Settlement Board, yet the only way to secure large quantities appears to be through the provincial government. A loan was recently raised by the province but it is understood that it was to be used for other purposes. The probability is, therefore, in view of the present condition of the money market, that the work of the board will not grow very rapidly in the near future.

Assessment Commissioner Forman, of Toronto, has announced that under the law which requires that the interest of the Crown be exempt from municipal taxation, munitions plants owned by the Imperial Munitions Board will not be taxed for municipal purposes.

ASSESSMENT OF LAND IN ALBERTA

Public Utility Commission Has Authority to Reduce Assessments of Large Areas of Land

The cities of Alberta have decided to present their case very strongly before the Public Utilities Commissioners of Alberta regarding the reduction in land assessments. By recent Alberta legislation the Public Utility Commission was granted the power to lower the assessment on lands in excess of twenty acres, and also the power to exempt them from the limits of the various communities in the province. To discuss this question, a conference of Alberta cities was held in Calgary on July 18th. This meeting was largely called to define the attitude of the cities in respect to dealing with applications of owner's land containing twenty acres or more, and to lay down the line of action that the communities would adopt in presenting another case.

Regarding the results of the conference, Mr. C. Costello, M.D., mayor of Calgary, said recently to *The Monetary Times*:—

"One point that particular emphasis was given to was that whatever action the Utility Commission took with the assessment of what we will call farm lands, the community should benefit by a percentage of the increased increment of land, and I think you will see that if a lowered assessment was put on at the present time and in the future sales were made, that there would be no doubt that some considerable revenue would come to the communties by the increase of the land."

Further conferences will be held before the question comes up finally before the commission, which will be, it is understood, some time in September. The following resolution was, however, passed at the Calgary meeting:—

"That the four cities represented at this meeting petition the Board of Public Utilities Commissioners of the province of Alberta.

"(1) That it refrain from giving final judgment in any of the applications pending before it on behalf of ratepayers under the amendment to the Public Utilities Act, passed at the last session of the legislature, until each of the said cities present a plan suited, in its opinion, to its individual needs, with recommendations covering the applications pending before the board.

"(2) That each such plan shall deal with, among other things, and cover specifically the uses to which lands may be put, and the principles of assessment thereof, and that each of the said cities undertake to proceed immediately to prepare such plan and to present same within such time as the board may order.

"(3) That the board, after considering the said plans and recommendations by the said cities, and after conducting such investigations into the problems of the cities as deemed advisable, do in turn recommend to the government that necessary amendments be made to the present Town Planning Act and the said Public Utilities Act of the province or the city charters, as the need may be, to enable the recommendations of the board to be adequately carried out."

On a motion of Mayor Evans, of Edmonton, and Acting Mayor Freeze, of Calgary, it was decided to ask the councils to make provision for immediate preparation of some joint plans on the foregoing recommendations, which would be carried out as far as possible under the direction of Mr. Adams

The idea that in the case of land being transferred a certificate be attached to the registration paper showing that the taxes on the property were paid up, was brought up by City Assessor Wallace, of Calgary, and seconded by Commissioner Meek, of Lethbridge. It was also decided that cooperation should be made between all cities in the province, as far as possible, in order to have much uniformity of plans, the local conditions allowing for slight variations from time to time.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended August 16th, 1918

Penn Canadian, 64,688; McKinley Darragh, 83,502; La Rose, 65,943; National Mines, 60,665; Buffalo, 87,884; O'Brien, 64,100; Coniagas, 170,370. Total, 507,242.

The total shipments since January 1st now amount to 18,055,478 pounds, or 9,477.7 tons.

RAISING TWELVE BILLIONS OF REVENUE

Farmers' Committee of United States Suggests that Government's Proposal Might Be Exceeded by 50 Per Cent.

A brief was recently submitted to the Ways and Means Committee of Congress by the Farmers' National Committee on War Finance. The following is an abstract:—

The three principles which should control in drafting the new revenue bill are: To secure adequate revenue equitably; to increase production; to prevent waste, i.e., equality of financial sacrifice.

The war profits of corporations will unquestionably be somewhat less this year than in 1917. Last year the net profits are estimated at about ten and a half billions; this year at nine billion, six hundred million. The war profits last year were about five billion, two hundred million; this year they will be about four billion three hundred million.

The total yield of the excess profits tax last year was about $1,691,000,000, while a tax of 80 per cent. on war profits would have yielded about $4,163,000,000. We lost about $2,472,000,000 by failure to tax war profits heavily enough. This was a great loss, for if the war continues through 1920, the total money cost to the United States will be about one hundred billion dollars. The average tax on war profits was only 32.6 per cent.

The tax of 50 per cent. on watches and jewelry suggested by the treasury department is unwise; because watches are needed and should not be made more expensive, but jewelry is not needed. The heavy income tax, war profits tax, and tax on the value of unused and inadequately used land which we suggest will prevent any foolish buying. Taxes on clothing, etc., will encourage buying a poor quality, and therefore waste. Farmers oppose a tax on automobiles used for business purposes to save feed, and a tax on gasoline because they increase the cost of production.

Twelve and a half billion can be raised by taxation this year, as follows:—

War profits tax	$3,875,000,000
Corporation tax	555,000,000
Miscellaneous	1,321,215,000
Income Tax	6,000,000,000
Customs	230,000,000
Tax on the value of unused and inadequately used land	500,000,000
Total	$12,481,215,000

Profits subject to the war profits tax will be this year about $4,305,000,000. A 90 per cent. tax on this will yield about $3,875,000,000.

The personal income for 1917 of those making returns was about twelve billion dollars, of which about four and a half billions was subject to the normal tax, and two and a half billions was not subject to taxation. This year the personal income of those liable to the income tax will be about fourteen billions, of which probably three and a half billions is not subject to the personal income tax because dividends.

By taking all net incomes over $50,000 and taxing heavily and progressively all incomes over $3,000.—$4,880,000,000 can be secured from that group of about 3,700,000 families and individuals. The other 19,000 families of the country can easily pay $1,120,000,000, an average of only about $58.

We have used the estimates of the secretary of the treasury for the receipts from corporations and miscellaneous taxes and other sources and from customs. The value of unused and inadequately used land is about $25,000,000,000. A tax of 2 per cent. thereon will yield about $500,000,000.

The enlargement of Guelph's water reservoir to accommodate 5,000,000 gallons, and the installation of an additional pump at the waterworks capable of pumping 6,000,000 gallons a day, are the chief items referred to in the report submitted to the city of Guelph by the Provincial Fire Underwriters of Ontario. They were in the form of a report from the inspectors, one of whom visited the city in June of this year, and made a series of tests.

CROP OUTLOOK THROUGHOUT CANADA

Ontario Fall Wheat Has Suffered Most, But Nearly All Grain Crops are Below Average

The Dominion Bureau of Statistics issued recently the usual crop report compiled from the returns of crop correspondents made on July 31st, 1918.

The preliminary estimate of the yield per acre of fall wheat for Canada is 15½ bushels as against 21½ bushels in 1917 and in 1916; and 23 bushels, the decennial average for 1908-1917. Upon the harvested area of 340,700 acres, this gives a total yield of 5,275,700 bushels as compared with 15,363,450 bushels in 1917, and 17,590,000 bushels in 1916. In Ontario, where the bulk of the fall wheat crop is grown, the estimated total yield for 1918 is 4,435,200 bushels from 277,200 acres, a yield per acre of 16 bushels, as compared with last year's estimate of 14,114,800 bushels from 656,500 acres, a rate per acre of 21½ bushels. The total yield of hay and clover for Canada is placed at 10,064,100 tons from 8,015,250 acres, representing a yield per acre of 1¼ tons. The corresponding figures of 1917 were 13,684,700 tons from 8,225,034 acres, or 1.66 ton per acre.

Condition of Spring-Sown Grains.

In the prairie provinces the drought remained unbroken until towards the end of July, and serious damage to wheat in the blossom stage was caused by heavy frosts which occurred from the 23rd to the 25th of the month. Conditions were improved by rains that fell during the last week of the month. For the whole of Canada the condition of crops on July 31st was worse than at the end of June. Spring wheat, measured against 100 as representing the average decennial yield, is 77, compared with 85 on June 30th, and 93 on July 31st, 1917; oats are 85 against 91 and 90; barley is 86 against 93 last month, and 93 on July 31st, 1917, and rye is 83 against 89 and 95. Peas and mixed grains are 101, or one above average. Beans are 95, buckwheat is 93, flax is 71, corn for husking is 86, potatoes are 95, turnips and mangolds are 96, corn for fodder is 85, sugar beets are 92, and pasture is 92. In the prairie provinces, spring wheat is in Manitoba 85 per cent. of the average, oats are 86, barley is 89, and rye is 84. In Saskatchewan the figures are spring wheat 75, oats 75, barley 78, and rye 79. In Alberta spring wheat is 69, oats are 68, and barley 70 per cent. of the decennial average. Potatoes are for Canada 95 per cent., or 5 per cent. below average, as against 98 per cent. on July 31st, 1917. In the maritime provinces and in Quebec spring wheat is 101 in Prince Edward Island, 104 in Nova Scotia, 105 in New Brunswick, and 106 in Quebec, conditions generally having improved during July. Other grain crops in these provinces are equally satisfactory. In Ontario, spring wheat sown to 158,000 acres is marked 118 per cent., as against 101 a month ago, and 111 on July 31st, 1917. The figures expressing condition for the whole of Canada indicate a total yield in 1918 for wheat of nearly 232 million bushels as compared with 233,742,850 bushels in 1917, and for oats a total yield of about 416 million bushels as compared with 403 million bushels in 1917. For the three prairie provinces the yield indicated by condition is for wheat 216,488,000 bushels, and for oats 254,030,000 bushels.

Conditions in Alberta.

A telegram from the Alberta Department of Agriculture dated August 10th, states that recent rains throughout the southern country have made a material improvement in crop conditions. In certain districts of the south where the prospect was poor two weeks ago heavy rains have fallen and the grain is now filling nicely. On account of this moisture the feed situation in many localities is greatly relieved, and conditions are much more encouraging than they have been for some time. After the frost it was apparent that the greater portion of the wheat and barley crop was destroyed, but as the season advances some improvement is noticeable.

The Royal Labor Commission, which was recently engaged for ten days in investigating the labor difficulties in the shipbuilding plants at Quebec, completed their work on the 19th instant. They then left for Montreal, where they will begin a similar investigation. When asked regarding the announcement of the decision, the chairman, Hon. Judge McLennon, said the commission would continue the other investigations and issue a report when all were concluded.

JOINT LIFE UNDERWRITERS' CONVENTION

Complete Programme Has Now Been Prepared for Convention in New York in September

Prominent speakers in life insurance and other fields will be heard at the convention of life underwriters in New York on September 4th, 5th and 6th, and a wide programme of subjects has been prepared. This is the first time that the National Association of Life Underwriters has met jointly with the Life Underwriters' Association of Canada, and representatives of both organizations have had a part in preparing the programme.

The main themes will be "The Contribution Which Life Insurance Has Made and Will Make Towards Winning the War," and "How to Develop Life Insurance in Spite of the War." On Tuesday, September 3rd, an executive committee meeting is first to be held, when the reports of the various committees will be received. The programme proper is as follows:—

Wednesday, September 4th, Morning Session, 10 to 12.30

Convention called to order by President Priddy.

"America" and "The Maple Leaf," sung by the assembly.

Invocation—Charles Summer Burch, Suffragan Bishop of New York.

Word of welcome—Orra S. Rogers, president of the Life Underwriters' Association of New York.

Response—J. T. Wilson, president of the Life Underwriters' Association of Canada; Lawrence Priddy, president of the National Association of Life Underwriters.

Convention photo.

Address—Woodrow Wilson, president, United States of America.

Address—Sir Charles Fitzpatrick, chief justice of the Supreme Court of Canada.

Address—Reviewing activities of the two national associations, President J. T. Wilson and President Lawrence Priddy.

Reading of special communications.

Recommendations and resolutions from executive committee.

New business.

Selection of nominating committee, National Association Life Underwriters.

Announcement—Place of meeting of next convention, chairman of executive committee.

Announcements—Local committee.

Wednesday, September 4th, Afternoon Session, Grand Ball Room, Hotel Astor, 2.30 to 5.00.

Address—"Woodrow Wilson and the Doctrine of Sovereignty," Darwin P. Kingsley, president, New York Life Insurance.

Address—"Life Insurance and Thrift," Herbert C. Cox, president, Canada Life Assurance Company. Discussion of above topic, with questions and answers. (Talks limited to five minutes.)

Address—"Science and War," Henry Moir, actuary and director, Home Life Insurance Company; president, Actuarial Society of America.

Address—(Topic will be furnished later), Harry L. Seay, president of the Southland Life Insurance Company; president, American Life Convention.

Action of recommendation of executive committee.

New business.

Announcements—Local committee.

Wednesday, September 4th, Evening Session.

Reception to delegates, alternates, invited guests and their families. Grand ballroom, Hotel Astor, 9 p.m.

Thursday, September 5th, Morning Session, 10 to 12.30.

Address—"Canada's War-time Experience," Thomas B. Macaulay, president, Sun Life Assurance Company of Canada. Discussion of above topic, with questions and answers.

Address—"Insurable Interest: How to Properly Designate the Beneficiary of a Life Policy," James H. McIntosh, general counsel, New York Life Insurance Company; president, the Association of Life Insurance Counsel. Discussion of above topic, with questions and answers. (Talks limited to three minutes.)

Address—"The Health of Each the Concern of All," George E. Vincent, president, the Rockefeller Foundation. Discussion of above topic, with questions and answers. (Talks limited to five minutes.)

Addresses of ten minutes each—"Present Day Opportunities for Women in Life Insurance," Miss Leonora M. Cowick, president, New England Women's Life Underwriters' Association; Mrs. Jennie Watkins; Miss Constance Woodward.

New business.

Presentation of written resolutions. (To be referred to executive committee.)

Subscription to annual proceedings.

Announcements—Local committee.

Thursday, September 5th, Afternoon Session, 2.30 to 5.00.

Address—"The Life Agent's Opportunity and Duty in View of War Conditions," George W. Perkins, retired, chairman of finance committee, War Work Council, International Committee, Y.M.C.A. Discussion of above topic, with questions and answers. (Talks limited to five minutes.)

Address—"Life Insurance, Bank Credits and Thrift," Sir Edmund Walker, president, Canadian Bank of Commerce.

Address—"The Influence of Personal Habits Upon Life Expectancy," J. H. Kellogg, M.D., superintendent, the Battle Creek Sanitarium. Discussions of above topic, with questions and answers.

Addresses—"Arguments I Have Used to Sell Life Insurance to Provide Funds for Inheritance Taxes and Succession Duties," Clayton M. Hunsicker, Frederic O. Fuller, A. L. Farmer, Julian S. Myrick. Discussion of above topic, with questions and answers.

Announcements.

Thursday, September 5th, Evening Session, Grand Ballroom, Hotel Astor, 7.00.

Annual banquet, President Lawrence Priddy presiding. Toast to President of the United States and to King George. Toast to the soldiers and sailors of Canada, the United States and our allies. The speakers will be Lord Reading, Charles M. Hughes and Newton Wesley Rowell.

Friday, September 5th, Morning Session, 10.00 to 12.30.

Address—"The Relation of Life Insurance to the Development of Our Agricultural Resources," Prof. Melville Cumming, Canadian Department of Agriculture.

Address—(Title will be furnished later.) Edwin Welles Dwight, M.D., medical director, New England Mutual Life Insurance Company. Discussion of above topic, with questions and answers. (Talks limited to three minutes.)

Address—"How I Personally Sell Twelve Million Per Annum," Harry B. Rosen. (Talks limited to five minutes.)

Subscription to annual proceedings.

Friday, September 6th, Afternoon Session, 2.30 to 5.00.

Address—"War-time Arguments in the Sale of Life Insurance," Edward A. Woods, manager, the Equitable Life Assurance Society, Pittsburg, Pa.; formerly president, the National Association of Life Underwriters. Discussion of the above topic, with questions and answers. (Talks limited to five minutes.)

Report of executive committee.

Reading of prize essays (two).

Presentation of cups and prizes.

Report of committee on code of ethics. General discussion of report.

Unfinished business.

Report of nominating committee.

Election and installation of new officers.

Adjournment.

Meeting of executive committee.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in August:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
August 7	$2,559,000	$2,882,000	+ $323,000
August 14	$2,746,000	$2,759,000	+ $ 13,000

Grand Trunk Railway.

	1917.	1918.	Inc. or dec.
August 7	$ 984,921	$1,236,243	+ $251,422
August 14	$ 993,068	$1,285,064	+ $291,996

Canadian Northern Railway.

	1917.	1918.	Inc. or dec.
August 7	$ 775,500	$ 859,800	+ $ 84,300
August 14	$ 746,800	$ 819,100	+ $ 72,300

WHERE INSURANCE IS A RISK, NOT A BUSINESS

Elsewhere in this issue of *The Monetary Times* is given some figures regarding the operations of the Nova Scotia Workmen's Compensation Board for the year 1917. The assessments levied at the beginning of the year included provision for compensation of all kinds and also for disaster reserve. As a result of the year's operations there was not only $81,236 at the credit of the disaster reserve fund but there was also a provisional balance of $68,010. The conclusion would seem to be, therefore, that the board had completed a very successful year's operations and that its initial assessments had been quite adequate.

There are, however, two or three other features which must be considered. The first is that of administration expenses. The board was first appointed on October 19th, 1916, and from that date until the end of the year 1916 the members were occupied with the work of organization and other preliminary work. The expenses for this period are presumably not included in the report for the year 1917. In the case of a private company the expenses of organization, etc., must be met out of the revenue from subsequent business. This expense, in the case of the Nova Scotia board, was borne by the government and not provided out of profits. The operations of the board are, therefore, not on a plane with those of private companies. As regards actual expenses for the year 1917, the province assumed $5,033 or almost 20 per cent.

These, however, are small items compared with the claims which would have arisen out of the Halifax disaster of December, 1917, had not the Halifax Relief Commission come to the rescue. Recognizing the fact that the disaster, being caused by the explosion of a munitions ship, was directly attributable to the war, a relief commission was established. The principal expense of this body is borne by the Dominion and British governments. This board was charged with the duty of reconstructing the damage done by the explosion. Among its other functions it assumed the claims against the Workmen's Compensation Board, and it is understood that negotiations are under way towards having some of the claims against private insurance companies also assumed, but nothing definite has as yet been announced in this connection.

The significance of these facts is that had the Halifax Relief Commission not come to the rescue of the Workmen's Compensation Board it would not have been able to meet all the claims, which are estimated at $850,000, without levying an additional assessment almost as large as the original one. The amount available in the disaster reserve, together with the provisional balance, makes up a total of just about $150,000, or merely a fraction of the possible claims. Had the disaster not been directly caused by war activities, no relief commission might have been created and the Workmen's Compensation Board would have had to meet the claims, with the result that an additional assessment would have been inevitable. It was, of course, unfortunate that such a thing should have taken place during the first year's operations, especially as a loss amounting to about $120,000 had arisen from the New Waterford disaster which took place on the 25th July of the same year. It may also be mentioned in this connection that there was another disaster on the 23rd January at Stellarton, N.S., which will entail a loss probably larger than that from the one of New Waterford. However, these are only indications of the fact that insurance which is confined to a limited area is not as sound as that in which the risks are extended over a wider area and a greater variety of industries than can be found in a small province, such as Nova Scotia. Had the workmen's compensation insurance of Nova Scotia been entirely in the hands of private companies, the loss would not have been a fatal blow to any of them, as it would be distributed over a wide field. When insurance is concentrated upon a small area or upon a particular class of risk, it becomes a gamble rather than insurance in the real sense.

ARE BANK CLEARINGS MISLEADING?

Bank clearings are recognized as one of the standard indexes of business activity, but their value for this purpose deserves careful consideration. Generally speaking, an increase in clearings indicates an increase in business transaction, and a comparison of the clearings of two cities gives an approximate idea of the relative amount of business, but the measure is not entirely accurate. There are a number of ways in which discrepancies arise between the amount of bank clearings and the total bank transactions. In the first place, the clearing house returns include a number of errors such as cheques or drafts presented to the wrong bank, or wrongly endorsed. These are automatically returned to the bank presenting them, and when the corrections are made are again presented to the proper bank. They accordingly go through the clearing house twice and cause the amount of clearings to slightly overstate the amount of business transacted through the bank.

On the other hand, there is a vast amount of business which does not go through the clearing house at all by reason of being done entirely within the one bank, as where a cheque is presented to the bank upon which it is drawn. In Canada the probability is that business of this kind is larger relatively than in the United States because a cheque drawn upon one bank here and presented to a different branch of the same bank does not enter the clearing house at all. As we have now only twenty banks, a cheque or draft must be drawn upon one of the other nineteen than that at which it is presented, in order that it may enter the clearing houses. In the United States, on the other hand, where there are no branch banks, there is greater probability of a cheque being presented to a bank other than that upon which it is drawn.

Bank clearings, therefore, represent only a part of bank transactions and the difficulty is that the proportion of clearings to total transactions is not the same in different cities, even of the same country, and still less so in cities in different countries. Differences in the size of cities, in their industries and in the habits of the people, occasion variety in banking methods, even in the same countries. In the United States the clearing house section of the American Bankers' Association has developed a plan under which reports of total bank transactions may be accumulated almost automatically. Twenty-nine cities are now compiling and returning these figures to the clearing house section. According to the "Commercial West," of Minneapolis, they are reported weekly on forms furnished by the section. In these cases we have a means of comparing the relation of bank clearings to total bank transactions and, unfortunately, there appears to be no uniform proportion whatever. In Kansas City the total transactions for the second quarter of 1918 were $3,184,764,000 and the bank clearings $2,283,725,000. The transactions were, therefore, 40 per cent. greater than the clearings. In the case of San Francisco, the difference was 109 per cent.; Detroit, 118 per cent.; Cincinnati, 230 per cent.; New Orleans, 71 per cent.; Richmond, 103 per cent.; Atlanta, 28 per cent., and Seattle, 87 per cent. These cities are named in the order of amount of business, but the percentages of excess of transactions over clearings, as stated above, do not show the same order. In the case of smaller cities, however, who calculate their business in this way, the transactions usually are several times the clearings; that is, they exceed them by several hundred per cent. This is quite as might be expected, because in smaller cities there is a greater possibility of a cheque or draft being presented upon a bank upon which it is drawn and accordingly more business is carried on without entering the clearing houses.

Reports of this kind might well be considered by the Canadian banks. For the present, however, the monthly statements furnished to the minister of finance and amalgamated by him in the one statement affords a more reliable index of banking and general business. It does not, however, give any comparisons between different cities or localities, and the defects of clearings must be kept in mind in using them as a basis for comparisons.

EXCESSIVE MORATORIUM LEGISLATION

Attention has frequently been called by *The Monetary Times* to the need for a revision of the moratorium laws of some of the Canadian provinces. The laws, generally speaking, were framed as temporary measures but remain in force long after the conditions which occasioned them have disappeared. If future developments could have been foreseen at the time of the legislation there is no doubt whatever that it would have been of an entirely different nature.

Much of the amounts overdue on mortgage payments, for instance, will be received, but there is a danger that if the war goes on much longer the accumulated fund will reach a figure that will be somewhat difficult for the debtor to deal with and which will affect the margin of security held. The purpose of a moratorium is to enable the debtor to avoid settlement of his debt at a time when there is a great credit stringency. Such a condition is necessarily a temporary one and when it resolves itself merely into a period of high interest rates, the emergency no longer exists. There was a time, no doubt, when measures of the kind had considerable justification, but this has not been the case since 1916, at least, and possibly since 1915.

Unfortunately, the laws have in many cases been used against the interest of creditors. Debtors have been enabled to retain funds at interest rates much below the rates current in the market, which acts not only unjustly to the creditor but also to other borrowers who have occasion to undertake new obligations.

SUGAR CONSERVATION IMPERATIVE

The Canada Food Board has asked private householders of Canada still further to restrict their consumption of sugar for personal use to 1½ pounds per month per person, and to use a greater proportion of brown sugar. The board also warns against hoarding as unfair, unnecessary and contrary to the law.

The Cuban crop of sugar has fallen short by 300,000 tons of the previous estimate; the United States sugar beet crop has also proved disappointing, as has the Louisiana cane crop. The recent German drive was a further cause of sugar shortage, as a large beet acreage was overrun and many sugar factories destroyed. Thousands of tons of sugar have been sunk by submarines, including a 13,000-ton cargo recently lost off the Atlantic coast. Conservation of sugar is imperative. There is sugar in Canada for everybody in moderation, but none for extravagant use, for wasteful use or for illegal hoarding

NOVA SCOTIA WORKMEN'S COMPENSATION

Assessments Have Been Adequate for Ordinary Accidents But Not Sufficient for Halifax Disaster

In *The Monetary Times* last week an account was given of the operations of the Nova Scotia Workmen's Compensation Board, for the year ended 31st December, 1917. The following is a statement of income and expenditure for the year:—

Income.	
Total assessments	$812,367
Interest penalties, etc., other than interest on reserves	9,698
Total	$822,066
Expenditure.	
Compensation paid, other than pensions	$173,174
Transferred to reserve for compensation awards	330,083
Administration expenses	22,871
Special surgical operations	201
Compensation estimated for reported claims	98,328
Compensation estimated for unreported accidents	48,158
Disaster reserve	81,230
Total	$754,055
Balance (provisional reserve)	68,010
	$822,065

This table does not include items relative to the Halifax disaster of December 6th, 1917, as no payments for compensation were made in 1917 and the compensation loss is to be taken care of by the relief commission. The assessments were based on payrolls furnished by employers when the actual payroll statements properly verified are received, and after they are audited on behalf of the board, a final adjustment will be made. The board expresses the opinion that the amount of the actual payrolls will be considerably larger than the estimates, and consequently that the amount of the total assessments for the year will be materially increased.

The industries of the province are arranged in ten groups, the reports of each are shown separately in the report of the board, but are lumped together in the totals given above. In three of the classes, namely, lumbering and woodworking, iron and steel (for manufacture and work), and building and construction was the total expenditure greater than the income. The other seven classes, however, provided a balance of $109,294 and when the negative balance from these three classes, amounting to $41,283, was deducted, the provisional balance of $268,010 was obtained.

According to the balance issued as at December 31st, 1917, assets totaled $616,817, most of which is in war bonds or cash. The amount of assessments still to be received is quite small, namely, $11,075. Among the liabilities there is provision for compensation estimated for reported claims, compensation estimated for unreported claims, disaster reserve and pension reserve.

The administration expenses for the year were $27,905. The board receives a grant from the province, however, of $5,034, bringing its share of the expense down to $22,871. The total number of accidents compensated was 4,812, including 142 deaths; all but 798 have been entirely disposed of.

TO PREPARE FOR CANADIAN IMMIGRATION

A company was organized about three months ago in Saskatchewan by the name of the North West Investment Company, Limited, at Regina, Sask. The president is Mr. W. [illegible], general manager of the Lumber Manufacturers' Yards, Limited, and the general manager is Mr. Norman [illegible]. The purpose of the company is to create an organization for the [illegible] of farm lands and the writing of insurance throughout the province. They expect that if Canada participates in the immigration which is expected after the war, a considerable portion of it will come to Saskatchewan and the company will be in a position to deal in farm lands. Agents have been secured at some [illegible] points throughout the province.

FIRE PREVENTION CONFERENCE IN TORONTO

A fire prevention conference will be held in Toronto on Friday August 30th. The meeting has been called by the premier, and notices sent to all in the provinces who are interested. It will be called to order at 10 o'clock a.m., in the reception room of the Parliament Buildings.

After the election of a chairman of the meeting, the formal work of the convention will be taken up. There will be a discussion in the forenoon on "Ways and Means for the Proper Observance of October 9th as Fire Prevention Day," led by Hon. T. A. Fleming, fire marshal of Ohio.

After luncheon the convention will reconvene at 2.30 p.m. to receive reports of committees and effect permanent organization.

"What Can Women and Children Do to Prevent Fires?" will be among the topics for discussion in the afternoon; and the education of the youth of our country along fire prevention lines will also be given consideration.

SOUTH VANCOUVER FINANCES

The municipality of South Vancouver is having domestic difficulties over the collection of its taxes. Some time ago, by the request of the municipality, the provincial government appointed Mr. F. J. Gillespie as tax commissioner for South Vancouver. He recently announced a tax upon improvements which is much higher than usual, and is levied upon one-third of the assessments. This tax is meeting with strenuous objection on the part of a large body of citizens, who claim that the arrears of taxes should be collected or tax sales resorted to. They point out that a tax on improvements will merely increase the burden upon the regular taxpayers, while delinquents will continue to escape unless severe measures are resorted to.

In explanation of the tax on improvements, Mr. Gillespie pointed out that a tax sale for 1914-15-16 would confer no immediate benefit on the municipality, because the arrears were all pledged to Spitzer, Rorick and Company, of Toledo. The ratepayers would, however, be relieved of the interest which is being paid on the loan in the meantime. The commissioner also announced that the loan from the bank now carried interest at 5½ per cent. as compared with 6½ per cent. formerly. A further point brought out was that, as the municipal act now stands, the corporation cannot guarantee a title to the purchaser of tax sale lands, and not until that act is amended at the next session of the legislature can the municipality expect any person to purchase its lands. He said that just as soon as the act was amended he would hold a tax sale.

On the 15th instant a meeting of about 1,000 of the citizens assembled in South Vancouver to protest against the improvement tax. After much discussion, during which a variety of opinion was expressed, the following resolution was passed:—

"We, ratepayers of South Vancouver in public meeting assembled, pledge ourselves not to pay our taxes for this year until a tax sale has been held, and every legitimate effort made to collect the arrears;

"That the tax sale embody all arrears up to and including the year 1916, and that sufficient time be allowed for the rebate.

"We also demand that after the tax sale the moneys realized through the same be deducted from the estimated income and all taxes reduced proportionately.

"We further maintain that it is the duty of the commissioner to do everything possible to collect the arrears of taxes before increasing the taxes of the residents.

"That we protest against the action of Commissioner Gillespie in levying an improvement tax, and hereby demand his recall by the government."

A Lignite Utilization Board has been appointed by Hon. Martin Burrell, minister of mines for the Dominion of Canada. This board will deal with the problems concerned with the future development and use of deposits of lignite coal in the west. Mr. R. A. Ross, consulting engineer, of Montreal, will be chairman, and the two members will be Mr. J. M. Leamy, of Winnipeg, provincial electrician, and Mr. J. A. Sheppard, of Moose Jaw, Sask.

LONG-ESTABLISHED BANK WILL SOON CLOSE

Arrangements Nearly Completed for Purchase of Bank of British North America by Bank of Montreal

On July 2nd an extraordinary general meeting of the shareholders of the Bank of British North America was held at the head office in London, England. The meeting was for the purpose of voting upon the sale of the bank to the Bank of Montreal. Mr. E. A. Hoare presided at the meeting and addressed the shareholders as follows:—

The directors desire, first, to state that the negotiations which have resulted in this provisional agreement were actually commenced before the war, and this was particularly mentioned in the circular, because, by an unfortunate coincidence, the announcement of the provisional agreement took place within a few days of the request published by the government that no bank amalgamation should be proceeded with until the committee set up to consider the whole subject had made its report. It might, therefore, appear that the directors were treating the wishes of government with disrespect, but so far from this being the case, the terms of the sale and purchase had actually been arranged in October, 1917,—several months before the great amalgamations which subsequently took place gave rise to the appointment of the committee.

The long delay that has occurred in bringing the matter to a conclusion has been unavoidable. As I explained to you from this chair on April 23rd, it was impossible to carry out the agreement until we had given to the proprietors the power of voting by proxy, and this involved considerable delay; but the difficulty has been overcome, and the proprietors have fully availed themselves of the privilege of the franchise.

It was certain that there would be numerous enquiries respecting the liability on the shares of the Bank of Montreal, and so it has proved to be. Some of the proprietors apparently did not realize that the offer is a cash price—£75 per share—but that the Bank of Montreal gave the option of receiving two of their shares for each one of our shares and they hesitated in giving their support to the proposal owing to their reluctance to assume the liability. Let me, therefore, explain yet more fully that there is no need for any proprietor to assume this liability at all. From the very beginning of the negotiations it has been particularly mentioned that a large number of our shares are held on joint accounts by trustees, executors, and others, who could not possibly accept a liability of any kind, however remote, and it is for them particularly that the cash price has been arranged; but as some correspondents have expressed a doubt as to the nature and extent of the liability, I will read to you Section 125 of the Canadian Bank Act as follows:—

> "In the event of the property and assets of the bank being insufficient to pay its debts and liabilities, each shareholder of the bank shall be liable for the deficiency to an amount equal to the par value of the shares held by him."

That is a very clear statement. The par value of the Bank of Montreal share is $100.

Terms of the Purchase.

Briefly, then, the proprietors may choose either to accept £75 cash for a share which for the last two years has been worth about £60 on the London Stock Exchange, or, as an alternative, they may exchange one share for two shares of the Bank of Montreal, quoted on the Canadian exchanges at $210, equivalent approximately to £84, while the income will be increased from £4 to £4 18s. The directors have no hesitation in recommending the proprietors to confirm the agreement; then, at a later date, each proprietor will decide, according to his own circumstances and inclination, which alternative he will accept. There is, however, one word which I ought to add respecting the choice that each one individually may make. I do not think that any proprietor should accept shares with the intention of immediately selling them in Canada at the quotation named in the circular, and so securing the difference between the cash price and the present quotation in Montreal. The market for bank shares in Canada is not a free market, and at the present time, when subscriptions to the Victory Loans absorb so large a part of the available resources of the country, the market is more contracted than usual. Therefore, if any considerable number of shares were to be offered simultaneously in Montreal, the present quotation would probably not be maintained. This would not only be disappointing to the seller, but in my opinion it would be unfair to the Bank of Montreal, and therefore, I give this note of warning. I would also add that such transactions would require the sanction of the treasury committee.

As I have said, the directors express no opinion as to the comparative merits of the alternative offers. Each one must judge for himself, and he will be guided by his own individual circumstances, but we are of opinion that those who accept the shares in exchange will benefit in a larger degree than they would have done by remaining under our present constitution. There can be no doubt whatever that on the conclusion of the war there will be great activity in Canadian affairs, and it would be difficult for us in London to realize fully both the difficulties and the opportunities that will constantly arise. We have felt these difficulties in the past and, as you are aware, we have endeavored to meet them by frequent visits to the branches, but since the outbreak of the war it has been impossible to continue these visits, and it is doubtful when they may be resumed. Our younger colleagues, to whom this duty would naturally fall, are all absent on active service; we could not have it otherwise, but, nevertheless, it means that we have lost the opportunity of personal intercourse with our own men and with our friends and customers in Canada, and the loss has been great. And this which we see on the court of directors is the same throughout the whole staff; our young men have given a splendid response to the call of Empire; many of them have died for it, and we foresee in the future the difficulty of supplying the higher appointments in the bank when deprived of so many of our younger men, upon whom we have relied for succession.

Favors Bank Amalgamations.

And notwithstanding the arguments that have recently been brought forward against a policy of bank amalgamations, I am distinctly of opinion that it is by strong combinations in banking and in commerce that we must look forward to success in the trade war which will inevitably follow the present war of arms. Since August, 1914, bankers have had many problems to face, but I am convinced that they are not to compare with those which will arise when we have secured a real peace, when the restraints of government control are removed, and commerce and finance once more resume their independence; and, holding that conviction most strongly, I feel that this alliance must be for the benefit not only of the vendors and of the purchasers, but for the benefit of the Dominion of Canada.

It is hardly necessary to say that we share with you the regret which we know is deeply felt by many of the proprietors at the dissolution of the Bank of British North America. For eighty-two years it has been doing consistently good service to the Dominion of Canada, and there has never been a time in all its history when it has failed to maintain a high standard in the conduct of its business and in the character of its representatives. It is impossible to see the passing of the fine old bank without emotion; but, on the other hand, we may find compensation in that we are to be united with the Bank of Montreal, for we must not forget that we are being absorbed by a bank which is not only the premier bank of the Dominion of Canada, but which stands in the front rank of all the banks of the Empire. It is the government bank; the directorate includes the most influential names in Canada, and under its present able management the bank cannot fail to retain its premier position and consistently to strengthen it. I may also add that there has always existed a close friendship between the two banks which is full of good promise for the future, and the negotiations, which have been conducted throughout by the Bank of Montreal with an urbanity which has smoothed over all difficulties and resulted in the proposal now before you, bear witness to the strength of this friendly feeling.

Whether it be in public affairs or in private life, it is gratifying when an offer conceived in a liberal spirit is met with an appreciative response, and therefore I hope that our friends will be pleased to learn that out of 20,000 shares no less than 16,781 have returned proxies in favor of the agreement; that is 84 per cent. of the total capital—a large total, especially at this time, when many proprietors are absent on active service. Canada has given a solid vote in favor, as was to be expected.

The chairman then answered several questions regarding the effects of the transaction. As to whether British holders of shares in the Bank of Montreal would have to pay the

Canadian income tax, he quoted a letter which he had received from Sir Vincent Meredith, president of the Bank of Montreal, to the effect that Bank of Montreal shares held by non-residents were not subject to the Canadian income tax. He also pointed out that the Bank of Montreal had a London register in addition to the Canadian one. It was asked if it was the intention to have the shares listed on the London Stock Exchange, and he stated that the bank would undoubtedly make application to have this done. The dividends of shareholders at the London register are paid in sterling with the income tax deducted as usual. He was also asked if on the death of a proprietor holding shares in the Bank of Montreal register in London would it be necessary for the executors to pay succession duty in the province of Quebec. Mr Hoare said in reply that this would have to be done, but that the British authorities allow a rebate from the British estate duty on presentation of the receipt for Quebec succession duty. The estate would not, therefore, be charged double.

ONTARIO MUNICIPAL ASSOCIATION

The twentieth annual meeting of the Ontario Municipal Association will be held in the city hall, Toronto, on August 28th, 29th and 30th. There will be morning and afternoon sessions on the 28th and 29th and morning session on the 30th. On the evening of the 29th the delegates will be entertained at the Canadian National Exhibition by the courtesy of the Toronto city council.

The following is a programme of the convention:—

WEDNESDAY, AUGUST 28th

Morning Session

9.00—Registration of members.

9.30—Opening of convention; minutes; communications.

10.30—Address of welcome—T. L. Church, Esq., mayor of Toronto.

Reply to address of welcome—G. K. Dewey, Esq., Brockville.

Report of executive committee.

President's annual address—S. H. Kent, Esq., Hamilton.

Appointment of convention committees.

11.00—The Workmen's Compensation Board and Municipalities—Samuel Price, Esq., Toronto, chairman Workmen's Compensation Board.

11.45—Public and Private Municipal Legislation of 1918—W. B. Doherty, Esq., city solicitor, St. Thomas.

Afternoon Session

2.00—Open forum.

THURSDAY, AUGUST 29th

Morning Session

9.30—Relation of Rural and Urban Municipalities—T. J. Mahony, Esq., warden Wentworth county.

10.15—Municipal Assessment—James C. Forman, assessment commissioner, city of Toronto.

11.00—Municipal Enhancement through Small Holdings—Greater Production—Intensive Cultivation—Irrigation—Illustrated by lantern slides and moving pictures—N. Cauchon, Esq., Ottawa.

Thursday Afternoon

2.00—Resolutions committee will meet. No general session of the convention.

Evening

Entertainment at Exhibition by courtesy of the Toronto city council.

FRIDAY, AUGUST 30th

9.30—Report of committees.

10.00—The Bell Telephone Local Franchise Situation—Ald. Henry B. Ashplant, London.

11.00—Municipalities and Social Service—E. Fraser Raney, M.A., LL.D., Toronto.

12.00—Report of nominating committee—Election of officers—Adjournment.

The Reconstruction Committee of the Dominion Cabinet will take up the question of housing, it is stated. This action is along the line recommended by the Commission of Conservation which proposed that the problem should be taken in hand by the federal and provincial governments in co-operation with the municipalities.

PERSONAL NOTES

MR. E. P. WOOD, manager of the Royal Bank at Odessa, died very suddenly in the village on Friday night.

MR. THOMAS P. HOWARD, managing director of the Phœnix Bridge and Iron Works, Montreal, has been appointed deputy-director of war supplies for Great Britain.

MR. J. B. ROLLAND, Montreal, president of the Rolland Paper Company, has been elected to the board of control of the Provincial Bank of Canada, to replace the late Dr. E. C. Lachapelle.

MR. THOS. JACKSON RUTHERFORD, president of the firm of Rutherford and Sons, one of the oldest established lumber firms in the Dominion, died suddenly on August 14th at his country residence at Trout Lake, near Ste. Agathe.

MR. MATTHEW WILSON, K.C., D.C.L., has been named as a commissioner from Ontario in the conference of representatives from all provinces which will meet in September for promoting uniformity of legislation in the provinces.

MR. A. W. ROSS has taken over the agency of the Canada Accident Company for British Columbia and Alberta. Mr. S. Farquhar, of the H. B. MacDonald and Company, Limited, Agency, Calgary, will take charge of the agency business under the supervision of Mr. Ross.

MR. H. S. SCOTT, who was in the employ of the Canadian Customs Department in Chicago, died on the 19th instant. For fifteen years he was the commercial editor of the Toronto Globe, and has since been in the employ of the Customs Department in Canada, England and the United States.

CITY OF VICTORIA TAX MEASURES

The Victoria Local Improvement Commission of Victoria, which was appointed under the city's private bill last spring, and entrusted with the task of straightening out the delinquent tax situation, issued a statement on the 13th instant which sets forth the principles on which the final report will be based. The chairman, Mr. G. J. Smallcross, said: "We have shown no favors. We have endeavored to be absolutely fair and impartial throughout and to make recommendations calculated to benefit not any particular section to the exclusion of others but the city as a whole. We have had a difficult task, because the city has weathered a severe storm. We have done our best to put the ship once more upon an even keel."

The report will recommend stringent measures for the collection of arrears, but at the same time every consideration will be given to the property owners.

NEW FINANCIAL FIRM FOR VANCOUVER

A new financial firm was started in Vancouver on August 1st, taking the name of R. Gardom & Company, Limited, with offices at 737 Granville Street. The officers and directors of the company are: Mr. F. M. Sylvester, managing director and vice-president of the Granby Consolidated Mining, Smelting & Power Company, president; Mr. R. Gardom, vice-president; Mr. George Rorie, managing director; Mr. W. A. Turquant, manager of the Hotel Vancouver, director; and Mr. L. V. de Bury, of Montreal.

Mr. Gardom was lately connected with the Workmen's Compensation Board, and had previously been prominent in business in Vancouver for some years. Mr. George Rorie has for several years been secretary of Ceperley, Rounsefell and Company. He resigned on June 1st. Both Mr. Gardom and Mr. Rorie were at one time connected with this well-known insurance firm. Mr. de Bury is engaged in the steel business in Montreal.

The new firm will undertake all classes of insurance business and engage in the business of real estate, both city property and farm lands, and handle timber, mines and general investments.

The Dominion government estimates that there will be 120,000 tax returns under the income tax law, and that the total revenue this year will be between ten million and fifteen million dollars.

BUSINESS BUILDING FOR BANKS

The Kinds of Advertising Plans Needed by Bankers—An Address Before Financial Advertisers' Convention in San Francisco

By Francis R. Morison, of Cleveland, Ohio.

I am sure you will all agree with me that advertising, like the famous brook, is one of those things that go on forever, no matter what may be happening to the rest of the world. Indeed, the more strenuous events are the greater the need for advertising, as has been very distinctly shown during the past three years.

To this rule bank advertising is, of course, no exception. Indeed in these times there is far greater need than ever before for the banker to make the fullest use of every possible legitimate means of publicity for the upbuilding of deposits.

What advertising can do in the way of persuading people to bring out their money has been shown to good purpose in each of the three Liberty Loan campaigns, and as it was my privilege to be the chairman of the advertising committee for the Cleveland district in the sale of the three Liberty Bond issues I will try to show you that the same fundamental business building methods as produced such wonderful results for the Liberty Loan will also prove invaluable for financial institutions.

At the risk of being considered somewhat of a heretic by my professional bank advertising brethren, I want to say frankly that, in my judgment, advertising by itself will not build up a financial institution any more than advertising by itself would have successfully sold Liberty Bonds.

Co-operation is Essential.

What then was it that made the various Liberty Loan campaigns so completely successful? Simply a combination of the three fundamental elements which are indispensable in any business building campaign—co-operation, salesmanship, and advertising.

Applying these three principles to a financial institution, we find that we need—

1. Team work on the part of everyone connected with the institution.
2. Retaining and developing the business of present customers.
3. Obtaining new business.

While co-operation is the proper dictionary word I prefer the more every-day expression, "team-work," and I want to lay particular emphasis upon the fact that this team work is not merely desirable but is, indeed, absolutely essential if a financial institution is to achieve the fullest measure of success.

It is well to realize in the first place that no one man ever accomplished great things absolutely by himself. Take our great industrial corporations, yes, and our large financial institutions—team work has been the keynote of their success and, in the main, the men who are to-day occupying positions of honour are the men who, in addition to performing their regular business tasks with the greatest possible efficiency, co-operated for the general good by devoting a part of their time and thought to the broader issues of their country and their community as well as to philanthropic enterprises of various kinds.

Let me, therefore, emphasize the fact that no matter how well the people connected with a bank have co-operated in the past it is possible to get even better results by more systematic methods of increasing this co-operation. In other words, to get the maximum results, the idea of team work must be constantly driven home to every director, stockholder and employee, so that he will at all times do his best to co-operate with the officers in building up his institution.

Directors as Business Getters.

I believe that every banker present will agree with me that the average bank director feels that he is doing his duty when he attends the board meetings and gives the institution the benefit of his advice and judgment on any matters that may arise. I will grant you that this is perhaps the most important function that the director is called upon to perform, but I emphatically assert that the director's responsibilities do not end there, and that it is of paramount importance that each director shall constitute himself a committee of one to co-operate directly with the officers and other directors in forwarding the growth and development of his institution. I am firmly convinced that the directors are not altogether to blame for this lack of complete co-operation because the fault lies very largely with the officers who fail to impress this fact upon the directors at the meetings, and who fail also to point out to the directors definite ways and means by which they can obtain new business for the bank.

There is no reason why directors should not be approached from time to time either by letter or through some printed message, and be told just how they can serve the bank and just how they can exert their influence for its benefit. Even though the director may be, as he usually is, a very busy man; even though he may be a man of such business prominence that his connection with the bank is a very small thing in his business life, yet I am sure that no director could possibly take exception to being approached occasionally in the right way and being reminded that the officers are always anxious for his co-operation and eager to carry out any suggestions which he may have to make for getting new business.

The average director, being a man of influence in his community, is in a position to recommend his friends and acquaintances to his institution, and naturally the officers are always ready to do their part in furnishing satisfactory service to any persons who may be sent to the bank by their directors.

It goes without saying that the directors are a powerful force in any community, and my experience has shown me that when the matter is properly presented to them, the amount of new business they can obtain is a very important asset for the institution.

Prejudice Against Bank Advertising.

Just one other point before leaving the subject of directors. No wide-awake merchant or manufacturer would consent for a moment to give up the right to advertise his own business. He realizes what advertising means in the building up of his business, and he knows that by not advertising he would be forfeiting the most effectual, and withal, economical method of calling to the attention of the people what he has to offer to the people. Yet, paradoxical as it may seem, these same merchants and manufacturers, either individually or collectively as directors of a financial institution, do not seem to carry these same convictions with regard to advertising their bank and frequently appear to be of the opinion that, except in a very nominal way, advertising is something that should not enter into the daily life of a banking institution. Why this should be so is hard for me to explain unless possibly the matter of tradition enters in. We are all inclined to follow precedent and perhaps because the banker of former years was not an aggressive advertiser, there has descended upon those connected with banks something of a feeling that what was good enough in the past ought to be good enough to-day.

Stockholders Can Also Assist.

It is too often assumed by a bank officer that the average stockholder is interested only in receiving his dividend checks, but I claim that the officers cannot blame the stockholders unless they themselves take the trouble to make clear to these stockholders that their co-operation would be appreciated and at the same time show them just exactly how they can really help. What I said about the directors applies very largely to the stockholders with this exception, that while the officers come in more or less constant personal contact with the directors, this is not always possible in the case of the stockholders and consequently a bank must rely very largely upon the United States mails in sending out convincing and persuasive letters advising stockholders of the progress of the bank, and constantly pointing out to them the advantages of the different departments of the bank so that they can do their share in building up their bank. It is needless to say that in my experience I have found that progressive bankers who are following out this plan are getting tangible and most gratifying results.

Employees Are All Salesmen.

Here is where salesmanship plays such a large part in the growth of a financial institution, and I want to go on record as stating that the most successful bank employee is not the best accountant, the best teller, or the best bookkeeper, but the man who in addition to having these qualifications realizes that he must also be a salesman, and that the first qualification for this salesmanship is to render not merely

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER
67 Pearl Street New York, N.Y.

perfunctory banking service, but polite, accommodating attention to every one who comes into the bank.

Nowadays progressive bankers are giving a great deal of thought to this matter of courteous treatment of customers and are educating their employees to develop a pleasant personality such as using a low and pleasant tone of voice, cultivating a pleasant facial expression, and to remember that a soft answer turneth away wrath.

As you, of course, know, the question of employees is one that proves quite a problem to many executives. Without actually being able to find any very definite fault with the employee yet there frequently seems to be a lack of something which might be called co-operation and enterprise, and we all know that a fifty-dollar clerk can very easily cost the bank a fifty-thousand-dollar customer.

It is not, of course, that employees do not want to do their best but rather that they may never have had put to them exactly how they can increase their usefulness to their institution and at the same time work for their own best advantage also. To meet this situation I find a regular monthly bulletin to employees by which the employee can increase the scope of his usefulness and find the answer to the ever-present question, "What is there in it for me?"

Also I am a great believer in the value of "get together" meetings. If the officers of a bank will make a point once in a while to have a meeting with the employees at which general discussions will take place, they will be pleasantly surprised to see what really definite results in increased enthusiasm and efficiency are achieved. Many a man will think of valuable suggestions and go no further—while at a meeting he will bring it out and thus many a good idea is gained that might otherwise be lost.

To sum up, any institution which will cultivate team work on the part of everybody connected with its organization will find inevitably that there will not only be increased business coming in but also a different atmosphere—an atmosphere of new life, of friendly, helpful co-operation all round.

Present Customers.

It has always seemed strange to me that bankers appear to pay comparatively little attention to developing and retaining the business which they already enjoy from present customers. The man or woman who is a customer of one department is certainly a better prospect for another department than an outsider, and can be secured at less cost; for example, few bankers analyze their list of safe deposit box renters to ascertain how many of these people carry bank accounts, and if not—why not. Then, too, the list of depositors affords the biggest field for the cultivation of new business, and is the one which is generally the most shamefully neglected. On the theory that a satisfied customer is the best advertisement, it goes without saying, that a depositor who is not only satisfied but pleased with the service he is receiving, will go out of his way to become a booster for your bank. Right here, however, let me say that depositors, as a rule, will not do this unless a systematic plan of inviting this co-operation is devised and put into operation. There are many ways of doing this—personal letters, enclosures with monthly statements or balanced pass books, letters to those who open new accounts, letters to those who close out their accounts, letters to those whose accounts are inactive, and last but not least, letters to borrowers. Borrowers may take the stand that they are doing the bank a favor by allowing it to loan them money, but down in their hearts they know that the bank has been of valuable assistance to them in the development of their own business, and especially when properly reminded they will go out of their way to show their appreciation in a substantial manner by directing new business to the institution.

New Business.

I have reserved the question of advertising for the department of new business, and I am not going to bore you with a long dissertation on the technical details of bank advertising. As a loyal Clevelander I may be pardoned for stating that the banks in Cleveland have always been the pioneers and leaders in bank advertising. The newspapers are used freely, space in the street cars, and films in moving picture houses are utilized, handsome booklets, pamphlets, folders, circulars, blotters and other advertising matter are used in profusion.

In this matter of general publicity and direct advertising the methods pursued are similar to those of any retail store and I am not going to take up your time by elaborating upon them. I do wish, however, to bring out the point that all bank advertisements must be dignified and conservative, and I claim it is possible to have dignified bank advertisements and yet have them retain business-pulling qualities. Paul T. Cherington, professor of business and advertising, at Harvard University, whom you doubtless know of as perhaps the greatest authority on theoretical advertising in the country, recently conducted a test of some twenty different lines of business—automobile, breakfast foods, hardware, and other commodities. He had his stenographer answer the advertisements in the magazines and he then carefully compiled all their follow-up, with a result that he awarded first place to the advertising of a bank for having the most systematic and psychologically correct advertising matter.

Advertisements now being used by some banks, and which combine sensationalism with undignified illustrations, not only are unproductive in results, but they are apt to undermine confidence and to bring ridicule upon the bank using them. I am sorry to say, moreover, that the advertising of some banks in even the larger cities reminds me of our old friend, the patent medicine expert, no matter what ailed you, his one world-famed remedy, good for man or beast, would cure you just the same. And so with a good many of the bank advertisements, no matter whether you are a national bank, a savings bank, or a trust company; whether your prospective customers are business men, factory employees, farmers, fishermen or coal miners, all you have to do, according to these vendors of syndicated advertisements, is to buy a set of these "cure-all" newspaper advertisements or booklets, imprint your name on them and then sit back comfortably in your office and watch the stream of new business flow steadily in.

I cannot, therefore, bring out too strongly the fact that because a bank has nothing to sell but safety and service, the advertising must point out to the prospective customer just why this safety and service is just exactly what he needs. A certain amount of educational advertising is, of course, necessary, but this must not be over-done or else the competing banks will derive just as much benefit as the bank which is paying for the advertising.

The advertising must be planned to meet the individual requirements, and while the fundamentals are very largely the same, methods of working out the details are as wide apart as the poles.

In this connection, at a gathering of this kind, the question naturally arises, especially in the minds of the younger men, "What opportunity is there for an advertising man in the banking business?" I will answer this question by saying that banks throughout the country are constantly putting in new business departments in charge of an advertising man, and that innumerable banks are seeking in vain for the right kind of a man to fill this position. There is a wide distinction between commercial and financial advertising, and it is this difference which makes it so difficult for the banker to find a man who can successfully handle the advertising of this bank. There are so many technicalities and ethical problems in this connection that in my judgment it is almost absolutely indispensable for a man to have had some actual banking experience in order to avoid the pitfalls into which so many advertising men have stumbled.

In conclusion I shall be very glad to join in any discussion regarding the points I have brought out, but before closing I want to say a word as to the value of an advertising club to the banker. No banker can attend the meetings of an advertising club week after week without absorbing valuable information along the lines of efficiency and business-building, and after all, that is the life of all business—greater efficiency and more business—and I claim that the knowledge which an advertising club disseminates is just as valuable to a banker as in any other line of business. In other words, a membership in the advertising club affords a broadening business education which cannot be obtained in any school, college or other business organization.

On page 33 of this issue there will be found an advertisement that should be of interest to fire insurance companies which are on the lookout for progressive representation in the province of Saskatchewan.

The Province of New Brunswick has sold to the public at par $300,000 of six per cent. twenty-year debentures. The sum of $200,000 was first offered, but the demand proved so great that an additional $100,000 was issued. The money will be used to improve the roads, and the principal and interest is payable from motor vehicle fees.

Have Your Will Drawn by Your Solicitor

There are many ways in which the legality of a Will may be nullified. It is so easy to make the terms ambiguous that it is advisable to have your Will drawn up by your solicitor. Proper provisions and accepted legal phrasing are necessary to make a Will clear and indisputable. One important provision is the naming of your Executor, and in this connection we solicit that you name this Corporation. Explanatory literature sent on request.

Wills appointing this Corporation as Executor may be filed in our safekeeping free of charge. *Correspondence Invited.*

OUTLOOK FOR FLAX INDUSTRY

Demand is Assured Not Only for Ordinary Purposes But Also for Military Use

BY ALFRED S. MOORE, M. Text. Inst.

(Author of "Linen, From Field to Factory," etc.)

Belfast, August 3rd, 1918.

With the flax harvest now in full swing as regards the United Kingdom in general, and Ireland in particular, it is possible to arrive at some estimate of what amount of fibre will be available for the linen manufacture, both as regards ordinary trade demands, and also for aeroplane equipments. It certainly must be understood that this latter requirement is not only insistent, but also incalculable in its extent, since 160 yards of fine linen are necessary for the fitting out of each machine.

At the outset it may be stated that, while the Irish flax acreage this season is very considerably greater than any year—save, perhaps, that in the freak year of 1881, when actually 147,000 acres were under cultivation—since the top record 300,000-acre season of 1860. However, through the lack of seed of high fibre potentiality, the quality of the fibre in general for spinning purposes will be hardly commensurate. Withal, there is the compensatory fact that the flax preparation this season will be undertaken with much more care to safeguard against waste. The weather conditions have been good on the whole, though much will depend on the next few weeks as influencing for weal or woe the later-sown portion of the crop.

Canadian Seed Splendidly Realizing.

Certainly what has surprised even the most optimistic of growers is the healthy and luxuriant promise shown in the results on Irish soil of the Canadian western or common seed. It will be remembered that in January last the dearth of Russian and native Irish seed was so pronounced that, as a war measure, so to put it, it was decided to try as substitute sufficient of the Canadian seed, known among Canadian farmers as blue flower Riga. Sufficient of this variety of seed was, therefore, imported to provide for 10,000 acres, and now—while it is not to be expected that the fibre will be equal to the best Irish for fine spinning qualities—still, it gives exceedingly great promise of being of immense value in helping to relieve a very imminent shortage, which would have meant dire disaster to the Ulster linen manufacture.

Big Irish Increase.

The government department of agriculture gives the present season's flax cultivation in Ireland at 135,000 acres, though this errs rather on the side of moderation. However, taking this figure as a basis, while it is still far below the 300,000 acres of 1860, it is as much as 27,600 acres, i.e., 25.6 per cent., above the growing of a year ago. In fact, it is as much as 43,500 acres, or 47.5 per cent., above that of 1916. Certainly, too, the present season's acreage, taken at 135,000 acres, shows a very commendable increase over the 52,313 acres which represented the average under flax cultivation in Ireland for the decade, 1895-1914. The government department's estimate must be considered, as I have stated, rather below the mark, because this year there have been many difficulties against arriving at any definite accuracy up to the present. Assuming still, however, that only 135,000 acres will be harvested now and within the next few weeks, and gauging the product fibre at 31 stones to the acre, we may reckon on Ireland's total proportion of flax fibre reaching round about 26,300 tons.

Recent news from Holland, which, during the years 1914-5-6 imported into Ulster 12,955 tons of fibre, i.e., an average of 4,318 tons yearly, records the total failure of that country's present crop. Of course, Belgium and France, under war occupation are also impossible in supplies. Then Russia's capabilities are dubious, even if the operations at Murman, near Archangel, kindle some faint hopes that next spring may see some imports from thence.

Withal, there are still some compensatory supplies hopeful. This year England and Scotland have revived flax growing, but on a limited scale. With an acreage of probably 14,000 acres, the fibre resultant may, with good handling in its preparation, give a yield of as much as 2,800 tons from Great Britain.

A new contributory also will be British East Africa, where the climate, soil and labor conditions are stated to be fairly favorable. It is stated that there is approaching 1,800 tons of fibre ready for shipment in this colony in addition to 10,000 acres under cultivation, but one prefers to see the fibre before being unduly optimistic.

Now, the linen manufacture could easily consume 140,000 tons of flax if such were available. The present supplies possible, as I have outlined, only account for about 30,000 tons. What of the balance? Well, it is known that during recent years Belfast linen companies—as if foreseeing the present crisis—have gone on gradually increasing their rentals of large tracts of land in Canada for the production of the exceedingly valuable raw material. Irrespective of these areas, it is known, too, that Canadian individual enterprise has been responsible in addition for vastly increased flax cultivation. So it is just possible that Canadian flax exports to the Irish linen industry may account for another 20,000 to 25,000 tons of fibre. If this should prove true in realization, it will forge another link in the practical services of Canada to the British Empire in our common hour of difficulty. Moreover, it should further awaken the Dominion's agriculturists to the great possibilities of flax as a very profitable crop.

Flax-Pulling Machines at Work.

In Ireland there are everywhere ominous evidences that the war's lessons have been even beneficial in giving the flax and linen industry in general a very much-needed impetus to betterment. Thus now, for the first time in history, thousands of indoor mill workers are drafted from Belfast city to work in the fields temporarily—a change of occupation which is much relished by them and should have good effects on their health. Then, also, for the first time, several flax-pulling motors—the clever invention of Mr. Jas. G. Crawford (director of the great York Street Belfast linen mills), in conjunction with Mr. R. M. Bennett, a noted Irish flax-grower—is proving with much satisfaction its potentialities in the solution of the labor problem, which is so adverse a factor facing flax cultivation on both sides of the Atlantic.

New Methods in Use.

More attention is likewise being given in Ireland this season to the simultaneous saving of the flax (or linseed), which is now so valuable alike for sowing, for stock feeding and for industrial purposes at its current price of $180 per ton, which in itself is a tidy extra to the $1,600 per ton guaranteed for good fibre. It seems nigh extraordinary that hitherto the Irish grower did not pay any great attention to this economy.

Further, instead of the old laborious and unpleasant system of retting the flax straw by the growers in dams or ponds, it will be stacked in the fields for a few weeks and then stored in barns until early spring, when it will be treated scientifically at central continuous warm-water retting depots, established and controlled by the linen manufacturers at convenient district centres. In this way much of the old wastefulness and deterioration of the fibre through careless handling will be obviated.

HEAVY DEMAND ON GOVERNMENT MINT

Since the outbreak of war gold coin and gold bullion to the value of $1,300,000,000 have been received at Ottawa by the department of finance as trustee for the Imperial government and the Bank of England. How the work of the Royal Mint here has, in consequence, been increased is not generally realized. When these deposits of gold were received by the department of finance it was necessary that their value should be ascertained, and that a certain quantity of gold bullion should be refined. The heavy demand on the gold refinery at the mint led to the construction of a second plant with a monthly output of a million ounces of fine gold. Through this extension the refinery has developed the largest capacity of any gold refinery in the world.

The special work of the refinery due to the war is shown by the following figures:—

Gold bullion received for refining, 15,092,770 ounces gross.

Total gold bars produced, 14,048,803 ounces fine; value, $290,414,547.

Fine silver recovered, 1,175,000 ounces fine.

As the war has made it impossible for the Newfoundland government to get its supplies of coin from England, coinage for Newfoundland was carried out by the Ottawa mint in 1917 and 1918 as follows: 1,670,000 silver pieces, 700,000 bronze pieces.

THE NATIONAL FIRE LOSS

Extension of the System of Inspection of Insured Risks by Provincial and Municipal Authorities

William B. Ellison, of New York, amplified his comment of a few days ago, regarding a means to reduce fire losses, which have become so important a factor in national life. He said:—

"To secure a system of inspection sufficient to meet the situation, should not be left to the companies alone, for the reason that the expense thereby incurred would naturally most materially increase our premium rates. Indeed, while no doubt, the companies are willing so far as they can, to reduce to a minimum the enormous losses that they have been subjected to, yet their conduct in that regard must be more or less regulated by careful scrutiny of the expenses incidental thereto. What with enormously increased taxes and other burdens now placed upon our companies, further steps looking towards fire prevention or fire protection must be made the subjects of careful study.

"That any one for any reason should be permitted to insure property beyond its reasonable value, or that any one should be permitted to so conduct himself as to invite a loss by fire, is, of course, discreditable to us as a people, and is more or less evidentiary of an incapacity or unwillingness to properly protect our own interests.

"The solution, therefore, of the difficulty, seems to me to lie along the line of materially increasing the duties and obligations of our public officials, with the hope that under a proper regulation, much that is now deplorable, may be remedied.

"The powers and duties of our fire marshals, or of bureaus in our various fire departments created for the purpose, might well be amplified so as to furnish us with real protection against over-insurance and negligent and fraudulent fires.

Over-Insurance Must be Looked Into.

"So far, fire prevention has been largely limited to structural conditions, and as such, in many respects have made the lives of property-owners a burden. Little or no attention has been paid to the question of over-insurance or the management of the properties in question. Both of these factors add very largely to conditions resulting in disastrous fire losses.

"Officials invested with the power to investigate fires, have generally contented themselves with a greater or lesser degree of activity after a fire has occurred. That service is not of serious value as preventative of fire. What we need most, I think, is an inspection of conditions as they exist prior to a fire, and that are conducive thereto.

"I can well understand the difficulties incidental to an inspection of all properties covered by insurance, real and personal, and that there would thereby be involved a very considerable expense; but the thought is lodged in my mind that such an expense would be infinitesimal as compared with the saving that would be effected.

"I understand that the Bureau of the State Fire Marshal in New York State has been virtually eliminated, and its functions abrogated. While it may well be that the old bureau was made a haven of rest for more or less defunct political dependants, yet the fault lies in the execution of the law, and not in the law itself. Such a bureau could have been made one of infinite value to the people of the state.

Municipal and Company Interests are the Same.

"The whole subject is one for state and municipal action and control, and aided reasonably by the companies whose interests would also be served thereby, I am convinced that our fire loss could be most materially reduced.

"I am quite sure that were we able to eliminate the system of over-insurance, and also the negligence of the insured or his employees, our insurance premiums could be readily greatly reduced, because as I understand the theory of fire insurance, it is that premium rates shall be commensurate with the proper maintenance of a fund sufficient to meet all proper and necessary demands upon it growing out of unavoidable fires.

"Under our present form of policy, we expressly eliminate all damage caused by a lack of care on the part of the insured to safeguard his property in case of a fire, that is, after a fire has occurred; and it seems to me absurd that there is no provision that will likewise eliminate all loss occasioned by a fire that was the result of negligence or fraud on the part of the assured.

"The far western State of Washington has awakened to the situation, as evidenced by the following quotation from a leaflet just issued by the Washington Surveying and Rating Bureau, as follows:—

"'A very praiseworthy activity is being manifested by the various fire departments of the state in the matter of inspections both of industrial plants and private dwellings. Fire marshals and chiefs of fire departments are becoming fully alive to the fact that efficiency on their part is demonstrated more through the prevention of fires than by their extinguishment. It is becoming generally known that the best way to put out fires is before they start; in other words, by fire prevention.'

"Harvey Wells, state fire marshal at Salem, Oregon, has just made a report in which he says, among other things:—

"'When a community arouses from a state of lethargic indifference in matters affecting public welfare from a standpoint of fire protection and fire prevention and establishes a record of reduction of 70 per cent. in fire waste within a brief period of three years, such an achievement is worthy of note and distinction, as well as emulation on the part of less fortunate communities. To the city of Portland, the metropolis of Oregon, credit for such a record is due.

"'As a result of the experience of 1913, 1914, and 1915, Portland was known by the insurance companies as one of the worst cities in the United States in fire waste. The statistical records of this department, upon which deductions are based, have been secured from the experience of insurance companies who, for the three years mentioned, paid to policyholders in Portland over $4,000,000. . . . .

"'The records we now have for the years 1916, 1917, and up to June 15th of this year give the fire waste in Portland for this period $1,200,000. Credit for this remarkable showing is due to the efficiency of the fire prevention bureau, supported by the citizens, who are interested in eliminating the element of fire waste and carelessness from their midst.'

"George Barr McCutcheon once said that 'indifference is the great American curse.' He must have had the preventable fire waste of the nation in mind when he wrote that sentence."

SASKATCHEWAN CROP OUTLOOK BETTER

The weekly crop report of the provincial department of agriculture indicates that the recent rains have changed conditions in the southern and central parts of the province for the better, and the crop yield will be higher than anticipated. The south-eastern, Regina-Weyburn, south central and central districts estimate wheat yields varying from five to twenty-five bushels per acre, and expect harvest to commence in some places about August 20th and to be general about the 25th. The south-western and west-central districts report that, while the rains came too late to increase the crop yields to any great extent, yet the later-sown grains will be greatly benefited, and will result in much more feed than was thought would be available. In the north-western, north-eastern and the northern parts of the east-central districts frost has inflicted serious damage, varying from 5 to 75 per cent. Many farmers are cutting and baling the straw for feed. It is, however, impossible to estimate the exact amount of damage that has been done, as this can only be ascertained when threshing commences. Even in these districts, however, some good crops are reported, both of wheat and oats, and harvest operations will commence about the 25th. Very few reports show the amount of harvest labor required, and, as additional help will be hard to secure, it will be advisable for farmers who expect to need men for harvest or threshing to make early application to their nearest district employment office or to the Bureau of Labor, Department of Agriculture, Regina

The people of the United States are now carrying over $60,000,000,000 of life insurance, according to the estimate made by the insurance press of New York. This sum is distributed as follows: $27,500,000,000 in old line companies, $10,000,000,000 in fraternal orders and over $22,000,000,000 in government insurance on the lives of soldiers and sailors.

AGRICULTURE IN ONTARIO

The following is a summary of reports made by agricultural representatives to the Ontario Department of Agriculture, issued on the 12th instant:—

Haying is practically over, with return in many places up to the average and in a few places slightly below.

Harvesting is now at its height. Fall wheat and barley are practically all cut and considerable quantities threshed, and large yields of both are reported from various parts of the province. The cutting of oats and spring wheat is also well under way and good returns from both these crops are sure.

The showers of the latter part of the week appear to have been fairly general and did much good, especially to the corn and roots.

Blight in potatoes is represented as doing considerable harm in some sections. Preparations for fall wheat seeding are under way and some counties report the outlook as being favorable to an increased acreage, although the dry weather has made ploughing difficult except where tractors are available.

The live stock situation is about normal, taking into account the condition of the pastures as a result of the dry weather. There has naturally been a decrease in the milk flow.

Dundas County reports that pasturing of hogs is now a common sight. Hogs are fenced in on rape or clover with a small covering for shelter, and this has developed in popularity as a result of the high price of concentrated feeds.

The demand for labor is now also at its height, but reports generally indicate that it is being fairly well met. The very general extent to which harvest leave has been granted is proving a big factor in the labor situation, and there is every assurance that a splendid crop will be satisfactorily harvested. The assistance of men and women from the towns and cities, however, is counted on in some sections.

MUNICIPAL BOND MARKET

The Monetary Times Weekly Register of Municipal Activities and Financing

Tweed, Ont.—Messrs. A. Jarvis and Company, of Toronto, have purchased a block of $8,600 6 per cent. 20-instalment bonds.

Preston, Ont.—Messrs. Graham, Sanson and Company, of Toronto, have purchased a block of $20,200 6 per cent. 30-instalment bonds.

St. James S.D., Man.—Messrs. W. A. Mackenzie and Company, of Toronto, have purchased a block of $50,000 7 per cent. 20 instalment bonds.

Penticton, B.C.—Sealed tenders, addressed to B. C. Bracewell, treasurer, will be received up till September 16th, 1918, for the purchase of $35,000 6 per cent. 25-year irrigation debentures. Interest payable half-yearly.

Windsor, Ont.—Messrs. Neely's, Limited, of Toronto, have purchased a block of $75,000 6 per cent. 20-instalment debentures. These debentures are for hydro-electric purposes, and were sold for 97.50. The issue will realize approximately $74,000. A campaign was started on August 20th, to sell the debentures locally and underwrite them among the business men of the border cities.

Edmonton, Alta.—Sealed tenders will be received by the debenture branch of the Department of Education until August 29th, 1918, on seven blocks of school district debentures amounting to $25,050. Separate tenders are to be made on each block as follows:—Block No. 1—Rural, 5-years 7 per cent., Ford S.D., No. 1910, $350. Block No. 2—Rural, 6-years 7 per cent., Cariboo S.D., No. 3573, $800. Block No. 3—Rural, 6-years, 7 per cent., Haig S.D., No. 3482, $1,200. Block No. 4—Rurals, 10-years 7 per cent., Thackeray S.D., No. 3501, $2,000; Buffalo Lake S.D., No. 3144, $600; Kenmaul S.D., No. 2800, $1,200; Maple Glen S.D., No. 2025, $600; total, $4,400. Block No. 5—Rurals, 10-years 7 per cent., Echodale S.D., No. 3523, $1,800; Rolly Point S.D., No. 3167, $1,800; Knoblich S.D., No. 3491, $1,800; Moy Hall S.D., No. 3299, $1,500; total, $6,000. Block No. 6—Rurals, 10-years 7 per cent., Adler S.D., No. 3655, $2,000; Empress View S.D., No. 3571, $2,000; Mount Butte S.D., No. 3539, $2,500; total, $5,500. Block No. 7—Rurals, 10-years 7 per cent., Altaview S.D., No. 3659, $2,200; Peaceful S.D., No. 3508, $1,000; Spondon S.D., No. 3375, $1,700; total $4,000.

ALBERTA PREPARES FOR VICTORY LOAN

With Hon. C. R. Mitchell as general chairman for the district and province, a committee of twenty-eight men will organize the campaign in northern Alberta for the forthcoming Victory Loan No. 2. A preliminary meeting of workers was held recently, when plans were discussed for the canvass in the city and district, along with the prospects for a good subscription. Mr. Mitchell accepted the permanent chairmanship, and most of the men who took an active part in the previous loan will be on duty again for the second and larger campaign.

It was decided to continue the division of the province into southern and northern districts, each with its chairman and other officers, but with a provincial head over both, through whom would come the orders and instructions from the Dominion office. Reports from the two branches will be sent regularly to the provincial chairman, who will have an office for that purpose.

The general opinion was that the campaign, which is to begin in the latter part of October, would be a success. Notwithstanding the crop failures, the people in the country were prepared to do their best, said a number of the out-of-town workers present at the meeting, and in many cases they had laid by some money for Victory bonds, recognizing the fact that it was not only patriotism to do so but good business. The suggestion was made that the canvassers in the country districts should be brought to the city and given some additional instruction in methods. A. W. Fraser, of Vegreville, emphasized the necessity of dealing promptly with the problem of reaching the non-English speaking people, and suggested that much could be done in an educational way through the [illegible]. The foreigners' subscriptions, he thought, would be about the same as last year.

NOTES OF NON-EXISTING COMPANIES

Signature of Officer Binds Him Personally, When Attached Before Company Exists

If a note or bill of exchange is made or accepted by the A. B. Company, Limited, and the signature of the company is followed by that of "X. Y., president," or by the signature of any other officer of the company, the signature itself shows that it is the note or bill of exchange of the company, which is liable thereon, and there is no personal liability on the part of the officer.

On the other hand, the law is well settled that if an individual signs or accepts a note or bill of exchange as "X. Y., president of the A. B. Company, Limited," then the note or bill of exchange is not binding upon the company, but it does bind X. Y. personally. The addition of the words, "President of the A. B. Company, Limited," is of no more effect than if X. Y. had added after his name any college degrees which he might hold, or M.P., denoting that he was a member of the Dominion parliament.

All this is very elementary law, but in these cases the A. B. Company, Limited, is an actual existing company, and incorporated at the time of the making or accepting of the note or bill of exchange.

Suppose, however, that before the company is actually incorporated, a note or bill of exchange is made or accepted in the name of the A. B. Company, Limited, followed by the signature or signatures of the officer or officers thereof, and after the note is given a charter is issued incorporating the company. Is this note binding on the company, or on the officers personally, or on nobody?

This point was before the Manitoba Court of Appeal in the case of Crane vs. Lavoie, where a note was made on the 10th day of May, 1910, beginning, "We promise to pay," and signed as follows:—

The Fournier Company, Limited,
F. X. Lavoie, president,
D. Fournier, manager.

The Fournier Company, Limited, was not incorporated by letters patent until the second day of June, 1910, and the first question then was, whether the Fournier Company, Limited, was liable on this note.

On this point the court decided the note was not binding on the company when made because the company was not in existence at the time, and that the company could not ratify the note without making a new contract of its own.

"The argument that the company, after its birth, ratified the note as its own promise to pay must fail," said the court. "A corporation has no power to ratify contracts made on its behalf before its incorporation. It can only do so in effect by making a new similar contract of its own."

The question then was whether Lavoie and Fournier who purported to sign as the president and manager of the non-existent company, were personally liable, and the decision of the court was that they were.

"It is established," said the court, "that although a persons signs an agreement on behalf of a company, and the company has no existence at the time, but is only projected or in prospect, he is personally liable, because there is no principal whom he does or can represent, and the agreement would be wholly inoperative if it were not to be binding upon the person who has signed it."

PROGRESS IN PRINCE RUPERT, B.C.

City is Well Situated With Regard to Industry — Municipal Works are in Good Condition

Not only is Prince Rupert, B.C., fast becoming the greatest fish port on the Pacific coast, but it also possesses the largest cold storage plant in Canada. It is the centre and point of shipment of an enormous lumber trade, especially in spruce. A large and completely up-to-date sawmill has been established. The wholesale dealers supply a large surrounding country with every description of goods, and the city is the centre of a mining district. The shipping of ore through Prince Rupert is in itself quite a business. Fishing is the principal industry, and will, no doubt, remain so, because the city is close to the fishing grounds. The lumber resources are also extensive, and business from this source will, for many years, be an asset to the city of Prince Rupert.

Regarding the municipal works, the city clerk, Mr. Fred Peters, makes the following statement to *The Monetary Times*:—

"We have a most excellent water system, giving the citizens and all industries ample supply of the purest water, which we now supply at a cheaper rate than any place in British Columbia, or, I believe, Canada. For example, large customers get water at 3 to 2½ cents per 100 cubic feet. This system is not developed ahead of industries. In fact, during last year we had to make extensions costing $10,000, and we will, no doubt, make more. The best feature is that the system can be developed to accommodate 100,000 people.

"Our telephone system, which enables us to supply privileges as cheaply as anyone in British Columbia, is not ahead of requirements, and we are now contemplating considerable extensions to meet actual requirements. Our electric light and power plant is now working almost to capacity, and we are now contemplating the installation of a very much greater power if our utilities pay. They cost nothing in taxes except a small special rate in water."

The annual report of the city for the year 1917 says:—

The city of Prince Rupert is the Pacific terminus of the Grand Trunk Pacific Railway Company, situate 550 miles north of Vancouver and 40 miles south of the Alaskan boundary. It is in the same latitude as London, and has a climate the mean temperature of which is about the same as that of the metropolis of the British Isles. It is 500 miles nearer the Orient than any other port on the Pacific coast, and is two days nearer the Yukon and Alaska than any other Pacific coast city.

Having a tri-weekly service of fast through passenger trains from the Atlantic coast, alternating with fast through freight service, it is the controlling factor in the Canadian Yukon and Canadian Alaska trade, as it will also be for the Orient trade in the near future.

Preparatory to this, the railway company, in conjunction with the Dominion government, completed and are now operating the largest floating drydock in America, covering 22 acres, at a cost of three million dollars, as well as laying out terminal facilities and trackage accommodation at a cost of two and three-quarter millions. In addition to this they have pledged themselves under a ten-year agreement with the city, dated June 8th, 1911 (as part consideration of the city accepting $15,000 per year to cover all taxes), to "commence and complete within reasonable time" terminal buildings costing one and one-half millions and an hotel to cost two millions. Already plans are complete and foundations excavated. Owing to the war conditions, superstructure of these undertakings have been temporarily held up, but we have the assurance of the president of the company that these works will be continued and carried to completion directly capital is available. The programme for 1918 is the expenditure of $250,000.

The Dominion government have also purchased land and excavated site for a post-office, to cost $250,000, and an armory, to cost $150,000, land for which was given them by the city. They have also erected a quarantine and marine station, with concrete dock, which cost $175,000, and the provincial government have also prepared site upon which to erect permanent court house and administration buildings to cost $250,000. The Imperial Oil Company have also leased from the Grand Trunk Pacific Railway Company 8¼ acres of land, upon which have been erected oil storage tanks which cost $200,000, and are now operating all oil shipments from the wells to Prince Rupert, thence by rail to the east. The provincial government have erected a concrete wharf at a cost of $270,000, which they are now operating. The 1918 programme for the Grand Trunk Pacific is the expenditure of $250,000 on wharves and terminal works.

The city has spent in developments $765,000 in permanently grading the whole of the business section. It has established its own light, telephone and water systems at a cost of $680,000, which are operated as public utilities. These are self-supporting, with the exception of part of the water system, which was only completed in 1915. Part of these charges were raised by special rate. The city has only $148,084 of non-productive debentures. It will be readily seen, therefore, that the expenditure by the city is extremely small when compared with outside interests, yet the amount spent has enabled it to keep pace with other developments, as well as provide cheap light, water and telephone. The water supply is by gravity, and 1,650 horse-power of electric current is generated. At the same time, the water supply is estimated to take care of a population of from fifty to sixty thousand people, and a further power site has been secured nearby which will generate a further 10,000 horse-power capacity for electrical supply when necessary.

The town site contains 2,240 acres, divided into 11,610 lots. The total estimated land valuation is $20,621,545, of which $2,649,850 is exempt from taxation. The total land taxable within city limits is $17,917,695, which includes Grand Trunk Railway Company land, valued at $3,489,400, upon which they pay an annual fixed amount of $15,000 until 1921, leaving a net assessment upon which tax levy is annually made of $11,690,435. The improvements are valued at $2,704,060, but are not taxed. In addition to this there are $359,600 improvements which are exempt. There is no floating debt. The total assets of this city, which includes real estate and buildings, is $563,159.72 (which had a land assessment in 1915 of $1,300,925), also water, light, telephone and roads which have been paid for, totalling $2,775,000. Our tax rate for 1916 was 10 mills gross, which includes schools, money by-laws, special rates and general administration. This was the lowest tax rate in western Canada. A 10½ mill rate will be levied this year, 1918. Our tax collection has an average of 69 per cent. for five years. Owing to a considerable portion of the town site being held by outside capitalists of repute, a large percentage of which is improved, the city has practically a guaranteed tax collection of 60 per cent. of its annual tax levy, the remainder being made up by small holders, 10 per cent. of whom are prompt taxpayers.

In 1914 our total bonded indebtedness was $2,594,838.34, of which only $250,070 was permanently sold; $1,371,000 was represented by treasury certificates, which were renewed for one year (conditionally that they were taken up by cash payment); $202,237.73 were hypothecated to the bank for loans made, and $771,530.61 unsold. Our assessed valuation for taxation was $17,486,485 and our gross mill rate was 13.075 mills, and the city borrowed from the bank $37,000 against current revenue. In 1915, $70,990 of short-term debentures matured and were taken up. In 1916 a further $25,870 matured and were paid for. The same year the whole of our debt was converted into serial bond form, two by-laws repealed, and the remaining debt permanently sold in the United States. In 1917 our entire debt, after deducting amounts collected and on hand for payment of debentures maturing in 1918, is 1,624,000, a reduction since 1914 of $970,838.34.

The whole transactions of the city for 1917 were carried on without borrowing one cent from the bank against current revenue or for any other purpose.

Our assessed valuation for taxation for 1917 levy was $11,596,295, a reduction of $5,890,190 since 1914, and our tax rate 10 mills gross. Our local improvement levy in 1914 of $146,643.66 was reduced in 1917 to $81,000, making a total reduction in taxation since war was declared of 62 per cent., with arrears of taxes, $178,000; all sinking funds completed and no obligations outstanding.

I, therefore, submit, having regard for the unenviable position in which the city stood in 1914, the fact of having resources sufficient to enable it to recover in this way, in spite of war conditions, should confirm the high regard bond houses have for Canadian municipal bonds, especially when applied to the older established cities, and argues well for the possibilities of British Columbia.

It is interesting to note that in spite of war conditions and the consequent curtailment of all possible capital con-

struction operations, the railway local traffic receipts have increased from $30,000 per month in 1914 to $275,000 per month for May, 1918, and freight shipments still on the increase.

Customs returns also show a very considerable increase, notwithstanding the fact that in recent years steel and other commodities for railway construction from the States swelled the totals. The reason for this is the steady increase in quantities of fish and other produce being shipped to the States and the ever-increasing traffic to the Yukon and Alaska, via Prince Rupert.

Educational Facilities.

Prince Rupert, though comparatively young, affords educational facilities second to none of the larger cities of British Columbia. The high school, which was opened in 1912 with ten pupils, has now over forty pupils on its roll. The success of its students in the annual public examinations, as well as the success of its pupils at the British Columbia University, afford conclusive proof of the high standard of education imparted therein.

Prince Rupert has three fine public schools, with a teaching staff of sixteen teachers and an enrollment of over five hundred. A well-equipped manual science school for boys has been in operation since 1916, and a fine domestic science school for girls was opened in 1917. The city is divided into school districts, by which arrangement the attendance and supervision is greatly improved.

Besides the high school and public schools, the Sisters of St. Joseph conduct an elementary school, a superior school in which commercial subjerts are taught, and a boarding academy, to which is attached a kindergarten course for young children. The Sisters have also made provision for taking care of musical students, both vocal and instrumental, elementary and advanced. The enrollment of these schools is approximately one hundred.

The city has six churches, and is the residence of the Metropolitan Bishop of Caledonia (Anglican), and the Bishop of Pntyris and vicar apostolic of Prince Rupert and the Yukon (Catholic).

OTTAWA ELECTRIC RAILWAY DISPUTE

Company Has No Power to Raise Rates and Suggests City Take Over the System

The recent difficulties of the Ottawa Electric Railway Company with its employees has occasioned the suggestion that the railway should be taken over by the city of Ottawa. The franchise expires on August 13th, 1923, on which date it may be extended for a further period of five years.

Some time ago a committee, including the mayor of Ottawa, waited on the president of the Ottawa Electric with the request that the line be extended over the Pretoria Avenue bridge. The directors explained at the time that, as the company's franchise extended only for five years, they could not afford to make additional investments of such an extent. They then suggested that the city should take over the system itself.

Even if the city council and the company were willing to do so, it would, of course, be some months before the transaction could be completed. It is expected, however, that the strikers, in the event of such a transaction being agreed upon, would be willing to go back to work, trusting to receiving favorable consideration from the city. The award of the Board of Conciliation and Arbitration, which the company was willing to accept, although it involved additional expenditure of $140,000 per annum, was turned down by the men. The company is powerless to increase rates excepting to charge five cents straight instead of six for a quarter, but the city would have the power to charge any rates it thought fit. It is very probable, of course, that difficulty would be experienced in finding a value of the assets and franchise which would be satisfactory to both the company and the city.

Last Year's Business Good.

According to the statement issued by the railway last February, the year 1917 was the best in the company's history. Contrary to the experience of many other utility enterprises in Canada, the earnings of the Ottawa Electric have increased. The year 1915 was the only one which saw a decrease in earnings during the past twenty-five years.

For the twelve months ended December 31st, 1917, the number of passengers carried was 29,347,692, or over 2,000,000 more than in the preceding year. The gross receipts were $1,240,627, the expenses $830,961, and the net income $409,665. Four quarterly dividends of 3 per cent. per annum were declared during the year and a bonus of 3 per cent. also, making 15 per cent. in dividends on the stock. Other payments were as follow:—

Interest on bond loans	$ 44,079
Mileage payments	16,442
Taxes	24,484
Business war tax	40,615
Reserve for depreciation	110,000
Transferred to profit and loss	18,085

During the year three new pay-as-you-enter cars were put in service and some of the tracks were relaid with 80-pound rails. A shed was also extended and improved. The total outlay on capital account was about $50,000. The assets of the company are valued at $3,432,959.

The following statement shows the growth of business since the year 1892. The first four figures are for the years ended May 31st and the fifth figure is for the seven months ending December 31st, 1895. From this date onward the statement was made up for the calendar year:—

	Gross receipts.	x Total expenses.	Net income.	Passengers carried.
1892	$ 71,698.99	$ 45,199.80	$ 26,499.19	1,520,405
1893	110,071.67	70,221.25	39,850.42	2,394,504

1915	1,041,100.26	742,123.80	298,976.46	24,361,867
1916	1,154,912.53	776,587.83	378,324.70	27,033,778
1917	1,240,627.24	830,961.38	409,665.86	29,347,692

*Seven months only. The company's year was changed to correspond with the calendar year.

x Including mileage payments, taxes and interest.

ASSOCIATION OF MARINE UNDERWRITERS

An organization of marine underwriters of the United States is being formed and will soon be in a position to undertake the task of promoting the interests of the business there. At a meeting of the executive committee, held recently, the selection of headquarters for the association was discussed, but no final action taken. Those on the executive committee include the following: Henry Evans, president of the Continental, chairman; Cornelius Eldert, president of the Atlantic Mutual; Edward Milligan, president of the Phœnix of Hartford; William H. McGee, of William H. McGee and Company; E. W. West, secretary of the Glens Falls; J. B. Levison, president of the Fireman's Fund of California, and Clarence A. Ludlum, vice-president of the Home.

Several standing committees have also been appointed to deal with questions of finance, law, war service and business advancement.

The Travelers Insurance Company, of Hartford, Conn., have adopted a new schedule of rates, the general revision being downwards. The company's policies have been completely remodelled.

HUDSON'S BAY COMPANY PROSPERS

Land Sales are Maintained and Good Profits Realized from Other Branches of Business

A satisfactory showing is made in the report of the Hudson's Bay Company for the year ended May 31st last. The sale of land brought in £495,300, as against £295,600 for the previous year, of which £487,600, as against £280,300, was for farm lands, the average per acre being £3 13s. 6d., as compared with £3 8s. 3d. Profit on the fur trade amounted to £44,000, as compared with £37,500, while the saleshops, etc., brought in £234,600, as against £214,400, the figures being arrived at after making provision for excess profits duty and other contingencies. A summary of results since 1903 is appended:—

Year ending May 31—	Net land receipts	Fur and trading profits.	Total net profits.	Ordinary dividend.
1903	£177,857	£142,001	£319,858	£312,500
1904	201,189	98,933	300,122	275,000
1905	207,364	102,969	310,333	290,000
1906	262,035	190,207	452,242	400,000
1907	283,879	177,688	481,567	425,000
1908	180,428	141,594	327,022	300,000
1909	175,476	80,391	255,867	260,000
1910	240,045	166,156	406,201	400,000
1911	548,512	159,966	708,478	400,000
1912	273,268	196,070	469,338	400,000
1913	589,926	228,324	818,250	500,000
1914	297,302	86,636	383,938	400,000
1915	2,697	30,641	33,338	Nil
1916	24,652	266,662	291,314	200,000
1917	140,777	279,708	420,485	300,000
1918	367,841	315,964	683,805	400,000

Total receipts in the land department were £634,400, as against £388,400, while taxes and general expenses were £2,800 lower at £222,800. The capital reserve fund is credited with £43,800, £140,000 is reserved for taxation, £25,000 is reserved for improvements at Edmonton, and £200,000 is distributed to ordinary shareholders (20 per cent., free of tax) on account of land sales, leaving £22,000 to be carried forward to the credit of the land account. The general profit and loss account shows total receipts of £377,900, and after payment of administration expenses and placing £10,000 to pensions reserve and reserving £20,000 for depreciation of investments, there is a balance of £316,000. Preference dividend for the year requires £100,000, and £200,000 goes to ordinary shareholders in the form of a 20 per cent. dividend paid, less income tax, making, with the payment on account of land sales, a total distribution for the year of 40 per cent., of which one-half is paid free of tax, as compared with 30 per cent. a year ago, of which half was also paid free of tax. In the balance sheet there is a reduction of £1,079,500 in creditors and credit balances, and of £980,100 in the amount invested in "saleshops and other trading." The report states that the company has now 3,514,459 acres unsold. On March 31st instalments to be received on sales amounted to £3,064,300, as compared with £2,260,300 on the corresponding date of last year.

AGRICULTURE THE GREATEST INDUSTRY

In the United States there are about 40,000,000 people engaged in money-making pursuits. Of these, about 13,000,000 are engaged in agricultural work, 10,300,000 in manufacturing and mechanics, about 5,300,000 in domestic service. (This class needs some explanation. It includes keepers and employees of hotels, restaurants, boarding and rooming houses and laundries, bootblacks, umbrella menders and scissor grinders, employees of saloons and dance halls, and of some minor occupations. It does not include housewives, who are classed in the United States census report as having "no occupation.") Seven million six hundred thousand are employed in trades and transportation, and 1,000,000, or only 5 per cent., of the workers, are in the professions—law, medicine, teaching, ministry, etc.

Yet for years our school system has been based on the needs of that 5 per cent. Isn't it about time that we gave some consideration to the other 95?

Trade schools and manual training have been receiving consideration for several years, but it is only very recently that we have begun to give any attention to this largest group of all—the agriculturists, who comprise 33 per cent. of our working population.

Not only that 5 per cent., but all these boys and girls have a right to ask that the schools give them some training for carrying on their work in the world.

It is not practical to educate all the 25,000,000 school children of the United States for the professions if less than 2,000,000 of them can find employment in those lines.

Training in agriculture will result in a general improvement in agricultural practices, and the direct and immediate result of this improvement is better homes, better schools and better education.—The Liberty Book (International Harvester Company, Chicago).

UNION INSURANCE SOCIETY OF CANTON LIMITED

In our issue of the 19th July there appeared a financial statement of the Union Insurance Society of Canton, Limited. In translating the statement of assets into Canadian currency, two or three errors arose and the correct balance sheet is reprinted below. The amount of gold with bankers' current and deposit account is $1,241,930 and not $1,091,930. Investments in silver securities are $5,269,255. The item of gold due from sundry debtors was also omitted in one place to the amount of $2,355,805. The total gold assets are accordingly $9,682,670, which is over one-half of the total assets. Most of the balance is made up of silver or securities payable in silver together with mortgages and leasehold property. The small discrepancy of $5 between the two totals is, of course, the result of differences in the totals of shillings and pence in the sterling statement, which are not carried over in the currency statement.

Balance Sheet, 31st December, 1917

To Authorized Capital 16,000 Shares of $187 each	$3,000,000 00	
" Subscribed Capital 15,881 Shares of $187 each upon which $75 per Share called and paid up		$1,191,075.00

By order of the Board,

JOHN AIRD,

General Manager.

Toronto, 19th July, 1918.

PATON MANUFACTURING COMPANY OF SHERBROOKE

Notice is hereby given that a Dividend of (4%) Four per cent. and a bonus of (2%) Two per cent. for the half-year ending July 31st have been declared payable on the 16th day of September next to Shareholders of record of the 31st instant.

By order of the Board.

A. D. BRODIE.

Secretary.

Sherbrooke, August 21st, 1918.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

PENTICTON, B.C.

Sealed tenders, addressed to the undersigned, will be received on or before twelve o'clock noon, September 16th, 1918, for the purchase of $35,000 twenty-five-year six per cent. irrigation debentures. Interest payable half-yearly. The highest or any tender not necessarily accepted.

B. C. BRACEWELL.

Treasurer.

August 20th, 1918.

TRAIL TO OFFER BONDS

The city of Trail, B.C., will shortly be offering an issue of $54,000 local improvement sewer debentures for sale. These debentures will carry 7 per cent. interest.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

BRITISH OFFICE is open to engage competent and experienced fire inspector, chiefly for Ontario field. Applications will be treated confidentially. Apply A. B. C., *The Monetary Times*, Toronto.

Toronto Agency Wanted

Exclusive Toronto Agency for a strong Fire Insurance Company wanted by an established organization. Tariff or non-tariff.

ADDRESS BOX 195, MONETARY TIMES.

Fire Insurance Agency Wanted

A Real Estate and Insurance Company operating in Saskatchewan has an active agency covering 300 points throughout the Province. A General Agency for a strong reliable Insurance Company is wished to take up the business controlled from these points. This is a first-class opportunity for an Insurance Company writing fire business to make use of a large organization well established.

Apply Box 193, Monetary Times, Toronto

CANADIAN NORTHERN RAILWAY AWARD DUE THIS MONTH

The award of the board of arbitrators to the Canadian Northern Railway will be paid on the 24th of the present month. The award was for $10,800,000, but, under an agreement entered into between the government on the one hand and Mackenzie and Mann and the Canadian Bank of Commerce on the other, the amount to be paid will not exceed $10,000,000. There are a few minority stockholders, however, who were not bound by the agreement which the government made with Mackenzie and Mann and the Bank of Commerce, and these are asking that their stock be paid for upon the basis of the full award. It is likely that this will be done, as the amount involved does not exceed more than a couple of hundred thousand dollars.

CANADA'S ZINC OUTPUT HAS INCREASED

Details of the progress being made in the development of new industries in Canada are given in a statement issued by the Imperial Munitions Board. The demand for supplies of zinc and copper—required in the manufacture of munitions—led to an investigation in 1915 to ascertain the feasibility of refining copper and producing metallic zinc in Canada.

This resulted in the establishment of the copper refining industry in Canada for the first time in its history, and a zinc plant was erected by the Consolidated Mining and Smelting Company at Trail, B.C., at a cost of $2,500,000. The production of zinc was increased from a daily output of 1,000 pounds to a present production of approximately fifty tons per day. The present annual capacity of the zinc and copper plants is approximately: metallic zinc, 18,000 tons; refined copper, 6,000 tons.

PAY AND ALLOWANCES

Details of Scale for Invalided Soldiers' Commission Patients and Students

Pay and allowances for discharged sailors and soldiers undergoing treatment in the sanatoria and hospitals of the Department of Soldiers' Civil Re-Establishment have been fixed by order-in-council. The scale will be exactly the same as each individual man was in receipt of from either the army or navy before his discharge, with one or two slight variations. Dependants will receive the militia or naval separation allowance, but a special scale in lieu of any allowances paid from the Patriotic Fund has been fixed.

The order-in-council also contains a confirmation of the scale which has been paid to discharged men granted courses of industrial re-education.

The scale of treatment allowance applies not only to men who are discharged for treatment but to men who, having been discharged to civil life, subsequently break down owing to war disabilities and come back for treatment. These were formerly known as re-attestation cases, but since the organization of the Department of Soldiers' Civil Re-Establishment it has been provided that they shall not re-attest but shall be treated as civilians by the Invalided Soldiers' Commission of that department.

Approximately 2,500 discharged men are affected at the present time by the scale for treatment cases. The number of current industrial re-education cases at the last compilation was over 2,000, making a total of nearly 5,000 who are being paid by the Department of Soldiers' Civil Re-Establishment.

The new scale for dependants of men receiving treatment in I.S.C. hospitals, which is to be in lieu of the Patriotic Fund allowance, is as follows:—

Wife only	$10.00	per month.
Wife and one child	19.00	" "
Wife and two children	26.00	" "
Wife and three children	31.00	" "

For each child in excess of three children $5 per month with a maximum allowance of $45 per month for wife and children.

A man with dependants will be required to assign at least $20 per month to his dependants, who will also receive the amount of separation allowance to which, but for his discharge, they would have been entitled under the pay and allowance regulations of the Department of Militia and Defence, or the Department of Naval Service. In the event of a man being granted out-patient treatment, provided that his disability is such as to prevent him from obtaining or continuing employment, he shall also receive an amount equivalent to the subsistance allowance to which, but for his discharge, he would have been entitled on active service.

It is provided, however, that no ex-member of the Forces who is undergoing inpatient treatment, and is entitled to the allowance payable under these clauses, shall be paid for his personal use a larger sum than $8 per month unless special authorization is given. The balance of his allowances shall be retained by the department or be deposited by the department in a bank or in the post office savings bank to his credit and paid to him at the conclusion of his treatment.

A scale of expense allowances has been fixed for discharged men not undergoing vocational training, who are directed by an officer of the department or by a medical practitioner acting on the authority of the department to report at an institution for examination or observation or for treatment for a period not exceeding one week. The same scale applies to men duly authorized to report for repairs to an artificial limb or other orthopedic appliances. The scale of expense is as follows:—

Return transportation, first class, with sleeping berths if necessary; $1 per day for the time absent from his home plus $1.50 for every night spent at a hotel or lodgings at his own expense, and 50 cents for every meal (3 meals per day) purchased by him while absent from home, provided that the time occupied shall not be longer than one week. If the extends beyond a week and the conditions keep him from his home or prevent him from continuing his occupation he shall receive the ordinary allowance of a man undergoing treatment less, however, the amount of his pension, if any.

When the institution or other place to which such discharged man is required to report is in the same town as or contiguous to his place of residence, the amount payable shall be $3 per day in lieu of the allowance above mentioned provided that the time shall not be longer than one week. When a man, undergoing training, is required to report for treatment or for repairs to an artificial limb his vocational allowance shall be continued instead of the travelling allowance mentioned, but any reasonable expense which he may incur shall, upon authorization by an officer of the department, be paid.

It is provided that payment of pension and allowances shall be suspended during the man's receipt of treatment or training allowances, except that when a man is undergoing treatment by the Department of Soldiers' Civil Re-Establishment of such a nature as not to prevent him from obtaining or continuing employment, his pension and allowance, if any, shall be continued during such treatment, and he shall be entitled to receive from the department a discretionary amount, not exceeding $1 for each attendance for treatment plus reasonable travelling expenses.

If a man undergoing training requires institutional treatment he shall continue to receive his training allowance, except when the treatment is likely to be of long duration. In that event the treatment allowance will be substituted for the training allowance during time of treatment. Such authorization must be made prior to the incurring of the expense.

Men refusing treatment which a military medical board or a medical officer of the Re-establishment Department reports they require may, in the discretion of the Board of Pension Commissioners, have their pensions reduced by not more than 50 per cent. and post discharge pay may be withheld until such discharged men have undergone and completed the treatment they require to the satisfaction of the Department of Soldiers' Civil Re-Establishment. The same conditions apply to men, who, by reason of misconduct while undergoing treatment, have to be expelled from an institution or have such treatment discontinued.

An important clause provides that allowances authorized by this order-in-council may be continued for one month after the completion of treatment or training, provided that the man's treatment or training has occupied a longer period than two months, that the man is not entitled to receive post discharge pay at the completion of such treatment or training, and that such continuation of payment is necessary to assist him in obtaining employment. The payment is also contingent upon good conduct during treatment or training.

The allowance for dependants shall not be paid in respect of any boy over 16 or girl over 17 years of age. The privileges extended by the order-in-council are not receivable by men who have been cashiered or dismissed the service, deprived of commission or warrant for misconduct or discharged from the service for misconduct, unless the department otherwise directs.

CANADA'S SHIPBUILDING CONTRACTS ARE LARGE

The government is making good progress with its $60,000,000 shipbuilding programme for the year. With the completion of the Imperial Munitions Board's contracts, berths for new ships on government order are now rapidly becoming available. Twenty ships are now under contract for the marine department, with three additional freighters of 10,500 tons each, to be laid down not later than November 1st in the Halifax yards.

Contracts for seven new steel vessels, aggregating 28,650 tons, have just been made. The Davies Company, of Levis, will build two of 5,100 tons each; the British-American Shipbuilding Company, of Welland, two of 3,450 tons each; the Port Arthur Shipbuilding Company, two of 3,400 tons each, and the Collingwood Shipbuilding Company, one of 3,750 tons.

Consolidation of the principal whaling interests on the Pacific coast has resulted in the incorporation of the Consolidated Whaling Company, Limited, with a capital of $2,500,000. The head offices of the company will be at Toronto. The combined plants of the newly-formed company have captured more than 650 whales early this season. They operate fifteen steam whalers beside other vessels, and have plants at five stations on the Washington, British Columbia and Alaskan coasts.

The British Canadian and General Investment Company,
Limited

At the Seventh Annual General Meeting of the Company held on 25th July, 1918, the Chairman said:—

You will no doubt have noticed from the Accounts that the profit for the year under review was apparently about £800 less than that for the previous year. This is not, however, quite a true comparison, as there are certain items appearing on both sides of the account this year (mostly relating to taxes) which properly belong to previous years, and after making the necessary adjustments, the figures of profit for the two years would be as follow: 1916, £6,338; 1917, £6,088, a difference of £250 only. Otherwise, I do not think the accounts call for any detailed comment, although I ought perhaps to say here that the Directors have again surrendered £750 of the fees to which they are entitled.

You will see in the Report a reference to the working of the Moratorium Acts in Canada, and you may perhaps remember that I mentioned this question in my remarks last year and pointed out the effect of this legislation upon us and more particularly upon our Affiliated Companies.

I have during the past twelve months endeavored to ventilate this matter in the Press and in other directions, as it seems to me that some effort should be made to obtain some modification of the Acts, which do not appear to be equitable to Mortgagees or of any real benefit to the Mortgagors.

The original purpose of these Acts was no doubt entirely laudable, namely, to prevent debtors embarrassed by the War, and especially those who were serving with the forces, from being unduly pressed by their creditors, and if the War had only lasted a short time no great harm would have been done.

It appears, however, as if the actual result will be first to protect the soldier (if indeed he can be said to be really protected at all) at the expense of individual lenders, instead of at the expense of the community, and secondly, to pile up an accumulation of debt for principal, interest, and in many cases taxes as well, which he will find it very difficult to deal with, if and when he returns to civil life.

For remember, the Moratorium Acts do not relieve the debtor of his obligations, they merely postpone them, and as the years go on the accumulations become formidable, and in many instances must already have reached a figure which will nearly, if not altogether, wipe out the borrower's equity in the property.

Everyone will desire that those who are fighting should be relieved as far as possible of all care and anxiety with regard to financial matters, but I contend that the burden of this relief should be borne by the community and not solely by individuals who chance in the past to have assisted the man who is now a soldier by lending him money to enable him to buy or improve his house or farm.

The relief should also be real relief and not merely a postponement of an obligation, and the remedy would seem to be the creation of a Civil Liabilities Commission somewhat similar to that which exists in England. The actual method to be adopted is not, however, of great importance so long as the result is equitable to the lender and a real relief to the soldier.

I ventured to warn you last year that the effect of these Acts, and also of the conditions prevailing with regard to City property in Canada, might probably cause some diminution in our available income during the next year or two, since we are taking no credit for interest in arrear or accrued, and for the same reasons I think it right to repeat that warning today.

It will no doubt interest you to hear that our total contributions to various War Loans now amount to about £75,000, and that our Staff War Savings Scheme has proved very successful.

Our English and Canadian colleagues who are in the Forces are still at the front, and their ranks are being added to. In fact, their patriotism constitutes one of our difficulties, since practically all the Directors of our Regina Companies either are or will shortly be serving, and we are consequently deprived of the benefit of their management and supervision of these Companies in which we are so largely interested.

Our interests are mainly, though not exclusively, Canadian, and I cannot conclude without again paying a tribute to the increasingly strenuous efforts the men and women of the Dominions are making on behalf of the great cause for which the Empire and its Allies are striving. I am certain these efforts will not be relaxed until complete victory has been attained, and when that happy time arrives I for one have no fear of her future. She has proved the courage and ability of her people, and has demonstrated the great resources of her industries and her land, and given the population necessary to develop these resources, we need place no limit on the possibilities which lie before her.

The Accounts and Balance Sheet and the Directors' Report thereon were adopted, and a Dividend at the rate of 4½ per cent. per annum for the year ended 31st December, 1917, was declared.

RURAL CREDITS SOCIETY A SUCCESS

Reports from Manitoba state that the Roblin Rural Credit Society in Manitoba, which was established under the authority of the Prout Rural Credit Bill, has been quite successful. It has about 100 members, and during the past year, made loans of over $43,000. The money has been used for the purchase of land, for the breaking up of new land, the purchase of stock and machinery, and improvements and betterments. The money has been advanced to the members by the local branch of the Union Bank. There had been some fear that the banks might suffer as a result of the movement, but the reverse is said to be the case, as the loans have stimulated general business in the district.

MAINTAINING WAR LOAN PRICES

The "Bache Review" says:—

There is one operation which is of the utmost importance in facilitating the placing of the next great Liberty Loan, and yet which has received no effectual attention. This is the undertaking to bring the issues of the last two loans up to par. The first loan of 3½ per cent. bonds by reason of complete tax exemption, has finally taken care of itself in this regard, the price after a period of decline having reached a level fractionally above a hundred. But these 3½s are held by a comparatively few people. The 4s and 4¼s are owned by from 17 to 20 million people, and it is to a large majority of these owners that the appeal for the new loan must be made. Their current holdings have been at a varying discount of from 4 or 5 to 7 points.

It is true that this decline is only temporary, and that these bonds after the war, will command a premium which in time will probably rise to high figures, and, aside from the reward of patriotic action, a substantial profit will ensue. But there can be no denying that the fact of these bonds ruling at a discount will be something of an obstacle in placing another and much larger amount of bonds bearing the same rate of 4¼ per cent. with the same people.

It would seem that the effort were worth making, before the next loan is announced, to overcome the discount at which the present issues are selling. A sinking fund was provided in the last loan for purchasing bonds in the open market. As far as known this has not been used. An attempt to do so might not succeed in restoring the selling price to around par, but it would seem as though with skilful management such a result might be brought about. That such operations are often successful with issues of stock is well known. It is argued that the volume of the government loans are so huge that success would be difficult. Still an overwhelmingly great majority of the owners of these bonds bought them to hold patriotically and permanently. The very fact that they are quoted at a discount has induced some selling, and holding them near par would undoubtedly tend to keep many bonds from being offered for sale. It would seem as though the effort, to be conducted by experts, were worth making.

There is another way in which an approximation of the result could be attained. That is by the method in vogue in Canada. Trading in the bonds is abolished on the exchanges, and a government committee has been in operation through whom only transactions may be arranged. Any one wishing to buy or sell may do so only through this committee. Brokers are paid a commission which induces them to find purchasers for the bonds. The price is controlled and the bonds are kept thus at the subscription price or above. They have recently sold above par while the issue price was 98.66.

PROVISION FOR SUCCESSION DUTIES

In the Bulletin for July, 1918, issued by the Great-West Life Assurance Company, attention is called to the value of life insurance as a provision for the payment of succession duties. It is sometimes the case that an estate contains very few assets which can be quickly realized upon without sacrifice, with the result that considerable loss is entailed in providing the funds for the payment of the duties. An instance is cited where a piece of Winnipeg property, worth possibly $100,000, had to be sold at a sacrifice at something like $40,000 in order to pay $8,000 in succession duties. A life insurance policy which becomes a cash asset upon the death of the insured is a ready solution of the problem.

RESULT OF CONSERVATION

Conservation measures and voluntary saving in the homes have reduced Canadian consumption of flour from 800,000 to 600,000 barrels per month as compared with pre-war consumption. Conservation efforts in Canada are releasing meat enough to provide the ration for at least 500,000 soldiers.

Canada is now saving sugar at the rate of more than 100,000 tons per annum as compared with a year ago.

Nearly 800 cars of foodstuffs have been saved from total or partial loss from spoiling through regulations of the Canada Food Board.

Net exports of beef from Canada have been increased by nearly 75,000,000 pounds per year, or 6,795 per cent. increase over the average net exports for 1910-14.

Before the war Canada imported butter at the rate of 7,000,000 pounds annually. This country is now exporting at the net rate of over 4,000,000 pounds per annum.

Canada exported from 25 to 30 per cent. more wheat during the last twelve months than could have been exported had it not been for conservation and organization of our food resources.

By standardization of flour and increasing the percentage of flour extraction from wheat, Canada is saving 20,000 barrels of flour per month.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended August 16th, 1917, and August 15th, 1918, respectively, with changes:—

MORE THAN SIX DOLLARS FOR ONE

The Farm Mortgage Bankers' Association of America, discussing the exemption from taxes of the federal farm loan bonds, says:—

A possible loss to the United States treasury of $3,-100,000 during the current year is one of the unexpected results of the combination of the high income tax with the farm loan law. The latter law was enacted before the United States entered the war at a time when the income tax [illegible] the highest incomes was only 6 per cent. In 1918 the income tax rate on incomes of over $1,500,000 is 62 per cent. The very rich income tax slackers are buying or have bought the tax exempt federal Land Bank bonds. The income on a $1,000 bond is $50. The income tax slacker is enabled to keep the entire $50 instead of being obliged to pay $31 as income tax as would be the case if taxable like industrials.

On $100,000,000 of federal farm loan bonds now outstanding this would make an annual loss to the government of $3,100,000. This deficiency will be required to be made up by other taxpayers, because war expenses must be paid by [illegible] if the very rich evade them.

Friends of the federal farm loan system claim that the tax exemption feature of the law benefits the farm borrower an average of half of 1 per cent., or $5 per year on a $1,000 loan. The benefit to the very rich income tax slacker is $31 per year on a $1,000 bond—$6.20 for every dollar of benefit received by the farmer. No patriotic farmer would ask the government to make such a bad bargain in war times. No true friend of the system will try to defend such financing. As it is expected that the federal land bank bonds will increase at a rate of over $100,000,000 annually, the tax burden will be enormous that will be thus accumulated on the people of moderate means through the tax exemption benefit given by the law to the multimillionaire income tax slackers. This gross perversion of the law is incidental to war changes in financial conditions. No one is to blame. It was not contemplated by those who originally framed the federal farm loan law. Congress can easily and quickly remedy the defect.

Fortunately, all of the beneficial features of the federal farm loan system can be preserved and its administration and efficiency will in no way be impaired if the tax exemption clause is repealed.

Merchants Casualty Co.

Head Office: Winnipeg, Man.

The most progressive company in Canada. Operating under the supervision of the Dominion and Provincial Insurance Departments. Embracing the entire Dominion of Canada.

BRITISH CANADIAN AND GENERAL INVESTMENT COMPANY

The revenue of the British Canadian and General Investment Company, Limited, for the year ended 31st December, 1917, after paying expenses, amounted to £10,031. There was a balance brought forward from the previous year of £4,963, making a total of £14,994. Income taxes and Canadian taxes required £2,124, and debenture interest £2,062. This left a balance of £10,808. At the annual meeting held on the 25th July, 1918, the directors recommended a dividend of 4½ per cent. per annum less income tax. This amounts to £5,167, which will leave a balance carried forward of £5,641, or considerably more than in the previous year.

In submitting the report the board called attention to the effect of the moratorium acts upon the company's business. They stated:

"Notwithstanding the considerable degree of prosperity which has attended Western Canada during the past year, the conditions with regard to city properties and the continued existence of the moratorium acts mentioned in the last two reports, have adversely affected the earnings of the affiliated companies and have also rendered difficult the collection of certain amounts due to the company. The practical effect of the moratorium acts does not appear to be equitable or to afford any real benefit to those whom they were designed to protect, and it is, therefore, to be hoped that the governments of the Dominion and of the various provinces will recognize that the time has arrived when a comprehensive review of the whole situation should be undertaken, with a view to effecting some revision of the arrangements now in force which will be beneficial to the borrowers and at the same time just to the lenders."

TEMISKAMING AND NORTHERN ONTARIO RAILWAY

The following is a statement of the earnings of the Temiskaming and Northern Ontario Railway for the eight months ending 30th June, 1918, that is, since the beginning of its fiscal year, which commenced on the first of November:—

	1918.	1917.	Increase.
Gross earnings	$1,825,000	$1,505,000	+ $320,000
Operating expenses	1,555,000	1,265,000	+ 290,000
Net earnings	270,000	240,000	+ 30,000

STOCK MARKET ON SOUND BASIS

Greenshields and Company, of Montreal, in their monthly review for August, say:—

The pronounced rise in prices of Canadian stocks in the past few weeks has justified the optimism with which we viewed the market in the early part of the year. The advance has proceeded on the solid foundation of a well-liquidated position, speculatively, and low prices relative to equities and dividends.

Despite the present strength of the market, however, we are not inclined to look for a bull market until prospects of peace become more clearly defined. The brilliant war news of recent weeks seems to foreshadow a definite decline in Germany's military power, but the final collapse may be remote. Immediately the dominant influence in the market position is likely to be the new Dominion government war loan, to be floated in October. On the basis of previous experience, the conservation of capital for the loan should make for a quiet stock market, and speculative purchases at the present level should be entered into with caution. Investment purchases of selected stocks can still be recommended freely on the basis of present dividend returns, if the purchaser is prepared to accept day-to-day fluctuations in prices with equanimity.

Monthly Income Policies a Necessity

A legacy of life insurance amounting to $100,000 was completely dissipated in seven years by faulty investments and expensive living. In another case a beneficiary squandered the proceeds of a life insurance policy amounting to $50,000 in a single year. To protect the beneficiary against inexperience in making investments, and against extravagance, the monthly income policy has been introduced, providing an automatic, safe and profitable investment of life insurance funds. Supplement your existing insurance with a monthly income policy. It can be written on the life, limited life or endowment plan. Such a policy with our disability clause incorporated is without an equal in furnishing ideal household protection. We will gladly furnish full particulars and illustrations.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Compania International, Limited.—The South American and Australian properties of Swift and Company have been organized into a distinct company, known as the Compania International, Limited, and capitalized at $22,500,000. Stockholders of Swift and Company are given the opportunity of exchanging 15 per cent. of holdings at par for an equivalent amount of International stock at par.

Lake Shore Mine.—The report to the president and directors of the company covering operations for the month of July shows an estimated mill output of $39,000. During the month the mill ran only 84 per cent. of the possible running time. This bears out the statement that about three days had been lost, due to delayed mill equipment. During July 1,582 tons of ore was treated, and the average recovery was $24.68 per ton. This compares with a grade of $24.61 a ton in June.

Okanagan Telephone Company.—A dividend at the rate of 5 per cent. per annum for the first half of this year has been declared by the company, a concern on which the stock is largely held by New Westminster people, and whose headquarters are in that city. This company has been empowered by the provincial government, from which it holds its charter, to make certain increases in the telephone rates, but these only went into effect at the beginning of August, and were adjudged necessary to meet the increased cost of operation and continue to give efficient service.

Black Lake Asbestos and Chrome Company, Limited.—Trustees of the company, at a meeting held on August 15th, decided that the company's position warranted declaration of an interest payment of 3 per cent. for the half-year on the company's $1,191,500 outstanding income bonds. The interest will be payable on September 1st. In February last a similar 3 per cent. payment was decided upon for the half-year ended June 30th, and was paid on March 1st.

The Black Lake Company was compelled to default interest payments entirely in 1913, 1914 and 1915. In 1916 2 per cent. was paid on the income bonds and in 1917 5 per cent. was paid.

American Cyanamid Company.—The following is a statement of the profits of the American Cyanamid Company for the year ended June 30th, 1918:—

Gross sales to customers		$5,587,076
Net sales to customers		5,547,508
Total sales		6,194,668
Cost of sales		3,548,283
Gross profit		$2,646,384
Expenses		301,148
Net profit on sales		$2,345,235
Additional profits		162,372
Total		$2,507,607
Interest, exchange, etc.	$ 72,247	
Reserves, depreciation, etc.	833,949	
		906,196
Net income		$1,601,411

A 7 per cent dividend was paid on May 1st which covers the cumulative preference dividends up to the year 1917. There remains unpaid 7 per cent on the preferred stock for the nine months ended June 30th 1918. The company has diverted its line of business to the manufacture of ammonia for military needs and had in hand on June 30th contracts for delivery within the following year of close to $6,000,000 of goods.

The city of Vancouver and the province of British Columbia have been negotiating with the British Columbia Electric Railway Company with a view to having the light and power rates of the latter reduced. The management, however, pointed out that they were rather looking towards an increase in rates on account of the rise in operating costs. No agreement has as yet been reached.

STRIKERS TO BE PROSECUTED

Criminal proceedings are to be commenced against labor leaders who called the recent general strike in Vancouver to protest against the shooting of a draft evader. It is thought, however, that the proceedings cannot be taken under the Industrial Disputes Act, but will have to be taken under the authority of the War Measures Act and the orders-in-council issued under its authority. General opinion is that the Industrial Disputes Act does not apply to such a strike as this as there was not a bona fide industrial dispute. Section 5 of the act provides that when there is a dispute between employers and employees they can apply for a Board of Conciliation; other sections provide that when an employer declares a lockout without first applying for a Conciliation Board he shall be liable to a fine. Employees striking contrary to the provisions of the act shall be liable to a fine of not less than $10 and not more than $50 per day. The act also proceeds to provide penalties for anyone who encourages or incites the continuation of a lockout or strike contrary to the provisions of the act, but it is pointed out that in the strike in question there was no dispute between employers and employees, and, consequently, there could be no application for a Conciliation Board so that prosecutions could scarcely be brought under it.

Under the authority of the War Measures Act, which was itself brief, but which gave large powers to the government to adopt measures calculated to assist in winning the war, a number of orders-in-council have been passed, one of these prohibiting people from interfering with the proper enforcement of the Service Act, and proceedings will probably be instituted under this authority.

BRITISH COLUMBIA TO PREVENT FIRES

The following circular letter has been issued from the attorney-general's department of the province of British Columbia:—

Sir,—The government has inaugurated a movement, the aim of which is to reduce the enormous waste due to preventable fires. The proposal is to establish a provincial bureau of fire prevention, which will operate through local bureaus, the membership to be composed of persons representative of this department, the municipalities, the fire departments, the insurance companies and all bodies or interests able and willing to render aid in this connection. The bureau will prepare propaganda, furnish information, and plan a campaign to diminish the loss by fire.

As you are doubtless aware, there is a tremendous field for an organization of this character. In Canada the annual value of property destroyed by fire approaches the sum of $3 for every man, woman and child, and surpasses even the figures for the United States, where a campaign is being vigorously waged over the length and breadth of the land. In Europe the average loss per capita is well under 50 per cent., proving that conditions in America call for a cure. This year's waste of our resources is not inevitable, for countless statistics demonstrate that about 60 per cent. of the fires which occur could be prevented by the exercise of more care. The Commission of Conservation, sitting at Ottawa, has thoroughly investigated the whole subject throughout the Dominion, and has just published a book, emphasizing the need of action.

It is, perhaps, needless to point out that, engaged as we are in war, when industries, plant, food, and materials of all kinds are of vital importance, there is an additional reason for taking all possible steps to preserve property. It is not sufficient to increase production unless at the same time what exists is safeguarded. Every fire destroys food or material, which, though compensated by insurance money, diminishes the available supply and requires labor to replace.

It is earnestly desired to enlist in the movement every agency which can render service. Will you, therefore, be so good as to bring the matter before your executive and request them to select a delegate for the bureau which I have outlined? A general conference of the parties interested will be held as soon as possible to formulate plans for prompt action and an early reply will oblige. Communications should be addressed to the superintendent of insurance, parliament buildings, Victoria, B.C.

I am, yours truly,
J. W. deB. Farris,
Attorney-General.

CROP PROSPECTS IN THE WEST

Latest Reports Give Rise to Much More Favorable Estimates—Manitoba's Prospects are Best

Last week a report from Mr. W. J. Whiteside, of the Canadian Northern Railway, on the crop outlook in Alberta, was given in *The Monetary Times.* Regarding Saskatchewan and Manitoba he says:—

Opinion is crystallizing in Saskatchewan as regards the possibilities of the wheat and oat crop of the province, and while it is recognized the probable final figure will be materially lower than the estimates early in the season before the drought and frost became serious factors, there is in well-informed circles, an under-current of confidence that the crop will attain to totals not even regarded as possible four weeks ago. Officers of the Provincial government in close touch with the situation, indeed, made it clear here to-day that where a month ago it was considered as out of the question to anticipate a wheat yield of seventy-five million bushels, beneficial rains and other climatic developments have so altered the problem, that now it is quite possible that estimate will be attained or even exceeded.

Other competent observers, who do not desire to have their ideas quoted, are of the opinion that the figure should be closer to one hundred million than seventy-five. It may, therefore, be fairly assumed that the total yield of wheat in the province this season should be somewhere between the two figures. It might, however, go higher than one hundred million bushels, because the damage from the freak frost in the last week of July, and the benefits from rains and other favorable developments, have not been accurately determined. The revised figures for the acreage sown to wheat in Saskatchewan are 9,101,000 acres, and for oats 4,612,000 acres. The estimated acreage lost on account of drought will not exceed ten per cent. There will be cutting on all of the remaining acreage, but in the badly frosted districts the product will be for feed for stock instead of breadstuffs for the allies. That is in wheat.

In oats, the greatest acreage, and always the best oat country is in the north, and the northern crop this year should be heavy. Present indications of labor needed from outside points are, that not more than five thousand men will be required. It may be more, but at the department of agriculture it is stated to be impossible to say definitely until crop queries now in the hands of representatives throughout the province, have been returned and studied.

Probable Production in Manitoba.

The crops in Manitoba seem to have suffered the least of the three prairie provinces from the vagaries of climate. While in the early weeks high, hot winds swept large areas and damaged possibly seven per cent. of the entire seeded acreage, it is declared in government offices here that acreage has not been lost by any means, and to set against this there was a considerably increased acreage seeded, and the damage from frost was negligible. Accordingly, the official expectation here is for an average production, or what approximates an average production, while there are declared to be indications that if the prevailing favorable weather continues the total yield might exceed the average.

The latest government crop estimates show an acreage seeded to wheat within the province slightly in excess of three million one hundred thousand. The average yield in wheat in Manitoba for the last ten years is 17.5 bushels to the acre. Let this be reduced to 15 bushels for the more than three million acres declared to have been sown, and the result should be in the vicinity of 45,000,000 bushels. This, of course, does not take into consideration a possible loss in acreage on account of wind, but it is felt that the paring of two and a half bushels off the average for the last ten years will provide against any loss in the total on that score. There were seeded to oats in Manitoba this year, as closely as may be figured now, 1,930,000 acres. The average in oats for the decade, (1907-1916), is 38.3 bushels to the acre. If this be reduced two bushels, and the result be taken roughly as thirty-five, the approximate yield should be 67,500,000 bushels. The acreage sown to barley is estimated as being 1,193,000. In this cereal the average yield for ten years has been 27.1 bushels to the acre. So, the government officers feel confident in placing the totals expected in barley at around thirty million bushels. When the three grains are totalled, therefore, Manitoba should have, in the event of present weather, or something like it, continuing, a total crop of more than 140,000,000 bushels.

The labor problem appears to be fairly well in hand. Conferences were held here yesterday, and it is considered that if three thousand men are brought into the province from outside points to help in the earlier operations, requirements should be met. Later on, for thrashing operations, there would, of course, be a greater need, but it is not anticipated that the total help required should exceed five thousand men. Manitoba looks to the eastern provinces for this help and feels reasonably confident, having in view all the conditions, she will not look in vain.

DOUBLE INCOME TAX TO GO

The delegation of United States citizens from Canada which recently visited Washington and called the attention of the Ways and Means Committee of the House of Representatives to the double income tax to which they were subject, met with a favorable reception. They were advised by Mr. Claude Kitchen, chairman of the committee, that an arrangement would probably be made whereby United States citizens resident in Canada would continue to pay both Canadian and United States income taxes, but that in the case of the latter the amount of the Canadian tax would be deducted. Accordingly, where the Canadian tax is as large as the United States tax, there will be nothing to be paid to the United States government, otherwise there will be a balance.

On the 13th instant the council of the municipality of Saanich, B.C., adopted a resolution increasing the wages of some of the municipal employees.

NEW INCORPORATIONS

Belcher's Islands Iron Mines Company, With Capital of $1,000,000, Received Charter

The largest company incorporated during the past week was the Belcher's Islands Iron Mines, Limited, with capital stock of $1,000,000, and head office in Toronto.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are the provisional directors:—

Vancouver, B.C.—Dempsay-Ewart, Limited, $75,000.

Listowel, Ont.—Hay Brothers, Limited, $100,000; G. E. Hay, J. Hay, J. G. Burt.

Brantford, Ont.—Brantford Buildings, Limited, $40,000; F. C. Harp, A. Harp, G. Pickles.

London, Ont.—Belvoir Stock Farms, Limited, $40,000; E. S. Little, G. J. Ingram, G. McNaughton.

Owen Sound, Ont.—Auto Sales Company, Limited, $10,000; E. C. Spereman, D. J. Barss, W. J. Craig.

Ottawa, Ont.—Champlain Club of Ottawa, Limited, $40,000; U. Valiquet, J. O. Lebland, J. A. N. Merciér.

Woodstock, Ont.—The Fig-lax Laboratories, Limited, $50,000; T. W. Goodyear, A. L. Goodyear, B. Goodyear.

Windsor, Ont.—The Windsor Mausoleum Company, Limited, $10,000; W. H. Warrington, R. S. Muir, J. McCarthy.

Cambray, Ont.—The Cambray Telephone Company, Limited, $10,000; S. J. McKinnon, T. H. Christian, A. Gillies.

Sault Ste. Marie, Ont.—French Bay Lumber Company, Limited, $150,000; J. P. Walsh, C. J. McLaughlin, E. E. Purvis.

Metabetchouan, Que.—Les Minoteries Electriques de Metabetchouan, Limitée, $99,900; A. Tremblay, E. Gagné, O. Tremblay.

Saint-Evariste-de-Forsyth, Que.—La Manufacture de Boites de St-Evariste, Limitée, $20,000; J. A. Roberge, A. Demers, B. Lefebvre.

Guelph, Ont.—Guelph Paper Box Company, Limited, $40,000; J. J. Small, J. Small, A. A. Buchner. W. J. Armstrong, Limited, $50,000; C. L. Dunbar, L. W. Goetz, R. D. Walter.

Sarnia, Ont.—Goodwin and Company, $40,000; J. F. Goodwin, A. McDonald Lott, H. R. Goodwin. Sarnia Coal & Dock Company, Limited, $20,000; P. Paton, R. J. Towers, J. Cowan.

Winnipeg, Man.—Malcom Construction Company, Limited, $5,000; D. Malcom, M. Molcom, F. A. Johns. F. A. Bean Canadian Properties, Limited, $300,000; F. A. Bean, Sr., F. A. Bean, Jr., M. A. Crinkley.

Toronto, Ont.—The B. S. L. Company, Limited, $40,000; A. Dodds, M. Macdonald, E. Smily. Crocker Press Company, Limited, $40,000; R. S. Crocker, T. Gowans, W. H. Moore. Mercantile Securities, Limited, $600,000; J. A. Kent, E. W. Wright, F. G. McMillan. Belcher's Islands Iron Mines, Limited, $1,000,000; T. N. Poole, A. L. Lillico, J. O. Allan. Capreol Townsite, Limited, $90,000; G. Ruel, A. J. Mitchell, R. G. O. Thompson. The Reliable Butchers & Grocers Company, Limited, $40,000; G. L. Smith, R. H. Greer, G. R. Forneret. The Safety Stove Pipe Company, Limited, $50,000; M. MacDonald, A. Dods, E. Smily.

Montreal, Que.—Le Pain de l'Union, Limitée, $20,000; C. J. E. Charbonneau, B. Melancon, J. P. Lamarche. La Compagnie Beeman, Incorporée, $5,000; E. Beeman, G. Davis, P. Lacoste. Delorimier Hotel, Limitée, $10,000; J. T. Trepanier, V. Lemay, C. Caron. Smith Brothers, Limited, $20,000, Lazarus Millman, P. E. Bourret, A. Millman. B. Ram, Limited, $20,000, L. Millman, P. Bourret, A. Millman. La Compagnie le Tabac Fermenté, Limitée, $25,000; J. H. Duys, E. N. Cusson, J. A. Conture. Duys Canadian Tobacco Company, Limited, $120,000; J. H. Duys, E. N. Cusson, J. A. Conture. Empire Paper Box Company, Limited, $20,000; J. R. Gordon, J. H. Roy, T. J. Rodger. Wilcocks', Limited, $100,000. H. J. Elliot, L. A. David, G. Wittaker. P. Poulin & Co., Limitée, $200,000. F. E. Audet, R. Weiss, R. Dorval. Montreal Cereal & Milling, Limited, $600,000. J. Sanche, S. Leblanc, L. N. Paul.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Cobalt, Ont.—August 21—General store and dwelling owned by M. A. Legault were damaged. Cause believed to be of incendiary origin.

Erin, Ont.—August 14—Barn of D. McLean was destroyed.

Grimsby, Ont.—August 21—Home of Donald Clark was damaged.

Hamilton, Ont.—August 19—Bakery owned by M. Ellanszweig on West Avenue, was damaged. Estimated loss, $1,000.

London, Ont.—August 15—The National Bowling Alleys, Penman's hosiery factory and the Scotland Woolen Mills store were damaged. Estimated loss, $150,000.

Magrath, Alta.—August 8—Barn of Verdon Bennett was destroyed.

Mitchell's Island, B.C.—August 15—Shingle mill of J. M. Telford was damaged. Cause believed to be of incendiary origin.

Ottawa, Ont.—August 15—Warehouse of the Ottawa Fireproof and Supply Company was damaged. Estimated loss, $5,000. Freight sheds near the Central Station, twenty loaded cars and eight empty cars were damaged. Caused by explosion in freight car. Estimated loss, $100,000.

Prescott, Ont.—August 15—Barns on the McCarthy farm and 200 tons of hay were damaged.

Scott, Ont.—August 22—Barn of Mr. Walter Durward on Wm. Usher's farm was destroyed. Estimated loss, $2,000. Insurance carried, $1,200.

Toronto, Ont.—August 21—House of Mr. J. Boyle, 907 Palmerston Avenue, was damaged. Caused by explosion of oil stove. Estimated loss, $800.

Utica, Ont.—August 22—Barn of Mr. Lakey was damaged.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

False Creek, B.C.—May 15—Boiler shop and drafting rooms in the J. Coughlan & Sons shipyards were destroyed. Two steel ships in building ways and equipment, and four other ships were damaged. Estimated loss, $1,500,000.

A total insurance of $212,500 was carried on buildings. On Hull No. 1, insurance was carried to the amount of $1,188,000; hull No. 2, $1,408,000; hull No. 3, $1,408,000; hull No. 4, $1,320,000; hull No. 5, $1,452,000.

North Vancouver, B.C.—Building of the Vancouver Proprietors, Limited, was damaged on July 15th, 1918. Caused by candle left burning on shelf. Estimated loss, $200. Insurance was carried in the Yorkshire Insurance Company, Limited, to the amount of $9,000.

Trail, B.C.—Residence of Wm. Barchard was damaged on July 19th, 1918. Caused by leaving clothes over kitchen range to dry. Estimated loss on building, $2,250; on contents, $1,500. Insurance was carried to the amount of $1,800 in the British Colonial Fire Insurance Company.

Vancouver, B.C.—Building of J. O. Le Cappelain was damaged on July 15th. Caused by spark from kitchen range. Estimated loss on building, $400; on contents, $125. Insurance to the amount of $1,000 was carried in the Commercial Union Assurance Company.

Wealth that Counts

Difficulties in Estimating National Wealth and Income — Most Measures Are Defective—Changes in Price Levels Affect Valuations—Canada Has Made Some Real Progress—New Views Have Developed on Social Value—Idleness Has Continually Fallen in Favor.

IT was Mr. Frank Vanderlip, president of the National City Bank of New York, and perhaps the ablest financier at present giving his services to the American government, who remarked a little over a year ago that the United States was "a nation of economic illiterates." So far as the statement is true, it must also be applied to Canada. This continent is far behind the United Kingdom, France and Germany in its understanding and discussion of economic problems. As elsewhere, however, the war has provoked a revolution in this direction, as the vastly increased interest in business and finance indicates. It is well that it should be so, for both Canada and the United States have serious financial and industrial facts to face in the post-bellum period. Among other things, it is imperative that we be able to strike a just balance between assets and liabilities arising out of the struggle, and get a keener appreciation and understanding of the essential nature of wealth.

Canadian census statistics, up to the period when Mr. Coats took over the work of the Census Bureau, were not dependable, to say the least; and we therefore cannot discover in them even a fairly reliable guide as to Canada's increase in wealth during the past decade—although it has been computed in the hundreds of millions of dollars. A recent estimate of the national wealth of the United Kingdom places it at one hundred and twenty billions of dollars; while the United States census of 1912 calculated that the wealth of the Republic stood at not less than one hundred and eighty-seven billions. Sir Thomas White, in a recent statement to the public, gave it as his judgment that Canada's expenditures on war account were more than balanced by increases in the nation's wealth effected by production and thrift. As our net national debt now amounts to 1,200 million dollars and our gross debt to something like 1,900 million dollars, it is certainly desirable that we know as concretely as possible just how the country stands with respect to wealth accretion.

Manifestly there is something wrong with the usual estimates of wealth increase, whether these estimates are made by government or other financial experts. It is clear as daylight that the only real wealth increase is one that affects the economic status of the individual, and that gives him increased control over want-satisfying goods. If the estimate of the United States census for 1912 be taken, for example, it would be found that the wealth of the Republic had increased in 1900-1912 by 99 billion dollars, and that the average wealth of each American family would amount to $10,000. Whether the gross estimate be dependable or not, it is evident that, although the United States is the richest country in the world, there is no such average family well-being. That in itself would lead one to suspect the soundness of the statistical method followed, and the statistical results achieved.

It is certain that a great part of the so-called increase in wealth, both in the Dominion and in the United States, has come from a mere re-valuation of property. This is as significant as though we had changed our measure of distance, calling the half mile a mile, thus doubling the distance between Toronto and Montreal. No matter how the figures were altered, the real distance would remain the same. And thus it is with all wealth of a speculative nature. A scarcity value placed upon lands, or houses or any other property, certainly does not multiply the amount of such property in existence, whatever the difference may be as expressed in terms of dollars.

Since the outbreak of war there has been a significant change in the relation between the standard of value, gold, and goods. As everyone is aware, the purchasing power of the gold dollar has diminished, until the point has been reached where it takes practically two dollars to secure the same quality and amount of goods as before the war. We are not here so much concerned with explaining the causes of this phenomenon as with making the fact clear that there has been a tremendous shifting of values in the last four years, due to depreciation of gold, and resulting in an apparent increase in wealth—an increase which is about as real as a mirage. As already remarked, the only valid increase in wealth, the only increase that counts, is an increase in the power of the individual over goods that minister to the satisfaction of human wants.

It is evident that, in these statistical estimations and wealth surveys, no attempt has been made to differentiate between private and social wealth—two entirely different things in all essentials. Society, the community at large, may be said to have progressed in wealth when it has increased the sum total of material goods; or when it has extended its power over environment. The man, or group of men, who succeed in cornering the supply of any essential commodity vastly increase their own wealth, through the speculative value given to the product, but they have not thereby added one whit to the real wealth of the community. It is plain as a pikestaff, therefore, that combines and mergers that are formed merely to restrict the output, and hence raise the prices of goods—however much they may enrich those immediately concerned—are a real menace to the economic well-being of the nation.

Bank Deposits and Stock Levels Not Always Reliable

Canada has indeed made wonderful strides in real wealth production, in the true meaning of that term, since the outbreak of the war. This is evidenced by many facts, among others by the great increase in time and demand deposits in the chartered banks. And yet, it should not be overlooked that much of this increase in wealth is also more apparent than real. Many of these deposits are merely the reverse of the loans that have been granted to business men by the banks; loans that have been left in the shape of deposits against which cheques may be drawn. It is obvious that a vast extension of credit has been made by the banks of the country to trading and manufacturing interests; and that this credit has almost to the same degree made itself felt by increased deposits at the banks. Surely no one can call deposit increases of this nature a real increase of wealth.

It must not be supposed, however, that a change in speculative values has no bearing upon the prosperity of the community or of the nation at large. At the outbreak of war, it will be recalled, there was a sharp and heavy decline in the speculative values of stocks and bonds, and of real estate,—a decline which wrought havoc to the business interests of the whole nation. It goes without saying that as far as legitimate business is concerned steady prices are essential to the proper functioning of the economic organization, and that they have an important bearing upon permanent prosperity. When President Cleveland sent his belligerent note to the government of the United Kingdom, at the time of the Venezuela crisis, there was a fall in values of over one billion dollars on the New York Stock Exchange; and while it may be thought that this meant no real loss in wealth—since it affected certificates of wealth and not actual property itself—yet the reaction upon the business life of the nation made itself felt in the slowing down of industry, the waste of productive power, and a diminution in the supply of goods placed upon the market.

Speculation Has Strong Hold on West.

Enough has been said to indicate that statistical comparations of the wealth of a nation are of very little value unless properly interpreted. In the decade immediately preceding the war, Canada experienced a boom in real estate both East and West, which in some measure, is now being duplicated in Western Canadian farm lands. For two years before the outbreak of hostilities speculative values in urban real estate were falling everywhere in Canada; and the shock of war wiped out most of these fictitious values. While those immediately concerned suffered loss, it cannot be affirmed that the people at large were any poorer as a result of this process of liquidation. The land was still there, and the buildings were there. No one can seriously maintain that an army of real estate speculators, swapping city lots to one another or to innocent outsiders, were in any sense adding to the wealth of the community. Indeed, Western business men who have discussed this matter with the writer have expressed the hope that boom days in real estate speculation will never return. The country has certainly gained vastly through the elimination of real estate speculation and the turning of this wasted effort to the actual production of wealth. It is as easy to create solid and permanent prosperity by pyramiding speculative values as it is to rise from purgatory to paradise by tugging at one's bootstraps. Paper wealth is not real wealth.

Unfortunately, there is a tendency in the prairie provinces to-day to carry on this process in farm lands. The price of land has advanced rapidly, and present owners who sell stand to gain. It must not be forgotten, however, that high-priced land raises the cost of production; and that for years to come the burden of interest on speculative values must function as a cost in placing the products of the land upon the market. Those who secure land on this speculative basis will lose in two ways: First, by the enhanced cost of production; and second, by the decline in prices that is expected to come in due course after the war. From the national point of view, speculation in farm lands carries with it a double menace to the country: It diverts attention from productive effort and concentrates it upon the speculative interest; and it tends to break up community life. There is nothing worse for a farming community, either from the point of view of its social or of economic development, than to have a succession of occupiers of the same land.

Canada's Progress During the Part Few Years.

The increase in Canada's national wealth, therefore, may have come from one or other of the following sources: An actual increase in the output of goods; a saving of capital; a better utilization and organization of wealth; an increase in the output of gold or of paper money; changed capitalization based upon higher interest rates; or from legal or natural monopolies. It is clear, from what has been said, that not all of these factors have brought about a real or permanent increase of wealth. Insofar as the nation has perfected its industrial organization, has turned out material goods, has eliminated labor waste, has more efficiently co-ordinated labor and capital, material and valuable progress has been made. And it must be said that great strides have been taken in that direction.

The war has inflicted untold misery and suffering, and has imposed inconceivable sacrifices upon the Canadian people. But the war has also taught us much, and brought us much, that otherwise would not have been secured. It has taught us the great lesson of thrift, for notwithstanding certain instances of conspicuous expenditure and extravagance, the people as a whole have learned something of the benefits of saving. It has made us intolerant of idle labor and waste, and has thrown new light upon the problem of unemployment. And, in spite of superficial disagreements between labor and capital, it is probable that both these great and essential forces in our life are being brought into a harmony never before known. Labor is learning the lesson of efficiency, and the meaning of loyalty to the business whence it derives its income; and employers are making real efforts to make labor worth more, not only to themselves, but to the worker as well. And above all, Canada has learned the hard but extremely valuable lesson that true prosperity is to be found only in productive effort, and not in the mere manipulation of speculative values.

By foregoing their fixed assessment this year 13 local factories have considerably augmented the city of Brantford's revenue. They have agreed to do so until the end of the war, on the understanding that the exemptions will run their full term after the war.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian General Electric Company.—The regular quarterly dividend of 2 per cent. on the company's common stock, and the regular half-yearly dividend of 3½ per cent. on the preferred stock, have been declared, both payable October 1 to stock of record September 14.

Schumacher Mining Company.—The directorate of the company expect to hold the annual meeting of the shareholders about the middle of September. It is understood that the annual report will show a deficit for the year's operations. The mine has been closed down for the past six weeks, owing to the high cost of operating.

Twin City Rapid Transit Company.—Gross revenues of the company for July, 1918, amounted to $816,958, compared with $858,177 for July last year. After deducting $599,975 for operating expenses, and $164,987 for fixed charges and taxes, the net income stood at $91,994, compared with $139.899 last year, a decrease of 34¼ per cent. The net income for the seven months ended July 31st, amounted to $485.906.

Porto Rico Railways Company, Limited.—The following is a comparative statement of the earnings of the company for July, 1918, and for seven months ended July 31st, 1918:—

	1917.	1918.	Increase.
For July—			
Gross	$ 77,905.30	$ 87,256.99	$ 2,464.59
Net	37,845.14	41,235.10	1,306.39
For seven months—			
Gross	522,885.35	594,003.59	71,118.24
Net	234,901.90	271,365.02	36,463.12

Lackawanna Steel Company.—Net profits of the company for the first half of 1918. after deducting charges and depreciation, but before deducting federal taxes, amounted to $12,559.291. Earnings for the third quarter are being maintained on about the average of the first half. Estimating operating earnings, less charges, etc., at $25,000,000 for the full year, the company will have left for distribution to its stockholdersers $25.50 a share, after paying a war tax as proposed by the house ways and means committee, plus income taxes of 12 per cent. on distributed and 18 per cent. on undistributed income.

Southern Canada Power Company, Limited.—The earnings of the company and its subsidiaries continue to increase, both in gross and in net. The gross for July was $41,265.01 and the net $18,491.11, an increase of $7,037.32 and $4,318.43, respectively, compared with the corresponding month of 1917. The following shows the standing of the company for the ten months ending with July:—

	1918.	Increase.
Gross	$394,632.34	$69,979.93
Operating expenses and purchased power	218,818.36	43.472.65
Net earnings	$175,813.98	$26,507.28

Russell Motor Car Company.—The annual report of the Russell Motor Car Company for the 12 months ended July 31st, will show another successful year's business. The profits were about $600,000. Last year they were $643,590. Provision has been made for depreciation, renewals, etc. This is about 30 per cent. on the capital stock of $2,000,000. The 7 per cent. dividend on the $1,200,000 of preferred stock required $84,000 and 7 per cent. on the $800,000 common will require $56,000. After paying these dividends a balance of $460,000 would remain, which, together with the amount carried forward from last year, would make a surplus of over $500,000. The company recently had some $20,000,000 of unfilled orders on its books, so that ample business for some time to come is assured.

Hudson's Bay Company.—The annual report of the company for the fiscal year ended May 31st, indicates that the net receipts of the company from the sale of land in the year were the largest with two exceptions in the history of the concern. The net land receipts for the year were £367,841. In the first year after the war the net receipts were only £2,697. The next year they increased to £24,652, and last year the report showed £140,777. The price per acre was slightly higher this year, being approximately $18. The retail stores, etc., of the company did much better, even allowing for the increased taxation. These profits amounted to £315,964, about a million and a half dollars. Dividends paid by the company for the year amounted to £400,000, about $2,000,000. This is at the rate of 40 per cent. on the common stock. Last year 30 per cent. was paid. One-half of these dividends are tax free as they are from the sale of land. The company has still over three million acres of land.

Consolidated Mining and Smelting Company.—The company makes the following statement of ore receipts at Trail Smelter, from August 1st to August 7th, 1918, inclusive, and from October 1st, 1917, to date (in tons), as follows:—

Company's mines.	Week.	Year to date.
Centre Star	434	45,839
Le Roi	....	54,249
Sullivan	....	65,691
St. Eugene	70	1.046
Emma	400	25,871
Lucky Thought	....	516
Molly Gibson	....	1,422
Highland	....	616
Ottawa	....	77
No. One	....	5.086
Richmond Eureka	....	36
Other mines	2,290	72,850
Total	3,194	273.299

Montreal Light, Heat and Power Company.—July figures for the company indicate that earnings for that month advanced more rapidly than during the two preceding months of the quarter. The gross earnings for the first quarter of the new fiscal year reached new high levels at $2,567,089. The following table shows the earnings with comparisons:—

	1918.	1917.	Increase.
July gross	$ 842,728	$ 750,289	$ 92,439
Operating expenses	415,385	350,528	64.857
Net	$ 427,342	$ 399,760	$ 27,582
Charges	83,325	82,788	537
Surplus	$ 344.017	$ 316,971	$527,046
Three months' gross	2,567,059	2,299,878	267,161
Operating expenses	1,260,172	1,060,697	199.475
Net	$1,306,867	$1,239,180	$ 66,687
Charges	249,110	249.392	*282
Surplus	$1,057,756	$ 989,788	$ 67.968

*Decrease.

Canada Bread Company, Limited.—The total active assets of the company at the end of June, when the fiscal year of the company closed, was $420,958. While this is $85,701 below the figures of the previous year, the current liabilities, on the other hand, showed a decline of $108,018. The proportion of the current liabilities to the active assets is a little less than 23 per cent., compared with over 40 per cent. at the end of the fiscal period of 1917. The surplus and reserve stands at $507,923, compared with $436,030 last year. The balance of the profit and loss account was $153.523, compared with $147,755. While the amount of cash in banks on current account was $380,803, compared with $550.701 the year before, this reduction is accounted for by the fact that the liabilities to creditors have been reduced by the sum of $102,986, due to the fact that the company is now paying cash for most of its raw materials. The company purchased during the year Victory Loan bonds to the amount of $100,000, which is a further explanation of the reduction in bank deposits. It is evident by the above figures that the general finances of the company are even in a stronger position than at the close of the previous year.

In the outstanding bonds of the company the management was able to secure a reduction of the sum of $36.703. The reserve for depreciation was increased by $50,000 to $250,000. The interest earned from bank balances and war loans was raised from $6,729 to $20,436. The manufacturing profits for the year were $205.771, compared with $199,105 for the year before. Besides paying its regular dividend of 7 per cent. on the preferred stock of $1,250,000, the company paid 2 per cent. on its $2,500,000 of common.

FIRES IN DWELLING HOUSES*

Temporary Absence of Occupants Has Frequently Resulted in Fire Loss—Remedies Suggested

BY E. P. HEATON,
Provincial Fire Marshal for Ontario.

Let me make clear the exact scope of the inquiry. It has nothing to do with fires in vacant or unoccupied dwellings.

During last winter scarcely a day passed in which the daily press throughout Ontario did not record some such incident as this: "Last night the home of ...... at ...... was burnt to the ground at about 9.15. Sad to relate two children, who were sleeping on the upper floor were burnt to death. ...... is overseas with the C.E.F., and it appears that Mrs. ...., after putting the children to bed, filled the stove with Jack Pine, and went to the picture show," etc. This is typical of very many instances on record and which, from my own knowledge, many of you have had brought under your own immediate experience locally.

It will be quite easy for you to fill in, in your own minds, a dozen or more variations of the details. For example: Aged parents may have been left in the house or, indeed, no one may have been left. In place of the filling up of the stove you may readily imagine the kerosene lamp, and while I have used the illustration of a woman going to a picture show, the occupants may have gone out visiting—they may have gone to buy supplies for the household—they may even have gone to church, but I am only using a typical instance to indicate the special cause of fire loss that has been under my observation.

It has been very difficult to get any actual reliable data, and I concluded that a letter of inquiry addressed to all the insurance companies licensed to do business in Ontario would probably be very helpful. In this letter, which was sent to about 150 insurance companies, I asked for a statement of the fires reported to each company during 1917 on the particular class of risk referred to, and at the same time asked for an expression of opinion as to the extent of the evil and a desirable way of checking it.

Up to July 31st, I received replies from 87 of the companies with the following result: 25 companies have sent lists of claims against them for the year 1917, showing a total number of 92, aggregating in amount $67,444.06; 41 companies report no claims, so far as they can trace, from the cause in the year 1917; 21 companies replied that they were unable to abstract the information from their loss records.

The statistical information furnished is practically, therefore, of no value, but it is reasonable to infer that if only one sixth of the companies doing business in Ontario have suffered 92 fires at a loss of sixty-seven thousand odd dollars, the evil is of a sufficiently marked extent to consider how it may be dealt with and checked, and after all this is the main purpose I have had in directing the inquiries referred to.

Analysing the suggestions made by the insurance companies in their letters in reply to my inquiry, I find they centre around three different solutions:—

1st.—Educational, in the words of one company as follows: "Remedy to be found in educating the public to the danger of the practice of leaving open lights or fires during the temporary absence of the occupants."

2nd.—Financial, as expressed by one company in the following words: "That every policy issued should contain a condition limiting recovery of the amount of the loss in the circumstances dealt with to 75 per cent. thereof, but in no case exceeding 75 per cent. of the policy." Or again, as illustrated by another company in these words: "The statutory conditions should be amended so as to provide that fires from this cause and in the circumstances dealt with should void the policy."

3rd.—Punitive, as expressed by another company in these words: "Fires from preventable causes and particularly when they are due to gross negligence on the part of the assured (or occupant) should be treated as a crime against society and punished as such." I may say in passing that the last feature, advocating punishment for the offence, is expressed by many in almost identical language.

Upon careful consideration I am personally of the opinion that the offence is not one calling for punishment. We must be careful to get a true perspective of the situation, and in order that this may be done it is necessary to consider the domestic conditions of the vast majority of the people in the smaller towns and in rural communities. Is it reasonable to expect that the home should be guarded at all times, day and night, when a fire is left in the stove, grate or furnace, or when a light is left burning? We might differentiate when the temporary inoccupancy is caused by a desire for pleasure only, but it is impossible to think that in the majority of cases the absence of the adult occupant or occupants is due to frivolity rather than to other reasons of a more sensible and urgent character.

Finally, I believe the question now under discussion to be indicative of the mental attitude and indifference of our people, and that no actual legislative remedy can be applied. A persistent campaign of moral education must lie at the root of and form the corrective basis of this and every other feature of our fire waste.

---

*An address delivered before the Dominion Fire Chiefs' Convention, Toronto.

DOMINION FIRE CHIEFS' CONVENTION

Fire Department Heads From All Over Canada Discuss Problems of Fire Prevention

The tenth annual convention of the Dominion Association of Fire Chiefs was held in Toronto on August 27th, 28th, 29th and 30th. The active members of the association are chiefs and ex-chiefs of fire departments in Canada, and other officers. There are also associate members, who are mostly interested in the manufacture of fire-fighting apparatus, heads of industrial plants and insurance men.

The convention opened at 9 o'clock on Tuesday, in the Exhibition Grounds, with Chief James Corbett, president, in the chair. The Mayor of Toronto, Mr. T. L. Church, delivered an address of welcome, which was replied to by Chief E. F. Earl, of Milton, Ontario. A number of committees were appointed, and other routine business transacted. At noon a photograph was taken.

At the sessions held in the afternoon and evening, the principal business of the convention was commenced. Various topics were discussed until the convention closed on Friday. This programme was varied, however, by demonstrations and testings of exhibits, and a visit to the plant of the Gutta Percha and Rubber Company. On Wednesday evening the members were the guests of the American LaFrance Fire Engine Company of Canada, the Consolidated Rubber Companies, the Dunlop Tire and Rubber Goods Company, the Goodyear Tire and Rubber Company, and the Gutta Percha and Rubber Company.

The convention closed on the 30th inst., at noon, but in the afternoon many of the members visited the Provincial Parliament Buildings, where a provincial fire prevention congress was being held.

Topics Discussed.

Among the more important subjects discussed at the convention were those of fire fighting apparatus, devices for the prevention of fires, and provincial legislation. Chief T. E. Heath, of Saskatoon, Sask., read an address on the "Monetary Saving by the Installation of Sprinkler Systems in Commercial and Mercantile Risks." The proper size of motor pumping apparatus, for different sized municipalities, was also discussed. Chief J. W. Graham, of Ottawa, spoke on "Compulsory Protection of Hospitals and Similar Institutions, by Legislative Enactment, or Government Regulations." Mr. A. F. Fisher, provincial fire commissioner for Saskatchewan, who was unable to be present, sent an address describing the operation of the Saskatchewan Fire Prevention Act.

Chief James Corbett, president, discussed sprinkler protection for basements, and gave an address on "Fire Walls, Fire Doors, Fire Escapes, and Prepared Wall and Ceiling Boards." Chief W. J. Early, of St. Catharines, Ontario, also spoke on the same subject. Mr. E. P. Heaton, provincial fire marshal of Ontario, introduced a discussion of the criminal practice of parents and other adult persons of leaving small and helpless children in homes while they are absent on business or pleasure. The adjustment of fire losses by insurance adjusters was discussed by Chief James Smart, of Calgary.

THE FUTURE OF PRICES

In discussions as to the course of industry after the war, it is generally assumed that prices will fall again to "normal." This assumption is, however, not entirely justified. There is really no such thing as "normal" price. What is meant is, of course, the price levels existing in 1914. These represent a considerable change as compared with prices of preceding years, and it would be an extraordinary thing if prices should again decline to anything which could be referred to as "normal" as compared with the prices existing at the beginning of the war.

From one point of view the whole future, not only of manufactures, but also of other phases of economic life, such as the wage scale and the value of real estate, resolves itself into a question of prices. The phenomenal rise which has taken place during the war years has been due to a number of causes, including scarcity of labor, unusual requirements on the part of governments and of industries working for the government, and disturbances to industry directly resulting from the war, such as shipping losses. Some of these, it will be seen, will disappear upon the return of peace while others will remain more or less permanently. Generally speaking, the factors on the demand side which have been influential in the rise in prices will cease. On the side of supply, it may reasonably be expected that an ample labor force will again be available. The large volume of shipping now being created will probably replace all the damage by a large margin, but some of the inroads upon industry will not be repaired for many years to come. For instance, the conversion of industrial plants into the munitions business and their reconversion into peace activity will add an element of capital expense.

Rising prices did not commence with 1914. As a matter of fact, a period of rising prices was almost concluding at the time and probably would have done so had not extraordinary conditions not only extended the period but also accentuated the movement. During the past hundred years and more there has been an alternate rise and fall of prices during every period of about 21 years. The year 1896 was the end of a period of falling prices and from that time up to the present, the movement has been consistently upwards. The year 1914 was the eighteenth of this period and if previous experience had been repeated a decline would have set in at this time. War conditions, however, were sufficiently abnormal to disturb entirely the ordinary course of economic events. These fluctuations in price levels are usually attributed to a large extent to the relation of the supply of gold to the demand. This is represented by a valuation of gold, expressed in terms of other commodities, and when the supply is not equal to the requirements, prices naturally fall. A large production of gold, on the other hand, brings about a rise in prices which tends to restrict the production of gold by increasing its cost. It is significant, therefore, that gold production has declined rapidly of late and there is every evidence of it continuing to do so, as profits have been greatly reduced.

There is no indication as yet of general declining prices. In the cases of some commodities, however, the upward movement has been slower during the past few months. The "Economist" gives figures showing an actual decline in the price of cereals and meats in 1918 as compared with 1917. General price levels show an advance over last year but not as great as the advances represented by 1915, 1916 and 1917. It is not likely that prices will commence to decline until the end of the war, although as soon as peace is in sight they may fall in the case of some commodities, as a result of a decline in demand being anticipated. If, on the other hand, the war be followed by a period of fairly normal activity, there is no reason whatever to look for prices to fall to their level of 1914, and although they probably will decline to some extent, they may stop at a level much above the level of that year.

SONS OF ENGLAND BENEFIT SOCIETY

That some fraternal insurance in Canada has not been conducted on a sound basis has become increasingly evident during the past few years. A recent statement of Mr. M. A. Mackenzie, who has examined the condition of the Sons of England Benefit Society, reveals the somewhat deplorable state in which that institution finds itself. Mr. Mackenzie certifies that having valued the list of certificates of life insurance in force at December 31st, 1917, he finds that the mid-year liability under all certificates in force was $1,738,900. The value of the future net contributions to be made under the same certificates was $865,300, and the funds amounted to $95,500. This makes a total of $960,800 of assets so that the company was 55 per cent. solvent, according to the meaning of the Ontario Insurance Act. The examiner states that he used the National Fraternal Congress table as the mortality basis of the valuation, that the interest basis taken was 4 per cent., and that the funds at the above figure are earning very little over 3 per cent.

The history of the Sons of England in the life insurance field has been similar to that of many other fraternal societies in Canada. During the early years of their organization large numbers of certificates were written upon the lives of young men and very few claims had to be met for a long time. The result was that funds were accumulating and the society appeared to be in excellent condition. Had a large volume of new business continued to come in in increasing amounts, this condition might have gone on indefinitely. However, business began to slacken and at the same time claims began to increase. It became apparent, therefore, that the original rates had not been sufficiently high to provide the necessary reserves.

An institution of this kind, like any other insurance company, should be solvent at any time, even if not a further dollar of new business were secured. This can unquestionably be said of most of the large insurance companies doing business in Canada. In the case of the private companies the earnings are invariably largely in excess of 4 per cent., and many of them calculate their reserves upon a 3 per cent. basis, which is the most conservative in use. In view of past experience, therefore, it is fortunate that fraternal life insurance is disappearing. That it is becoming less common in the case of this company at any rate is illustrated by the fact that the Sons of England secured only $18,000 of new business during 1917, while $65,500 matured and $160,750 was permitted to lapse. The consequence was that the amount in force declined from $3,834,000 to $3,619,850. Substantial losses are realized by those who see fit to allow their policies to lapse, but on the other hand, those who continue their policies know that ultimately a loss must be incurred, either in reduced beneficiary payments or through an increased premium.

THE OUTLOOK FOR WAGE EARNERS

A recent statement in Montreal of a prominent labor man, opens a question which has been anticipated but has not as yet received much serious discussion in this country. Mr. George L. Berry, general president of the International Printing Pressmen's and Assistants' Union, said that he believed that many employers already were planning to cut down wages after the war, and that workers should begin to adjust themselves in order to meet the new conditions which would arise at that time.

If there is any movement on foot such as Mr. Berry suggests, it certainly is not of a very extensive kind. Probably not for a century has there been a time in Canadian industrial history when the outlook was more uncertain than it is at present and manufacturers and other employers of labor are too busily engaged dealing with the problems of the present to make arrangements for a future period the conditions of which cannot be foreseen. The future depends upon how long the war lasts, the economic arrangements which are included in the peace terms and the internal developments which take place in our own country. In these events labor is interested just as much as is capital.
